Undergraduate Guide	9	Forest and Wildlife Ecology	157
College of Agricultural and Life Sciences	44	Forest Science, BS	157
Agricultural and Applied Economics	51	Wildlife Ecology, BS	164
Agricultural and Applied Economics, BS	52	Genetics	169
Agricultural Business Management, BS	56	Genetics and Genomics, BS	170
Business Management for Agricultural and Life Sciences, Certificate	60	Genetics in a Modern World, Certificate	176
Development Economics, Certificate	61	Life Sciences Communication	177
Agricultural and Life Sciences - College-Wide	62	Life Sciences Communication, BS	178
College of Agricultural and Life Sciences Honors	62	Science Communication, Certificate	184
Individual Major, BS	63	Nutritional Sciences	185
Animal and Dairy Sciences	66	Nutritional Sciences, BS	185
Animal and Veterinary Biosciences, BS	66	Nutritional Sciences, BS Nutrition and Dietetics	190
Animal Sciences, BS	72	Plant and Agroecosystem Sciences	195
Dairy and Food Animal Management, BS	78	Agroecology, BS	195
Dairy Science, BS	83	Agronomy, BS	201
Bacteriology	88	Horticulture, BS	207
Biology, BS (CALS)	89	Plant Science and Technology, BS	213
Biology: Evolutionary Biology	96	Plant Pathology	220
Microbiology, BS (CALS)	101	Organic Agriculture, Certificate	220
Biochemistry	108	Plant Pathology, BS	222
Biochemistry, BS (CALS)	108	Soil and Environmental Sciences	228
Biological Systems Engineering	116	Environmental Sciences, BS (CALS)	229
Biological Systems Engineering, BS	117	Environmental Soil Science, Certificate	237
Biological Systems Engineering: Food and Bioprocess Engineering	123	Soil Science, BS	239
Biological Systems Engineering: Machinery Systems Engineering	125	College of Engineering	246
Biological Systems Engineering: Natural Resources and Environmental Engineering	127	Biomedical Engineering	257
Community and Environmental Sociology	128	Biology in Engineering for Engineering Majors, Certificate	258
Community and Environmental Sociology, BS	128	Biomedical Engineering, BS	260
Food Systems, Certificate	132	Chemical and Biological Engineering	267
Entomology	134	Chemical Engineering, BS	268
Entomology, BS	135	Civil and Environmental Engineering	274
Global Health, BS	140	Architecture, Certificate	274
Global Health, Certificate	147	Civil Engineering, BS	276
Food Science	150	Civil Engineering: Construction Engineering and Management	282
Fermented Foods and Beverages, Certificate	151	Environmental Engineering, BS	283
Food Science, BS	153	Geological Engineering, BS	289
		Electrical and Computer Engineering	295
		Computer Engineering, BS	296
		Computer Engineering: Machine Learning and Data Science, BS	301

Computer Engineering: Semiconductor Engineering, BS	302	Anthropology, BA	403
Electrical Engineering, BS	303	Anthropology, BS	407
Electrical Engineering: Machine Learning and Data Science, BS	309	Archaeology, Certificate	411
Electrical Engineering: Semiconductor Engineering, BS	310	Art History	413
Engineering - College-wide	311	Art History, BA	413
College of Engineering Honors in the Liberal Arts	312	Art History, BS	420
International Engineering, Certificate	312	Art History, Certificate	426
Naval Science, BNS	313	Asian American Studies Program	429
Technical Communication, Certificate	315	Asian American Studies, Certificate	429
Industrial and Systems Engineering	318	Asian Languages and Cultures	430
Engineering Data Analytics, Certificate	318	Asian Languages and Cultures, BA	432
Industrial Engineering, BS	319	Asian Languages and Cultures: East Asian Studies	440
Six Sigma, Certificate	325	Asian Languages and Cultures: South Asian Studies	443
Materials Science and Engineering	326	Asian Languages and Cultures: Southeast Asian Studies	445
Materials Science and Engineering, BS	326	Asian Languages and Cultures, BS	446
Mechanical Engineering	330	Asian Languages and Cultures: East Asian Studies	453
Engineering Mechanics, BS	331	Asian Languages and Cultures: South Asian Studies	456
Engineering Mechanics: Aerospace Engineering	336	Asian Languages and Cultures: Southeast Asian Studies	459
Engineering Mechanics: Astronautics	339	Chinese Professional Communication, Certificate	460
Engineering Thermal Energy Systems, Certificate	341	Chinese, BA	463
Manufacturing Engineering, Certificate	342	Chinese, BS	470
Mechanical Engineering, BS	344	Japanese Professional Communication, Certificate	476
Nuclear Engineering and Engineering Physics	349	Japanese, BA	479
Engineering for Energy Sustainability, Certificate	350	Japanese, BS	484
Engineering Physics, BS	351	Astronomy	489
Nuclear Engineering Materials, Certificate	357	Astronomy-Physics, BA	489
Nuclear Engineering, BS	358	Astronomy-Physics, BS	494
Nuclear Engineering: Radiation Sciences	364	Atmospheric and Oceanic Sciences	499
College of Letters & Science	366	Atmospheric and Oceanic Sciences, BA	499
African American Studies	378	Atmospheric and Oceanic Sciences, BS	504

UNDERGRADUATE GUIDE

The Guide contains information about the many academic programs that make the University of Wisconsin-Madison one of the world's foremost institutions of higher education.

The Guide is published online only. It is not available in printed format.

The information in the Guide applies to all undergraduate students at the university regardless of their classification (school/college affiliation). Information in the individual school/college sections applies specifically to students who intend to graduate from one of those schools or colleges.

It is important for students to be familiar with all the information that applies to them. Students are strongly encouraged to consult their advisors at least once each semester to be certain they are completing requirements that apply to their degree and major programs.

The Guide is intended to complement other university information including specific materials supplied by schools, colleges, departments, and programs.

For more information about admission expectations, academic preparation, the application process, and important dates and deadlines, contact:

Office of Admission and Recruitment (<https://www.admissions.wisc.edu/>)
702 West Johnson Street, Suite 1101
Madison, WI 53715-1007
onwisconsin@admissions.wisc.edu
608-262-3961

Schedule a campus tour at VisitBucky (<https://www.admissions.wisc.edu/visitbucky/>) or call 608-262-3961.

UW-Madison summer brochures and program information are available from the Division of Continuing Studies (<http://continuingstudies.wisc.edu/>).

All students should familiarize themselves with the regulations regarding the privacy of their education records, including grades and records related to academic and nonacademic misconduct. Information about the Family Educational Rights and Privacy Act of 1974 (<https://registrar.wisc.edu/ferpa/>), as amended, is distributed during Wisconsin Welcome and is available at:

Office of the Registrar (<https://registrar.wisc.edu/>)
333 East Campus Mall #11101
Madison, WI 53715-1384

Undergraduate students will also be prompted to review this information before enrolling in courses each fall and spring term.

ACCREDITATION

The University of Wisconsin-Madison is accredited by the Higher Learning Commission (<http://www.hlcommission.org/>).

230 South Lasalle Street, Suite 7-500
Chicago, IL 60604
Telephone 1-800-621-7440

www.hlcommission.org (<http://www.hlcommission.org>)

UW-Madison, which was first accredited in 1913, was last accredited in 2019, and will go through a reaccreditation process again in 2028-29.

Student achievement data (<https://data.wisc.edu/student-achievement-data/>)

SAFE LEARNING AND WORK ENVIRONMENT

Guide to creating and maintaining a Safe Learning and Work Environment at UW-Madison: Responsibilities, Resources, and Reporting Requirements. (<https://compliance.wisc.edu/safe-learning-work-guide/>)

CONSUMER INFORMATION

UW-Madison is required by law to make available to enrolled and prospective students and their parents' certain information about its operations. Such information pertains to:

1. general institutional operation
2. financial aid
3. retention and graduation rates
4. annual security & fire report, and
5. athletic program participation rates, financial support, and graduation rates

To meet the requirement, information for the University of Wisconsin-Madison is provided on the Consumer Information webpage (<https://financialaid.wisc.edu/consumer-info/>).

DISTANCE EDUCATION AUTHORIZATION AND DISCLOSURES

UW-Madison complies with the requirements and standards set by the National Council for State Authorization Reciprocity Agreements (NC-SARA) (<https://nc-sara.org/>).

Disclosures and information related to distance education at UW-Madison is available on the Distance Education, State Authorization, and Disclosures webpage (<https://academicplanning.wisc.edu/distance-education/>).

REGISTRATION WITH MINNESOTA OFFICE OF HIGHER EDUCATION

The University of Wisconsin-Madison is a public institution registered as a "Private Institution" with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

EQUAL OPPORTUNITY, EQUAL ACCESS, AND NON-DISCRIMINATION

The University of Wisconsin-Madison is committed to providing equal opportunity and equal access in compliance with all applicable federal and

state laws and regulations and Universities of Wisconsin and university non-discrimination policies and procedures.

POLICIES & PROCEDURES

The Office of Compliance promotes ethical conduct and compliance with all applicable laws, regulations, and UW-Madison policies. UW-Madison's non-discrimination statement, contact information for the university's Equal Opportunity Investigations Administrator, Title IX Coordinator, ADA Coordinator as well as information regarding UW-Madison's Equal Opportunity Complaint process is available on the Office of Compliance's website (<https://compliance.wisc.edu/eo-complaint/>).

DISABILITY RESOURCES

The McBurney Disability Resource Center is an office within the Division of Student Affairs that views disability as an important aspect of the diversity of UW-Madison. The Center is committed to creating an accessible and inclusive educational experience for students, by partnering with students, faculty, and staff to design accessible environments and to provide academic accommodations so that students can engage, explore and participate in the Wisconsin Idea.

The Center works with UW-Madison students with physical, learning, hearing, vision, psychological, health and other disabilities substantially affecting a major life activity (e.g., walking, communicating, learning, seeing, breathing, reading, etc.). Many students have non-apparent disabilities such as depression, anxiety, autism spectrum, learning disabilities, AD/HD and health conditions such as Crohn's disease or fibromyalgia.

Common accommodations include extended time and/or small group environment for exams, note taking support, sign language interpreting, real time and media captioning, and conversion of printed materials to accessible formats. McBurney Center staff members also collaborate with students and faculty to determine reasonable flexibility with regard to attendance, participation, and deadlines for conditions that fluctuate in severity over the course of enrollment. The Center makes referrals to other campus offices or community resources for non-classroom accommodations related to housing, transportation, personal care needs, and so on. Students should contact the Center upon admission to begin the eligibility for services process. Early notice is essential in order to have accommodations in place prior to the start of the semester. For detailed information, see apply for accommodations (<https://mcburney.wisc.edu/apply-for-accommodations/>).

McBurney Disability Resource Center
702 West Johnson Street, Suite 2104
Madison, WI 53706
608-263-2741 (voice)
608-225-7956 (text)
608-265-2998 (fax)
mcburney@studentlife.wisc.edu
www.mcburney.wisc.edu (<http://www.mcburney.wisc.edu/>)

The information, policies, and rules contained herein are subject to change. The information in this catalog is current as of June 1, 2025. Later revisions are announced through department or program offices. Students are responsible for knowing current university regulations. University offices can provide current information about possible changes.

ADMISSION

ADMISSION

OFFICE OF ADMISSIONS AND RECRUITMENT

Students seeking to earn a bachelor's degree from the University of Wisconsin-Madison will apply for admission through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>). Undergraduate admission is competitive and selective; professional admissions counselors review applications using a holistic process. We focus on academic excellence, reviewing high school and college coursework (when applicable), the courses students have chosen to take, the rigor and breadth of the curriculum, and how the student has performed in their coursework. We also consider written essays, letters of recommendation, extracurricular involvement, and optional test scores.

Our review process is designed to help us identify students who are not only academically stellar but also have qualities such as leadership, concern for humanity, and achievement in the arts, athletics, and other areas. We also seek diversity in personal background and experience for potential contribution to the University of Wisconsin-Madison community.

We invite and encourage all students considering the University of Wisconsin-Madison to join us on campus for a visit (<https://apps.admissions.wisc.edu/visitbucky/>). There are many options to explore and discover what UW-Madison has in store.

Apply (<https://admissions.wisc.edu/how-do-i-apply-to-uw-madison/>)

To submit an application for admission, review the application dates and deadlines, as well as the required application materials listed on our website.

Deadlines (<https://admissions.wisc.edu/deadlines/>)

First-Year Applicants (<https://admissions.wisc.edu/apply-as-a-freshman/>)

Transfer Applicants (<https://admissions.wisc.edu/apply-as-a-transfer/>)

Reentry Applicants (<https://admissions.wisc.edu/apply-as-a-reentry-student/>)

Second Degree Applicants (<https://admissions.wisc.edu/apply-as-a-second-degree-student/>)

FIRST-YEAR STUDENTS

Competitive first-year applicants have taken advantage of the rigor offered at their high schools and have performed well in challenging courses. Beyond academic excellence, we are looking for students who demonstrate leadership, community engagement, and passion.

Students are considered first-year applicants if they have not yet completed high school (secondary-level education); have not earned a GED/HSED (but will by the time they enroll at UW-Madison); or have not enrolled in a college or university in a degree-granting program since graduating high school or earning a GED/HSED. For more information about admission requirements and expectations of first-year applicants, please see our website (<https://admissions.wisc.edu/apply-as-a-freshman/>).

TRANSFER STUDENTS

Successful transfer applicants will have a consistently high or upward grade trend; a strong cumulative grade point average; and rigorous coursework in English composition, college-level math, science, social

science, humanities, literature, and foreign language. Admission to the university does not guarantee acceptance to an intended major, which is a separate process from undergraduate admission.

Students are considered transfer applicants if they have enrolled in an accredited college or university in a degree-granting program after graduating from high school or earning a GED/HSED. Students must have 24 transferable credits earned at a college or university after high school graduation to be eligible for admission as a transfer applicant. For more information about admission requirements and expectations of transfer applicants, please see our website (<https://admissions.wisc.edu/apply-as-a-transfer/>).

Prospective transfer students can begin satisfying UW–Madison general education and degree requirements before transferring. Transfer credit (<https://registrar.wisc.edu/transfer-credit/>) is generally given for college-level courses taken at a degree-granting institution accredited by a CHEA-recognized organization (<http://chea.org/>). Courses must be similar in nature, level, and content to UW–Madison undergraduate courses and apply to a UW–Madison academic program. Students may wish to consult the UW–Madison Transfer Credit Policy (<https://www.wisconsin.edu/uw-policies/uw-system-administrative-policies/uw-system-undergraduate-transfer-policy/>) for more details.

Transfer Articulation Agreements

A transfer articulation agreement defines accepted transfer courses/credits between two institutions, promoting the successful transfer of completed coursework into UW–Madison required coursework.

UW–Madison currently participates in two transfer articulation agreements with the Wisconsin Technical College System.

1. Universal Undergraduate Credit Transfer Agreement (<https://www.wisconsin.edu/transfer/universal-transfer/>);
2. University of Wisconsin System Collaborative Nursing Program/BSN@Home Agreement (<https://uwmadison.box.com/v/BSNHome-articulation/>).

REENTERING STUDENTS

Students previously registered at UW–Madison in an undergraduate degree program who wish to resume undergraduate study after an absence of a semester or more are considered reentry students. Reentry students must file an application for readmission but are not subject to the application fee.

To guarantee an early enrollment appointment time, reentry students should submit the complete application by March 1 for the summer or fall term or by November 1 for the spring term. In addition to submitting an application (<https://admissions.wisc.edu/apply-as-a-reentry-student/>), reentry applicants must submit official transcripts for any work completed elsewhere since last enrolled at UW–Madison, a list of courses in progress (if applicable), and an academic action from the dean's office if they are in "dropped" or "must obtain permission to continue" status.

SECOND DEGREE STUDENTS

Students who previously completed a bachelor's degree at the University of Wisconsin–Madison or another institution and are interested in pursuing a second bachelor's degree are considered a second degree student.

Not all programs are able to accept second degree students. Please be sure to review the school and college-specific requirements (<https://admissions.wisc.edu/apply-as-a-second-degree-student/>) to determine if the program you are interested in accepts second degree applicants.

All second degree applicants will receive an initial eligibility review to determine if they are considered a second degree-seeking student based on official college transcripts or academic record (for UW–Madison students).

For more information about admission requirements and expectations of second degree applicants, please see our website (<https://admissions.wisc.edu/apply-as-a-second-degree-student/>).

NONDEGREE UNIVERSITY SPECIAL AND GUEST STUDENTS

Undergraduate students visiting from other universities or recent UW–Madison graduates may desire to enroll at UW–Madison as nondegree University Special and Guest students. Contact the Division of Continuing Studies, Adult Career and Special Student Services (<https://continuingstudies.wisc.edu/>).

21 North Park Street
Madison, WI 53715

PLACEMENT TESTS AND CREDIT BY EXAM

PLACEMENT TESTS AND CREDIT BY EXAM

PLACEMENT TESTS

This is a summary of the Placement by UW System or Departmental Test policy. Click here (<https://policy.wisc.edu/library/UW-1014/>) to view the official policy in its entirety in the UW–Madison Policy Library.

Each student comes to UW–Madison with a unique set of skills and academic preparation. To assess where each student stands in beginning to meet their General Education Requirements (p. 33), placement tests provide academic advisors with the tools to help determine in which courses students should enroll. Placement tests are required of all incoming first-year and some transfer students. Transfer students may be exempt from placement testing based on their transfer credit. Other exams such as ACT, SAT, SAT II, TOEFL, Advanced Placement (AP), International Baccalaureate (IB), etc. do not satisfy the requirement of placement tests, however, scores on these exams may assist in appropriate course enrollment advising.

UW System Placement tests are developed by faculty and instructional staff from various UW System campuses and led by Testing and Evaluation Services (<https://testing.wisc.edu/>) (T&E). T&E conducts studies to support the development of these tests and effectively uses the results to place incoming students into appropriate levels of English, math, Spanish, French and German. Outlined below are the situations typical for requiring placement tests.

LANGUAGE PLACEMENT TESTS

A first-year student with previous experience in French, German, or Spanish or a transfer student without transfer credit in the language who plans to enroll in one or more of these languages must take a placement test to qualify for enrollment in courses beyond the entry level language course. If you are interested in taking a course in another language, see the available Departmental Placement Exams below (p. 13). Previous

experience may include native speakers and those who have previous coursework in the language.

French

Score	Placement Into
0-149	Consult with French Advisor
150-385	FRENCH 101 (First Semester French)
386-475	FRENCH 102 (Second Semester French)
476-560	FRENCH 203 (Third Semester French)
561-715	FRENCH 204 (Fourth Semester French)
716-800	FRENCH 228 (Intermediate Language and Culture)
801-850	Consult with French Advisor

German

Score	Placement Into
150-406	GERMAN 101 (First Semester German)
407-466	GERMAN 102 (Second Semester German)
467-536	GERMAN 203 (Third Semester German)
537-616	GERMAN 204 (Fourth Semester German)
617-850	GERMAN 249 (Intermediate German - Speaking and Listening), GERMAN 258 (Intermediate German-Reading), GERMAN 262 (Intermediate German-Writing), or GERMAN 285 (Intermediate Intensive (Honors) German: Language, Culture, Texts)

Note: If your score is between 0-149 or 851-999, please consult the German advisor. These scores are not valid, and something was entered incorrectly on your record.

Spanish

Score	Placement Into
150-420	SPANISH 101 (First Semester Spanish)
421-540	SPANISH 102 (Second Semester Spanish)
541-639	SPANISH 203 (Third Semester Spanish)
640-742	SPANISH 204 (Fourth Semester Spanish)
743-849	SPANISH 226 (Intermediate Language Practice with Emphasis on Writing and Grammar)
850	SPANISH 226 (Intermediate Language Practice with Emphasis on Writing and Grammar), or SPANISH 311 (Advanced Language Practice)

Note: If your score is between 0-149 or 851-999, please consult the Spanish advisor. These scores are not valid, and something was entered incorrectly on your record.

MATH PLACEMENT TEST

This test is required for students admitted to undergraduate degree granting programs who is:

- Admitted as a first-year student; or
- Admitted as a transfer student and (one of the following):
 - Has not previously completed the UW System math placement test (Math B if taken after March 2023).
 - Does not have credit for the UW-Madison direct equivalent of MATH 96, MATH 112, MATH 114, MATH 171, MATH 211, MATH 217, MATH 221, MATH 222, or MATH 234.

It is assumed that a transfer student with one of the direct equivalent MATH courses in progress at the time of admission will successfully

complete the course, and will not be required to take the placement test. If the student does not complete or pass the course, the student may be required to take the placement test to demonstrate minimum math proficiency.

Notes:

- To ensure timely completion of the undergraduate degree, students must demonstrate minimum math proficiency before they can enroll in a Quantitative Reasoning Part A course. They should complete Part A of the Quantitative Reasoning requirement by the end of their first year, and must complete Part A before they enroll in Part B.
- Satisfaction of Quantitative Reasoning A from a math course that is transferred in does not automatically exempt students from the UW System math placement test.
- MATH 101 equivalents will be reviewed by the math department.

Math Placement Exam Matrix

For more detailed information on math course sequencing and placement, please see the information available on the Math Department website (<https://math.wisc.edu/undergraduate/placement/new-student/>). Students should discuss course selection based on math placement test scores with an advisor if they have any questions.

MFUND	AALG	TAG	Math Course Options	General Education
150-355	150-850	150-850	• MATH 96	
356-465	150-850	150-850	• MATH 96 • MATH 141	
466-850	150-485	150-555	• MATH 112	
466-850	150-485	556-850	• MATH 112 • MATH 114

466-850	486-535	556-850	• MATH 112 Quantitative • MATH 114 Reasoning A satisfied	
466-850	536-850	150-155	• MATH 113 Quantitative • MATH 114 Reasoning A satisfied • MATH 211	
466-850	536-850	556-820	• MATH 211 Quantitative • MATH 221 Reasoning A satisfied	

ENGLISH PLACEMENT TESTS

There are two tests used to determine the placement of a student into courses focused on the development of skills needed for success in college-level communications:

- UW English Placement Test (UWEPT)
- UW-Madison English as a Second Language Assessment Test (MSNESLAT)

UW English Placement Test (UWEPT)

This test is required for a student admitted to undergraduate degree-granting programs who is (one of the following):

1. Admitted as a first-year student and is not required to take the MSNESLAT (see next section); or
2. Admitted as transfer student and is not required to take the MSNESLAT (see next section), and
 - a. Has not previously completed the UW System English placement test.
 - b. Has not earned credit for the UW-Madison equivalent of a Communication A (p. 34) course.

English

Score	Placement Into
001-604	Must take Communication A course
605-850	Communication A requirement satisfied

Note: If your score is 0 or between 851-999, please consult your advisor. These scores are not valid, and something was entered incorrectly on your record.

UW-Madison English as a Second Language Assessment Test (MSNESLAT)

This test is required for an undergraduate student who must submit a Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or Duolingo English Test (DET) score for admission to UW-Madison.

First-year applicants educated in non-English speaking countries must submit an official TOEFL, IELTS, or DET score, unless English was the primary language of instruction in all four years of secondary school. Transfer applicants may have the test waived if English was the primary language of instruction in all four years of secondary school or a college-level English composition course was successfully completed at an accredited U.S. institution. This requirement will not be waived for Advanced Placement, International Baccalaureate, or A-level scores.

The MSNESLAT is designed to evaluate English language proficiency, and to place a student into English as a Second Language courses that focus on written and spoken English used in academic contexts. A student who takes the MSNESLAT and obtains a score of less than 99 (Exempt) must satisfy the university's expectation of college-level English language proficiency by completing ESL 118 Academic Writing II.

English as a Second Language (ESL)

Score	Placement Into
99	Exempt from ESL 118 and Communication A satisfied
110	ESL 110 (Intensive English as a Second Language)
114	ESL 114 (Intermediate English Language Skills)
115	ESL 115 (Grammar for Academic Use)
116	ESL 116 (Academic Reading and Vocabulary Skills)
117	ESL 117 (Academic Writing I)
118	ESL 118 (Academic Writing II)

Note: If your score is between 1-98 or 119-999, please consult your advisor. These scores are not valid, and something was entered incorrectly on your record.

DEPARTMENTAL PLACEMENT TESTS

Academic units that offer a sequence of courses may choose to propose and offer a placement test to determine which course in the sequence is an appropriate starting point for an individual student.

Chinese

Score	Placement Into
10	ASIALANG 101 (First Semester Chinese)
20	ASIALANG 111 (Elementary Chinese II)
30	ASIALANG 102 (Second Semester Chinese)
40	ASIALANG 201 (Third Semester Chinese)
50	ASIALANG 202 (Fourth Semester Chinese)
60	ASIALANG 301 (Fifth Semester Chinese)
70	ASIALANG 302 (Sixth Semester Chinese)

Computer Sciences

Score	Placement Into
10	COMP SCI 200 (Programming I)

50	ASIALANG 234 (Fourth Semester Hindi)
60	ASIALANG 333 (Fifth Semester Hindi)
70	ASIALANG 334 (Sixth Semester Hindi)

Hmong

Score	Placement Into
10	ASIALANG 125 (First Semester Hmong)
30	ASIALANG 126 (Second Semester Hmong)
40	ASIALANG 225 (Third Semester Hmong)
50	ASIALANG 226 (Fourth Semester Hmong)
60	ASIALANG 325 (Fifth Semester Hmong)
70	ASIALANG 326 (Sixth Semester Hmong)

Indonesian

Score	Placement Into
10	ASIALANG 127 (First Semester Indonesian)
30	ASIALANG 128 (Second Semester Indonesian)
40	ASIALANG 227 (Third Semester Indonesian)
50	ASIALANG 228 (Fourth Semester Indonesian)
60	ASIALANG 348 (Fifth Semester Indonesian)
70	ASIALANG 328 (Sixth Semester Indonesian)
80	ASIALANG 421 (Seventh Semester Asian Language)
90	ASIALANG 422 (Eighth Semester Asian Language)

Japanese

Score	Placement Into
10	ASIALANG 103 (First Semester Japanese)
20	ASIALANG 114 (Second Semester Elementary Japanese)
30	ASIALANG 104 (Second Semester Japanese)
40	ASIALANG 203 (Third Semester Japanese)
50	ASIALANG 204 (Fourth Semester Japanese)
60	ASIALANG 303 (Fifth Semester Japanese)
70	ASIALANG 304 (Sixth Semester Japanese)

Korean

Score	Placement Into
10	ASIALANG 105 (First Semester Korean)
30	ASIALANG 106 (Second Semester Korean)
40	ASIALANG 205 (Third Semester Korean)
50	ASIALANG 206 (Fourth Semester Korean)
60	ASIALANG 305 (Fifth Semester Korean)
70	ASIALANG 306 (Sixth Semester Korean)
80	ASIALANG 405 (Seventh Semester Korean)
90	ASIALANG 406 (Eighth Semester Korean)

Modern Hebrew

Score	Placement Into
10	HEBR-MOD 101 (First Semester Hebrew)
20	HEBR-MOD 102 (Second Semester Hebrew)
30	HEBR-MOD 201 (Third Semester Hebrew)
40	HEBR-MOD 202 (Fourth Semester Hebrew)
50	HEBR-MOD/​JEWISH 301 (Introduction to Hebrew Literature)
60	HEBR-MOD/​JEWISH 302 (Introduction to Hebrew Literature)
70	HEBR-MOD/​JEWISH 401 (Topics in Modern Hebrew / Israeli Literature and Culture I)
80	HEBR-MOD/​JEWISH 402 (Topics in Modern Hebrew / Israeli Literature and Culture II)

Piano

Score	Placement Into
10	MUS PERF 101 (Beginning Class Piano)
20	MUS PERF 102 (Beginning Class Piano)
30	MUS PERF 103 (Elementary Class Piano)
40	MUS PERF 104 (Intermediate Class Piano)

Persian

Score	Placement Into
10	ASIALANG 137 (First Semester Persian)
30	ASIALANG 138 (Second Semester Persian)
40	ASIALANG 237 (Third Semester Persian)
50	ASIALANG 238 (Fourth Semester Persian)
60	ASIALANG 337 (Fifth Semester Persian)
70	ASIALANG 338 (Sixth Semester Persian)

Thai

Score	Placement Into
10	ASIALANG 129 (First Semester Thai)
30	ASIALANG 130 (Second Semester Thai)
40	ASIALANG 229 (Third Semester Thai)
50	ASIALANG 230 (Fourth Semester Thai)
60	ASIALANG 329 (Fifth Semester Thai)
70	ASIALANG 330 (Sixth Semester Thai)

Tibetan

Score	Placement Into
10	ASIALANG 135 (First Semester Modern Tibetan)
30	ASIALANG 136 (Second Semester Modern Tibetan)
40	ASIALANG 235 (Third Semester Modern Tibetan)
50	ASIALANG 236 (Fourth Semester Modern Tibetan)
60	ASIALANG 335 (Fifth Semester Tibetan)
70	ASIALANG 336 (Sixth Semester Tibetan)

Urdu

Score	Placement Into
10	ASIALANG 139 (First Semester Urdu)
30	ASIALANG 140 (Second Semester Urdu)
40	ASIALANG 239 (Third Semester Urdu)
50	ASIALANG 240 (Fourth Semester Urdu)
60	ASIALANG 339 (Fifth Semester Urdu)
70	ASIALANG 340 (Sixth Semester Urdu)

Vietnamese

Score	Placement Into
10	ASIALANG 131 (First Semester Vietnamese)
30	ASIALANG 132 (Second Semester Vietnamese)
40	ASIALANG 231 (Third Semester Vietnamese)
50	ASIALANG 232 (Fourth Semester Vietnamese)
60	ASIALANG 331 (Fifth Semester Vietnamese)
70	ASIALANG 332 (Sixth Semester Vietnamese)
80	ASIALANG 421 (Seventh Semester Asian Language)
90	ASIALANG 422 (Eighth Semester Asian Language)

RETROACTIVE LANGUAGE CREDIT

Undergraduates at UW-Madison who have gained prior knowledge in a language other than English may be eligible to earn retrocredits. To earn these credits, students must take a language course at UW-Madison above the first-semester level in which they have some proficiency.

The course must be designated with the Foreign Language attribute of 2nd, 3rd, 4th, or 5th semester language course and must be the first course in that language taken by the student after graduating from high school. Students interested in taking one of these courses may need to take a placement test and should consult with a language advisor at SOAR.

To be eligible, students must enroll in the language course prior to earning 30-degree credits and earn a grade of B or better. While transfer credits are included in the 30 credits, credits earned by students admitted as first-year students who took college level credits while in high school are not included. Test and other credit such as AP, CLEP or retrocredits from another language are also not included.

Native speakers of a language are not eligible to earn retro credits in that language.

UW–Madison honors retro credits earned at previous UW institutions if the student enrolled in the course prior to earning 30 credits and earned a grade of B or better.

ADVANCED PLACEMENT (AP)

UW–Madison offers degree credit for Advanced Placement (<https://apcentral.collegeboard.org/courses/>) (AP) Exams. AP exams must be taken before graduation from high school or obtaining an equivalent credential. Students who receive credit for a particular course through AP and take the same course at UW–Madison will not receive degree credit twice; however, the grade in the UW–Madison course will be included in the overall grade point average.

GCE ADVANCED LEVEL (A-LEVEL)

Advanced Level examinations, or A-Levels, are a key aspect of the British education system, serving as subject-specific qualifications usually taken by students in the final two years of secondary education. These exams are highly regarded internationally for their academic rigor. Credit is earned from A-Levels exams with grades ranging from A to E. Advanced Subsidiary (AS) Levels are not eligible for credit.

The UW-Madison credit earned from A-Level exams is determined by faculty review. For A-Level exams not listed in our current table, students can seek credit evaluation. In these instances, they are advised to contact the Office of the Registrar Credit Evaluation Services (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>) to begin the faculty review process, which may lead to credit approval for these additional exams.

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)

The College-Level Examination Program (CLEP) (<https://clep.collegeboard.org/>) allows students who have gained college-level knowledge outside the classroom to take examinations for possible college credit. To qualify for credit, students achieve a minimum score of 65 and take their CLEP examination before they accumulate 16 semester credits post-graduation from high school or after obtaining an equivalent credential.

The following credits are excluded from the 16-credit limit for CLEP eligibility:

- credits earned from dual enrollment courses taken in high school.
- test credits such as those from Advanced Placement (AP), International Baccalaureate (IB) and Advanced Levels.
- Credits in-progress at the time the CLEP exam is taken.

CREDIT BY EXAM

This is a summary of the Credit by Exam policy. Click [here \(https://policy.wisc.edu/library/UW-1005/\)](https://policy.wisc.edu/library/UW-1005/) to view the official policy in its entirety in the UW-Madison Policy Library.

Students may acquire knowledge, skills, and competencies through a variety of experiences that are academic in nature but may not necessarily correspond to a setting in which UW-Madison awards traditional credit. Credit by examination is one opportunity for students to demonstrate mastery of material that is equivalent to what would be learned in a specific UW-Madison course.

Departments must propose and have approved the exams they offer. Listed below are the courses that have been approved for credit by exam.

Animal and Dairy Science

Code	Title	Credits
AN SCI/DY SCI 101	Introduction to Animal Sciences	3

For more information on how to earn credit by exam for this course, see the exam information (<https://andysci.wisc.edu/animal-science-dairy-science-101-credit-by-exam/>).

Chemistry

Code	Title	Credits
CHEM 105	General Chemistry I ¹	3
CHEM 106	General Chemistry II ²	4

For more information on how to earn credit by exam for these courses, see the exam information (<https://chem.wisc.edu/chemistry-credit-by-examination/>).

¹ CHEM 101 General Chemistry I Laboratory + CHEM 105 General Chemistry I = CHEM 103 General Chemistry I

² CHEM 102 General Chemistry II Laboratory + CHEM 106 General Chemistry II = CHEM 104 General Chemistry II

Educational Psychology

Code	Title	Credits
ED PSYCH 640	Foundations of Instructional Coaching	3

For more information on how to earn credit by exam for this course, contact Lisa Hebgen, Educational Psychology: Professional Educator (MSPE) Director, lmhebgen@wisc.edu or 608-574-0355.

Math

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 340	Elementary Matrix and Linear Algebra	3

For more information on how to earn credit by exam for these courses, see the exam information (<https://math.wisc.edu/undergraduate/creditema/>).

Social Work

Code	Title	Credits
SOC WORK 612	Psychopathology in Generalist Social Work Practice	2
SOC WORK 650	Methods of Social Work Research	3
SOC WORK 708	The Field of Social Work	2
SOC WORK 709	Social Policy	2
SOC WORK 710	Diversity, Oppression and Social Justice in Social Work	2
SOC WORK 711	Human Behavior and the Environment	2

For more information on how to earn credit by exam for these courses, see the exam information (<https://socwork.wisc.edu/students/exemptions/>).

Statistics

Code	Title	Credits
STAT 240	Data Science Modeling I	4

For more information on how to earn credit by exam for these courses, see the exam information (<https://stat.wisc.edu/stat-240-credit-by-examination/>).

ADVISING

ADVISING

At UW–Madison advising is a partnership between students and the network of advisors they build during their time here. Advising is one of the most essential resources available to students and can play a pivotal role in the college experience and beyond. Advisors can help students get

the most out of their Wisconsin Experience by helping them make well-informed decisions, sharing strategies for success, supporting them as they encounter challenges, connecting them to resources, and providing information about campus policies and procedures.

There are many reasons to see an advisor and advising is not limited to certain subjects or specific months of the year. Here are some of the many topics that advisors can help students with:

- Setting academic, career, and life goals
- Connecting a major to a career
- Creating a graduation timeline plan
- Selecting courses and fulfilling degree requirements
- Connecting with tutors
- Getting involved with campus organizations
- Practicing for job interviews
- Choosing a study abroad program
- Finding an internship
- Researching volunteer opportunities
- Understanding university policies and deadlines
- Talking about graduate school
- Proofreading resumes and cover letters

To find contact information for advisors, including the assigned advisor, see this link (<https://advising.wisc.edu/find-an-advisor/>).

SCHOOL AND COLLEGE ACADEMIC ADVISING OFFICES

UW–Madison has eight undergraduate schools and colleges. All undergraduates are assigned to an advisor in their area of academic interest, or to a Cross-College Advising Service advisor who specializes in working with students who are deciding on an academic major.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES (CALS)

Academic Affairs Office

SCHOOL OF BUSINESS (BUS)

Undergraduate Academic Advising
<https://business.wisc.edu/undergraduate/academic-advising/>

CROSS-COLLEGE ADVISING SERVICE (CCAS)

The Cross-College Advising Service (CCAS) (<https://ccas.wisc.edu/>) is a campus-wide advising office for undergraduate students who are in the process of deciding on a major and want to explore the many academic opportunities on campus. CCAS also assists students who are considering changing majors or who have not been admitted to limited-enrollment programs and are evaluating other options. CCAS advisors are knowledgeable about all the programs and majors offered by the eight undergraduate schools and colleges on campus. Each year at SOAR (Student Orientation, Advising, and Registration) (<http://soar.wisc.edu/>), over 1500 students in the entering class self-identify as "undecided/ exploring" and are assigned to CCAS advisors.

In addition to the main CCAS office in Ingraham Hall, CCAS has residence hall advising offices in Chadbourne Residential College, Witte Hall, Sellery Hall, Ogg Hall, and Dejope Hall. The Dejope office is available to all students in Lakeshore-area residence halls.

CAREER DEVELOPMENT AND PLANNING

Career Services at UW-Madison support students in discovering what success looks like after college and how to achieve it. Career advisors and career planning opportunities at UW-Madison are available to help students answer the question, "Who am I? Who do I want to become? Where am I going and how do I get there?" Career planning is a multi-year process that includes self-assessment and reflection, exploring academic and career options, gaining experience in areas of interest, and ultimately conducting a job or graduate school search.

Each school or college within UW-Madison has a dedicated career services office to support their students. There are also several career services offices available to meet with any student looking to explore their academic and career goals. Links to all of the career services offices at UW-Madison are available online at www.careers.wisc.edu (<https://www.careers.wisc.edu>).

Students can work with career services staff to discuss career interests and goals, participate in skill-building workshops, connect with alumni and employers, develop a job or internship search plan, attend a career and internship fair, and much more.

HANDSHAKE AND BIG INTERVIEW

Handshake is a free tool for all UW-Madison students and is the best way to connect with employers, find jobs and internships, and learn about career events offered by career services offices and employers. All UW-Madison students are automatically provided with a Handshake account – it can be activated by logging in using a UW-Madison NetID and password through the mobile app (<https://qrco.de/bdEvx3/>) or by visiting <https://wisc.joinhandshake.com/>.

Big Interview is another free career tool available to all UW-Madison students. With Big Interview, students can practice and improve their interviewing skills, complete lessons about job searching, negotiations, and much more. Students can access this tool by visiting <https://wisc.biginterview.com/>.

CAREER ADVISING

Students can meet with individual career advisors throughout their undergraduate experience as they explore and navigate their career plans. Career advisors can help students with a variety of areas, including:

- Exploring career and major options
- Discussing values, skills, and interests
- Receiving help with resumes and cover letters
- Searching for jobs and internships
- Connecting with alumni and employers
- Preparing and practicing for interviews
- Guidance when applying to graduate or professional school
- Considerations for job offers and negotiating

CAREER EXPLORATION CENTER (CEC)

The Career Exploration Center (CEC) (<https://cec.ccas.wisc.edu/>) supports undergraduate students who are undecided about their career and/or academic goals. They assist students in gathering information, personal insight, and experiences that help them explore their options and provide direction in planning the next steps in their career journey.

PRE-PROFESSIONAL STUDY

At UW-Madison, students interested in pursuing graduate-level health professions and law school have access to specialized Pre-Professional Advising resources. Pre-Professional Advising is made up of two co-located and highly collaborative career advising units: The Center for Pre-Health Advising and the Center for Pre-Law Advising. The units share a joint mission of helping to increase access and equity within the fields of health and law.

CENTER FOR PRE-HEALTH ADVISING

prehealth.wisc.edu (<https://prehealth.wisc.edu>)

Pre-Health—e.g., Pre-Med/DO, Pre-PA, Pre-OT, Pre-Vet MD—is not an undergraduate major, it is an intention. Students should major in areas of true interest, meet regularly with their academic advisor(s), and proactively utilize the resources offered by the Center for Pre-Health Advising (CPHA) if they are considering further schooling and careers in the following areas: medicine, dentistry, occupational therapy, physical therapy, physician assistant, public health, chiropractic, optometry,

veterinary medicine, or other graduate-level health programs. Students interested in PharmD are strongly encouraged to access advising through the UW School of Pharmacy, due to the many unique aspects of pursuing this degree.

CENTER FOR PRE-LAW ADVISING

prelaw.wisc.edu (<https://prelaw.wisc.edu>)

Pre-law is not an undergraduate major, it is an intention. Students should major in areas of true interest, meet regularly with their academic advisor(s), and proactively utilize the resources offered by the Center for Pre-Law Advising (CPLA) for support in considering, preparing for, and applying to law school.

STUDY ABROAD ADVISING SCHOOL/COLLEGE STUDY ABROAD

Several schools and colleges have their own study abroad advising locations and offer information about study abroad programs that are directly related to certain areas of study.

- College of Agricultural and Life Sciences
- School of Business
- University of Wisconsin Law School

INTERNATIONAL ACADEMIC PROGRAMS (IAP)

studyabroad.wisc.edu (<http://studyabroad.wisc.edu>)

International Academic Programs (IAP) offers more than 300 study and intern abroad programs, as well as domestic study away programs. There are programs on six continents in over 80 countries for students of all majors. Courses through IAP programs can count toward degree requirements, allowing students to stay on track for graduation. Scholarships, grants, and financial aid are available.

NON-APPROVED STUDY ABROAD

Students considering participating in a study abroad program sponsored by a university other than UW-Madison should review this page: <https://studyabroad.wisc.edu/nonapproved/> for more information.

GRADUATING IN FOUR YEARS OR FEWER

UW-Madison encourages, supports, and expects students to work with academic advisors to create, maintain, and plan a graduation timeline. Students should consult with their assigned academic advisor(s) before each enrollment period, and more as needed. Additionally, each major in the Guide includes a four-year plan to help students map out a path to graduation, with help from advisor(s).

To ensure a timely graduation, students should discuss the following topics with their advisor:

- Exploring interests while making progress on degree requirements
- Setting and achieving academic and career goals
- Academic challenges and connecting to resources that support academic success
- Procedures and requirements for declaring a major
- Using the Degree Audit Reporting System (DARS) (<https://registrar.wisc.edu/dars/>) to check progress toward the degree
- Any changes to a declared major, as well as alternative plans if applying to a competitive limited-enrollment program
- A strategic course schedule to stay on track for graduation

DEGREE AUDIT REPORTING SYSTEM (DARS)

A Degree Audit Reporting System (DARS) (<https://registrar.wisc.edu/dars/>) report is an automated summary of a student's degree progress. All schools and colleges at UW-Madison use DARS to audit the progress of most undergraduate degree programs and certificates.

DARS reports indicate which requirements are completed, which are complete with in-progress and planned courses, and which remain

unsatisfied. For most undergraduate programs, DARS is the tool used to determine completion of the program and/or eligibility to graduate.

Students can request and review their DARS via the Course Search & Enroll app. They should contact their assigned advisor(s) for help reading and interpreting their DARS report.

OFFICER EDUCATION

OFFICER EDUCATION

The Reserve Officers Training Corps (ROTC) prepares students to become commissioned officers in the U.S. Air Force, Army, Navy, or Marines, as well as for civilian careers. Students may be enrolled in ROTC while pursuing a degree at UW–Madison. ROTC courses are open to all undergraduates who have met the prerequisites. The number of ROTC credits that count toward a UW–Madison degree can vary by department and school or college. Prospective and registered students should contact the military program offices listed in this section of the catalog for information about regular course offerings, summer camp programs, and scholarships.

AIR FORCE ROTC—AEROSPACE STUDIES

The Air Force ROTC (AFROTC) program is the primary path available to enter the U.S. Air Force or U.S. Space Force as an officer. Students enroll in the AFROTC program while working toward a bachelor's degree in any major they choose. They attend an aerospace studies class each semester, a hands-on leadership laboratory, and weekly physical fitness sessions, while learning about how the Air Force and Space Force work and deciding which job fields match their interests. Upon graduating, they enter active duty service as second lieutenants, in leadership and management roles in the Air Force or Space Force.

Most career fields have an active-duty commitment of four years after college. If students choose to separate from the Air Force or Space Force at that time, they can pursue other careers with experience and the distinction of "military officer" on their resumes.

AFROTC is designed for students with three or more years remaining until graduation. To receive an officer's commission, AFROTC cadets must complete all necessary requirements for a degree as well as courses specified by the Air Force. Courses are often taken for academic credit as part of a student's electives. The amount of credit given toward a degree for AFROTC academic work is determined by the student's school or college, and major department.

Required Courses for Air Force ROTC/Aerospace Studies

General Military Course, total of 4 credit hours:

Code	Title	Credits
A F AERO 101	Heritage and Values I	1
A F AERO 102	Heritage and Values II	1
A F AERO 201	Team and Leadership Fundamentals I	1
A F AERO 202	Team and Leadership Fundamentals II (General Military Course, total of 4 credit hours:)	1

Professional Officer Course, total of 12 credit hours:

Code	Title	Credits
A F AERO 301	Leading People and Effective Communication I	3
A F AERO 302	Leading People and Effective Communication II	3
A F AERO 401	National Security Affairs	3
A F AERO 402	Leadership Responsibilities & Commissioning Preparation	3

Cadets must enroll in A F AERO 501 Leadership Laboratory I every Fall semester and A F AERO 502 Leadership Laboratory II every Spring semester, in addition to their lecture courses, for a total of 8 credit hours.

Scholarships:

Qualified students may compete for Air Force ROTC scholarships ranging from two to three years in duration. High school students can apply for a four-year scholarship during their senior year of high school. Students must be enrolled and participating in Air Force ROTC to be eligible for scholarships. Scholarships are merit based and pay up to full tuition & fees (both in and out-of-state) or room and board (capped at \$10,000/semester) but not both, \$900/semester for textbooks, and a tax fee subsistence stipend of \$300-\$500 (based on academic/AFROTC year) per month. Interested students should consult with the Recruiting Officer for more detailed information concerning the scholarship eligibility requirements.

For Participating Students:

Participating students are those who are registered in AF AERO courses but do not seek a commission. Participating students are not cadets, and the following apply:

- Must create a WINGS account; however, students are not required to complete the application for AFROTC membership. Accounts can be created here: https://wings.holmcenter.com/psp/hcp/LANDING/PORT_HCP/c/W_ROT.C.W_PTL_PREScreen.GBL
- May enroll in AFROTC classes for academic course credit only.
- Will not be issued uniforms.
- Will not be included in Detachment Commander's Ranking.
- Are ineligible to compete in any selection program.
- Cannot compete for an Enrollment Allocation (EA), contract, or commission.

All 100 and 200-level AFROTC courses are open to all students regardless of membership in the program. Students are invited to take one of the program's courses to determine if AFROTC is right for them with no obligation to join. For more information, please contact the Recruiting Officer at 608-264-0543 or 608-262-3440; afrotc@mailplus.wisc.edu.

MILITARY SCIENCE—ARMY ROTC

The Army Reserve Officers' Training Corps (ROTC) is the nation's largest leadership and management-development training program. It offers the opportunity to earn a commission as a Second Lieutenant for Active Duty, Army Reserve, or Army National Guard while pursuing an academic degree. It enables young men and women to prepare themselves to be leaders in the Army or the civilian career field of their choice. The traditional four-year Army ROTC Program is divided into a two-year Basic Course and a two-year Advanced Course. A non-contracted student

enrolled in the Basic Course does not incur a military service obligation. All Military Science classes are taught in person on campus.

Basic Course

This instruction introduces the student to fundamental military and leadership subjects. It is normally taken over four successive semesters, but may be completed in as few as two semesters. Students should discuss available options with the Scholarship & Enrollment Officer before registering for courses if they have fewer than four semesters to complete the Basic Course.

The regular curriculum consists of a lecture and lab each semester. Freshmen are encouraged to take our class and lab with no military obligation. Students can enroll in a lecture without enrolling in the lab, but cannot enroll in a lab without the corresponding lecture. Labs are intended to provide practical leadership experience and military skills training such as map reading, land navigation, field training, and rifle marksmanship. Additionally, students who start in the Aerospace Studies or Naval Science programs can switch to Military Science and continue on toward graduation with no penalty.

Code	Title	Credits
MIL SCI 101	Foundations of Officership	1
MIL SCI 110	Leadership Lab 1A	1
MIL SCI 102	Basic Leadership	1
MIL SCI 111	Leadership Lab 1B	1
MIL SCI 201	Individual Leadership Studies	2
MIL SCI 210	Leadership Lab 2A	1
MIL SCI 202	Leadership and Teamwork	2
MIL SCI 211	Leadership Lab 2B	1

Advanced Course

Students who have completed the Basic Course or an equivalency (see Two-Year Program) and have passed all enrollment eligibility criteria continue on into the Advanced Course. This course consists of the following lectures, leadership labs, a separate military history course, physical fitness training sessions, and a four-week paid leadership capstone (Advance Camp) at Fort Knox, Ky. Students normally attend Advance Camp between their junior and senior years of Military Science. During labs and physical training sessions students are provided practical leadership opportunities to prepare them for Advance Camp and their future military careers. Students must complete all components of this course to earn a commission.

Code	Title	Credits
MIL SCI 301	Leadership and Problem Solving	2
MIL SCI 310	Leadership Lab 3A	1
MIL SCI 302	Leadership and Ethics	2
MIL SCI 311	Leadership Lab 3B	1
MIL SCI 401	Leadership and Management	2
MIL SCI 410	Leadership Lab 4A	1
MIL SCI 402	Officership	2
MIL SCI 411	Leadership Lab 4B	1

History Course

Cadets are to take and pass one history course that meets the ROTC Military History requirement for commissioning:

Code	Title	Credits
Recommended course		
HISTORY 345	Military History of the United States	3-4
Alternative courses		
HISTORY 133	Global Military History (5000 BCE - Present)	3-4
HISTORY 229	Explorations in Transnational/Comparative History (Humanities)	3
HISTORY/ASIAN 319	The Vietnam Wars	3-4
HISTORY 344	The Age of the American Revolution, 1763-1789	3-4
HISTORY 357	The Second World War	3-4
HISTORY 427	The American Military Experience to 1902	3-4
HISTORY 428	The American Military Experience Since 1899	3-4
HISTORY/ASIAN 456	Pearl Harbor & Hiroshima: Japan, the US & The Crisis in Asia	3-4

Two-Year Program

Students who are veterans, members of the Army National Guard/Army Reserve, or who have participated in the Junior Reserve Officers' Training Corps Program in high school may qualify for direct entry into the Advanced Course. Students who did not complete the ROTC Basic Course (see above), to include graduate and doctoral students, but have two years of academic study remaining may be eligible to attend Basic Camp. This option compresses the Basic Course curriculum into a paid four-week summer leadership professional development course held at Fort Knox, KY prior to starting the Advanced Course. Students who believe they qualify for this program should consult with the Scholarship & Enrollment Officer for more information.

Scholarships

Qualified students may compete for Army ROTC scholarships ranging from two to three years in duration. High school students can apply for a four year scholarship during their senior year of high school. Students must be enrolled and participating in Army ROTC to be eligible for scholarships. Scholarships are merit based and pay full tuition & fees (both in and out-of-state) or room and board (capped at \$6,000/semester) but not both, \$600/semester for textbooks and laboratory expenses, and a tax fee subsistence stipend of \$420 for each month of the regular school year. Interested students should consult with the Scholarship & Enrollment Officer for more detailed information concerning the scholarship eligibility requirements. For additional information about Army ROTC, students may contact Craig Giese in the Department of Military Science, 1910 Linden Drive, 608-262-3411, armyrotc@mailplus.wisc.edu.

NAVAL SCIENCE—NAVAL ROTC Mission

The Naval ROTC Program was established to develop future officers mentally, morally and physically and to instill in them the highest ideals of duty, and loyalty, and with the core values of honor, courage and commitment in order to commission college graduates as Naval officers who possess a basic professional background, are motivated toward careers in the Naval service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship and government.

Program Description

The purpose of the Naval ROTC Program is to educate and train qualified young men and women for service as commissioned officers in the Navy's unrestricted line, and the Marine Corps. As the largest single source of Navy and Marine Corps officers, the Naval ROTC Scholarship Program plays an important role in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps.

Selected applicants for the four-year Naval ROTC Scholarship Program are awarded scholarships through a highly competitive national selection process, and receive full tuition, books stipend, educational fees and other financial benefits. Upon graduation, midshipmen are commissioned as active duty officers in the Navy's unrestricted line or the Marine Corps.

The four-year Naval ROTC Scholarship Program is available to qualified students who graduate from high school before August 1 of the year they intend to start college, and have earned less than 30 credit hours of college-level courses.

Students may affiliate with the Naval ROTC program, with the approval of the Professor of Naval Science, as College Program midshipmen, but receive none of the monetary benefits of scholarship students. College program midshipmen may apply and compete for 3-, 2-, or 1-year NROTC scholarships in each of their freshman, sophomore and junior academic years.

Students selected for the Navy ROTC Scholarship Program make their own arrangements for college enrollment and room and board, and take the normal course load required by the college or university for degree completion.

Upon graduation, midshipmen who complete all academic requirements in the Navy ROTC program are commissioned as an Ensign in the Navy or a 2nd Lieutenant in the Marine Corps and will be required to serve a minimum of five years of active military service. (Additional service requirements may apply for specific service assignments; e.g., pilot, nuclear power officer.)

Program Requirements

- Complete all requirements for a bachelor's degree.
- Complete specified Naval Science courses:

Navy Option

Code	Title	Credits
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs	3
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 202	Navigation	3
NAV SCI 301	Naval Engineering	3
NAV SCI 302	Naval Weapons	3
NAV SCI 401	Naval Operations	3
NAV SCI 402	Naval Leadership and Ethics	3

Marine Option

Code	Title	Credits
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs	3
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 350	Fundamentals of Maneuver Warfare	3

NAV SCI 351	Land Campaigns	3
NAV SCI 402	Naval Leadership and Ethics	3

- In addition (or concurrent) to prescribed undergraduate degree and Naval Science course load, midshipmen must also satisfy these academic requirements:
 - Calculus (two semesters, by end of sophomore year). Not required for Marine option students.
 - Physics (two-semester of calculus-based physics, by end of junior year). Not required for Marine option students.
 - English grammar and composition (two-semester).
 - National Security Policy/American Military Affairs (one-semester).
 - World Culture/Regional Studies (one-semester; certain countries or cultures do not satisfy). Not required for Marine option students.
- Maintain a minimum, cumulative 2.5 GPA.
- Register for, and attend a one credit Naval Science leadership lab each semester (NAV SCI 175 Introductory Naval Laboratory I, NAV SCI 176 Introductory Naval Laboratory II, NAV SCI 275 Elementary Naval Laboratory I, NAV SCI 276 Elementary Naval Laboratory II, NAV SCI 375 Intermediate Naval Laboratory I, NAV SCI 376 Intermediate Naval Laboratory II, NAV SCI 475 Advanced Naval Laboratory I, NAV SCI 476 Advanced Naval Laboratory II)
- Participate in a 4-6-week training period each summer

Summer Training Requirements

A significant portion of a midshipman's professional training during their four-year curriculum is received during summer training.

Navy option midshipmen attend summer training, to include Career Orientation and Training for Midshipmen (CORTRAMID) for rising sophomores, and Fleet Exposure Cruises for rising juniors and seniors.

Marine Corps option summer training includes Career Orientation and Training for Midshipmen (CORTRAMID) for rising sophomores, and Fleet Exposure Cruises for rising juniors. All rising senior Marine option midshipmen attend the 6-week Marine Corps Officer Candidates School in Quantico, VA.

Midshipmen must ultimately make decisions as to which warfare area they will request to be commissioned into; CORTRAMID and the various summer training programs are designed to instill awareness of these areas and provide midshipmen with the background necessary to make informed decisions regarding their career choice. Midshipmen select their order of preference of available warfare communities and are ultimately assigned based on their class rank and the needs of the Navy and Marine Corps.

Possible Summer Training Assignments

- CORTRAMID: Midshipmen assigned to this training will travel to a Fleet concentration area on either the East or West coast and spend a week with each of the following warfare communities: surface ship, submarine, aviation, and Marine Corps.
- Nuclear Power: Midshipmen can be assigned to a nuclear submarine or aircraft carrier.
- Ashore Aviation Option: Selected, qualified midshipmen train with a shore-based Navy aviation squadron, including flight time if feasible.
- Surface Warfare: Midshipmen can be assigned to a Navy ship in the United States or in overseas ports.

- Fleet Marine Force Month: Marine option midshipmen can be assigned to a unit on the East or West coast, where they will closely shadow officers and enlisted Marines in their day-to-day training.

PEOPLE

Air Force ROTC—Aerospace Studies: Lieutenant Colonel Scott Gross, Professor of Aerospace Studies/Department Chair/Detachment Commander; Major Jeremy Ware, Assistant Professor of Aerospace Studies/Recruiting Officer; Major Ryan Hansen, Assistant Professor of Aerospace Studies/Education Officer; Captain Kaitlynn Williams, Assistant Professor of Aerospace Studies/Operations Flight Commander.

Military Science—Army ROTC: Please refer to our website (<https://badgerrotc.wisc.edu/cadre/>) for current cadre and staff.

Naval Science—Professor, CAPT Barnett; Associate Professor, CDR Mascotti; Assistant Professors LCDR Adam Stroik, LT Michael Breslin, and Marine 1st Lt. Teja Upadhyaya. The assistant professors act as undergraduate advisors and may be contacted through the department office.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The Wisconsin (<https://wisconsinexperience.wisc.edu>) Experience is UW–Madison’s vision for the total student experience, which combines learning in and out of the classroom. Tied to the Wisconsin Idea and steeped in our long-standing institutional values—the commitment to the truth, shared participation in decision-making, and service to local and global communities—the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

Through the Wisconsin Experience, our students will engage in the following areas of intellectual and personal growth.

Empathy and Humility

- Develop and demonstrate cultural understanding of self and others
- Engage locally, nationally, and globally in a respectful and civil manner
- Appreciate and celebrate one another’s abilities, views, and accomplishments

Relentless Curiosity

- Actively learn with expert instructors, scholars, and peers
- Engage in creative inquiry, scholarship, and research
- Develop resilience, and foster courage in life and learning

Intellectual Confidence

- Develop competence, depth, and expertise in a field of study
- Integrate ideas and synthesize knowledge across multiple contexts
- Exercise critical thinking and effective communication

Purposeful Action

- Apply knowledge and skills to solve problems
- Engage in public service, partner with others, and contribute to community
- Lead for positive change

STUDENT LEARNING AT UW–MADISON

Student engagement and activism are deeply rooted in UW–Madison’s rich history of academic and research excellence. Occasionally, students are expected to help the university better understand and improve student learning by participating in evaluative activities, which include surveys, focus groups, and questionnaires, and by providing examples of their work through presentations, posters, demonstrations, and writing samples. We rely on the student perspective when assessing the effectiveness of academic and co-curricular programs. By participating, students help improve their own educational and related experiences and contribute to better educational experiences for future students.

ACADEMIC ENRICHMENT AND HONORS PROGRAMS

UW–Madison offers students many ways to enrich their academic program, regardless of the major field of study they choose to pursue. Engaging in research, studying abroad, being part of learning communities, participating in university honors, becoming a student leader, engaging in service learning—these are all vital components that enhance and strengthen classroom learning. This partnership between in- and out-of-classroom learning form the foundation of the *Wisconsin Experience*. The university encourages students to take advantage of opportunities to integrate their learning experiences.

Honors Programs

Honors programs, which vary slightly among the schools and colleges, are designed for students who wish to undertake work that is more intensive than regular coursework. High grade point averages are required to maintain honors student standing. Students should refer to Honors Programs (<https://teachlearn.provost.wisc.edu/honors-programs/>) for more information including specific school or college programs or to contact an honors advisor.

Undergraduate Research Opportunities

One of the most exciting things in life is to discover something new. UW–Madison provides unique opportunities to learn from and work with some of the world’s leading researchers and scholars. Options range from assisting with professors’ ongoing research to designing and directing one’s own projects. For many examples, see Undergraduate Research Opportunities (<https://teachlearn.provost.wisc.edu/undergraduate-research/>). The Undergraduate Research Scholars Program (<http://urs.ls.wisc.edu/>) is one opportunity available in the first or second year of study. Students may cap off their undergraduate degree with a senior thesis or senior honors thesis and are encouraged to present their work at the Undergraduate Symposium. For program descriptions, see

Undergraduate Symposium (<https://ugradsymposium.wisc.edu/>). For a sampling of the many grants and awards available to support and honor this work, visit the Undergraduate Academic Awards Office (<https://awards.advising.wisc.edu/>).

Community-Based Learning

Undergraduates have access to more than 100 community-based learning courses each year. These courses emphasize hands-on experiences that address real-world issues as a venue for educational growth. More information on community-based learning is available at the Morgridge Center for Public Service (<http://morgridge.wisc.edu/>).

Learning Communities

UW–Madison’s rich tradition of supporting learning communities (<https://www.housing.wisc.edu/residence-halls/learning-communities/>) means that the traditional classroom is not the only place where students learn. Students may choose to participate in any of the many residential and nonresidential learning communities, where students, faculty, and staff work together as both learners and teachers to pursue their academic interests. For more information about residential options, refer to University Housing’s learning communities (<https://www.housing.wisc.edu/residence-halls/learning-communities/>).

WISCIENCE

At WISCIENCE (<https://wiscience.wisc.edu/>) (the Wisconsin Institute for Science Education and Community Engagement), we advance inclusive education in STEM for all. Our high-impact courses, programs, events, and initiatives provide professional development opportunities in STEM in supportive learning environments on and beyond campus. We serve UW community members at all career stages—with many offerings for undergraduate students.

In WISCIENCE courses and programs, you can:

- Explore STEM research (<https://wiscience.wisc.edu/research/#undergrad-courses>), community engagement (<https://wiscience.wisc.edu/service/#undergraduate>), and leadership (<https://wiscience.wisc.edu/leadership/>)
- Build community, boost confidence, and develop your STEM identity
- Fulfill degree requirements while building skills for STEM careers
- Engage with instructors committed to inclusive STEM education for all

Learn More (<https://wiscience.wisc.edu/>)

STUDY ABROAD PROGRAMS

Studying abroad extends the boundaries of the classroom to the world. It is an exciting way for students to complement and enhance their on-campus learning while earning meaningful credit toward the major and degree. Each year UW–Madison sends more than 2,500 students on study abroad programs around the globe, including international internships and domestic study away options within the United States.

International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu/>) serves as the central study abroad office on campus, offering more than 300 programs in over 80 countries around the world. IAP program offerings, available to all majors for students at all levels, range from short-term faculty-led opportunities to intensive language study, internships, a semester or a year at a university abroad, service-learning, and programs with special themes. Students can visit the

Study Abroad Resource Center, 301 Red Gym, to meet with advisors who can help students prepare and research study abroad options.

Additionally, in partnership with IAP, the College of Agricultural and Life Sciences, the College of Engineering, and the School of Business offer programs geared specifically for their academic disciplines. All approved UW–Madison programs share policies, procedures, and best practices, and are featured on the Program Search (<https://studyabroad.wisc.edu/programs/>) page.

The Value of Study Abroad

Employers are increasingly looking for workers who not only have technical knowledge, but also “soft skills” such as critical thinking, problem solving, time management, and communication skills deemed necessary for success in a global workforce. Study abroad is one of the best ways students can acquire global skills and stand out to potential employers. Study abroad alumni have better job prospects. Based on a survey conducted by IES Abroad (<http://thepienews.com/news/us-study-abroad-alumni-have-better-job-prospects/>), 90 percent of study abroad alumni found their first job within six months of graduation. In addition to being able to experience new customs, cultures, interests, and food, alumni have reported that study abroad increased their confidence and had a lasting impact on their worldview (<https://www.iesabroad.org/study-abroad/benefits/alumni-survey-results/>).

Regardless of major, students will find that study abroad has much to offer. The variety of program sites and durations (semester, spring break, summer, winter, year) allow students to select programs based on individual academic interests and personal goals and objectives.

Access and Meaningful Credit for All Majors

In general, credits earned abroad can count toward fulfilling (<https://studyabroad.wisc.edu/academics/>) college and major requirements in any UW–Madison school or college. Seniors in most schools and colleges who complete their major and degree requirements while abroad on a UW–Madison program can graduate at the end of their study abroad program. Seniors who wish to graduate abroad should work closely with their academic advisors to ensure all degree requirements will be met.

Each study program has its own eligibility requirements. Students are encouraged to talk with their academic advisors early in their academic careers about how study abroad can fit into their academic plans and future career goals. We are also working with departments to create Major Advising Pages (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/>) to highlight programs that work best for students’ degree plans.

Costs and Funding

Students who are thinking about studying abroad or have already decided to do so may be concerned about how they will fund the experience. We frequently hear from students that the program cost is a primary factor in deciding whether they are able to pursue studying abroad. Instead of tuition, students pay a program fee to cover the actual costs of the experience, which is unique to each program. Programs vary widely in cost, so it is likely that we have a program for every budget. Sometimes studying abroad is no more expensive than studying on campus, and other times the cost can be higher. We work with students to create funding (<https://studyabroad.wisc.edu/funding/>) plans for their time abroad.

Students who study abroad in UW–Madison-sponsored programs may be eligible to use federal financial aid toward the costs of the program. Students should meet with the UW–Madison Office of Student Financial Aid to discuss eligibility requirements. In addition, students can apply for scholarships (<https://www.studyabroad.wisc.edu/>)

scholarships.html) specifically designated for use with study abroad programs. These include UW–Madison, national, and international scholarship opportunities. Students can also use most campus and academic department scholarships for UW–Madison-sponsored study abroad programs and should talk with their scholarship sponsor about that.

Diversity and Inclusion

Study Abroad staff are committed to providing quality study abroad and domestic study away programs for every UW–Madison student. We work strategically to identify, address, and remove barriers that may prevent participation and to provide a welcoming and inclusive environment for students. Our team actively engages with students, faculty, and staff from diverse backgrounds and prioritizes the continuous development of our knowledge and cultural competence. We also recognize the importance of increasing access to study abroad for historically underrepresented student populations. We are committed to diversity and inclusion so that every student can engage with and understand their identity through a new lens and continue to develop and make progress on their personal, professional, and academic goals.

REQUIREMENTS FOR UNDERGRADUATE DEGREES

REQUIREMENTS FOR UNDERGRADUATE DEGREES

This is a summary of the Requirements for Undergraduate Degrees policy. Click here (<https://policy.wisc.edu/library/UW-1060/>) to view the official policy in its entirety in the UW-Madison Policy Library.

The University of Wisconsin–Madison sets minimum standards that must be met by all students pursuing an undergraduate degree. The information in the following paragraphs provides general information about study at UW–Madison. Requirements may vary among the schools and colleges, and for specific programs. Students should learn about and understand the specific requirements for their program of study.

TOTAL DEGREE CREDITS

To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits (which includes AP, IB and other test credit, transfer credit, and retroactive credit). Requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. Undergraduate Majors (p. 22).

RESIDENCE CREDIT

Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats, as credits earned in UW–Madison Study Abroad/Study Away programs. Some schools and colleges may have additional requirements concerning courses taken in residence; students should refer to the specific school or college section of the *Guide* or consult with an advisor.

UNDERGRADUATE MAJOR DECLARATION

This is a summary of the Undergraduate Major Declaration policy. Click here (<https://policy.wisc.edu/library/UW-1009/>) to view the official policy in its entirety in the UW-Madison Policy Library.

Undergraduate degrees at UW–Madison presume that students are completing a program of study that consists of a degree program that combines the requirements for the degree with focused study in a discipline, or that combines school or collegewide requirements with an undergraduate major in which they pursue focused study. All undergraduates are expected to have declared or to have been admitted to their focused area of study by the end of the semester in which they have accumulated 86 credits. Students who have not met this expectation may be prevented from enrolling in future terms until they meet with their advisor. Some schools and colleges have additional requirements governing when majors may be declared; students should refer to the specific school or college section of the *Guide* and consult with an advisor about declaring their major.

ACADEMIC PROBATION

Undergraduate students must maintain the minimum academic thresholds, including the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

GENERAL EDUCATION REQUIREMENTS

This is a summary of the General Education Requirements policy. Click here (<https://policy.wisc.edu/library/UW-1059/>) to view the official policy in its entirety in the UW-Madison Policy Library.

All undergraduate students at UW–Madison must complete the university-wide General Education Requirements, which are designed to convey the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. These requirements provide for breadth across the humanities and arts, social studies, and natural sciences; competence in communication, critical thinking, and analytical skills necessary for success in college and beyond; and investigation of the issues raised by living in a culturally diverse society. This core is intended to provide students with intellectual and practical skills, basic knowledge of human cultures and the physical world, strategies for understanding these topics, and tools intended to contribute to their sense of personal and social responsibility. General Education complements the work students do in their majors and degrees. Together, these requirements help students learn what they need to know not just for making a living, but also for making a life.

Completing the General Education Requirements is an important part of achieving these competencies, and to do so, students choose from many courses in communication, ethnic studies, quantitative reasoning, and breadth of study across disciplines in the natural sciences, humanities, literature, and arts, and social and behavioral sciences.

Each school and college may choose to allow General Education courses to count toward other degree and/or major requirements. Students should always check with their advisors to discuss any additional degree requirements and determine if students are required to take specific General Education courses or to complete the requirements in a particular order. Students should review their Degree Audit (DARS) report to see how they are progressing toward fulfilling the General Education requirements. Please refer to this website (<https://gened.wisc.edu/>) for more information about the requirements.

The university-wide General Education requirements are:

Breadth, 13–15 Credits, Distributed Over Three Areas

All students must complete 13–15 credits of coursework intended to provide a breadth of experience across the major modes of academic inquiry. This requirement encourages students to adopt a broad intellectual perspective, to examine the world through investigative, critical, and creative strategies practiced in the natural (computational, biological, and physical) sciences, social and behavioral sciences, as well as in the arts and humanities.

Learning Outcomes

Students acquire critical and creative thinking skills as well as enhance their problem-solving skills through a breadth of study across the humanities and arts, social studies, computational, biological sciences and physical sciences. In courses satisfying the Breadth requirement, students will:

- Articulate examples of significant contributions to human understanding achieved through various “ways of knowing” found in the arts and humanities; social and behavioral sciences; and computational, biological, and physical sciences
- Recognize and articulate the ways in which different disciplines approach questions that call upon different tools of inquiry, understanding, and creative enterprise
- Identify ways in which multiple tools of inquiry and understanding can be used to achieve greater insight into resolving “big” questions (e.g., climate change, poverty, global health etc.), evaluating the strengths and weaknesses of those approaches, and understanding which complementary approaches will help achieve meaningful change
- Evaluate different modes of inquiry across the humanities and arts; social studies; computational, biological, and physical sciences, and identify strengths and weaknesses of those approaches across disciplines when approaching a question

To achieve these outcomes, students are required to complete courses in the following areas.

- Natural Science, 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Humanities/Literature/Arts, 6 credits
- Social Studies, 3 credits

This requirement challenges students to understand that there are many ways to research, understand, communicate about, and interpret creatively the world around us. These “ways of knowing” intersect and overlap, and the ideas presented in one area will often inform and transform what students know and how they think about the others. Students develop skills that help them make informed decisions in a wide range of political, economic, and social contexts, to think critically about the world, to better understand their own and others’ experience, and to behave in socially responsible ways. (For more information about how this exposure to breadth of inquiry and expression enriches students’ undergraduate experience and complements intensive study in the major, please see the General Education Requirements (<https://gened.wisc.edu/>) website.)

Communication, 3 to 5/6 Credits

The Communication requirement helps to ensure that all graduates of UW-Madison acquire essential communication and research-

gathering skills necessary for success in university course work and beyond. Communication-A (Comm-A) and Communication-B (Comm-B) courses train students to gather and assess information from a variety of sources and to present different kinds of information, insight, and analysis to diverse audiences. These courses are essential for students’ career success and their preparation for public life in a rapidly changing world. While Comm-A courses focus exclusively on essential communication skills, Comm-B courses provide content instruction in a specific discipline and teach research, writing, and communication skills in conjunction with the course content. Comm-B courses are offered by departments across campus and vary widely in topic, content, and format.

Learning Outcomes

Students develop skills that enable them to be effective communicators in and out of the classroom. In courses satisfying the Communication requirement, students will:

- Make effective use of information retrieved, organized, and synthesized from appropriate sources
- Present ideas and information clearly and logically to achieve a specific purpose
- Make effective use of communicative forms appropriate to a specific discipline and adapted to the intended audience
- Use appropriate style and conventions associated with particular communicative forms, genres or disciplines

To achieve these outcomes, students must complete the following Communication requirements:

Part A. Literacy Proficiency.

2–3 credits at first-year level dedicated to reading, listening, and discussion, with emphasis on writing. While most incoming freshmen are required to complete coursework to fulfill this requirement, students may be exempted from Part A by approved college course work while in high school, AP test scores, or placement testing. Students are expected to satisfy this requirement by the end of their first year of undergraduate study.

Learning Outcomes

- Use the four modes of literacy: writing, speaking, reading, and listening to formulate strategies for critical thinking
- Use information-seeking skills to demonstrate the four modes of literacy

Part B. Enhancing Literacy Proficiency.

2–3 credits of more advanced coursework for students who have completed or been exempted from Part A. Students should consult with the appropriate undergraduate advisor about when this requirement should be completed. Courses that satisfy this requirement are offered in many fields of study; although a wide variety of courses fulfill this requirement, students are encouraged to select a course most in keeping with their interests or other requirements of their intended field(s) of study.

Learning Outcomes

- Identify and make skillful use of relevant, reliable, and high-quality research sources appropriate to the course subject and discipline

- Make productive use of the writing process, including brainstorming, outlining, drafting, incorporating feedback, and revising, to develop a fledgling idea into a formal paper, presentation, and/or project
- Share research, course content, or creative activity in writing and at least one other mode of communication relevant to the discipline. Other modes of communication might include presentations using one or more media, debate, discussion, poster presentations, and other forms of expression that convey course content

Please note: Because English is the language of instruction at UW–Madison, Communication A and B courses are taught in English, and student work in them is also completed in English.

Ethnic Studies, 3 Credits

The Ethnic Studies requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Because this increased understanding is expected to have a positive effect on campus climate, students are expected to complete this requirement within the first 60 credits of undergraduate study

Learning Outcomes

Students draw connections between historical and present day circumstances and consider perceptions and cultural assumptions when examining questions and making decisions. In courses satisfying the Ethnic Studies requirement, students will:

- Articulate how the past has affected present day circumstances regarding race and racial inequities in the U.S.
- Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity
- Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others
- Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society

The skills listed above apply to students' lives inside and outside the classroom, and by pursuing these objectives, students will further enhance their ability to participate in a multicultural society more effectively, respectfully, and meaningfully. Students complete this requirement by taking one course of at least 3 credits that is designated as an Ethnic Studies course.

Quantitative Reasoning, 3 to 6 Credits

Quantitative Reasoning is the process of forming conclusions, judgments or inferences from quantitative information. The Quantitative Reasoning requirement at UW–Madison has two parts: Part A and B. Quantitative Reasoning A courses provide students with skills in mathematics, computer science, statistics or formal logic that are needed for dealing with quantitative information. The acquired skills are broad-based in order to have a positive impact on the readiness of students to take a Quantitative Reasoning B course in a variety of disciplines. Quantitative Reasoning B courses allow students to enhance their Quantitative Reasoning Proficiency in a more advanced setting, where they make significant use of quantitative tools in the context of other course material. To ensure

timely completion of the undergraduate degree, students must demonstrate minimum math proficiency before they can enroll in a Quantitative Reasoning Part A course. They should complete Part A of the Quantitative Reasoning requirement by the end of their first year, and must complete Part A before they enroll in Part B.

Quantitative Reasoning Part A:

An introductory course in college-level mathematics, computer science, statistics, or formal logic that is intended to prepare students for more advanced work in a disciplinary context.

Learning Outcomes

- Solve problems using quantitative information and the tools of college-level mathematics, computer science, statistics or formal logic
- Draw conclusions using quantitative information and the tools of college-level mathematics, computer science, statistics or formal logic
- Develop models and/or interpret data and/or devise algorithm using quantitative information and the tools of college-level mathematics, computer science, statistics or formal logic

Quantitative Reasoning Part A Requirement:

Can be satisfied by approved college work while in high school, AP test scores, placement testing, or taking a 3-credit course at UW–Madison with a Quantitative Reasoning A designation.

Quantitative Reasoning Part B:

In the disciplinary or interdisciplinary context of a course designed to build on the tools of college-level mathematics, computer science, statistics, or formal logic.

Learning Outcomes

- Manipulate quantitative information to create models, and/or devise solutions to problems using multi-step arguments, based on and supported by quantitative information
- Evaluate models and arguments using quantitative information
- Express and interpret in context models, solutions, and/or arguments using verbal, numerical, graphical, algorithmic, computational or symbolic techniques

Quantitative Reasoning Part B Requirement:

Can be satisfied by taking a designated QR-B course of at least 3 credits in a variety of fields of study, which enhances students' proficiency in this domain. Students are encouraged to select a course in keeping with their interests or to satisfy other requirements for their major or degree program.

Identifying Courses That Meet General Education Requirements

The university offers hundreds of courses that meet the requirements described above. Students should consider their own interests and check with their advisor when deciding which courses to complete. Please note that many undergraduate programs of study have breadth requirements that go beyond these basic university-wide requirements.

The following language is used in the UW–Madison course listings to indicate how courses count toward satisfying the communication, quantitative reasoning, and ethnic studies portions of the General

Education Requirements. Courses that satisfy these requirements are also tagged with a mortarboard (graduate cap) symbol. #

- Communication Part A
- Communication Part B
- Ethnic Studies
- Quantitative Reasoning Part A
- Quantitative Reasoning Part B

Note: Some Communication Part B courses carry Communication B credit only at the lecture or section level and/or only in certain semesters; these courses will be indicated in the Schedule of Classes.

Course descriptions also include information about whether courses meet General Education Humanities, Natural Science, or Social Studies Breadth Requirements. (Click on course numbers in the Guide to see this information.) Students should also be aware that each school and college may, at its own discretion, designate additional courses that satisfy these requirements. For this reason, students should consult their advisors to obtain information about how these requirements are implemented in the school or college in which they are enrolled.

General Education Policies

- Only undergraduate-level college courses may satisfy General Education Requirements.
- Directed or Individualized Study may not be used to satisfy General Education Requirements.
- Because these requirements assume that students are engaged in focused study within the designated area of general education, requirements cannot be met with portions of courses.
- Exemption from General Education: All students are required to meet the fundamental degree requirements of the university, which include general education.
- Disability-Based Waivers: The university has determined that waivers to the communication and quantitative reasoning portions of the general education component would fundamentally alter the nature of the University of Wisconsin–Madison degree. Students should not expect to obtain disability-based waivers to the communication and quantitative reasoning portions of the General Education Requirements.
- Pass/Fail: Effective fall 2012, all courses taken to meet the University General Education Requirements must be taken on a graded basis. These grades are included in students' GPA calculations according to school/college GPA rules.

GRADUATING

Declaration of Intent to Graduate

When students expect to graduate, they must indicate their intent by completing the graduation application available in the MyUW Student Center. It is the policy of UW–Madison that all work for the degree must be completed and all degree requirements satisfied before the degree can be conferred.

Conferral of Degrees

When students have been certified as having completed all university general education, degree, and major requirements, the degree will be awarded. When the degree is awarded, a diploma will be issued, listing the degree earned, and the transcript updated to reflect the degree, major, and any other approved academic programs

completed. Students who have holds (<https://kb.wisc.edu/helpdesk/page.php?id=4139>) on their records will not receive their diplomas, or be able to order transcripts, until the holds are cleared.

Commencement

Students who wish to attend the spring or winter commencement ceremony must indicate their intent by completing the graduation application available via Student Center in MyUW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e4s1>) by the posted deadline (<https://commencement.wisc.edu/graduate-checklist/>). Students may participate in the commencement ceremony (<https://commencement.wisc.edu/>), in which the chancellor and deans symbolically confer the degrees, even if all degree requirements have not been completed. Neither participation in the ceremony nor listing in the program conveys degree conferral. Students will not receive the diploma or transcript notation until all degree requirements are certified as complete by their respective school or college. Should a student's graduation plans change, updates to the intended term of graduation must be indicated via the graduation application in the MyUW Student Center.

ENROLLMENT AND RECORDS

ENROLLMENT AND RECORDS

The Office of the Registrar (<https://registrar.wisc.edu/>) is responsible for maintaining the academic records of students who attend the University of Wisconsin–Madison and for many services associated with these records, including enrollment and grading. The office is located at:

333 East Campus Mall #11101
Madison, WI 53715-1384
registrar@em.wisc.edu
608-262-3811

Many student services are available online in the Student Center on MyUW–Madison (MyUW) (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e2s1>), including viewing grades, ordering transcripts, and updating address and emergency contact information. Students are responsible for the accuracy of the addresses provided in MyUW and for the courses selected when they enroll.

MyUW is available to eligible students, who gain access by using their Net ID and password from any device with internet access. For further information, see DoIT (Division of Information Technology) (<http://it.wisc.edu/>).

ENROLLMENT

Students enroll for courses, obtain information about deadlines, view their class schedule, and more in the Course Search & Enroll (<http://public.enroll.wisc.edu>) application on MyUW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e3s1>). Information about key deadlines and course enrollment are also available at the Office of the Registrar website (<https://registrar.wisc.edu/>). Additional assistance with the course enrollment process is available by calling 608-262-3811 or emailing registrar@em.wisc.edu.

GRADING SYSTEM

The general quality of a student's work is expressed in terms of a grade point average (GPA). It is based on the total number of credits taken for which grades of A through F are received. Semester grades are reported by letter only; plus and minus signs are not authorized. The highest

possible GPA is 4.0, representing A grades in every course; the lowest possible is 0.0. The following is the official scale of grades at UW–Madison.

Grades with Associated Grade Points per Credit

Grade		Grade Points Per Credit
A	Excellent	4
AB	Intermediate Grade	3.5
B	Good	3
BC	Intermediate Grade	2.5
C	Fair	2
D	Poor	1
F	Failure	0

Excluded from the GPA calculation are:

S or U (Satisfactory or Unsatisfactory) in courses taken on the pass/fail basis.

SD/UD (Satisfactory-Disruption/University Disruption-No Credit): special grading option for students in response to the COVID-19 events.

S/M/U (Satisfactory/Marginal/Unsatisfactory) in courses offered only through the School of Veterinary Medicine.

Cr or N (Credit or No Credit) in courses offered on a credit/no credit basis.

Def (Deferred), Ex (Excused), PE (Permanently Excused), formerly used only for required Physical Education. The Physical Education requirement was discontinued effective August 30, 1976.

DR (Dropped), indicates the course was dropped.

I (IN for Cr/N Courses) (Incomplete), a temporary grade used when work is not completed during a term.

EI (Extended Incomplete), a temporary grade for an extended time limit to remove an Incomplete.

PI (Permanent Incomplete), a permanent grade replacing an Incomplete incurred in a student's last semester in residence and not removed within five years.

NR (No Report), indicates that a grade was not submitted by the instructor. Has no net effect on GPA. Effective Summer 1999.

NW (No Work)... "should be used for students who enroll in a course and then never attend. 'No Work' in this context means that the instructor has no evidence that the student ever attended, in that no course work was ever submitted. Any student who does attend for part of the semester, and then stops participating should be given a grade of 'F' unless there are grounds for assignment of a grade of 'I' (Incomplete)." Fac. Doc. 1028; effective 9/94.

P (Progress), a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.

Q (Question on Credits or Honors), a temporary grade used during grade reporting to indicate a credit problem. Should only be used when the student is enrolled for the wrong number of credits or their honors indication is incorrect. A Q grade may be represented on a grade report as "?".

R (Registered), not used after the Summer 1974.

W (Withdrew), indicates the student withdrew from the University while enrolled in the course.

Audited courses, denoted as such by 'AU' in place of a number of credits, are graded either S (Satisfactory) or NR (No Report).

CREDIT/NO CREDIT COURSES

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR, meaning the student earned the credits for which the course was offered, or N, meaning that the student did not earn any credit even though enrolled for the course. Students may not take such courses on any other basis.

PASS/FAIL

Policy on Use of Pass/Fail Grading Option for Undergraduates

This policy concerns the use of the pass/fail grading option for degree-seeking undergraduate students. According to the UW–Madison grading scale, grades of S (satisfactory) and U (unsatisfactory) are the transcribed grades that are used for what is commonly known as pass/fail. It applies only to courses that use the default A–F grading scale and that also allow students to choose to take a course on a pass/fail (PF) basis.¹

The instructor enters the letter grade earned by students on the grade roster, and those letter grades are subsequently recorded as a pass (S) or fail (U) on the student record. A pass (S) will be recorded when a letter grade of A through C is earned. A fail (U) will be recorded when a letter grade of D or F is earned. In addition to the S or U notation, the student transcript includes the symbol # for courses that were taken on a pass/fail basis. Neither the S nor the U is used in computing the grade point average. Instructors are not informed that a student has elected to take the course pass/fail.

Student Eligibility

Students must be in good academic standing according to their school/college in order to be eligible to request the pass/fail grading option.

Undergraduates may carry one course on a pass/fail basis per term and a maximum of 16 credits during their undergrad career. The summer sessions collectively count as a single term.

Required courses cannot be taken on a pass/fail basis. The student's school or college may review the request to take a course pass/fail and reject requests for nonelective work. It may be difficult for the school or college official to determine whether a course is an elective or being used to fulfill a requirement since a student's enrollment or the way a course is being used in the specific program of study may change. Ultimately it is the student's responsibility to be sure that the requested course is an elective. Students are strongly advised to consult with an academic advisor before taking a course pass/fail. Courses taken on a pass/fail basis will not count for nonelective requirements even if they would normally count toward such requirements.

Each school or college is responsible for clearly communicating to its students what the definition of "good academic standing" is and what a free elective is.

In each school or college, the office responsible for academic policy exceptions is authorized to make exceptions to the pass/fail policy.

Process for Requesting the Pass/Fail Grading Option

Students indicate that they would like to have a course they are enrolled in graded on a pass/fail basis by completing a course change request via their Student Center (see Course Change Request (<https://kb.wisc.edu/registrar/7700/>) for detailed information). Students may submit pass/fail requests via their Student Center from the time that they enroll until midnight on the Friday at the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed).

The deadline for requesting the pass/fail grading option is posted on the Office of the Registrar website (<https://registrar.wisc.edu/dates/>). These deadlines are based on the idea that the pass/fail option is intended to encourage students to explore educational opportunities that they might otherwise not be willing to attempt. Pass/fail is not intended as a way for students to avoid academic consequences.

Once the student has submitted the request to take a course on a pass/fail basis the request is routed via Student Information System workflow to an academic dean in the school or college for approval or further communication with the student. The school/college official must approve the request before the grading option is changed to pass/fail by the Office of the Registrar.

Students can see whether a course is being graded on a pass/fail basis in the MyUW Student Center's Academic Records > View Grades section.

¹ For study abroad programs operated by the College of Engineering, courses taken abroad toward an engineering major will be posted as pass/fail. This occurs automatically and is not a student option; this practice is not covered or affected by this policy.

FAILURES

Every course grade of F counts as 0 grade points and remains permanently on the transcript. If the course is repeated, the original F will remain on the transcript and will be included in computing the GPA.

INCOMPLETES

This is a summary of the Undergraduate and Special (Nondegree) Student Lapsed Incomplete Grades policy. Click here (<https://policy.wisc.edu/library/UW-1094/>) to view the official policy in its entirety in the UW-Madison Policy Library.

A grade of Incomplete may be assigned to a student who, because of illness or another unusual and substantiated cause beyond their control, is unable to complete the coursework.

To be eligible for an Incomplete grade, the student must:

- be earning a passing grade to-date in the course,
- and have a limited amount of work to complete by the end of the term.

The student must initiate the request for a grade of Incomplete with the instructor before the end of the term. The instructor and student must agree on the coursework to be completed and establish a plan for the work to be submitted by the student, and the instructor-assigned grade change to be entered in the student information system and updated on the student record prior to the deadlines below.

Deadline for Resolving Incomplete Grades

- Incomplete grades assigned in spring semester or summer term must be updated on the student record by the Friday of the eighth week of the following fall term.

- Incomplete grades assigned in fall semester must be updated on the student record by the Friday of the eighth week of the following spring term.

Consequences for Not Completing Coursework

If the Incomplete grade is not changed to a final grade by the Friday of the eighth week deadline, the Incomplete grade will be changed (lapsed) to a grade of F or N (for Credit/No Credit courses).

If the outstanding work is unable to be completed by the deadline due to additional extenuating circumstances, the instructor may extend the time the student has to complete outstanding work by submitting a request to change the Incomplete grade to a grade of Extended Incomplete (EI).

- The Extended Incomplete grade must be accompanied by a new deadline date which should typically be no later than the last day of instruction for that semester/term.
- If the Extended Incomplete grade is not changed to a final grade by the deadline date specified by the instructor, the grade will be changed to a grade of F or N (for Credit/No Credit courses).

A graduating student with an Incomplete grade must complete all coursework before their degree can be awarded. The completion of coursework after the intended term/semester of graduation means that a student will be awarded their degree at the next official conferral date.

AUDIT

Students may audit eligible courses with instructor and academic dean consent if no laboratory or performance skills are involved. Auditors may not recite or take examinations but are expected to attend classes regularly and do some assigned work. Although courses for which students enroll as an auditor are factored into tuition, such courses do not earn academic credit and do not count in determining full-time/part-time load for enrollment certification in an academic term. Students initiate a request to audit by completing a course change request via Student Center (see Course Change Request (<https://kb.wisc.edu/registrar/7700/>) for detailed information). Students may submit audit requests via Student Center from the time that they enroll until midnight on the Friday at the end of the fourth week of fall and spring semesters. (For modular and summer session courses, audit requests must be submitted by midnight Friday of the week in which the session is one-fourth completed). School and college policies may vary from this description. Students are advised to consult with the instructor concerning specific course requirements that must be satisfied.

CLASS STANDING

Students are classified by year according to the number of credits they have earned:

Freshman: fewer than 24 credits
 Sophomore: 24-53 credits
 Junior: 54-85 credits
 Senior: 86 or more credits

TUITION AND FEES

The UW System Board of Regents sets tuition and fee rates annually. Rates are subject to change without notice.

The tuition and fee schedule is available on the Bursar's Office website (<https://bursar.wisc.edu/tuition-and-fees/>). Students whose first enrollment for the term is after the first Friday of the official first week of classes are assessed a late initial enrollment fee. Exception: Special

and Guest students have until the Friday of the second week of classes to enroll.

Enrolled students can view account charges/payments, financial aid (loans, grants, scholarships) received, and refunds on their MyUW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e5s1>) Student Center, Financial Account. Students can also access links to view and pay student account eBills, set up Authorized Payers for account access, and enroll for eRefund.

The Bursar's Office provides the student account bill electronically (eBill). The eBill is published on the MyUW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e5s1>) Student Center payment portal. Students and their Authorized Payers receive an email when the eBill is available to view.

For questions about tuition rates, student account activity and billing questions, contact the Bursar's Office.

tuition@busssvc.wisc.edu (include student ID and name)
608-262-3611
333 East Campus Mall #10501
Madison, WI 53715-1383

Making Payments

Student Account payment options include making an online ePayment, mailing a check to the Bursar's Office, or placing a check in the first-floor lobby dropbox. For detailed payment information, see Payment Methods (<https://bursar.wisc.edu/student-tuition-account/payment-methods/>) on the Bursar's Office website.

If the balance is not paid by the due date, a late fee is assessed and a hold is placed to prevent future enrollment until the account is paid.

RESIDENCE FOR TUITION PURPOSES

At the University of Wisconsin-Madison, residence for tuition determinations are governed by Wisconsin Statutes 36.27(2). The standards to qualify as a Wisconsin resident are unique to this law and may differ from standards used to determine residency for other purposes, such as voting, paying taxes, obtaining licensures, and other forms of residency. In general, eligibility for resident status requires that an independent student (or the student's parent, if the student is a dependent) must demonstrate bona fide residency in Wisconsin for at least twelve months immediately prior to enrollment for any term. However, the law also states that individuals who come to Wisconsin primarily for educational purposes do not qualify as Wisconsin residents for tuition purposes, even if they meet the remaining eligibility criteria. As a result, students who begin their enrollment as nonresidents usually maintain nonresident status for the duration of their enrollment.

While all individuals who do not demonstrate eligibility under Wisconsin Statutes 36.27(2) will be classified as nonresidents, the law does provide a limited set of exceptions to twelve-month period normally required to establish bona fide residency. These exceptions pertain to some (but not all) individuals who are refugees in Wisconsin, who have certain military or veteran statuses, or who have relocated to Wisconsin for full-time, permanent employment under certain conditions. If you have questions about whether your circumstances might align with the exemptions noted here, you may wish to contact a residence specialist to discuss your residency further.

For more information and the full text of Wisconsin Statutes, Section 36.27(2), see the Office of the Registrar website (<https://>

registrar.wisc.edu/residence/) or contact a residence specialist at 608-262-1355 or ResidenceForTuition@registrar.wisc.edu.

Nonresident students who plan to use federal veteran benefits such as the post-9/11 GI Bill may be eligible for resident tuition rates even though they are formally classified as nonresidents of Wisconsin. If you plan to use veteran benefits while enrolled at UW-Madison, you may wish to speak with University Veterans Services at 608-265-4628 or veterans@wisc.edu for more information about how to use your military benefits at the University.

MINNESOTA RECIPROCITY FOR TUITION RATES

Minnesota residents who are certified by the Minnesota Office of Higher Education for the appropriate term to attend UW-Madison under the Minnesota-Wisconsin Tuition Reciprocity Agreement will be assessed the approved reciprocity tuition rate, plus the segregated fees assessed to all UW-Madison students. Students under this program will be classified as nonresidents of Wisconsin. Minnesota residents must apply to the Minnesota Office of Higher Education for verification of their eligibility for reciprocity.

To learn more about eligibility, application procedures, and deadlines, visit the UW-Madison Minnesota Reciprocity website (<https://registrar.wisc.edu/reciprocity/>). Students may apply online on the Additional information can also be found at the Minnesota Office of Higher Education website (<http://www.ohe.state.mn.us/>).

It is the student's responsibility to inquire about application procedures, deadline dates, and reapplication procedures. Students may apply online on the Minnesota Office of Higher Education website (<http://www.ohe.state.mn.us/>). Questions may be directed to the Minnesota Office of Higher Education:

1450 Energy Park Drive, Suite 350
St. Paul, MN 55108-5227
651-642-0567 or 1-800-657-3866

They may also be directed to the UW-Madison Office of the Registrar (<https://registrar.wisc.edu/>):
333 East Campus Mall #11101
Madison, WI 53715-1384
registrar@em.wisc.edu
608-262-3811

RULES, RIGHTS, AND RESPONSIBILITIES

RULES, RIGHTS, AND RESPONSIBILITIES STUDENT PRIVACY RIGHTS (FERPA)

Students have the right to inspect and review most education records maintained about them by the University of Wisconsin-Madison and, in many cases, decide if a third person can obtain information from them. Students may challenge information in their records which they believe to be inaccurate, misleading, or inappropriate.

The university has adopted a policy statement implementing all provisions of the Family Educational Rights and Privacy Act (FERPA). A copy of this statement may be obtained at the Office of the Registrar (<https://registrar.wisc.edu/>), 333 East Campus Mall #11101. The university, in

accordance with the act, has designated the following as "directory information," which is publicly available unless a student asks to have any or all of it withheld: name; postal address; telephone numbers; e-mail addresses; date of birth; major field(s) of study and number of academic credits earned toward degree; attendance status (including current year, credit load, and full-or part-time status); dates of attendance (matriculation and withdrawal dates); degrees and awards received (type of degree and date granted); previously attended educational agencies or institutions; participation in officially recognized activities; and participation in athletics and weight and height of athletes.

Students wishing to keep some or all of their "directory information" confidential should restrict their information in the Student Center in MyUW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e6s1>). Students with questions about the provisions of the act or who believe the university is not complying with the act may obtain assistance from the Office of the Registrar:

333 East Campus Mall #11101
Madison, WI 53715-1384
reginfo@em.wisc.edu
608-262-3811

Students have the right to file complaints alleging university noncompliance with the act with the federal agency that enforces the act. The address is: The Family Educational Rights and Privacy Act Office (<https://studentprivacy.ed.gov/ferpa/>), Department of Education, 330 Independence Avenue SW, Washington, DC 20201.

Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at: Office of the Registrar (<https://registrar.wisc.edu/>)
333 East Campus Mall #11101
Madison, WI 53715-1384

Undergraduate students will also be prompted to review this information before enrolling in courses each fall and spring term.

AVAILABILITY OF ACADEMIC RECORD INFORMATION TO PARENTS OR GUARDIANS OR OTHERS

A student may authorize a third party (e.g., a parent, guardian, spouse, potential employer, etc.) access to academic record information. An authorization form (<https://registrar.wisc.edu/ferpa-restrict/>) is available at the Office of the Registrar's website, or by visiting the Office of the Registrar (<https://registrar.wisc.edu/>), 333 East Campus Mall #11101. The authorization form permits release of specified information on a one-time basis to the specified third party. If no authorization is on file, it will be assumed that the student does not wish to give a third party access to academic record information. This policy is designed to give students specific control over the parties to whom academic record information may be released.

Grade reports will not be sent by the university to parents or guardians. Students are urged to keep their parents informed of their academic progress.

ACADEMIC INTEGRITY

UW-Madison students are required to conduct their academic work with integrity. Students have due process rights if they are accused of academic misconduct. It is important students:

- be familiar with the rules of academic misconduct (UWS Ch. 14 (https://docs.legis.wisconsin.gov/code/admin_code/uws/14/));

- ask their instructors if they are unsure (for example, using sources in a paper or if collaboration with another student is permitted);
- tell their instructors if they see misconduct;
- don't help someone else cheat, it is a violation of the rules

Additional information is on the Office of Student Conduct and Community Standards website (<https://conduct.students.wisc.edu/>). Students can contact the office via phone at 608-263-5701 or conduct@studentaffairs.wisc.edu.

STUDENT RIGHTS AND RESPONSIBILITIES

Every member of the University of Wisconsin-Madison community has the right to conduct their academic and social life in an environment free from threats, danger, or harassment. Students are also responsible for conducting themselves in a manner compatible with membership in the university and local communities.

UWS Chapters 17 and 18 of the Wisconsin Administrative Code list the university policies students are expected to follow and describes the procedures used when students are accused of misconduct, including possible outcomes. Review the complete text of UWS Chapter 17 (https://docs.legis.wisconsin.gov/code/admin_code/uws/17/); and additional information is on the Office of Student Conduct and Community Standards website (<https://conduct.students.wisc.edu/academic-misconduct/>), or contact the office via phone at 608-263-5701 or conduct@studentaffairs.wisc.edu.

STUDENT GRIEVANCE PROCEDURE

Any student at UW-Madison who feels that they have been treated unfairly has the right to voice a complaint and receive a prompt hearing of the grievance. The basis for a grievance can range from something as subtle as miscommunication to the extreme of harassment.

Each school or college has a procedure to hear grievances. Generally the process involves an informal attempt to solve the problem, if appropriate. If not, more formal proceedings can be undertaken until a resolution is reached. Advisors and school or college offices have detailed information. For assistance in determining options, students can contact the drop-in staff member within the Office of Student Assistance and Support at 608-263-5700, within Bascom Hall, Room 70, Monday-Friday, 8:30 a.m. - 4 p.m.

SEEKING ASSISTANCE

The Office of Student Assistance and Support (<https://osas.wisc.edu/>) assists students with matters outside of the classroom. They assist with a variety of concerns and connecting students with resources on campus. A great place to start when you don't know where to go.

If you need personal assistance or resources, staff members in the Office of Student Assistance and Support are available on a drop-in basis, Monday-Friday. Reach out if you are dealing with a financial crisis, sudden health issues, housing/food insecurity, or other sensitive situations.

A student can seek help at many places on campus, for both personal and academic problems. For answers to general questions on many topics, a good place to start is Ask Bucky (<https://info.wisc.edu/ask-bucky/>), which is an excellent general referral service.

For personal concerns, Mental Health Services, a unit of University Health Services (<http://www.uhs.wisc.edu/>), offers individual, group and couple counseling services. Experienced counselors, psychologists, and psychiatrists can assist students in addressing depression and

managing anxiety, and in developing self-awareness and understanding, independence, and self-direction. Our experienced staff is committed to understanding and respecting every individual. Mental Health Services is located at 333 East Campus Mall; 608-265-5600. In addition, an on-call dean in Student Assistance and Judicial Affairs is usually available by telephone (608-263-5700) or on a drop-in basis (75 Bascom Hall) Monday–Friday, 8:30 a.m.–4:30 p.m. UHS also offers students at 24/7 crisis line for mental health support. 608-265-5600 (option 9).

For academic problems, many places can offer help. The student should first discuss the problem with the professor or TA. If the problem is not resolved at that time, the student can speak with an academic advisor or the chair of the department. If further assistance is needed, the student should contact one of the academic deans in the school or college.

STUDENT AFFAIRS

STUDENT AFFAIRS

Student Affairs at UW–Madison (<https://students.wisc.edu>) serves students in areas including health and well-being, identity and inclusion, leadership and engagement, and student advocacy. Its multiple departments collaborate broadly across the many programs and campus units that serve students, such as the Division of Diversity, Equity and Educational Achievement (<https://diversity.wisc.edu/>), International Student Services (<https://iss.wisc.edu>), and University Housing (<https://www.housing.wisc.edu/>), to enhance UW–Madison as a welcoming and inclusive community for all students.

ASSOCIATED STUDENTS OF MADISON (ASM)

4301 Student Activity Center
333 East Campus Mall
608-265-4276 (265-4ASM)

Web: asm.wisc.edu (<http://asm.wisc.edu>)

Facebook: Associated Students of Madison (<https://www.facebook.com/ASMStudentGov/>)

Instagram: <https://www.instagram.com/asmstudentgovt/>

- Promotes student voice as it pertains to legislative, diversity, and university affairs
- Distributes funding for student activities, organizations, and events to maximize student involvement in shaping campus life
- Supports elected student representatives
- Serves as the home for student Shared Governance, which ensure that students have a voice in setting and executing campus policies that impact student life
- Supports the Open Seat Food Pantry, which strives to alleviate the stresses of food insecurity for those who need support.
- Provides policy direction to the Student Activity Center, which offers office and meetings space to student organizations
- Coordinates the funding and policy decisions for the student bus pass every semester, which allows students to take unlimited rides on any Madison Metro bus route, in addition to the free campus bus routes

GENDER AND SEXUALITY CAMPUS CENTER

137 Red Gym
716 Langdon Street
Phone: 608-265-3344

Web: mcburney.wisc.edu (<http://mcburney.wisc.edu>)

Facebook: McBurny Disability Resource Center (<https://www.facebook.com/McBurney-Disability-Resource-Center-1408271469436889/>)

Center-1408271469436889/)

Text: (608) 225-7956

- Promotes accessible, open, and welcoming campus community for students with disabilities
- Works with students with a variety of disabilities such as psychological/mental health, learning, chronic health, ADHD, vision, hearing, mobility, etc
- Develops individualized accommodation plans for students with disabilities and provides classroom accommodations to students with disabilities taking undergraduate, graduate, and professional school courses
- Provides information and referral services on disability issues for students, faculty, staff, and campus visitors
- Offers peer education and campus programming around disability issues and inclusive practices

MULTICULTURAL STUDENT CENTER

716 Langdon Street

608-262-4503

Web: msc.wisc.edu (<http://msc.wisc.edu/>)

Facebook: UW–Madison Multicultural Student Center (<https://www.facebook.com/UWMulticultural/>)

Instagram: [@UWMulticultural](https://twitter.com/@UWMulticultural/) (<https://twitter.com/@UWMulticultural/>)

- The MSC includes the Black Cultural Center, APIDA (Asian Pacific Islander Desi American) Student Center, Indigenous Student Center, and Latine Cultural Center. Each identity center hosts events and programs throughout the academic year.
- Provides spaces, services, and events for students to find community and belonging
- Celebrates and honors heritage and history through monthly recognitions including Latine Heritage Month, Native November,

Black History Month, Middle Eastern North African Heritage Month, and APIDA Heritage month

- Organizes 'MCOR' and 'The Meet Up,' welcome week events featuring cultural performances and affiliated student organizations
- Develops leadership development opportunities for student leaders through internships, committees, and affiliated student organization opportunities

OFFICE FOR STUDENT ORGANIZATIONS, LEADERSHIP & INVOLVEMENT

(formerly the Center for Leadership & Involvement)

Student Activity Center

3rd Floor, 333 East Campus Mall

608-263-0365

Web: soli.wisc.edu (<https://soli.wisc.edu>)

Facebook: [facebook.com/UWSOLI](https://www.facebook.com/UWSOLI/) (<https://www.facebook.com/UWSOLI/>)

Twitter: @UWSOLI (<https://twitter.com/uwsoli/>)

Instagram: @uwsoli (<https://www.instagram.com/uwsoli/>)

- Manages the Student Activity Center (3rd and 4th floors of 333 E. Campus Mall), which offers office and meeting spaces to student organizations.
- Facilitates the registration and advising for more than 1,000 student organizations
- Hosts student organization fairs in fall and spring
- Supports leadership development opportunities, such as the Wisconsin Experience Bus Trip and also advises the Student Leadership Certificate Program (SLP)
- Administers the UW-Madison Leadership Certificate

OFFICE OF FRATERNITY & SORORITY LIFE

University Club – 432 East Campus Mall

Phone: 608-265-9019

Email: advisor@fsl.wisc.edu

Web: <https://www.fsl.wisc.edu>

Instagram: https://www.instagram.com/fsl_uwmadison/ (https://www.instagram.com/fsl_uwmadison/)

- Advises more than 100 student leaders who serve in council and community leadership roles
- Plans and implements programming to support the development of members in multiple areas, such as leadership and harm prevention
- Reinforces expectations of the fraternal experience and supports a variety of accountability processes

OFFICE OF INCLUSION EDUCATION

Office of Inclusion Education

716 Langdon Street, Office #123

Email: inclusioneducation@studentaffairs.wisc.edu

Web: <http://inclusioneducation.wisc.edu>

Instagram: https://www.instagram.com/uw_inclusioneducation/

The Office of Inclusion Education elevates and prioritizes inclusion for all students at UW-Madison and provides:

- Workshops for students
- Workshops for faculty and staff who interact with students

- Required first-year student programs, including Our Wisconsin and Free Expression at UW-Madison (<https://inclusioneducation.wisc.edu/programs/>)
- An annual leadership retreat (<https://inclusioneducation.wisc.edu/leadership-retreat/>) for students
- Support for first-generation college students
- Support for students affected by war and displacement
- Online guides and materials about inclusive practices

OFFICE OF STUDENT ASSISTANCE AND SUPPORT

(formerly the Dean of Students Office)

70 Bascom Hall

500 Lincoln Drive

608-263-5700

Email: osas@studentaffairs.wisc.edu

Web: osas.wisc.edu (<https://osas.wisc.edu>)

- Creates a culture of care so students know the Office of Student Assistance and Support is the place to go when you need support
- Connects students who are navigating personal, academic, financial, or health issues, to supportive campus and community resources
- Provides walk-in, email, virtual, and call-in assistance meetings to discuss concerns that students have without judgement
- Supports students who have concerns about their friends and classmates
- Supports Staff and Faculty who have concerns about students

OFFICE OF STUDENT CONDUCT AND COMMUNITY STANDARDS

724 West Johnson

608-263-5701

Email: conduct@studentaffairs.wisc.edu

Web: conduct.students.wisc.edu (<https://conduct.students.wisc.edu>)

- Upholds every student's right to learn in a safe community
- Fosters integrity and accountability
- Challenges and supports students to reflect, integrate and act on their Wisconsin Experience
- Partners with instructors to resolve academic misconduct

OFFICE OF STUDENT TRANSITION & FAMILY ENGAGEMENT

(formerly the Center for the First-Year Experience)

155 Middleton Building

1305 Linden Drive

608-263-0367

Web: newstudent.wisc.edu (<http://newstudent.wisc.edu>)

Instagram: <https://www.instagram.com/uwnewstudent/>

- Collaborates with campus partners to plan and implement Student Orientation, Advising, and Registration (SOAR) for incoming undergraduates and their families
- Oversees the Transfer Transition Program, which provides support services to new transfer students on campus

- Offers seminar courses on the Wisconsin Experience and provides consultation and support to faculty and graduate students who work with first-year students
- Houses the Parent and Family program, which welcomes parents and family members to UW-Madison so they can encourage and reinforce their student's success
- Organizes Wisconsin Welcome, the campus wide welcome week of events for new students to explore campus, make community, and have fun on campus

UNIVERSITY HEALTH SERVICES (UHS)

333 East Campus Mall
608-265-5600

Email: uhs@uhs.wisc.edu

Web: [uhs.wisc.edu](https://www.uhs.wisc.edu) (<https://www.uhs.wisc.edu>)

Facebook: <https://www.facebook.com/UHSMadison> (<https://www.facebook.com/UHSMadison/>)

Instagram: [@uhsmadison](https://www.instagram.com/uhsmadison/) (<https://www.instagram.com/uhsmadison/>)

- Offers comprehensive, high-quality medical, mental health, and prevention services to UW-Madison students
- Most services are available at no additional charge since students pay for UHS services with their tuition and fees
- Services are designed to meet student health needs, including mental health counseling, health screenings, treatment of common health concerns, support for survivors of sexual assault and students recovering from substance dependence, and more

UNIVERSITY RECREATION AND WELLBEING (REC WELL)

797 W. Dayton Street
608-262-8244

- Moves students to play hard, get fit, and live well on campus by fostering a culture of healthy habits through recreational programs and offerings
- All full-time students are Rec Well members (funded by segregated fees) with unlimited access to our state-of-the-art indoor facilities, outdoor multipurpose fields and courts, cardio/strength equipment, swimming pools and diving well, as well as multi-sport gyms and courts
- Offers a wide variety of programs including intramural sports, sport clubs, group fitness, personal training, wellbeing services, nutrition services, athletic training, lessons (swim, tennis, and ice skating), first aid/CPR/AED certification, and lifeguard training classes
- We provide inclusive and accessible programs to the Madison community and have a variety of accessibility options across our programs, services, and facilities
- Employs more than 1,200 student employees each year in a wide range of program areas, including building operations, member

services, human resources, marketing and communications, fitness

UNIVERSITY VETERAN SERVICES

333 East Campus Mall, Room 10320

Facebook: <https://www.facebook.com/TheWisconsinUnion> (<https://www.facebook.com/TheWisconsinUnion/>)

Instagram: <https://www.instagram.com/wisconsinunion> (<https://www.instagram.com/wisconsinunion/>)

- Hosts more than 1,000 events each year, including theater performances, live music, art classes, outdoor activities, cuisine-related events, free film showings, talks by thought leaders and much more. Most events are free.
- Provides student leadership opportunities, including some positions that provide stipends for 60-80% of in-state tuition
- Offers many ways to enjoy and learn about the outdoors through Outdoor UW, including kayak and canoe rentals

- Provides more than 30 dining options at Union South, Memorial Union and satellite cafes and markets throughout downtown Madison
- Provides spaces for studying, relaxing, and dining at Memorial Union, Union South, and the seasonally open Memorial Union Terrace
- Offers an open arts studio, called Wheelhouse Studios, with spaces that can be used on a drop-in or reservation basis
- Offers outdoor equipment rentals through Outdoor UW, including camping equipment, climbing equipment, snowshoes (seasonally), ice skates (seasonally), and paddling equipment (seasonally)
- Provides billiards and bowling activities, as well as board and video game use at Sett Recreation at Union South
- Employs more than 1,000 students, who work in more than 70 kinds of jobs throughout the Union's departments

ACADEMIC CALENDAR

ACADEMIC CALENDAR

Establishment of the academic calendar (<https://www.secfac.wisc.edu/academic-calendar/>) for the University of Wisconsin–Madison falls within the authority of the faculty as set forth in Faculty Policies and Procedures. Construction of the academic calendar is subject to various rules and guidelines prescribed by the Board of Regents, the Faculty Senate and State of Wisconsin legislation. The Faculty Senate approves an academic calendar which spans a future five-year period.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

OVERVIEW

Students curious to discover how our living world works and how they can improve it – from the smallest microbe to ecosystem-wide weather patterns – will find a home in the College of Agricultural and Life Sciences. Students explore global questions in these five CALS areas of study:

- Health and nutrition
- Food and agriculture
- Biological sciences
- Sustainability, natural resources, and the environment
- Business, communication, and society

CALS brings together students, faculty, and staff from diverse backgrounds to create an enriching and welcoming culture that produces socially aware graduates who will make an impact locally and globally.

CALS students are passionate about using science to improve the world, and CALS programs encourage students to pursue their passions in the classroom and beyond.

CALS students gain critical thinking, research, and communication skills that lead them to careers in a wide variety of industries and public service – including biotechnology, healthcare, food, and agriculture – and prepare them well for graduate and professional studies at top-ranked institutions.

Students in all majors graduate on average in four years.

CALS faculty are involved in all aspects of student education, including teaching in classrooms, hosting research opportunities in labs, leading study abroad experiences, and providing professional mentorship to students.

CALS promotes working across disciplines; half of CALS students double-major or complete at least one certificate (similar to a minor).

As evidence of a strong community, CALS awards over \$1.2 million in scholarships supported by alumni and friends eager to give new students the same positive experiences they enjoyed. These awards are in addition to university scholarships, grants, and loans.

CALS Signature Experiences reflect the core values of a CALS education and offer a variety of options for students in all majors:

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCE

All CALS majors include a senior-level capstone course that integrates interdisciplinary knowledge to address a problem of societal relevance and also helps prepare students for their future careers. Additionally, most students complete independent research under the guidance of internationally-recognized faculty researchers.

BUILD COMMUNITY AND NETWORKS

With more than 20 CALS-sponsored student organizations, students can build their professional networks early and enhance their leadership skills. Students also engage with faculty mentors, often for exploration of majors and career pathways.

CUSTOMIZE A PATH OF STUDY

More than half of CALS students double-major or complete at least one certificate (similar to a minor) to meet their goals and interests. To augment bachelor of science degrees for top students, CALS offers honors programs in research and in many majors.

MAKE A STRONG START

All CALS students take a First-Year Seminar to explore different areas of study, learn about how to access student services, and make friends. There are several seminars to choose from, including QuickStart (<https://cals.wisc.edu/academics/undergraduate/quick-start/>), an online course that allows students to begin their college career the summer before they arrive on campus.

GAIN GLOBAL PERSPECTIVE

Because CALS disciplines have global reach, students take at least one course with a purposeful international focus, and many students choose to study abroad. CALS offers more than 34 abroad programs specifically designed to fulfill CALS students' academic, professional and personal goals. In total, CALS students can choose from more than 250 UW–Madison study abroad programs.

CALS students are growing the future through a better understanding of living things. Explore our majors and certificates (p. 45) to learn more.

- Science Communication, Certificate (p. 184)
- Soil Science, BS (p. 239)
- Wildlife Ecology, BS (p. 164)

to take advantage of all that CALS has to offer students while they explore life science and agricultural science options.

Admissions for incoming first-year and transfer students are handled centrally through the UW-Madison Office of Admissions and Recruitment (<https://admissions.wisc.edu/>). However, through this process students will be directly admitted into CALS if they choose a CALS major, including the CALS undecided option. CALS majors do not have enrollment caps, and most do not have special admissions criteria.

All students, including incoming first-year and transfer students, with questions about study in the College of Agricultural and Life Sciences are encouraged to contact the CALS Office of Academic Affairs at academicaffairs@cals.wisc.edu. Prospective students can also connect with the college and learn more in a variety of other ways, including attending informational sessions, taking a tour, and connecting with student ambassadors.

For students transferring from another university or college, transfer credits are evaluated by the UW-Madison Registrar's Office (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>) after acceptance. Transfer students must complete all CALS degree requirements, including earning at least 30 credits at UW-Madison.

Students may also transfer to the College of Agricultural and Life Sciences from other schools and colleges at UW-Madison. For more information, contact the academic advisor in your intended major or the CALS Office of Academic Affairs (academicaffairs@cals.wisc.edu), or visit the CALS transfer information page (<https://cals.wisc.edu/academics/undergraduate/visit-and-apply/transfer-students/>).

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Opportunities to apply classroom learning to real-world settings are at the core of a CALS education. We offer a variety of CALS Signature Experiences for students in all majors to live the Wisconsin idea and fulfill the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/>).

These opportunities fall into five major categories:

We want our students to make a strong start and every CALS first-year student can achieve that through a CALS First-Year seminar to explore different areas of study, learn about how to take advantage of campus resources, and make friends. There are several seminars to choose from, including QuickStart (<https://cals.wisc.edu/academics/undergraduate/quick-start/>), which allows students to begin their college career the summer before they arrive on campus.

CALS students learn through hands-on, real world experiences. A majority of CALS students earn credit for research experiences in labs and internships.

Through student organizations, peer advising and mentoring, and residential learning communities, students build their community and networks.

Students gain a global perspective by taking courses with an international focus and many students choose to study abroad. CALS offers more than 34 abroad programs, and students may also choose from general UW-Madison study abroad opportunities.

ENTERING THE COLLEGE

ADMISSION

CALS offers majors in a [variety](#) of topics within the life sciences and agriculture. Students who know they are interested in CALS areas of study but are uncertain about a specific major may choose "undecided" in CALS

Finally, many CALS students take advantage of the ability to customize their path of study by participating in an honors program (p. 51), pursuing certificates or second majors, and choosing elective courses that match their interests and meet their goals.

POLICIES AND REGULATIONS

POLICIES AND REGULATIONS

Policies may be found on the Office of Academic Affairs KnowledgeBase (<https://kb.wisc.edu/cals/academicaffairs/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth–Humanities/Literature/Arts: 6 credits
 - Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth–Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

UNIVERSITY DEGREE REQUIREMENTS

- Total Degree
- To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
- Residency
- Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

- Quality of Work
- Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

Students are advised to complete introductory and basic course requirements (i.e., biological and physical sciences, chemistry, mathematics, communications, etc.) early in their academic programs.

Students must also satisfy a minimum of 15 credits in the selected major that are not double counted with CALS or General Education requirements. All CALS students must also complete a capstone course in their major that meets the stated criteria.

CALS FIRST-YEAR SEMINAR REQUIREMENT

The CALS First-Year Seminar gives students a strong start to their undergraduate experience. Courses that meet the first-year seminar requirement provide an introduction to the opportunities and resources available at UW-Madison. They foster connections, community, and positive relationships through small-group discussions. Students

collaborate with instructors and peers to explore complex questions and develop important academic and personal skills. Students can meet the first-year seminar requirement through a variety of experiences, which have been approved by the college. Students can choose from stand-alone seminar courses, courses associated with learning communities/student groups, or First-Year Interest Groups (FIGS).

APPROVED FIRST-YEAR SEMINAR COURSES

Code	Title	Credits
First-Year Seminar Courses		
AN SCI 135	Grand Challenges and Career Opportunities in Animal and Dairy Sciences	1
BIOCHEM 100	Biochemistry Freshman Seminar	1
COUN PSY 125	The Wisconsin Experience Seminar	1
F&W ECOL 101	Orientation to Wildlife Ecology	1
GENETICS 155	Freshman Seminar in Genetics	1
INTEGSCI 100	Exploring Biology	2
INTEGSCI 140	Exploring Service in STEM	1
INTER-AG 155	Issues in Agriculture, Environment, and Life Sciences	1
INTEREGR 170	Design Practicum	3
INTER-HE 201	Belonging, Purpose and the Ecology of Human Happiness: EcoYou	3
LSC 155	First-Year Seminar in Science Communication	1
MICROBIO 150	Microbiomes and Microbiology - First-Year Seminar	1

Learning Community/Student Group Courses

The following learning community/student group courses are approved as CALS First-Year Seminars. Only the specific course numbers and titles listed, including Topics titles (in parentheses), are approved.

AFROAMER 271	Selected Topics in African American Culture (Topic: Multiculturalism & Social Justice (Seminar for Multicultural Learning Community))	3
COUN PSY 115	Human Resources Development: Educational Effectiveness (Topics: First-Year Transition Active Student; PEOPLE First Year Experience Seminar)	1
INTEGSCI 110	BioHouse Seminar: Biology for the 21st Century	1
INTER-AG 117	GreenHouse Roots Seminar	1
INTER-AG 140	CALS QuickStart: Foundations	1
INTER-AG 175	WISE Seminar	1
INTER-LS 130	CRC First-Year Seminar: Foundations of a Liberal Arts Education	1

First-Year Interest Groups (FIGS)

All First-Year Interest Groups (FIGS) meet the CALS first-year seminar requirement. For more information, see <http://figs.wisc.edu/>.

CALS INTERNATIONAL STUDIES REQUIREMENT

Required of all CALS majors, the intent of the CALS international studies requirement is to deepen student knowledge and understanding of international issues related to scientific and sociological themes in CALS; develop openness, awareness and respect with regard to other cultures; and prepare students to address global challenges as engaged employees and active citizens.

The following learning outcomes must be satisfied for courses to fulfill the CALS International Studies requirement:

- Identify and explain, to diverse audiences, global issues pertaining to one or more CALS priority themes (<https://cals.wisc.edu/about-cals/initiatives/strategic-plan/priority-themes/>)
- Demonstrate critical thinking and comparative perspectives with respect to experiences or cultural approaches to international challenges

Courses that satisfy the 3-credit CALS international studies requirement must meet all of the following criteria:

- Be connected to one or more of the CALS priority themes
- Include substantial international comparative content
- Include substantial non-U.S. content (typically >50% of the content or assignments or grade in the course)
- Facilitate active student engagement consistent with the learning outcomes and university assessment criteria
- Fulfill 3 credits (either by a single course or a pair of courses)

APPROVED INTERNATIONAL STUDIES COURSES (EFFECTIVE FALL 2019 UNLESS OTHERWISE NOTED)

Code	Title	Credits
The 3 credit requirement may be fulfilled as either a stand-alone 3 credit course or as a set of courses as listed below.		
A A E/ENVIR ST 244	The Environment and the Global Economy	4
A A E 319	The International Agricultural Economy	3
A A E/ NUTR SCI 350	World Hunger and Malnutrition	3
A A E 352	Global Health: Economics, Natural Systems, and Policy ²	4

DY SCI/AN SCI/ FOOD SCI/ SOIL SCI 472 & DY SCI/AN SCI/ FOOD SCI/ SOIL SCI 473	Animal Agriculture and Global Sustainable Development and International Field Study in Animal Agriculture and Sustainable Development	3

¹ Approved for enrollments Summer 2020 and later.

² Approved for enrollments Summer 2021 and later.

CALS CAPSTONE LEARNING EXPERIENCE REQUIREMENT

A CALS capstone is a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance with the intent of facilitating the transition to post-baccalaureate life. Capstone courses are approved by the college for each major.

A capstone experience should:

- Develop problem solving skills
- Expose the student to multidisciplinary approach
- Develop teamwork and interpersonal skills, including the ability to communicate effectively to multiple audiences
- Develop skills in accessing and using information resources (e.g., electronic databases, library resources, national repositories)
- Address societal, economic, ethical, scientific, and professional issues
- Communicate and extend the capstone experience via written, oral, and/or multimedia reports by each student

The capstone experience will normally be completed during the student's final 2 or 3 semesters. The intent is to have the student utilize and integrate their undergraduate learning into a culminating, or capstone, experience. Students should consult with their departmental faculty advisors for specific information regarding this requirement. Where appropriate, students should submit a copy of the final project materials to the campus library (via Minds@UW (<https://www.library.wisc.edu/research-support/minds/>) or similar).

DEGREES OFFERED

The College of Agricultural and Life Sciences offers four bachelor of science (BS) degree programs:

BS DEGREE

BS-AGRICULTURAL BUSINESS MANAGEMENT (P. 56)

BS-BIOLOGICAL SYSTEMS ENGINEERING (P. 117)

BS- NUTRITION AND DIETETICS (P. 190)

Three of the college's majors have specialized BS degree programs, as listed above. The general BS degree program provides a broad and general foundation for the other majors in the college.

MULTIPLE DEGREES OR MAJORS

Under certain circumstances it may be possible for a student to earn more than one undergraduate major or degree. It is expected that the programs be significantly different from each other and that approval for simultaneous majors or degrees be received prior to the student having earned 86 credits. More information is available below and through CALS policies and procedures (<https://kb.wisc.edu/cals/academicaffairs/73885/>).

EARNING TWO UNDERGRADUATE MAJORS SIMULTANEOUSLY

CALS permits undergraduates to pursue two CALS majors simultaneously. Both majors must be in the same degree program; two degrees must follow the policy outlined below. The following policies and procedures have been established for this program:

1. The student must complete an application form and have approval in advance from their CALS major advisor, the advisor of their desired second major, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
2. The student must satisfy all requirements of both majors. The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements.

The diploma awarded will be based on the certification of completion of the degree. The transcript will note the completion of requirements for two or more majors.

EARNING A NON-CALS MAJOR WHILE COMPLETING A DEGREE PROGRAM IN THE COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

The College of Letters & Science (L&S) and the School of Education permit undergraduates currently enrolled in the College of Agricultural and Life Sciences to complete certain additional undergraduate majors offered by L&S or the School of Education and have this noted on the transcript. The following policies have been established for this program:

1. The student must complete an application form and have advance approval from their CALS major advisor, their non-CALS major advisor, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
2. The non-CALS major is not to substitute for any major in CALS.
3. The student must satisfy all requirements of the non-CALS major, both the requirements established by the department (i.e., certain courses) and those established by the other school/college (e.g. for L&S, 15 credits of advanced work in the major in residence at UW-

Madison), but is not required to complete the other school/college's degree requirements. The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements for the CALS major.

EARNING A GLOBAL HEALTH ADDITIONAL MAJOR WHILE COMPLETING A DEGREE PROGRAM IN ANOTHER SCHOOL/COLLEGE AT UW-MADISON

Students in another school/college at UW-Madison are eligible to declare a Global Health major if they have fewer than 86 credits toward graduation, receive permission from their home school/college, and maintain a primary major in the home school/college. The process for obtaining special permission to declare a Global Health major is dependent on the student's home school/college. Students must also contact the Global Health major advising unit about the steps required to declare an additional major and fulfill all the Global Health major requirements.

EARNING TWO UNDERGRADUATE DEGREES SIMULTANEOUSLY

A student who wishes to earn **two undergraduate degrees simultaneously** (in contrast to earning two undergraduate majors simultaneously) should consult with the CALS Office of Academic Affairs as early as possible in their academic career regarding feasibility.

If the two degrees to be earned are within the College of Agricultural and Life Sciences, at least 30 additional credits and all course and grade point requirements must be completed. Thus, a minimum of 150 credits (for most majors) would be required. Some courses may satisfy requirements for both degrees; however, students must complete 15 unique credits in each major. **A student must have an advisor in both major fields.** To work on two degrees simultaneously within the college, a student should seek permission as early as possible to ensure that it is feasible to complete both degrees.

If the two degrees to be earned are from two different colleges (one degree in Agricultural and Life Sciences and one degree in another school or college on this campus), the academic dean in both colleges must approve the student's plan. Note that not all colleges will allow dual degrees. Where allowed, the following academic policies shall be followed (additional policies may exist):

1. Admission into the other college or school shall be based on that particular college or school admission criteria.
2. A student may seek two baccalaureate degrees simultaneously (in contrast to two majors), each from a different college, provided that the two degree programs differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits and that the student's program is **approved by both colleges before the student has earned 86 credits**. The degrees from each college will be awarded simultaneously.

Applications and additional information pertaining to the earning of two undergraduate degrees simultaneously are in CALS policy and procedures (<https://kb.wisc.edu/cals/academicaffairs/73885/>) and available from the Office of Academic Affairs, 116 Agricultural Hall.

SECOND BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Students with a bachelor of science (BS) or bachelor of arts (BA) degree from the University of Wisconsin-Madison or other accredited institution

may, if eligible, pursue a second bachelor's degree from the College of Agricultural and Life Sciences.

Students who have been out of school for one semester or more must apply for admission (or readmission) with the regular undergraduate application. Continuing UW–Madison students do not need to submit this form. All candidates need an academic dean's permission from the Office of Academic Affairs to work toward a second bachelor's degree. A minimum of a 2.0 GPA is required. Several college majors require a higher GPA.

The following requirements for the second bachelor's degree must be met:

- Students must complete a minimum of **30 credits in residence**, of which 15 or more must be in the major field as specified by the major department. These credits are in **addition** to credits earned for the first degree.
- Candidates must **complete all university, college, major, and curricular degree program requirements**. Credits earned for the first degree will apply toward appropriate requirements for the second. However, students must take at least 30 additional credits, as noted above. Students with their first BS degree from the college must select a new major or degree program.

All second-degree candidates must be accepted by the department offering their program of interest and have their program approved by the college before beginning the program.

RESOURCES

RESOURCES STUDENT SERVICES

Regardless of major, CALS professionals can help students navigate their UW–Madison educational experience. As the academic dean's office for CALS, the Office of Academic Affairs (<https://cals.wisc.edu/academics/undergraduate/>) assists all CALS and CALS-interested students with questions or concerns around academics, major exploration, careers, scholarships, study abroad, or other areas of student life. Individual advising is tailored to fit students' specific needs and circumstances.

ACADEMIC ADVISING

Every student has an assigned academic advisor, and students are encouraged to consult with them regularly. In CALS, all students declared in a major are assigned an advisor who specializes in that program. Students who are undecided and exploring majors in CALS are assigned to a college advisor who helps them find the right major for their academic and career goals. Academic advisors assist students with choosing courses to match their interests and fulfill all requirements for graduation. Advisors also talk with students about achieving their educational objectives, engaging in the full Wisconsin Experience, and planning for the future. CALS has a network of advisors (<https://cals.wisc.edu/academics/undergraduate/current-students/advising/>) for academics, career exploration, study abroad, and more, all of whom work together to support students across their UW–Madison experience.

Students are also encouraged to seek advice from other university faculty and staff. There are many people on campus who are willing and able to help students who proactively seek advice.

CAREER SERVICES

CALS Career Services (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>) provides resources and guidance for students

to explore career interests and develop skills as they seek employment, internships, or admission to graduate or professional programs. Academic advisors and faculty in every CALS major also provide specialized career and pre-professional advising. CALS students and alumni have access to Handshake (<https://careers.wisc.edu/handshake/>), an online job and internship posting tool that includes thousands of listings. The Center for Pre-Health Advising (<https://prehealth.wisc.edu/>) is an excellent resource for CALS students interested in exploring professional careers in medicine, including human health and veterinary medicine.

DEAN ON CALL

"Dean on call" is a drop-in service that provides the opportunity for all CALS students to have a one-on-one session with an academic affairs professional to discuss an academic policy or problem, seek advice about a personal issue, or receive assistance when confronted with a special situation. See the CALS Office of Academic Affairs website (<https://cals.wisc.edu/academics/undergraduate/current-students/academic-policies/>) for more information.

SCHOLARSHIPS AND FINANCIAL RESOURCES

CALS has an extensive scholarship program (<https://cals.wisc.edu/academics/undergraduate/funding-your-education/cals-scholarships/>) with more than \$1.2 million in awards available to CALS students annually, including first-year students. This is in addition to university scholarships, grants, loans, and employment available at the Office of Student Financial Aid (<https://financialaid.wisc.edu/>). One yearly application allows students to be considered for any scholarships administered by the college. Scholarships that are awarded based on financial need require a current Free Application for Federal Student Aid (FAFSA (<https://studentaid.gov/>)) on file with the university.

STUDY ABROAD

Today's college graduates must be prepared for the international community in which they will live and work. Study, intern, and research abroad programs offer students unique opportunities to enrich their education by experiencing other cultures and broadening their understanding of agricultural and life sciences outside the United States. CALS Study Abroad (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>) offers more than 34 short- and long-term programs in more than 20 countries. In total, CALS students can choose from more than 250 UW–Madison study abroad programs (<https://studyabroad.wisc.edu/programs/>). All programs carry UW–Madison academic credit, and many fulfill academic and major requirements (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/>). CALS offers scholarships to CALS students for study abroad to reduce financial barriers to participation.

HONORS

The CALS Honors Program (p. 51) allows highly motivated students to continue challenging themselves through research and coursework. The objective of the Honors Program is to help students develop critical thinking and problem-solving abilities and to provide students the challenge of designing, conducting, and reporting research in collaboration with faculty from one of the world's leading research institutions.

STUDENT ORGANIZATIONS

Student organizations (<https://cals.wisc.edu/academics/undergraduate/student-life/student-organizations/>) provide a vehicle for students to gain leadership experience, develop professional skills, and build on personal

interests. CALS sponsors more than 20 organizations that help students meet their professional and personal interests.

HONORS

HONORS

The CALS honors program allows students to continue challenging themselves through research and coursework. The objective of the honors program is to help students develop critical thinking and problem-solving abilities through specialized courses and to provide students the challenge of designing, conducting, and reporting research in collaboration with faculty from one of the world's leading research institutions.

HONORS

CALS has two different avenues to earn an honors degree designation. Students may complete either based on their interests and goals. Students are not allowed to complete both types of honors. In either option, a student must successfully complete a senior honors thesis approved by the research mentor or committee.

Honors in Research

Students engage in the university's great research tradition through the completion of two research projects: an introductory project and a senior thesis project. Students identify a faculty mentor to oversee their research efforts and support their progression through the program. In addition to the hands-on research experience, students are required to enroll in coursework directed at furthering their knowledge in quality and ethical scientific discovery. Students who successfully complete Honors in Research (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/honors-research/>) will receive an honors designation on their diploma.

Honors in the Major

Students complete a specified number of honors credits in a designated set of courses to gain advanced knowledge and inquiry within their major field of interest. A limited number of CALS majors offer this program option; more information is located on the requirements tab for the major. Students who successfully complete honors in the major will receive an honors designation on their transcript and [diploma. A list of majors that offer this option can be found here.](#)

For complete information contact the Office of Academic [Affairs](#).

DEAN'S LIST

Students who achieve at a high level academically are recognized by the dean. Selections to the dean's list are announced at the close of each semester. The student's achievement for only the single semester is considered and is noted on the transcript. To be placed on the dean's list, a student must have achieved at least a 3.5 GPA or above for the semester's study load of not less than 12 credits, on a regular grade basis (A, AB, B, BC, C, D, F), regardless of overall grade point average, and must not have received a grade of F or an Incomplete for any course, or a U (for a pass/fail course) or an N (for Credit/No Credit graded course that was not passed).

GRADUATION WITH DISTINCTION OR HIGHEST DISTINCTION

Students who graduate with a cumulative GPA that places them in the top 20 percent of the graduating class in the college will graduate with "distinction"; those in the upper 5 percent, with "highest distinction." These students must have at least 60 credits on the UW-Madison

campus. The notations on the student's transcript will read "graduated with distinction" or "graduated with highest distinction" in the "degrees awarded" section of the transcript. The registrar makes these calculations and updates final transcripts approximately 45 days after the grading deadline for each semester.

DISTINCTIVE SCHOLASTIC ACHIEVEMENT

A preliminary list of those degree candidates who may be eligible for graduation with distinction is prepared by the registrar prior to commencement. These students are eligible to wear a cardinal stole with their caps and gowns at commencement. Inclusion on the distinctive scholastic achievement list does not guarantee graduation with distinction, which is determined after final grades are awarded.

AGRICULTURAL AND APPLIED ECONOMICS

The Department of Agricultural and Applied Economics (AAE) at the University of Wisconsin-Madison was founded in 1909 and was the first department of agricultural economics in the United States. The department offers two undergraduate programs—Agricultural and Applied Economics (p. 52) and Agricultural Business Management (p. 56). Both majors will give students a strong base in economics and how it is applied to real-world situations. The teaching and research in AAE focuses on the areas of development economics, environmental economics, and managerial economics.

The department also offers two certificates to undergraduate students enrolled at the University of Wisconsin-Madison: the Certificate in Business Management for Agricultural and Life Sciences (p. 60) and the Certificate in Development Economics (p. 61).

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Agricultural and Applied Economics, BS (p. 52)
- Agricultural Business Management, BS (p. 56)
- Business Management for Agricultural and Life Sciences, Certificate (p. 60)
- Development Economics, Certificate (p. 61)

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The Department of Agricultural and Applied Economics offers a number of scholarships to students declared in both of our majors, Agricultural & Applied Economics (p. 52) and Agricultural Business Management (p. 56). All of our students are encouraged to apply each year for department and CALS scholarships through the Wisconsin Scholarship Hub (WiSH). Students in either of our majors or who have declared the Certificate in Business Management for Agricultural & Life Sciences (p. 60) are also eligible to apply for the Renk Scholarship Program

(<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

RESOURCES

There are a number of student organizations of interest to students in our majors. For more information, please visit the CALS Student Organization (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/student-organizations/#association-of-women-in-agriculture>) website.

AGRICULTURAL AND APPLIED ECONOMICS, BS

Agricultural and applied economics (AAE) majors learn about the principles of economics and how to apply them to real-world problems and public policy debates. This training equips students to analyze the economic factors impacting a wide range of issues, including environmental challenges and sustainability, energy and climate change, globalization and trade, business economics and finance, global poverty and hunger, community and regional economic development, biotechnology, and food systems.

A degree in agricultural and applied economics helps students prepare to work as environmental economists, environmental managers, agricultural economists, policy and business analysts, researchers, managers, consultants, and auditors with nonprofit organizations, government agencies, co-operatives, multinational firms, agribusiness companies, financial institutions, and the food or retailing industry. Students also go on to pursue graduate-level degrees in economics, public policy, business, or law.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Students are encouraged to apply their course learning to real life through research projects, independent studies, and internships with guidance from faculty and staff members. During their final year, majors complete a senior capstone course where they work closely with fellow students on a semester-long project and also hear from program alumni.

BUILD COMMUNITY AND NETWORKS

Students get to know faculty and instructors through the courses they take, and they can build their networks by participating in student organizations and the department's commodity trading challenge team.

Individuals selected for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), operated by the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>), receive mentorship and financial support, as well as internship and networking opportunities.

CUSTOMIZE A PATH OF STUDY

AAE students customize their academic experience to fit their career goals by selecting one of four concentrations within the major:

environmental economics, development economics, managerial economics, or applied economics.

MAKE A STRONG START

A number of first-year seminar courses are available to help new students understand academic programs, access student services, and develop time management and study skills.

GAIN A GLOBAL PERSPECTIVE

Many AAE majors study abroad to gain an international perspective and prepare to participate in today's global economy. Students can explore studying abroad as an AAE major utilizing the AAE Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the

requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Use economic concepts to think critically about real-world problems and public policy debates.
- 2. Use appropriate quantitative techniques to analyze economic problems.
- 3. Communicate results effectively orally and in writing.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist students and their advisors. Students should use their DARS report, the degree planner, Guide requirements, and the course search & enroll tools to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. Students must complete at least 120 total credits to be eligible for graduation.

Note: To meet the math requirement you may need three or four semesters of math coursework.

Each agricultural and applied economics major receives one-on-one guidance from an academic advisor. The advisor helps students plan their coursework and identify opportunities to get involved in department and campus activities.

The agricultural and applied economics department offers a one-credit course in career development for majors. Students in the course hear from department alumni and others about their career paths and receive resume writing assistance and interviewing tips.

CAREER OPPORTUNITIES

Agricultural and applied economics graduates have great careers as environmental economists, agricultural economists, policy and business analysts, consultants, researchers, managers, traders, and auditors for nonprofit organizations, government agencies, multinational firms, financial institutions, agribusiness companies, co-operatives, and food companies. Graduates also pursue advanced degrees in economics, public policy, business, or law.

AAE graduates are recognized for their skills in data analysis, business and economic forecasting, strategic planning, management, and leadership.

Visit aae.wisc.edu/undergrad/advising (<https://aae.wisc.edu/undergrad/advising/>) for detailed advising information!

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE STUDENT ORGANIZATIONS**

There are numerous campus student organizations of interest to agricultural and applied economics majors, including Economics Student Association, Global Economic Forum – Madison, and Women in Economics. A full list of organizations is available on the Wisconsin Involvement Network website (<https://win.wisc.edu/organizations/>).

COMPETITIVE TEAMS

Each year, a team of UW–Madison students participates in the annual CME Group University Trading Challenge (<https://www.cmegroup.com/events/university-trading-challenge.html>), a simulated trading competition that pits hundreds of college teams from around the world against one another as they make real-time commodity trading decisions.

RESEARCH EXPERIENCE

AAE students are able to gain social science research experience on both domestic and international topics by working with a faculty member on a specific project.

INTERNSHIPS

Agricultural and applied economics majors can complete an internship during their undergraduate years.

GLOBAL ENGAGEMENT

Many agricultural and applied economics students choose to study abroad. These programs help students gain an international perspective and prepare them to participate in today's global economy. Students can find more information on the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>). Study abroad options include programs that focus on sustainable development, food systems, agriculture, health and wellness, and community and economic development.

AAE students who select development economics as their area of concentration take numerous international-focused courses that address the global economy, population, and poverty.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

AAE students have numerous volunteer activities to choose from. The Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS**RESOURCES AND SCHOLARSHIPS**

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. The Department of Agricultural and Applied Economics awards an average of \$60,000 in scholarships per year to students in the department. Students apply for CALS and AAE scholarships through a single application in the Wisconsin Scholarship Hub

(WiSH). Learn more about college scholarships (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

AAE majors are also eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The program, offered through the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>), is designed for high-performing students with an interest in agriculture or agribusiness. In addition to financial support, Renk Scholars are provided networking opportunities that help them find internships and other experiences to build their business and leadership skills.

AGRICULTURAL BUSINESS MANAGEMENT, BS

Agricultural business management (ABM) majors learn to apply the fundamentals of business to agriculture and related industries. Students study business operations, finance and economic decision analysis, analytical and managerial tools, organization of the food system, and commodity markets.

Offered through the Department of Agricultural and Applied Economics, ABM coursework includes agribusiness, economics, statistics, accounting, finance, and management. Majors can take some courses through the School of Business, including business law, fundamentals of accounting and finance, and fundamentals of management. ABM majors learn managerial economics, how businesses make decisions and minimize risk, and how to use applied mathematics and statistics to analyze prices and markets.

The agribusiness industry – which encompasses enterprises related to farming and the bio-economy – needs staff who are educated in both business and agriculture. The ABM major prepares students for great careers in management, business analysis, marketing, commodities trading, sales, consulting, banking, and finance. In addition to agribusiness firms, ABM graduates find employment with food companies, tech companies, co-operatives, government agencies, and financial institutions.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Students are encouraged to apply their course learning to real life through research projects, independent studies, and internships with guidance from faculty and staff members. During their final year, majors complete a senior capstone course where they work closely with fellow students on a semester-long project and also hear from program alumni.

BUILD COMMUNITY AND NETWORKS

Students get to know faculty and instructors through the courses they take, and they can build their networks by participating in student organizations and the department’s commodity trading challenge team.

Individuals selected for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), operated by the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>), receive mentorship and financial support, as well as internship and networking opportunities.

CUSTOMIZE A PATH OF STUDY

Core courses focus on macroeconomics, microeconomics, finance, accounting, commodity markets, and economic analysis, planning, and management. ABM students customize their academic experience to fit their career goals by completing additional coursework in finance, accounting, management, marketing, business law, and human resources.

MAKE A STRONG START

A number of first-year seminar courses are available to help new students understand academic programs, access student services, and develop time management and study skills.

GAIN GLOBAL PERSPECTIVE

There are several internationally focused courses that ABM majors can take within the Department of Agricultural and Applied Economics. Some students choose to study abroad, working with their advisor and the CALS study abroad office to identify appropriate programs. Students can explore studying abroad as an ABM major utilizing the Agricultural Business Management Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Evaluate how insights from economics can support effective decision-making in businesses, communities, and societies.
2. Apply economic concepts and methods to real world situations in agricultural business management.
3. Analyze, interpret, and effectively summarize quantitative data.

4. Employ economic models and mathematical techniques to structure and solve questions of resource allocation.
5. Describe the structure of the agricultural business sector and how it functions.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist students and their advisors.

Students should use their DARS report, the degree planner, Guide requirements, and the course search & enroll tools to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Note: Students must complete MATH 213, MATH 217, or MATH 221 or ECON 205. Students may satisfy the required level of math proficiency through the math placement exam. On the other hand, this level of competence may require as many as three or four semesters of coursework in mathematics, depending on where students begin their course sequence.

Students must complete at least 120 total credits to be eligible for graduation.

Total Credits 117-123**ADVISING AND CAREERS****ADVISING AND CAREERS****ADVISING**

Each agricultural business management major receives one-on-one guidance from an academic advisor. The advisor helps students plan their coursework and identify opportunities to get involved in department and campus activities.

The agricultural and applied economics department offers a one-credit course in career development for majors. Students in the course hear from department alumni and others about their career paths and receive resume writing assistance and interviewing tips.

CAREER OPPORTUNITIES

Agricultural business management graduates have great careers in management, business analysis, marketing, commodities trading, sales, consulting, banking, and finance. They find positions with agribusiness firms, food companies, tech companies, co-operatives, government agencies, and financial institutions.

Graduates are recognized for their skills in management, leadership, public speaking, sales, marketing, social media, customer service, strategic planning, risk analysis, business process management, and management accounting.

Visit aae.wisc.edu/undergrad/advising (<https://aae.wisc.edu/undergrad/advising/>) for detailed advising information.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE
STUDENT ORGANIZATIONS**

There are numerous campus student organizations of interest to agricultural business management majors, including Alpha Gamma Rho, Association of Women in Agriculture, Collegiate Farm Bureau, and National Agri-Marketing Association. A full list of organizations is available on the Wisconsin Involvement Network website (<https://win.wisc.edu/organizations/>).

COMPETITIVE TEAMS

Students can join the UW-Madison team that participates in the annual CME Group University Trading Challenge (<https://www.cmegroup.com/events/university-trading-challenge.html>). This simulated trading

competition pits hundreds of college teams from around the world against one another as they make real-time commodity trading decisions.

RESEARCH EXPERIENCE

Students are able to gain social science research experience on both domestic and international topics by working with a faculty member on a specific project.

INTERNSHIPS

Agricultural business management majors are encouraged to complete an internship during their undergraduate years, and they typically do so during the summer after their sophomore or junior years. Internships allow students to explore career options, gain professional skills, and develop their networks.

**COMMUNITY ENGAGEMENT AND
VOLUNTEERING**

Students have numerous volunteer activities to choose from. The Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

GLOBAL ENGAGEMENT

ABM majors can choose to study abroad. Students work with their advisor and the CALS study abroad office to identify appropriate programs. More information is available on the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

RESOURCES AND SCHOLARSHIPS**RESOURCES AND
SCHOLARSHIPS**

Students in the College of Agricultural and Life Sciences (CALS) receive more than \$1.25 million in scholarships annually. The Department of Agricultural and Applied Economics awards an average of \$60,000 in scholarships per year to students in the department. Students apply for CALS and department scholarships through a single application in the Wisconsin Scholarship Hub (WiSH). Learn more about college scholarships (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

ABM majors are also eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The program, offered through the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>), is designed for high-performing students with an interest in agriculture or agribusiness. In addition to financial support, Renk Scholars are provided networking opportunities that help them find internships and other experiences to build their business and leadership skills.

BUSINESS MANAGEMENT FOR AGRICULTURAL AND LIFE SCIENCES, CERTIFICATE

Basic business literacy can benefit all graduates, whatever their field or intended career may be. When entering the professional world, CALS students increasingly encounter situations that require an understanding of basic business and management concepts. The certificate in business management for agricultural and life sciences can provide students the business skills that employers value.

The certificate offers students in the College of Agricultural and Life Sciences (CALS) the opportunity to gain business knowledge and have it recorded on their transcript. The certificate is designed specifically for students intending to pursue careers in agriculture and life sciences, and enrollment is open only to undergraduates currently enrolled in CALS. This professional credential is offered by the Department of Agricultural and Applied Economics, the Department of Life Sciences Communication, and the Renk Agribusiness Institute.

HOW TO GET IN

HOW TO GET IN

To declare this certificate, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 45). Contact the advisor listed under the Advising and Careers tab for more information or to declare the certificate.

Students may not earn this certificate in conjunction with a BS in Agricultural Business Management.

REQUIREMENTS

REQUIREMENTS

Code	Title	Credits
Completion of the certificate requires a total of six courses.		
<i>The following four courses are required:</i>		
A A E 101	Introduction to Agricultural and Applied Economics	4
LSC 270	Marketing Communication for the Sciences	3
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	3
GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	3
<i>Select two courses from the following:</i>		5-6
A A E 319	The International Agricultural Economy	
A A E 320	Agricultural Systems Management	
A A E 322	Commodity Markets	

A A E 323	Cooperatives and Alternative Forms of Enterprise Ownership
A A E 335	Introduction to Data Analysis using Spreadsheets
A A E 419	Agricultural Finance
A A E/ECON 421	Economic Decision Analysis
A A E 422	Food Systems and Supply Chains
A A E/ECON 526	Quantitative Methods in Agricultural and Applied Economics
A A E/M H R 540	Intellectual Property Rights, Innovation and Technology
DY SCI 233	Dairy Herd Management I
DY SCI 234	Dairy Herd Management II
DY SCI 535	Dairy Farm Management Practicum
LSC 250	Research Methods in the Communication Industry
LSC 251	Science, Media and Society
LSC 432	Social Media for the Sciences
LSC 435	Brand Strategy for the Sciences

Total Credits

18-19

- No substitutions are allowed for the core courses.
- Students may count no more than two courses toward both their major requirements and these certificate requirements.
- Minimum average 2.000 GPA in all certificate courses.
- 12 credits in the certificate must be taken in residence.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand general business concepts.
2. Understand business management fundamentals in an agricultural and life sciences context.
3. Understand economics, marketing and communication as they relate to business management in agricultural and life science industries.

ADVISING AND CAREERS

ADVISING AND CAREERS

For academic advising information, please visit: aae.wisc.edu/undergrad/advising/ (<https://aae.wisc.edu/undergrad/advising/>)

Students pursuing the certificate in business management for agricultural and life sciences are often interested in careers such as running a research lab, managing the books on their family farm, banking, business analysis, marketing, or management and sales, depending on their major. When combined with their major, the certificate can provide a basic background in business management that many employers find valuable.

Students can use the services provided by the CALS Career Services Office (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>), which include help with creating a resume or cover letter and mock interviews. CALS students also have access to Handshake, an online job/internship posting tool that provides students with hundreds of job and internship listings.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Students declared in the Certificate in Business Management for Agricultural and Life Sciences may choose to do an internship to get some experience in their field of interest. They can use the services provided by the CALS Career Services Office (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>) to help find an internship, including Handshake (<https://wisc.joinhandshake.com/login/>), an online job/internship posting tool that provides students with hundreds of job and internship listings.

RENK SCHOLARSHIP PROGRAM

Students declared in the Certificate in Business Management for Agricultural and Life Sciences are eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

RENK SCHOLARSHIP PROGRAM

Students declared in the Certificate in Business Management for Agricultural and Life Sciences are eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

DEVELOPMENT ECONOMICS, CERTIFICATE

The certificate in development economics gives students a solid foundation of analytical skills that will enable them to better understand the challenges created by world poverty. They will learn how economics can be used to address the problems of poverty and the impact of globalization on growth and development. Students will focus on such issues as the relationship between population growth and economic growth, the major debates about food self-sufficiency and food security, how child labor and gender discrimination limit economic development, and what environmental problems are posed by economic development.

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin–Madison.

HOW TO GET IN

- A student may combine this certificate with any other certificate and/or major. However, students with a major in Agricultural and Applied Economics, a major in Economics, or a major in the Politics and Policy in the Global Economy option in International Studies may count no more than 2 courses toward both their major requirements and the requirements for the certificate in development economics.
- 50% of certificate coursework must be completed in residence.
- Minimum average 2.000 GPA in all certificate courses.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand the impacts of global economic processes, such as trade, foreign investment, and migration, on growth and development.
2. Understand the contributions of private and public investments in areas such as agriculture, education, environmental resources, health care, industrialization, and technology adoption to growth and development, and the methods for measuring those effects.

ADVISING AND CAREERS

ADVISING AND CAREERS

For academic advising information, please visit: aae.wisc.edu/undergrad/advising/ (<https://aae.wisc.edu/undergrad/advising/>)

Students pursuing the certificate in development economics are often interested in careers in international development. Depending on their major, they often find careers in policy analysis, consulting, or working abroad. They can find employment with a variety of employers such as nonprofit organizations, government agencies, cooperatives, or

multinational firms. Many students pursue graduate degrees in economics, public policy, law, or other areas.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE STUDY ABROAD

Many students declared in the certificate in development economics choose to study abroad. Study abroad programs offer students the opportunity to gain an international perspective and can prepare them to participate in today's global economy. International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu/>) serves as the primary study abroad office on campus, offering more than 200 programs in more than 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service learning, and programs with special themes. There are also international programs offered through the College of Agricultural and Life Sciences (CALS) (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>). Study abroad programs in CALS cover a variety of content areas such as sustainable development, food systems, agriculture, health and wellness, and community and economic development.

AGRICULTURAL AND LIFE SCIENCES – COLLEGE-WIDE

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- College of Agricultural and Life Sciences Honors (p. 62)
- Individual Major, BS (p. 63)

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES HONORS

The CALS honors program allows motivated students to continue challenging themselves in the classroom and beyond. Students may pursue either honors in research or honors in the major. Both tracks require a senior honors thesis and result in an honors designation upon graduation.

HONORS IN RESEARCH

Students completing the CALS honors in research track engage in the university's great research tradition. From selecting a research question and designing a study through analysis and presentation of the results, the honors in research track requires students to explore the full scientific process. Students identify a faculty mentor to oversee their research efforts and support their progression through the program. In addition to this hands-on research experience, students are required to enroll in

coursework directed at furthering their knowledge in quality and ethical scientific discovery.

HONORS IN MAJOR

Information can be found in the requirements tab for each major that offers the option.

HOW TO GET IN

HOW TO GET IN

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

REQUIREMENTS

The Honors in Research track requires students to complete two research projects, an introductory project and a senior thesis project. Students work under the guidance of a faculty mentor for both projects.

In the course of this program, it is expected that the student will: (i) learn the background and methods of the discipline; (ii) identify an interesting and tractable problem or question for study; (iii) learn to draft a proposal defending the relevance and appropriateness of specific research efforts; (iv) demonstrate appropriate skills in working on that problem in a manner appropriate to a professional in the discipline; (v) analyze and interpret the results of their efforts; and (vi) present these results as a thesis and in an approved public forum.

To earn Honors in Research, students must first be admitted to the college's Honors Program. Students must then make satisfactory progress toward the program requirements listed below and maintain a 3.25 GPA. Failure to maintain this progress will result in removal of the student from the Honors Program.

Program requirements:

- Identify a research mentor
- Complete introductory (one-semester) research project and presentation
- Complete three seminar courses (one credit each)
 - INTER-AG 288 (spring of freshman year)
 - INTER-AG 388 (spring of sophomore year)
 - INTER-AG 488 (spring of junior year)
- Enroll in Senior Honors Thesis credits (681 and 682; or 699 in the mentor's department) for two semesters at a minimum of two credits each semester
- Complete a Senior Honors Thesis research project and presentation
- Submit the Senior Honors Thesis and related documentation to CALS Academic Affairs
- Maintain a cumulative grade point average of 3.25

Additional information can be found on the Honors website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>).

ADVISING AND CAREERS

ADVISING AND CAREERS

Find additional information on the CALS honors program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>).

INDIVIDUAL MAJOR, BS

Students who wish to pursue a special intellectual problem or academic path not adequately covered by existing majors can work with advisors and faculty to create an individual path of study to meet their goals. The individual major must involve courses from several programs, must be at least as rigorous as existing majors, and must be targeted at a special intellectual problem or academic need identified by the student.

The individual major must be approved by a faculty committee and the CALS Curriculum Committee. Students are strongly encouraged to consult with an assistant dean in the CALS Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Most CALS students complete independent research under the guidance of internationally recognized faculty researchers. Lab or field courses related to the special interests of the student are encouraged as part of the individual major.

BUILD COMMUNITY AND NETWORKS

With more than 20 CALS-sponsored student organizations, students can build their professional networks early and enhance their leadership skills.

CUSTOMIZE A PATH OF STUDY

Students who complete an approved individual major work closely with faculty and staff to craft a path of study unique to them. Their diploma will include the approved name of their specialized major.

MAKE A STRONG START

A number of first-year seminar courses are available to help new students understand academic programs, access student services, and develop time management and study skills.

GAIN GLOBAL PERSPECTIVE

All individual majors must complete a CALS International Studies course or approved study abroad experience. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Individual majors must be approved by a faculty committee and the CALS Curriculum Committee. Approval is not guaranteed, so students should consider alternative options carefully. Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. The process to request to pursue an individual major is outlined below.

The student selects a three-person faculty committee from departments offering courses in the proposed major. The major advisor is from a CALS department that offers many of the courses in the proposed individual major. No more than two members of the committee can be from a single department. The student must submit a proposed plan of study to the committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The plan should include: the title of the proposed major; the rationale for the major; learning outcomes for the major and a brief assessment plan; the list of courses and the reasons for including each course in the major; and a semester plan for degree completion. The student is required to earn at least 30 credits after the term in which the proposal is approved. Thus, early planning is essential.

If the faculty committee approves the plan, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the Curriculum Committee to present the proposal. The Curriculum Committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. **The decision of the Curriculum Committee is final.**

Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the Curriculum Committee.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5

CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry
Biological science	5
Additional science (biological, physical, or natural)	3
Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)	

INDIVIDUAL MAJOR REQUIREMENTS

DEVELOPMENT OF THE INDIVIDUAL MAJOR

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. Development of the individual major is the responsibility of the student. The student should identify a faculty major advisor from the CALS department that offers many of the courses in the proposed individual major. In addition, the student should select two additional faculty from departments offering the courses in the proposed major to serve on the faculty committee. The student should consult with the faculty members and an assistant dean in Academic Affairs as a plan of study is developed. The plan of study must include the following:

- title of proposed major
- rationale for the major (what specific goal does the major achieve that cannot be achieved through one or more existing majors? what is the targeted intellectual problem? why is the major necessary for achieving the student's academic and career goals?)
- 3-5 learning outcomes for the major with a brief explanation of how learning will be assessed
- list of courses, including the reason for including each course in the major (how does each course contribute to the major learning outcomes?)
- semester plan for degree completion and estimated graduation term (if graduation exceeds four total years, include a justification for the extended time-to-degree; note that the student must earn at least 30 credits after the term in which the proposal is approved)

APPROVAL OF THE INDIVIDUAL MAJOR

Once the plan of study is developed, the student submits the plan to the faculty committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The faculty committee may require revisions prior to approval, or choose not to accept the plan. Once approved, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the curriculum committee to present the proposal. The curriculum committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. **Approval of an individual major is not guaranteed, so students should consider alternative options carefully. The decision of the curriculum committee is final.**

Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that

significantly affect the nature or rigor of the program must be reviewed and approved by the curriculum committee.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

Students will develop learning outcomes as part of the individual major proposal process in consultation with their faculty mentors and an assistant dean. Review the Provost's website (<https://assessment.provost.wisc.edu/student-learning-outcomes/writing-student-learning-outcomes/>) for guidelines on developing learning outcomes.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Students will develop a semester-by-semester plan as part of the proposal process for the individual major, in consultation with their faculty mentors and an assistant dean. Review the Four-Year Plans available for similar or related majors in the *Guide* to begin planning. Students should submit the proposal early in their academic career but no later than achieving senior standing (86 credits) to ensure timely progress to degree completion.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

Students are required to identify a faculty advisor as part of the process for requesting approval to pursue an individual major. The faculty advisor serves as the student's academic advisor along with support from the

other members of the student's faculty committee and professional advisors in the Office of Academic Affairs.

CAREER OPPORTUNITIES

Students with specific post-graduate plans who pursue an individual major can work with advisors to craft a curricular plan that will meet their career goals.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Opportunities to apply classroom learning to real-world settings is at the core of a CALS education. We offer a variety of CALS Signature Experiences for students in all majors to live the Wisconsin idea and fulfill the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/>).

These opportunities fall into five major categories:

CALS students make a strong start, and every CALS first-year student can achieve that through a First-Year Seminar to explore different areas of study, learn about how to take advantage of campus resources, and make friends. There are several seminars to choose from, including QuickStart (<https://cals.wisc.edu/academics/undergraduate/future-students/quick-start/>), an online course that allows students to begin their college career the summer before they arrive on campus.

CALS students learn through hands-on, real-world experiences. A majority of CALS students earn credit for research experiences in labs and internships.

Through student organizations, peer advising and mentoring, and residential learning communities, students build their community and networks.

Students gain a global perspective by taking courses with an international focus, and many students choose to study abroad. CALS offers more than 34 faculty-led study abroad programs, and students may also choose from general UW–Madison study abroad opportunities.

Finally, many CALS students take advantage of the ability to customize their path of study by participating in an honors program (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/#honorstext>), pursuing certificates or multiple majors, and choosing elective courses that match their interests and meet their goals.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

ANIMAL AND DAIRY SCIENCES

The Department of Animal and Dairy Sciences is the home of undergraduate and graduate programs in animal sciences and dairy science. It has a long and proud history of groundbreaking discoveries in animal nutrition, physiology, genetics, management, and muscle biology, which are coupled with excellence in the emerging fields of animal welfare, digital agriculture, and animal biologics to generate new knowledge and solve practical problems. The department is interdisciplinary, and the interests and skillsets of our faculty and graduate students range from molecular biology to animal care and management. Virtually all of our work happens in a biological context, with an eye toward advancing our understanding of animal biology, improving the lives of domestic animals, enhancing the sustainability of animal agriculture, and improving human health and nutrition.

The department was formed as a merger of the Department of Animal Sciences and the Department of Dairy Science in 2020 as a culmination of a long-standing, interdependent relationship that includes sharing the Animal Sciences Building at 1675 Observatory Drive, cross-listing and co-teaching many core courses, and collaborating on countless research projects and outreach programs.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Animal and Veterinary Biosciences, BS (p. 66)
- Animal Sciences, BS (p. 72)
- Dairy and Food Animal Management, BS (p. 78)
- Dairy Science, BS (p. 83)

ANIMAL AND VETERINARY BIOSCIENCES, BS

Studying the biology of domesticated animals helps us better understand their health. The major addresses important issues related to animal health and welfare, biomedical advancements, food safety, precision livestock farming, and land and water stewardship.

Students in the Animal and Veterinary Biosciences major learn about cattle, swine, sheep, horses, poultry, and goats, as well as companion animals such as cats and dogs. They also examine recent discoveries connecting human and animal health.

The Department of Animal and Dairy Sciences is home to the undergraduate program in Animal and Veterinary Biosciences. The department produces skilled leaders in animal agriculture and sustainable food systems while embracing innovation and technology. A 10:1 student-faculty ratio and small classes allow for meaningful connections among students and instructors.

Students can take courses on an assortment of topics including animal breeding, veterinary genetics, animal health and welfare, physiology, and animal nutrition utilizing various animals as a vehicle for learning. The

major offers a science-focused path for students interested in veterinary medicine, animal science, bioscience, or other graduate programs.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

The program emphasizes hands-on learning, and students choose from more than a dozen lab courses covering animal handling, reproductive biology, veterinary genetics, animal welfare, meat science and biologics, and more. Field courses look at international agriculture and sustainability. The department encourages Animal and Veterinary Biosciences majors to get involved with internships and research with faculty and staff.

BUILD COMMUNITY AND NETWORKS

Animal and Veterinary Biosciences majors find a welcoming community where professors know their students and can provide guidance based on their specific goals. Outside of the classroom, students can join several student organizations including the Pre-Veterinary Association (<https://win.wisc.edu/organization/prevetassociation/>), Saddle and Sirloin Club (<https://win.wisc.edu/organization/saddleandsirloin/>), Poultry Club (<https://www.facebook.com/PoultryClubUWMadison/>), Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>), and Badger Meat Science Club. (<https://www.facebook.com/badgermeatscienceclub/>)

CUSTOMIZE A PATH OF STUDY

Students can choose from a variety of breadth and depth courses to explore their interests within the major, customizing their coursework to fit their career goals. Course flexibility allows students to complete several pre-veterinary requirements, a certificate, or double major within the curriculum. Students can elect to complete Honors in Animal and Veterinary Biosciences.

MAKE A STRONG START

The department offers an introductory seminar course that helps students maximize their education, develop professional skills, and make informed decisions about their classes, internships, and career paths. Multiple Animal Sciences courses are open to first-year students offering additional opportunities to establish connections to the major.

GAIN GLOBAL PERSPECTIVE

Students are encouraged to study abroad; the department offers globally focused courses that look at livestock production, health, animal agriculture, and sustainable development. Students can explore studying abroad as an Animal and Veterinary Biosciences major utilizing the Animal and Veterinary Biosciences Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/animal-and-veterinary-biosciences/>). Students work with their advisor and the CALS study abroad office (<https://cals.wisc.edu/academics/undergraduate/current-students/study-abroad/>) to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

The Animal and Veterinary Biosciences BS cannot be earned in combination with the Animal Sciences BS or Dairy Science BS.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First year seminar (p. 47)		1
International studies (p. 47)		3
Physical science fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological science		5
Additional science (biological, physical, or natural)		3
Science breadth (biological, physical, natural, or social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

SUMMARY OF MAJOR REQUIREMENTS

Code	Title	Credits
Major Requirements		
Mathematics and Science Foundation		19–25

Animal & Veterinary Biosciences Core Requirements	37–38
Capstone in Major	2–3
Total Credits	58–66

ANIMAL & VETERINARY BIOSCIENCES MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics		
Complete one of the following (or may be satisfied by placement exam):		3–5
MATH 112	College Algebra	
MATH 114	Precalculus	
Statistics		
Complete one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Complete one of the following:		5–9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Biology		
Complete one of the following:		5
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	Animal Biology and Animal Biology Laboratory	
Biochemistry		
Complete one of the following:		3
BIOCHEM 301	Survey of Biochemistry	
BIOCHEM 501	Introduction to Biochemistry	
Introduction to the Major		
Complete the following:		4
AN SCI/ DY SCI 101	Introduction to Animal Sciences	
AN SCI/ DY SCI 102	Introduction to Animal Sciences Laboratory	
Animal Science Core		
Complete four courses from the following: ¹		11–12
AN SCI 245	Animal Welfare	
AN SCI/DY SCI/ NUTR SCI 311	Comparative Animal Nutrition	
AN SCI/ DY SCI 320	Animal Health and Disease	
AN SCI/ DY SCI 361	Introduction to Animal and Veterinary Genetics	
AN SCI/ DY SCI 373	Animal Physiology	

Animal Biology Depth

Complete at least 10 credits from the following: 10

AN SCI 245	Animal Welfare ¹
AN SCI/ FOOD SCI 305	Introduction to Meat Science and Technology
AN SCI/DY SCI/ NUTR SCI 311	Comparative Animal Nutrition ¹
AN SCI/ DY SCI 320	Animal Health and Disease ¹
AN SCI 324	Applied Companion Animal Behavior and Learning
AN SCI 336	Animal Growth and Development
AN SCI/ DY SCI 361	Introduction to Animal and Veterinary Genetics ¹
AN SCI/ DY SCI 362	Veterinary Genetics
or AN SCI/ DY SCI 363	Principles of Animal Breeding
AN SCI 366	Concepts in Genomics
AN SCI/ DY SCI 373	Animal Physiology ¹
DY SCI 378	Lactation Physiology
AN SCI/ DY SCI 414	Ruminant Nutrition & Metabolism
AN SCI 415	Application of Monogastric Nutrition Principles
AN SCI 420	Microbiomes of Animal Systems
AN SCI/ DY SCI 434	Reproductive Physiology

Major Breadth

Complete at least 12 credits from the following: 12

AN SCI 200	The Biology and Appreciation of Companion Animals
DY SCI 233	Dairy Herd Management I
DY SCI 234	Dairy Herd Management II
AN SCI/BSE 344	Digital Technologies for Animal Monitoring
AN SCI 399	Coordinative Internship/ Cooperative Education (Footnote 2 applies to both AN SCI 399 and 699) ²
or AN SCI 699	Special Problems
A A E 422	Food Systems and Supply Chains
AN SCI 431	Beef Cattle Production
AN SCI 432	Swine Production
AN SCI/ FOOD SCI 515	Commercial Meat Processing
DY SCI 534	Reproductive Management of Dairy Cattle
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology
or BIOLOGY/ BOTANY 130	General Botany
CHEM 343	Organic Chemistry I

PHYSICS 103	General Physics
MICROBIO 303	Biology of Microorganisms
M M & I/ENTOM/ PATH-BIO/ ZOOLOGY 350	Parasitology

Capstone in Major

Complete one of the following: 2-3

AN SCI 435	Animal Sciences Proseminar
DY SCI 535	Dairy Farm Management Practicum

Total Credits 58-66¹ Courses cannot count for both Animal Science Core and Depth.² Maximum of 3 credits.**HONORS IN THE MAJOR**

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn honors in the major, students are required to take at least 20 honors credits. In addition, students must take AN SCI 681 Senior Honor Thesis and AN SCI 682 Senior Honors Thesis when completing their thesis project; please see the honors program page (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Define biological processes and explain their role in animal health and management
- 2. Apply scientific concepts and critical thinking skills to identify and analyze real world problems in animal and veterinary biosciences
- 3. Develop scientific competencies and communication skills needed for advanced careers in animal or veterinary biosciences

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Below you will find two sample four-year plans. These plans represent a range of interest and career-based options for completing the Animal and Veterinary Biosciences major. Your individual plan will look different from these plans. You should customize your own program of study in consultation with your advisor. The degree requires a minimum of 120 credits for completion.

SAMPLE FOUR-YEAR PLAN - VETERINARY INTEREST¹

First Year		
Fall	Credits Spring	Credits
AN SCI/DY SCI 101	3 CHEM 103	4
AN SCI/DY SCI 102	1 Major Breadth	3
AN SCI 135 (CALS First-Year Seminar)	1 General Education (Comm A, Comm B, or Ethnic)	3
University Breadth (Humanities or Social Science)	3 University Breadth (Humanities or Social Science)	3
MATH 112 or 114	3-5 Elective	3

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Each student receives one-on-one guidance from their professional advisor. Academic advisors will help students build an individualized, four-year plan. Many Animal and Veterinary Biosciences majors complete certificates or double majors. Customary examples include Life Sciences Communication, Genetics and Genomics, Global Health, CALS Business Management, and opportunities outside of CALS such as foreign languages, depending on students' interests.

CAREER OPPORTUNITIES

All students have a faculty mentor to assist with their career planning.

Students graduating with a degree in Animal and Veterinary Biosciences can enter a number of career fields. These include nutrition and genetics, health and welfare, animal management and monitoring technology, meat science and biologics, food and animal research, and teaching. Many students go on to pursue professional education in veterinary medicine, graduate programs in animal science, or human medicine.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

INTERNSHIPS

Animal and Veterinary Biosciences majors take part in a number of internships around campus and beyond. Past students interned at veterinary clinics and hospitals, genetics companies, animal feed companies, Extension, food companies, farms, animal pharmaceutical companies, animal councils, humane societies, and more.

On-campus opportunities at department animal care facilities, the UW School of Veterinary Medicine, and at Bucky's Varsity Meats, give students hands-on experience each semester.

RESEARCH EXPERIENCE

There are numerous opportunities to conduct research with faculty and staff in the department. Around 75% of Animal and Veterinary Biosciences majors have completed independent study projects. Several research stipends are available and some students also take part in research as part of an honors thesis.

STUDENT ORGANIZATIONS

By joining a student organization, Animal and Veterinary Biosciences majors connect with other students and build relationships with faculty and staff. Organizations of particular interest to Animal and Veterinary Biosciences students include the Pre Vet Association (<https://win.wisc.edu/organization/prevetassociation/>), Saddle and Sirloin Club (<https://win.wisc.edu/organization/saddleandsirloin/>), Poultry Club (<https://www.facebook.com/PoultryClubUWMadison/>), Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>), and Badger Meat Science Club (<https://www.facebook.com/badgermeatscienceclub/>).

There are additional opportunities for students to get involved in animal or agriculture-related organizations on campus, such as the Hooferriding Club (<https://www.hooferriding.org/>), Association of Women in Agriculture (<http://awamadison.org/>), Babcock House (<https://>

win.wisc.edu/organization/babcock_house/), and Collegiate FFA (<http://collegiateffamadison.weebly.com/>).

GLOBAL ENGAGEMENT

The department encourages students to study abroad and offers globally focused courses that look at animal health, animal agriculture, and sustainable development. Students can find more information on the International Academic Programs website (<https://www.studyabroad.wisc.edu/>) and the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Animal and Veterinary Biosciences students engage in a number of volunteer opportunities including working at the Livestock Lab, the Poultry Research Lab, the Dairy Cattle Center, Bucky's Varsity Meats, and Animal Farm Units. Students also participate in undergraduate student recruitment events, 4-H and Extension events, Dane County Humane Society, and spay/neuter clinics.

On campus, the Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The Animal and Veterinary Biosciences program awards \$25,000–\$35,000 in annual scholarships. Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships here (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

Campus facilities offering students hands-on experiences:

- The Livestock Laboratory accommodates research on multiple species and includes a surgery room.
- The Poultry Research Laboratory houses chickens and other birds.
- The state-of-the-art Meat Science & Animal Biologics Discovery Building houses a meat processing facility, retail shop, and advanced laboratories.
- A network of off-campus Agricultural Research Stations serve as living laboratories for agricultural animal research.
- The School of Veterinary Medicine Animal clinics and research labs offer experiences for undergraduate students.
- The Dairy Cattle Center houses more than 80 dairy cows on campus in a tie-stall barn.

ANIMAL SCIENCES, BS

Admissions to the Animal Science BS have been suspended as of spring 2024 and will be discontinued as of fall 2028. If you have any questions, please contact the department.

Students interested in the Animal Sciences BS may be interested in the Animal and Veterinary Biosciences BS (p. 66), a new major as of Fall 2023.

Studying the biology of domesticated animals helps us better understand their health. The major addresses important issues related to animal health and welfare, biomedical advancements, food safety, precision livestock farming, and land and water stewardship.

Students in the animal sciences major learn about cattle, swine, sheep, horses, poultry, and goats, as well as companion animals. They also examine recent discoveries connecting human and animal health.

The Department of Animal and Dairy Sciences is home to the undergraduate program in animal sciences. It produces skilled leaders in animal agriculture and sustainable food systems while embracing innovation and technology. A 10:1 student-faculty ratio and small classes allow for meaningful connections among students and instructors.

Students can take courses on an assortment of topics including animal breeding, veterinary genetics, animal health and welfare, animal nutrition, and companion animals including dogs and cats, and more. The major offers a science-focused path for students interested in veterinary medicine, animal science, medicine, or other graduate programs. Students can also focus on the business of animal sciences with classes in economics, accounting, marketing, farm management, and other courses.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

The program emphasizes hands-on learning, and students choose from more than a dozen lab courses covering animal handling, reproductive biology, veterinary genetics, meat processing, animal welfare, and more. Field courses look at international agriculture and sustainability. The department encourages animal sciences majors to get involved with internships and research with faculty and staff.

BUILD COMMUNITY AND NETWORKS

Animal sciences majors find a welcoming community where professors know their students and can provide guidance based on their specific goals. Outside of the classroom, students can join several student organizations including the Pre Vet Club (<https://win.wisc.edu/organization/prevetassociation/>), Badger Meat Science Club (<https://win.wisc.edu/organization/badgermeatscienceclub/>), Saddle and Sirloin Club (<https://win.wisc.edu/organization/saddleandsirloin/>), and Poultry Club (<https://www.facebook.com/PoultryClubUWMadison/>). Competitions, such as animal welfare assessment and meat judging offer students unique networking experiences in the industry.

CUSTOMIZE A PATH OF STUDY

The variety of classes in the department, including paths that emphasize science or business, allows animal sciences students to customize their coursework to fit their career goals. Students can elect to complete Honors in Animal Sciences.

MAKE A STRONG START

The department offers an introductory seminar course that helps students maximize their education, develop professional skills, and make informed decisions about their classes, internships, and career opportunities.

GAIN GLOBAL PERSPECTIVE

Students are encouraged to study abroad; the department offers globally focused courses that look at livestock production, health, animal agriculture, and sustainable development. Students can explore studying abroad as an Animal Sciences major utilizing the Animal Sciences Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Admissions to the Animal Science BS have been suspended as of spring 2024 and will be discontinued as of fall 2028. If you have any questions, please contact the department.

Students interested in the Animal Sciences BS may be interested in the Animal and Veterinary Biosciences BS (p. 66), a new major as of fall 2023.

The Animal Sciences BS cannot be earned in combination with the Animal and Veterinary Biosciences BS, Dairy Science BS, or Dairy and Food Animal Management BS.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education

requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.		
First year seminar (p. 47)		1
International studies (p. 47)		3
Physical science fundamentals		4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
Biological science		5
Additional science (biological, physical, or natural)		3
Science breadth (biological, physical, natural, or social)		3

CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam): ¹		5-6
MATH 112 & MATH 113	College Algebra and Trigonometry	
MATH 114	Precalculus

Total Credits		26

¹ A A E 101 Introduction to Agricultural and Applied Economics not accepted as a prerequisite for some advanced Business courses.

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)

- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take AN SCI 681 Senior Honor Thesis and AN SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Knowledge and comprehension) Develop the working vocabulary of an animal scientist, a working knowledge of the basic anatomy, biochemistry, physiology, and genetics of animal and meat biology, and the applied nutrition, breeding, product harvest and processing skills, necessary to manage animal production systems. Demonstrate knowledge through rigorous examination and demonstration through hands-on instructional laboratory activities.
2. (Analytical processing) Develop the ability to reduce complex datasets and scientific information into meaningful relationships and correlations, and using the scientific literature, develop hypotheses to test the cause of predicted relationships using the scientific method. Demonstrate skills through a senior capstone experience and through individualized research opportunities and instructional activities.
3. (Integration for application) Apply knowledge to develop solutions to real world problems. Identify problems yet to be investigated and in need of advanced study. Ability to integrate and apply knowledge is demonstrated through our internship programs, animal related job experiences, club activities, and problems sets that students solve in exams and laboratory settings.
4. (Critical thinking) Find their sources of information using peer reviewed research articles. Learn not only to question popular press, but understand that even in the scientific literature there are contradictory findings. Capacity to synthesize scientific literature

such that they can communicate a position backed with strong scientific support. Skills are demonstrated through the reading, writing and discussion of science-based papers in key courses during their educational process and through an oral presentation in their capstone course.

5. (Effective communication) Communicate, both in writing and orally, the science behind the biology and management of domestically farmed animals. Communications provide new insights into animal production, and are explained in a manner fitting with the audience. Ability to communicate is measured by their effectiveness in presenting research posters and presentations, their analysis of the literature in papers and presentations in class and during their senior capstone course.

¹ Choose Science or Business Emphasis; see Requirements tab for details.

² 12 credits required; see Requirements tab for options.

³ These courses are generally offered as intensive modular courses with AN SCI/DY SCI 361 being offered first half of the semester and AN SCI/DY SCI 362/AN SCI/DY SCI 363 Principles of Animal Breeding offered second half of the semester.

ADVISING AND CAREERS**ADVISING AND CAREERS****ADVISING**

Each student receives one-on-one guidance from their professional advisor. Academic advisors will help students build an individualized, four-year plan. Many animal sciences majors have completed double majors with Life Sciences Communication, Genetics and Genomics, and departments outside of CALS such as Spanish, depending on students' interests. Certificates such as CALS Business Management, Environmental Studies, Food Systems, and Global Health complement several of our students' interests and provide depth to their undergraduate program.

CAREER OPPORTUNITIES

All students have a faculty mentor to assist with their career planning.

Students graduating with a degree in animal sciences can enter a number of career fields. These include nutrition, herd management, food testing, business, marketing, technology, meat science, healthcare, research, and teaching. Graduates have also found positions within zoos. Many students go on to pursue graduate education in veterinary medicine, animal science, or human medicine.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE****INTERNSHIPS**

Animal sciences majors take part in a number of internships around campus and beyond. Past students interned at veterinary clinics and hospitals, genetics companies, animal feed companies, Extension, food companies, farms, animal pharmaceutical companies, animal councils, and more.

Opportunities at Bucky's Varsity Meats, an on-campus meat-processing facility, and the Livestock Laboratory give students hands-on experience with all aspects of meat production.

RESEARCH EXPERIENCE

There are numerous opportunities to conduct research with faculty and staff in the department. Around 75% of animal sciences majors have completed independent study projects, and research stipends are available. Some students also take part in research as part of an honors thesis.

STUDENT ORGANIZATIONS

By joining a student organization, animal sciences majors connect with other students and build relationships with faculty and staff. Organizations available to animal sciences students include the Pre Vet Club (<https://prevetassociation.weebly.com/>), Badger Meat Science Club (<https://www.facebook.com/badgermeatscienceclub/>), Saddle and Sirloin Club (<https://win.wisc.edu/organization/saddleandsirloin/>), and Poultry Club (<https://www.facebook.com/PoultryClubUWMadison/>).

There are additional opportunities for students to get involved in animal-related organizations on campus such as the Hooferriding Club (<https://www.hooferriding.org/>), Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>), Collegiate FFA (<http://collegiateffamadison.weebly.com/>), and Association of Women in Agriculture (<http://awamadison.org/>).

COMPETITIVE TEAMS

Students can join teams and compete against other universities for events such as the Animal Welfare Assessment and the Animal Science Academic Quadrathlon competition.

GLOBAL ENGAGEMENT

The department encourages students to study abroad and offers globally focused courses that look at livestock production, health, animal agriculture, and sustainable development. Students can find more information on the International Academic Programs website (<https://www.studyabroad.wisc.edu/>) and the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Animal sciences students engage in a number of volunteer opportunities including working at the Livestock Lab, the Poultry Research Lab, the Dairy Cattle Center, Bucky's Varsity Meats, and Animal Farm Units. Students also participate in Extension, 4-H, and undergraduate student recruitment events.

On campus, the Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS**RESOURCES AND SCHOLARSHIPS**

The animal sciences program awards \$25,000-\$35,000 in annual scholarships. Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships here. (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>)

The new, state-of-the-art Meat Science & Animal Biologics Discovery Building houses a fully functional meat processing facility, a retail shop called Bucky’s Varsity Meats, and an advanced laboratory that offers students highly valued hands-on opportunities.

Other specialized facilities offering students hands-on experiences include:

- The Livestock Laboratory accommodates research on multiple species and includes a surgery room.
- The Poultry Research Laboratory houses chickens and other birds.
- The Dairy Cattle Center houses more than 80 dairy cows on campus in a tie-stall barn.
- A network of off-campus Agricultural Research Stations (<https://ars.wisc.edu/>) serve as living laboratories for agricultural animal research.

DAIRY AND FOOD ANIMAL MANAGEMENT, BS

Studying the business of animal agriculture and the biology and management of farm animals can lead to improvements in our food production systems that will benefit animals, farmers, consumers, and the environment. Students in the Dairy and Food Animal Management major learn these principles while embracing innovation and technology to meet the needs of today’s dairy, livestock, poultry, and meat industries. The Department of Animal and Dairy Sciences, home of the undergraduate program in dairy and food animal management, produces skilled leaders who integrate management challenges associated with animal health and welfare, land and water stewardship, precision livestock farming, food safety, and sustainable global agriculture.

A 10:1 student-faculty ratio and small classes allow for meaningful connections. Out-of-classroom learning opportunities, such as internships on farms or with agribusiness, and management experiences associated with meat processing give students the training they need for successful 21st-century careers. Students can also gain valuable experience working in research labs, department dairy and livestock operations, as well as the meat processing and retail facilities.

Students majoring in Dairy and Food Animal Management are working toward a variety of careers that require a strong background in agribusiness, animal biology, farm management, livestock production management, meat industry, technical services and consulting, research, and outreach.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

UW-Madison has farm animals on campus. Animal facilities are located near classrooms giving students easy access to livestock and poultry during lab sessions. Animal agriculture is not just about managing animals-it is about business economics and global food systems. Out-of-the classroom experiences are the norm for Dairy and Food Animal Management students, with **100 percent** of students completing an internship or field experience.

Hands-on courses include reproduction, animal nutrition and genetics, dairy herd management, lactation physiology, meat science, and

processing. Students solve problems through field trips, involvement on farms, and processing facilities.

BUILD COMMUNITY AND NETWORKS

Madison is an ideal location for the study of dairy and food animal management. It is a vibrant city-home to many large agribusinesses-located close to dairy & livestock farms and meat markets. Students volunteer in a variety of activities when involved with clubs and organizations; making connections and networking with industry partners via events such as World Dairy Expo directed by the Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>) and the Lamb Show directed by the Saddle & Sirloin Club (<https://win.wisc.edu/organization/saddleandsirloin/>).

CUSTOMIZE A PATH OF STUDY

Dairy and Food Animal Management students can customize their coursework to fit their career goals with a large variety of animal classes in combination with courses taught by Agricultural & Applied Economics. The major can be combined with other majors such as Life Sciences Communication and Agronomy or certificates such as computer sciences, food systems, environmental studies, and global health.

MAKE A STRONG START

Students can take an introductory seminar course that helps them develop an individualized four-year course plan, learn about internships and job opportunities, and discuss leadership development opportunities.

GAIN GLOBAL PERSPECTIVE

Dairy and Food Animal Management majors are encouraged to go on study abroad programs, where they can immerse themselves in international animal production coursework, research, or field experiences. Many students have completed a semester abroad in The Netherlands. Additional CALS Study Abroad collaborations include Dublin, Ireland, Greece, and New Zealand undergraduate programs. Students work with their advisor and the CALS study abroad office (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>) to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.

Other Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (<https://go.wisc.edu/g85h79>) (<https://go.wisc.edu/g85h79/>) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

The Dairy and Food Animal Management BS cannot be earned in combination with the Animal Sciences BS or Dairy Science BS.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and

Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Describe biological principles and their application within dairy and food animal production systems
2. Explain business, management, and economic principles and their application to dairy and food animal production systems
3. Apply scientific principles and critical thinking skills to identify and solve real-world problems facing dairy and food animal production enterprises
4. Demonstrate the scientific, managerial, and communication competencies needed for advanced careers in dairy and food animal management

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist students and their advisors.

Students should use their DARS Report, the Degree Planner, Guide Requirements, and the Course Search & Enroll tools to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Total Credits 120**ADVISING AND CAREERS****ADVISING AND CAREERS****ADVISING**

Each Dairy and Food Animal Management major receives one-on-one guidance from their academic advisor. Academic advisors will help students build an individualized curriculum four-year plan, explore and identify experiences to meet career goals and deepen their educational program.

CAREER OPPORTUNITIES

As students find their career interests, faculty working in those fields serve as career mentors to help students make progress toward their goals.

Undergraduates in Dairy and Food Animal Management prepare for a variety of career opportunities. Animal agriculture career opportunities include animal nutrition and consulting, animal breeding & genetics, herd management, information technology, product development, quality control, food testing and Agriculture business.

Dairy and Food Animal Management graduates are in high demand by employers and receive job offers with competitive salaries.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE
INTERNSHIPS**

In the Dairy and Food Animal Management program, 100 percent of students complete an internship or field experience. Students will work with their faculty mentor to explore internship opportunities and establish goals.

UW-Madison's proximity to farms, agribusinesses, and events such as Dairy Expo provide undergraduates with unique internships and valuable hands-on learning. Students can be directly involved with meat processing and sales at Bucky's Varsity Meats, providing real life experiences.

Internship opportunities from industry collaborators are dispersed to students via department communications.

RESEARCH EXPERIENCE

Many students complete a research project under mentorship from a faculty member. Animal and Dairy science faculty are internationally recognized specialists in nutrition, genetics, lactation, reproduction, animal welfare, herd management, and more. Students can take on research projects with faculty members for either course credit or pay, depending on the opportunity.

STUDENT ORGANIZATIONS

The Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>) is a large, motivated student organization on campus with members from various majors who share a passion for the dairy industry. Highlights of the club's activities include work at the World Dairy Expo and club trips.

The Saddle & Sirloin Club (<https://win.wisc.edu/organization/saddleandsirloin/>) hosts various livestock shows, such as the Lamb Show.

The Poultry Club (<https://www.facebook.com/PoultryClubUWMadison/>) and Badger Meat Science Club (<https://www.facebook.com/badgermeatscienceclub/>) are active department clubs offering students unique opportunities to be involved with events and networking opportunities within their respective industries.

Students in these organizations volunteer and participate in events such as Wisconsin 4-H competitions, FFA Judging Contests, and club trips. These clubs also offer student opportunities to be in leadership positions and develop soft skills.

There are other opportunities for students to get involved in agriculture-related organizations on campus such as Collegiate FFA (<http://collegiateffamadison.weebly.com/>), Association of Women in Agriculture

(<http://awamadison.org/>), Babcock House (https://win.wisc.edu/organization/babcock_house/), and Alpha Gamma Rho (<https://win.wisc.edu/organization/agr/>).

COMPETITIVE TEAMS

Students can join competitive teams that take part in Intercollegiate Dairy Judging (<https://andysci.wisc.edu/uw-madison-dairy-judging/>), the North American Intercollegiate Dairy Challenge (<https://andysci.wisc.edu/national-north-american-intercollegiate-dairy-challenge/>), and the Intercollegiate Riding Teams (<https://win.wisc.edu/organization/wisconsinquestrianteam/>).

GLOBAL ENGAGEMENT

Dairy and Food Animal Management students are encouraged to study abroad. Students can find more information on the International Academic Programs website (<https://www.studyabroad.wisc.edu/>) and the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

In addition to study abroad programs, the department offers globally focused courses that look at animal agriculture, sustainable development, improvement in developing countries, and the world role of U.S. animal agriculture, and food production related to human and environmental health, land use, and social justice.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Students volunteer at a number of activities directed by Badger Dairy Club, Saddle & Sirloin, Poultry Club, and the Meat Science Club. Students have the unique opportunity to be directly involved in the working behind the scenes before, during, and after the shows and events.

On campus, the Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The department offers more than 40 scholarships and awards more than \$170,000 annually.

Students across the College of Agricultural & Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships here (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

UW-Madison has specialized facilities offering students hands-on dairy science experiences, including:

- The Dairy Cattle Center (<https://andysci.wisc.edu/about-us/facilities/>) is home to more than 80 dairy cows on campus in a tie-stall barn.
- The Poultry Research Lab (<https://andysci.wisc.edu/about-us/facilities/>) is located right on campus, housing chickens and other poultry; offering students part time jobs and involvement with poultry research being conducted by faculty.

- Bucky's Varsity Meats (<https://varsitymeats.cals.wisc.edu/>) is a student driven retail store selling a variety of meats and meat products. Students can find part-time work and experience in a wide range of meat marketing jobs.
- The Livestock Laboratory (<https://andysci.wisc.edu/about-us/facilities/>) houses a variety of livestock being used for classes or research in which students' opportunities to gain hands-on handling skills for part-time jobs.
- A network of off-campus Agricultural Research Stations (<https://ars.wisc.edu/>) serve as living laboratories for livestock research to enhance research taking place on campus.
- The Babcock Dairy Plant (<https://babcockhalldairyplant.wisc.edu/>) is a fully operational dairy plant with a retail store selling dairy products. Students can find part-time work and experience in a wide range of dairy processing jobs.

DAIRY SCIENCE, BS

Admissions to the Dairy Science, BS were suspended as of spring 2025 and will be discontinued as of fall 2029. If you have any questions, please contact the department.

Students interested in the Dairy Science BS may be interested in the Dairy and Food Animal Management BS (p. 78), a new major as of Fall 2024.

Studying the biology and management of dairy cows can lead to improvements in dairy production, animal welfare, human nutrition, and environmental protections. Students in the dairy science major learn all of these principles while embracing innovation and technology to meet needs in the dairy industry. The Department of Animal and Dairy Sciences, home of the undergraduate program in dairy science, produces skilled leaders who address the challenges of animal health and welfare, land and water stewardship, precision livestock farming, food safety, and biomedical advancements.

A 10:1 student-faculty ratio and small classes allow for meaningful connections. Out-of-classroom learning opportunities, such as internships on farms or with agribusiness, give students the training they need for successful 21st-century careers. Students can also gain valuable experience in research labs or in the student-operated Dairy Cattle Center.

Students majoring in dairy science are working toward a variety of careers that require a strong background in animal biology including agribusiness, dairy farm management, technical services and consulting, research, and teaching. Students also prepare for veterinary medicine or graduate school.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

UW-Madison has cows on campus. The Dairy Cattle Center is located near classrooms giving students access to cows during lab sessions. But dairy science isn't just about milking cows – it includes genetics, nutrition, lactation, and biological and digital technologies that are relevant to the dairy industry and beyond. Out-of-the-classroom experiences are the norm for dairy science students, with 100% of students completing an internship or field experience.

Field courses include dairy nutrition and dairy cattle judging. Lab courses cover dairy herd management, lactation, reproduction, and dairy cattle

improvement. Students solve problems through field trips to working commercial dairy operations.

BUILD COMMUNITY AND NETWORKS

Madison is an ideal location for the study of dairy science. It is a vibrant city – home to many large agribusinesses – that's also located close to dairy farms. Students volunteer in a variety of activities directed by the Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>). The largest effort is their work at the World Dairy Expo, an international dairy event held in Madison.

CUSTOMIZE A PATH OF STUDY

Dairy science students can customize their coursework to fit their career goals with a large variety of classes in the department. The major can be combined with other majors such as agricultural business management, genetics and genomics, life science communications, or agronomy. Students can also pursue Honors in Dairy Science.

MAKE A STRONG START

Students can take an introductory seminar course that helps them develop an individualized four-year course plan, learn about internships and job opportunities, and discuss leadership development opportunities.

GAIN GLOBAL PERSPECTIVE

Dairy science majors are encouraged to go on study abroad programs, where they can immerse themselves in research or field experiences. In recent years, a program to central Mexico has focused on global agricultural, rural development, and the relationship between the U.S. and Mexican dairy industries, and many students have completed a semester abroad in The Netherlands. Students can explore studying abroad as a Dairy Science major by utilizing the Dairy Science Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Admissions to the Dairy Science, BS were suspended as of spring 2025 and will be discontinued as of fall 2029. If you have any questions, please contact the department.

Students interested in the Dairy Science BS may be interested in the following new majors:

- Dairy and Food Animal Management BS (p. 78)
- Animal and Veterinary Biosciences BS (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/animal-dairy-sciences/animal-veterinary-biosciences-bs/>)

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None

GPA requirements to get in

Credits required to get in

Other

Must have fewer than 86 credits.

Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (<https://go.wisc.edu/g85h79>) (<https://go.wisc.edu/g85h79/>) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

The Dairy Science BS, cannot be earned in combination with the Animal and Veterinary Biosciences BS, Animal Sciences BS, or Dairy and Food Animal Management BS.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First year seminar (p. 47)		1
International studies (p. 47)		3
Physical science fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological science		5
Additional science (biological, physical, or natural)		3
Science breadth (biological, physical, natural, or social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		3-5
MATH 112	College Algebra	
MATH 114	Precalculus	
MATH 171	Calculus with Algebra and Trigonometry I	
Select one of the following:		3
STAT 301	Introduction to Statistical Methods	
or STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Select one of the following:		4-5
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Biology

Total Credits 65-79

¹ Consult with your advisor for details.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Gain knowledge of current and emerging research based information in animal biology and management sciences to support dairy production.
2. Gain intellectual, practical and attitudinal skills needed to identify and solve problems and challenges facing dairy producers and allied industries.
3. Gain in life-long learning skills to enable graduates to adapt to changing technological, economic and social circumstances throughout their professional career.

ADVISING AND CAREERS**ADVISING AND CAREERS****ADVISING**

Each dairy science student receives one-on-one guidance from their academic advisor. Academic advisors will help students build an individualized, four-year plan. Students are encouraged to take part in research experiences and internships.

CAREER OPPORTUNITIES

As students find their career interests, faculty working in those fields serve as career advisors to help students make progress toward their goals.

Undergraduates in dairy science prepare for a variety of career opportunities. Science-related career opportunities include research, quality control, communications, patent law, pharmaceuticals, food testing, and human nutrition. Animal agriculture career opportunities include veterinary medicine, animal nutrition and consulting, dairy genetics, herd management, information technology, and business.

Dairy science graduates are in high demand by employers and receive job offers with competitive salaries.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE INTERNSHIPS**

In the dairy science program, 100% of students complete an internship or field experience. The department offers an internship course under the guidance of a faculty or staff member.

UW-Madison's proximity to farms, agribusinesses, and events such as the World Dairy Expo provides undergraduates with unique networking experiences and valuable hands-on learning.

RESEARCH EXPERIENCE

More than half of the students complete a research project under mentorship from a faculty member. Dairy science researchers are internationally recognized specialists in nutrition, genetics, lactation, reproduction, animal welfare, herd management, and more. Students can take on research projects with faculty members for either course credit or pay, depending on the opportunity.

STUDENT ORGANIZATIONS

The Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>) is a large, motivated student organization on campus with more than 75 members of various majors who share a passion for the dairy industry. Students are involved in dairy industry events that provide leadership and networking opportunities. Highlights of the club's activities include work at the World Dairy Expo, hosting the Badger Invitational Sale, volunteering at the Wisconsin 4-H Dairy Bowl and FFA Dairy Judging Contests, and club trips.

There are other opportunities for students to get involved in agriculture-related organizations on campus such as Collegiate FFA (<http://collegiateffamadison.weebly.com/>), Association of Women in Agriculture (<http://awamadison.org/>), and Alpha Gamma Rho (<https://win.wisc.edu/organization/agr/>).

COMPETITIVE TEAMS

Students can join competitive teams that take part in Intercollegiate Dairy Judging (<https://andysci.wisc.edu/uw-madison-dairy-judging/>), the North American Intercollegiate Dairy Challenge (<https://andysci.wisc.edu/national-north-american-intercollegiate-dairy-challenge/>), and the Animal Welfare Assessment Contest (<https://www.awjac.org/#YPcEjUxOnct>).

GLOBAL ENGAGEMENT

Dairy science students are encouraged to study abroad; the department offers globally focused courses that look at livestock production, health, animal agriculture, and sustainable development, including a summer field study program focused on animal agriculture. Students can find more information on the International Academic Programs website (<https://www.studyabroad.wisc.edu/>) and the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

In addition to study abroad programs, the dairy science major offers several courses that cover animal systems and their improvement in developing countries, the world role of U.S. animal agriculture, and food production related to human and environmental health, land use, and social justice.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Students volunteer at a number of activities directed by the Badger Dairy Club. The largest effort is their work at the World Dairy Expo, an international dairy event held in Madison. There students have the unique opportunity to be directly involved in the event working behind the scenes before, during, and after the show.

On campus, the Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The department offers more than 30 scholarships and awards more than \$170,000 annually.

Students across the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships here (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

UW-Madison has specialized facilities offering students hands-on dairy science experiences, including:

- The Dairy Cattle Center is home to more than 80 dairy cows on campus in a tie-stall barn.
- A network of off-campus Agricultural Research Stations (<https://ars.wisc.edu/>) serve as living laboratories for dairy research to enhance research taking place on campus.
- The Babcock Dairy Plant is a fully operational dairy plant with a retail store selling dairy products. Students can find part-time work and experience in a wide range of dairy processing jobs.

BACTERIOLOGY

See the microbiology major in Guide for information on exploring, declaring, advising, and careers within microbiology.

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development and other issues of national concern.

The microbiology major, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques—gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms, and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process, as well as training in microbiology, allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

The department also serves as the administrative home for the biology major in the College of Agricultural and Life Sciences.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Biology, BS (CALS) (p. 89)
- Microbiology, BS (CALS) (p. 101)

BIOLOGY, BS (CALS)

The Biology Major is designed for students with broad interests in the biological sciences. It is intended primarily to:

1. prepare undergraduates for graduate studies in diverse areas of biology;
2. prepare certain pre-professional students (e.g., medicine, veterinary medicine, dentistry) for advanced study in the health professions;
3. provide a broad exposure to biology for students who want a general science education as biologists, and
4. serve as initial preparation for students who later choose a more specialized major.

The major is offered by the College of Agricultural and Life Sciences and the College of Letters & Science.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

Students who intend to major in Biology in either the College of Letters and Science (L&S) or the College of Agricultural and Life Sciences (CALS) may not combine this major ("double major") with the Molecular and Cell Biology Major or the Neurobiology Major.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly,

courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

REQUIREMENTS FOR THE MAJOR

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of biological science courses within the introductory biology, foundation course, upper-level breadth in the major, and capstone requirements. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

In addition to the standard Biology major, there is a Named Option in Evolutionary Biology. Students may complete only one Biology major/named option and must declare the option they are pursuing.

CORE REQUIREMENTS

Mathematics and Statistics

Code	Title	Credits
Complete one of the following:		4-10
MATH 221	Calculus and Analytic Geometry I	
MATH 211	Survey of Calculus I	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
Complete one of the following:		3-4
STAT 240	Data Science Modeling I	
STAT 301	Introduction to Statistical Methods	
STAT 324	Introduction to Statistics for Science and Engineering	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Total Credits		7-14

Chemistry

Code	Title	Credits
General Chemistry (Complete one of the following):		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Organic Chemistry		
CHEM 343	Organic Chemistry I	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Organic Chemistry II	3
Total Credits		13-18

Physics

Code	Title	Credits
First Semester Physics (complete one of the following):		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Second Semester Physics (complete one of the following):		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
Total Credits		8-10

Introductory Biology

Code	Title	Credits
Select one of the following options:		10-13
Option A:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option B:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 485	Principles of Physiology	
Option C:		
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
BOTANY/ BIOLOGY 130	General Botany	
Total Credits		10-13

Foundation Course (complete one of the following):

Students may use BIOCORE 381 and BIOCORE 383 toward both introductory biology and foundation.

Code	Title	Credits
BIOCHEM 501	Introduction to Biochemistry	3
BIOCHEM 508	General Biochemistry II	3-4
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	6
GENETICS 466	Principles of Genetics	3
GENETICS 468	General Genetics 2	3
MICROBIO 470	Microbial Genetics & Molecular Machines	3

UPPER-LEVEL BREADTH IN THE MAJOR

Minimum of 13 credits required and must include one approved lab course. Approved lab courses are indicated by footnote. A course taken to meet the foundation requirement may not also count as an upper-level breadth course.

- Complete at least two credits from either category A or B.
- Complete at least two credits from either category C or D.
- Complete at least two credits from an unused category (A, B, C, D, or E).

A. Cellular and Subcellular Biology

CAPSTONE REQUIREMENT

Code	Title	Credits
Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. The capstone experience will normally be completed during the student's final two or three semesters. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682s and 692s in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.		
ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 486	Principles of Physiology Laboratory 2	2
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/ F&W ECOL/ ZOOLOGY 460	General Ecology	4
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL 599	Wildlife Research Capstone (limited access)	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
PL PATH 315	Plant Microbiomes	4
ZOOLOGY 316	Laboratory for Limnology- Conservation of Aquatic Resources	2-3
ZOOLOGY 555	Laboratory in Developmental Biology	3
ZOOLOGY 612	Comparative Physiology Laboratory	2

BIOLOGY NAMED OPTION

Instead of completing the requirements above, students may choose to select the named option below.

View as listView as grid

• BIOLOGY: EVOLUTIONARY BIOLOGY (P. 96)

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

Honors in the Major in Biology: Requirements

To earn Honors in the Major in Biology, students must satisfy the requirements for the major (above) as well as the following requirements:

- Earn a 3.300 overall university GPA
- Complete a two-semester senior honors thesis for 6 credits total and present research in a public forum
- Complete at least 20 credits of honors coursework from the following sections of the Biology curriculum:
 - Introductory biology
 - Foundation courses
 - Upper-level breadth in the major
- At least 6 of the 20 credits of honors coursework must be from the upper-level breadth in the major requirement

FOOTNOTES

¹ Course also approved for lab credit

² To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratory and BIOCORE 384 Cellular Biology Laboratory.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Know and understand core concepts that unify the breadth of biological sciences including: evolution; structure and function; information flow, exchange, and storage; pathways for transformations of energy and matter; and systems.
2. Demonstrate practical skills of a professional biologist including: problem-solving by engaging the process of science; written and verbal proficiency; laboratory skills; quantitative analysis skills; and teamwork skills.
3. Graduates will be able to engage and make broader connections to other scientific disciplines and society.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Four-year plans for the biology major are designed to support biological science major exploration. The four-year plan is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and Course Search & Enroll. Your specific program of study could, and probably will, look different. You should customize your own four-year plan to fit your unique path at UW–Madison. Consult with your advisor about the best path for you.

SAMPLE BIOLOGY FOUR-YEAR PLAN

First Year

Fall	Credits Spring	Credits
CHEM 103 or 109	4-5 CHEM 104	5
Math Course ¹	3-5 Math or Statistics	3-4
Communication A or Breadth Courses	6 Communication A or Breadth Courses	5-7
First Year Seminar ²	1	
14-17		13-16

Second Year

Fall	Credits Spring	Credits
Upper-Level Breadth in the Major ⁴	3-5 Upper-Level Breadth in the Major ⁴	3-5
Capstone or Research Course	2-3 Capstone or Research Course	2-3
Elective Courses	7-10 Elective Courses	7-10
12-18		12-18

Total Credits 99-134

¹ Math determined by placement scores. Biology majors must complete MATH 171/MATH 217, MATH 211, or MATH 221 plus one additional math/stats course.

² See CALS requirements (p. 46) for a list of approved first-year seminar courses.

³ Students may complete BIOLOGY/BOTANY/ZOOLOGY 151-BIOLOGY/BOTANY/ZOOLOGY 152 & a foundational course or BIOLOGY/ZOOLOGY 101-BIOLOGY/ZOOLOGY 102, BIOLOGY/BOTANY 130 & a foundational course or BIOCORE (three lectures and two labs required).

⁴ See requirements tab for upper-level breadth in the major course lists.

ADVISING AND CAREERS

ADVISING AND CAREERS

Your advisor is here to guide you through the Biology Major. We can address your questions and concerns, provide advice, help you create a four-year degree plan that meets your major and professional goals, and connect you to resources. It is important to remember that advising is about the process, and some questions do not have a quick and easy

answer. Your advisor will challenge you to self-reflect, to critically think about your goals and strategies, and to develop decision-making skills. For more information about what to expect during your advising appointment, visit UW Undergraduate Advising (<https://advising.wisc.edu/soar/advising-101/>).

In the Biology Major, students are assigned to an advisor according to last name. Please schedule an advising appointment here (<http://biologymajor.wisc.edu/advising/>).

CAREERS

The Biology Major encourages students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the CALS Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

College of Agricultural and Life Sciences graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

Career Resources:

- Schedule a Career Advising appointment (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=service/63821/schedule>)
- Explore CALS Career Services for Students (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/students/>)

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biology, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Many study abroad programs offer a plethora of excellent upper-level biological science courses. Students often complete courses abroad that meet major requirements while others use this opportunity to focus on non-science coursework and explore other topics that interest them. Students can explore studying abroad as a Biology major utilizing the Biology Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biology/>). Students work with their advisor and the CALS Study Abroad Office (<https://cals.wisc.edu/academics/undergraduate/current-students/study-abroad/>) to identify appropriate programs.
- Students are encouraged to get involved in research in any life science department. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can be identified by inquiring directly (<https://wiscience.wisc.edu/resources/undergrad-resources/>) with faculty members, reading the Biology Major Newsletter (<https://biologymajor.wisc.edu/newsletters/>), or announcement on the Student Job Center (<https://studentjobs.wisc.edu/>).

BIOLOGY: EVOLUTIONARY BIOLOGY

The Evolutionary Biology Named Option allows biology majors to concentrate their studies in evolution and to have this reflected on their transcript. Since there is no evolutionary biology major available at UW–Madison, this is the only mechanism to indicate specialization in this rapidly growing and popular field. In taking this named option, students will be able to fulfill their intermediate/advanced biology requirement with courses that emphasize evolutionary biology, ranging from required courses in fundamental evolutionary biology to more advanced optional courses that cover a wide range of evolutionary biology topics. They will also take a seminar course in evolutionary biology.

Who should enroll in this option? Students with broad interest in the biological sciences who want to:

- Prepare for graduate study in evolutionary biology or related fields
- Prepare for professional studies (e.g. medical school, veterinary school, dentistry)
- Concentrate their biological studies in evolutionary biology

REQUIREMENTS

REQUIREMENTS FOR THE NAMED OPTION

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, Capstone, and Evolutionary Biology Seminar requirements. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

CORE REQUIREMENTS

Mathematics and Statistics

Code	Title	Credits
Complete one of the following:		4-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
MATH 211	Survey of Calculus 1	
Complete one of the following:		3-4
STAT 240	Data Science Modeling I	
STAT 301	Introduction to Statistical Methods	
STAT 324	Introduction to Statistics for Science and Engineering	
STAT 371	Introductory Applied Statistics for the Life Sciences	

Total Credits 7-14

Chemistry

Code	Title	Credits
General Chemistry (Complete one of the following):		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Organic Chemistry		
CHEM 343	Organic Chemistry I	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Organic Chemistry II	3
Total Credits		13-18

Physics

Code	Title	Credits
First Semester Physics (Complete one of the following):		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Second Semester Physics (complete one of the following):		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
Total Credits		8-10

Introductory Biology

Code	Title	Credits
Complete one sequence:		10-13
Option A:		10
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option B:		13
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 485	Principles of Physiology	
Option C:		10
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
BOTANY/ BIOLOGY 130	General Botany	

Foundation Course (complete one of the following):

Students may use BIOCORE 381 and BIOCORE 383 toward both Introductory Biology and Foundation.

Code	Title	Credits
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	6
GENETICS 466	Principles of Genetics	3
GENETICS 468	General Genetics 2	3

UPPER-LEVEL BREADTH IN THE MAJOR

Minimum of 13 credits required as follows and must include **one approved lab course**. (Approved lab courses are indicated by footnote.) A course taken to meet the Foundation requirement may not also count as Upper-Level Breadth in the Major.

- Complete the Evolutionary Biology course listed below.
- Complete at least two credits from either category A or B.
- Complete at least two credits from category C.
- Complete at least two credits from category D.
- Additional courses needed to reach 13 credits of Upper-Level Breadth in the Major may be taken from any category (A, B, C, D, E).

Required Evolutionary Biology Course

Code	Title	Credits

EVOLUTIONARY BIOLOGY SEMINAR

Code	Title	Credits
BIOLOGY/ GENETICS 522	Communicating Evolutionary Biology	2-3

CAPSTONE REQUIREMENT

Code	Title	Credits
------	-------	---------

Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. The capstone experience will normally be completed during the student's final two or three semesters. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682s and 692s in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.

ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 486	Principles of Physiology Laboratory ²	2
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/ F&W ECOL/ ZOOLOGY 460	General Ecology	4
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL 599	Wildlife Research Capstone (limited access)	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
PL PATH 315	Plant Microbiomes	4
ZOOLOGY 316	Laboratory for Limnology- Conservation of Aquatic Resources	2-3
ZOOLOGY 555	Laboratory in Developmental Biology	3
ZOOLOGY 612	Comparative Physiology Laboratory	2

FOOTNOTES

¹ Course also approved for lab credit.

² To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratory and BIOCORE 384 Cellular Biology Laboratory.

³ Students may complete BIOLOGY/BOTANY/ZOOLOGY 151-BIOLOGY/BOTANY/ZOOLOGY 152 & a foundational course or BIOLOGY/ZOOLOGY 101-BIOLOGY/ZOOLOGY 102, BIOLOGY/BOTANY 130 & a foundational course or BIOCORE (three lectures and two labs required).

⁴ See requirements tab for upper-level breadth in the major course lists.

¹ Math determined by placement scores. Students in the Evolutionary Biology Named Option must complete MATH 171/MATH 217, MATH 211, or MATH 221 plus STAT 240, STAT 301, or STAT 371.

² See CALS requirements (p. 46) for a list of approved CALS first-year seminar courses.

MICROBIOLOGY, BS (CALS)

The smallest living things – including bacteria, viruses, and yeast – may not be visible to the human eye, but they have big effects on health, food, medicine, energy, and the environment. These tiny organisms, called microbes, were the first life forms on Earth and continue to influence the planet in significant ways. Microbiomes – communities of microbes – are increasingly studied by researchers focusing on human health, global warming, infectious disease, environmental remediation, bioenergy, and much more.

The microbiology major prepares students for modern research in microbiology with a heavy emphasis on practical laboratory experiences. Students learn the cellular biology, genetics, ecology, evolution, and physiology of microbes. Through courses, students learn laboratory techniques – gaining the type of hands-on experiences with modern equipment that employers and graduate and professional schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories where they will learn to critically evaluate scientific data, carry out laboratory experiments, and communicate scientific information.

Microbiology majors graduate prepared for careers in biotechnology, education, healthcare, information technology, and food safety. Many students pursue graduate and professional studies, including medical school, dental school, and biological sciences PhD programs.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

With so many microbiologists on the faculty, students have numerous opportunities to conduct research in faculty labs. As one of the largest research buildings on campus, students have access to state-of-the-art facilities and are able to conduct cutting-edge experiments using novel techniques that few other undergraduate programs allow. Through a senior-year capstone course, students conduct research under the direction of a professor or as part of class projects that have included culturing microbes from the gut of hibernating ground squirrels, comparing bacteria from the mouths of athletes and non-athletes, and culturing microbes found in deep sea vents. This kind of hands-on experience distinguishes microbiology majors from other graduates and enhances the real-world skills that are valued by post-secondary schools and employers.

BUILD COMMUNITY AND NETWORKS

Through the Microbiology Club, students establish study groups, explore careers, and teach others on campus and in the community about microbiology. Through events like cheese, yogurt, and kombucha making, the club offers opportunities for community-building both within the program and with the broader university community. This student organization is the official American Society of Microbiology undergraduate chapter for the UW-Madison and provides annual travel and research awards to outstanding students.

CUSTOMIZE A PATH OF STUDY

Core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes, microbial biotechnology, and public health, as well as advanced topics in microbial genetics and physiology. Students may also pursue honors in microbiology.

MAKE A STRONG START

All courses in the program, including entry-level courses, are taught by faculty who specialize in teaching microbiology.

GAIN GLOBAL PERSPECTIVE

Majors can also choose from a variety of study abroad programs including short-term field experiences, summer research opportunities, and semester-long exchange programs at top universities around the world. A study abroad program in Thailand specifically tailored for microbiology majors is frequently offered and led by microbiology faculty from UW–Madison. Students can explore studying abroad as a microbiology major by utilizing the Microbiology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First year seminar (p. 47)		1
International studies (p. 47)		3
Physical science fundamentals		4-5

CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry
Biological science	5
Additional science (biological, physical, or natural)	3
Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)	

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics		
Complete one of the following:		5-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry I	
Statistics		
Complete one of the following:		3
STAT 371	Introductory Applied Statistics for the Life Sciences (Recommended)	
STAT 301	Introduction to Statistical Methods	
STAT 240	Data Science Modeling I	
General Chemistry		
Complete one of the following:		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Organic Chemistry		
Complete ALL of the following:		
CHEM 343	Organic Chemistry I	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Organic Chemistry II	3
Biology Foundation		
Complete one of the following:		10-13
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology ¹	
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384 & BIOCORE 485	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory and Principles of Physiology ¹	

ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany
--	---

Physics

Select one of the following:		8-10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics ²	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics ²	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	

Biochemistry

Complete one of the following:		3-6
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	

Microbiology Courses

Microbiology Core:

Complete all of the following courses (except where noted, all microbiology core courses are offered every fall and spring semester):		
MICROBIO 303	Biology of Microorganisms	3
MICROBIO 304	Biology of Microorganisms Laboratory	2
MICROBIO 305	Critical Analyses in Microbiology	1
MICROBIO 450	Diversity, Ecology and Evolution of Microorganisms (Spring only)	3
MICROBIO 470	Microbial Genetics & Molecular Machines	3
MICROBIO 526	Physiology of Microorganisms	3
MICROBIO 527	Advanced Laboratory Techniques in Microbiology (Fall only)	2

Microbiology Capstone (required):

MICROBIO 551	Capstone Research Project in Microbiology (Spring only)	2
--------------	---	---

Microbiology Electives

Complete at least 6 credits; at least 3 credits must come from Set A. Note that not all elective courses are offered every semester.

Set A:		3-6
MICROBIO/ FOOD SCI 324	Food Microbiology Laboratory	
MICROBIO/ FOOD SCI 325	Food Microbiology	
MICROBIO/ AN SCI/ BOTANY 335	The Microbiome of Plants, Animals, and Humans	
MICROBIO 345	Introduction to Disease Biology	
MICROBIO 357	General Bioinformatics for Microbiologists	
MICROBIO/SOIL SCI 425	Environmental Microbiology	

MICROBIO 520	Planetary Microbiology: What Life Here Tells Us About Life Out There
MICROBIO/SOIL SCI 523	Soil Microbiology and Biochemistry
MICROBIO 525	Field Studies of Planetary Microbiology and Life in the Universe
MICROBIO/ONCOLOGY 545	Topics in Biotechnology (topics vary by semester)
MICROBIO/BIOCHEM/GENETICS 612	Prokaryotic Molecular Biology
MICROBIO 626	Microbial and Cellular Metabolomics
MICROBIO 657	Bioinformatics for Microbiologists
MICROBIO/BMOLCHEM 668	Microbiology at Atomic Resolution
Set B: 0-3	
BIOCHEM/M M & I 575	Biology of Viruses
BIOCHEM 601	Protein and Enzyme Structure and Function
BOTANY 330	Algae
BOTANY/PL PATH 332	Fungi
BOTANY/ENTOM/PL PATH 505	Plant-Microbe Interactions: Molecular and Ecological Aspects
CHEM 665	Biophysical Chemistry
COMP SCI/B M I 576	Introduction to Bioinformatics
F&W ECOL/SURG SCI 548	Diseases of Wildlife
FOOD SCI 550	Fermented Foods and Beverages
M M & I 301	Pathogenic Bacteriology
M M & I 341	Immunology
M M & I/ENTOM/PATH-BIO/ZOOLOGY 350	Parasitology
M M & I 554	Emerging Infectious Diseases and Bioterrorism
ONCOLOGY/M M & I/PL PATH 640	General Virology-Multiplication of Viruses
PATH-BIO/M M & I 528	Immunology
PL PATH 622	Plant-Bacterial Interactions
PL PATH/BOTANY/GENETICS/M M & I 655	Biology and Genetics of Fungi
Total Credits 64-88	

¹ (BIOLOGY/BOTANY/ZOOLOGY 151 and BIOLOGY/BOTANY/ZOOLOGY 152) or (BIOCORE 381 / BIOCORE 382 / BIOCORE 383 / BIOCORE 384 / BIOCORE 485) are recommended.

² (PHYSICS 103 / PHYSICS 104) or (PHYSICS 207 / PHYSICS 208) are recommended.

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

MICROBIOLOGY HONORS IN THE MAJOR REQUIREMENTS

To earn honors in the major in Microbiology, students must satisfy the requirements for the major (above) as well as the following requirements. All courses used for honors in the major requirements must receive "B" or better grades to fulfill requirements.

- Earn a 3.300 overall university GPA.
- Earn a 3.300 GPA for all MICROBIO courses, and all courses accepted in the major.
- Complete a two-semester senior honors thesis (MICROBIO 681 and MICROBIO 682) for 6 credits total and present research in a public forum. Students completing their senior honors theses in laboratories or departments outside of microbiology may be able to count that thesis toward honors in the major.
- Complete at least 20 credits from the following coursework:
 - 6 or more of the 20 credits must be courses taken for honors from the Core and Foundation Honors Coursework (p. 105) list. Courses completed from this list may count towards both major requirements and honors requirements.
 - Other courses taken for honors that fulfill requirements for the major (see major requirements above). Includes the following coursework: set A microbiology electives, set B microbiology

electives, BIOCORE 381, BIOCORE 382, BIOCORE 383, BIOCORE 384, BIOCORE 485, BIOLOGY/BOTANY/ZOOLOGY 151, BIOLOGY/BOTANY/ZOOLOGY 152. Independent study and thesis credits do not count to meet this honors requirement.

- Set A microbiology electives completed beyond the major requirements. See major requirements above for the list of set A microbiology electives. This coursework does not need to be taken for honors but cannot count towards both major requirements and honors requirements.
- Honors coursework in MATH (p. 105), CHEM (p. 105), PHYSICS (p. 105), or BIOCORE (p. 105) from the lists below.

Core and Foundation Honors Coursework

Code	Title	Credits

BIOCORE 587	Biological Interactions	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Develop a fundamental understanding of the principles of microbiology and the necessary skills for a professional career in microbiology

2. Apply the scientific method to questions. Formulate a hypothesis, gather data, and analyze that data to assess the degree to which their work supports the hypothesis.
3. Demonstrate proficiency in the techniques used in microbiology and an ability to critically analyze data and integrate ideas for problem solving
4. Access the primary and secondary literature and, in combination with their own findings, effectively communicate their ideas both orally and in written form.
5. Learn about and demonstrate personal and professional ethics.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist students and their advisors.

Students should use their DARS report, the degree planner, Guide requirements, and the course search & enroll tools to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. Students must complete at least 120 total credits to be eligible for graduation.

Students planning to pursue graduate studies in a biological science are encouraged to take MATH 222, PHYSICS 201/ PHYSICS 202 or PHYSICS 207/PHYSICS 208, and BIOCHEM 507/BIOCHEM 508 (see footnote 7). Also recommended: CHEM 665 Biophysical Chemistry and MICROBIO/BIOCHEM/GENETICS 612 Prokaryotic Molecular Biology.

SAMPLE MICROBIOLOGY FOUR-YEAR PLAN

12-18		13-19
Total Credits 105-138		

- ¹ Choose 1 of 3 sequences: (CHEM 103/CHEM 104) or CHEM 109 or (CHEM 115/CHEM 116). Students who take CHEM 109 and plan to attend medical or other professional schools are advised to take one additional inorganic course (CHEM 311 or CHEM 327).
- ² Math course determined by placement scores. Microbiology majors must complete math through calculus (choose from MATH 171/MATH 217 or MATH 221), and statistics (choose from STAT 301, STAT 371, or STAT 240).
- ³ Electives can be scheduled according to the student's preference. Consult your advisor and the requirements tab.
- ⁴ The three choices are 1) ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/BIOLOGY/BOTANY 152; 2) ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY 102 and BOTANY/BIOLOGY 130; or 3) Biocore. Biocore is a 3 to 4 semester sequence. Students must complete the first three lectures and the first two labs. The Biocore courses are BIOCORE 381, BIOCORE 382, BIOCORE 383, BIOCORE 384, BIOCORE 485, BIOCORE 486, BIOCORE 587.
- ⁵ Physics may be taken in year 1, 2, 3, or 4 depending on the student's schedule.
- ⁶ Undergraduate research courses include MICROBIO 299, MICROBIO 699, MICROBIO 681, MICROBIO 682 (honors thesis), MICROBIO 691, MICROBIO 692 (thesis). Both semesters are required for thesis credit. Students are encouraged to take several semesters of research (internship opportunities, MICROBIO 399, are also encouraged).
- ⁷ If BIOCHEM 507 General Biochemistry I and BIOCHEM 508 General Biochemistry II are taken, both semesters must be completed (with the recommendation of BIOCHEM 507 in fall semester of year 3 and BIOCHEM 508 in spring semester of year 3).

THREE-YEAR PLAN

THREE-YEAR PLAN

This sample three-year plan is a tool to assist students and their advisor(s). Students should use it - along with their DARS report, the Degree Planner, and Course Search & Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an academic advisor early and often to discuss feasibility, appropriate course

sequencing, post-graduation plans (careers, graduate school, etc.), and considerations they might make in pursuit of a three-year graduation plan.

While there are many advantages to attending four years of college, including making the most of research and study abroad opportunities, exploring alternative majors, completing additional majors and certificates, developing skills and interests through student groups, and personal growth, students may have reasons for wishing to graduate in fewer than four years.

The example plan assumes that students will:

- enter their first year with 20 advanced standing credits, including equivalency credit for MATH 221
- declare their major first year
- take two summer terms
- enroll in at least 15-16 credits in the fall/spring semesters

SAMPLE MICROBIOLOGY THREE-YEAR PLAN

Code	Title	Credits

Total Credits 98-100

Students must earn **120 total credits** to graduate, including accepted advanced standing or transfer credits. The above charts reflect 100-102 total credits from six fall/spring semesters and two summer terms, including courses taken in the summer before the first year.

¹ The Microbiology major recommends INTER-AG 140 CALS QuickStart: Foundations or INTER-AG 141 QuickStart: Connect2Campus for the first-year seminar requirement. However, this requirement can be fulfilled through courses offered in Fall and Spring semester of the first year.

² The Microbiology major encourages students with an interest in research to work with faculty through independent research courses as electives.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Each student is assigned a professional academic advisor who works to understand student goals and helps to craft a path that best suits their needs. Additionally, faculty provide students with ongoing professional and scientific mentorship. More than 60% of students in the major conduct faculty-directed research. With low ratios of students to faculty, students also receive additional faculty mentoring in the classroom.

Current UW-Madison students should use Starfish to schedule an appointment with an advisor in the Biochemistry & Microbiology Undergraduate Advising Hub (<https://biochemmicrobio.wisc.edu/>).

CAREER OPPORTUNITIES

Alumni hold professional positions as physicians, research scientists, public health officials, dentists, optometrists, physician assistants, physical therapists, master brewers, quality control officers, health inspectors, professors, and more.

Graduates are recognized for their skills in laboratory research and scientific communication, skills that are valued by potential employers and professional schools.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

A RICH HISTORY OF MICROBIOLOGY

UW-Madison is recognized as one of the birthplaces of Microbiology, as recognized by the American Society for Microbiology's *Milestones in Microbiology*. UW-Madison is the first school to teach microbiology in the U.S., and it is consistently ranked as one of the top public schools in the field.

RESEARCH EXPERIENCE

The majority of microbiology majors conduct research in a faculty-led research lab where they receive direct mentorship from professors, scientists, and graduate students. Because UW-Madison has the highest concentration of microbiologists on any U.S. campus, students have many research options.

STUDENT ORGANIZATION

The Microbiology Club (<https://bs.microbiology.wisc.edu/student-experience/microbiology-club/>) is the undergraduate-led student chapter of the American Society of Microbiology.

GLOBAL ENGAGEMENT

Microbiology majors can participate in several international academic experiences including short-term field experiences, summer research opportunities, and semester-long exchange programs at top universities around the world. The UW Microbiology and Public Health in Northern Thailand program occurs during the summer.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Our students engage in numerous volunteer activities spearheaded by the Microbiology Club. This involves explaining microbiology and its impact during public educational events at UW-Madison. Many students also volunteer at local public schools to teach microbiology to elementary-aged students.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships at <https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>.

The Department of Bacteriology offers several scholarships to students in the microbiology major. Awards are given annually and fund undergraduate research, provide travel stipends to microbiology students attending professional scientific conferences, or recognize outstanding graduating seniors. Learn more at <https://bs.microbiology.wisc.edu/awards-and-scholarships/>.

BIOCHEMISTRY

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal or population level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus

on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's-level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

DEGREES/MAJORS/CERTIFICATES

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.

Other Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (<https://go.wisc.edu/g85h79> (<https://go.wisc.edu/g85h79/>)) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

Students who intend to major in Biochemistry may not combine this major ("double major") with the Molecular and Cell Biology major.

The Biochemistry major is offered through either the College of Agricultural and Life Sciences (CALS) or the College of Letters & Science (L&S). Students interested in the differences or transferring between CALS and L&S should meet with the advisor to discuss this in more detail.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth–Humanities/Literature/Arts: 6 credits
 - Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth–Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

REQUIREMENTS FOR THE MAJOR MATHEMATICS

Mathematics Requirements

Code	Title	Credits
Complete one of the following options:		
MATH 221 & MATH 222	Calculus and Analytic Geometry 1 and Calculus and Analytic Geometry 2	9
MATH 171 & MATH 217 & MATH 222	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II and Calculus and Analytic Geometry 2	14

CHEMISTRY

General Chemistry

Code	Title	Credits
Complete one of the following options:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II (satisfies both general and analytical chemistry requirements)	10

Organic Chemistry

Code	Title	Credits
Complete ALL of the following courses:		
CHEM 343	Organic Chemistry I	3
CHEM 345	Organic Chemistry II	3
CHEM 344	Introductory Organic Chemistry Laboratory	2

Analytical Chemistry

Code	Title	Credits
Complete one of the following options:		
CHEM 327	Fundamentals of Analytical Science	4
CHEM 329	Fundamentals of Analytical Science	4
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II (satisfies both general and analytical chemistry requirements)	10

Physical Chemistry

Code	Title	Credits
Complete one:		
CHEM 665	Biophysical Chemistry (Recommended)	3
CHEM 561	Physical Chemistry I	3

BIOLOGY

Students must complete either Option A (introductory + upper-level biology), or Option B (biocore), for 16 total credits of biological science coursework.

Option A (Introductory and Upper-Level Biology) Option A Introductory Biology

Code	Title	Credits
Complete one of the following introductory biology options:		
BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology (recommended)	10

BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	10
--	---	----

And Option A Upper-Level Biology

At least 6 credits of upper-level biological science coursework are required (to achieve 16 total credits—more than 6 credits may be required if introductory biology totals less than 10 credits due to transfer credits). Select from the course list below. To see courses offered in specific upcoming semesters, please see the biochemistry website (https://biochem.wisc.edu/undergraduate_program/advanced-biology-courses-undergraduate-program/).

Important: A course may not double count in both the "upper-level biology" and the "biochemistry" requirements for the major. Biochemistry courses on this list can count only for "upper-level biology" if they are above-and-beyond what is needed to fulfill the "biochemistry" portion of the major. For example, if students have taken BIOCHEM 501, they will need one advanced biochemistry elective to fulfill the biochemistry requirement, and then any additional biochemistry courses taken can count for upper-level biology.

Code	Title	Credits

Option B (Biocore)

Biocore is an honors-level, integrated sequence of lecture and lab courses that covers introductory and intermediate biology topics. Students must apply and be accepted to the program to take BIOCORE classes.

Code	Title	Credits
Complete these lecture courses:		
BIOCORE 381	Evolution, Ecology, and Genetics	3
BIOCORE 383	Cellular Biology	3
BIOCORE 485	Principles of Physiology	3
BIOCORE 587	Biological Interactions	3
Complete two of these lab classes:		
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	4
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 486	Principles of Physiology Laboratory	
Total Credits		16

PHYSICS (CALCULUS-BASED)

Physics Requirements

Code	Title	Credits
Complete one of the following options: ¹		
PHYSICS 207 & PHYSICS 208	General Physics and General Physics (recommended)	10
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	10

¹ Students should consult with their advisor if they have credit for PHYSICS 103 and PHYSICS 104 to discuss options.

BIOCHE MISTRY

One set of introductory coursework and the capstone course are required, for a total of three BIOCHEM courses.

Introductory Courses

Code	Title	Credits
Complete one of the following options:		
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II (recommended)	6
OR		
BIOCHEM 501	Introduction to Biochemistry	3

AND one of the following advanced biochemistry electives:

BIOCHEM/ NUTR SCI 510	Nutritional Biochemistry and Metabolism
BIOCHEM/ NUTR SCI 560	Principles of Human Disease and Biotechnology
BIOCHEM/ M M & I 575	Biology of Viruses
BIOCHEM 601	Protein and Enzyme Structure and Function
BIOCHEM/B M I/ BMOLCHEM/ MATH 609	Mathematical Methods for Systems Biology
BIOCHEM/ GENETICS/ MICROBIO 612	Prokaryotic Molecular Biology
BIOCHEM/ GENETICS/ MD GENET 620	Eukaryotic Molecular Biology
BIOCHEM/ BOTANY 621	Plant Biochemistry
BIOCHEM 625	Mechanisms of Action of Vitamins and Minerals
BIOCHEM/ GENETICS 631	Plant Genetics and Development
BIOCHEM/ NUTR SCI 645	Molecular Control of Metabolism and Metabolic Disease

Capstone Course (required)

Code	Title	Credits
BIOCHEM 551	Biochemical Methods	4

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

HONORS IN THE MAJOR IN BIOCHEMISTRY: REQUIREMENTS

To earn honors in the major in biochemistry, students must satisfy the requirements for the major (above) as well as the following requirements. All courses used for honors in the major requirements must receive "B" or better grades to fulfill requirements.

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all BIOCHEM courses, and all courses accepted in the major
- Complete BIOCHEM 507 and BIOCHEM 508 for Honors
- Complete a two-semester Senior Honors Thesis for 6 credits total, present research in a public forum and submit documentation to CALS Academic Affairs.
- Complete at least 14 credits of any combination of the following coursework:
 - Honors courses that would fulfill the biological science requirement in the major (see above)
 - Statistics coursework (does not need to be taken for honors): STAT 301, STAT 371, or STAT/B M I 541
 - Biochemistry elective coursework beyond the major requirements (does not need to be taken for Honors): NUTR SCI/ BIOCHEM 510, BIOCHEM/NUTR SCI 560, M M & I/ BIOCHEM 575, BIOCHEM 601, MATH/B M I/ BIOCHEM/ BMOLCHEM 609, MICROBIO/BIOCHEM/GENETICS 612, MD GENET/BIOCHEM/GENETICS 620, BOTANY/ BIOCHEM 621, BIOCHEM 625, BIOCHEM/GENETICS 631, BIOCHEM/NUTR SCI 645
 - Honors coursework in MATH, CHEM, or PHYSICS from the list below:

Math

Code	Title	Credits
MATH 341	Linear Algebra	3
MATH 375	Topics in Multi-Variable Calculus and Linear Algebra	5
MATH 376	Topics in Multi-Variable Calculus and Differential Equations	5
MATH 521	Analysis I	3
MATH 522	Analysis II	3
MATH 541	Modern Algebra	3
MATH 542	Modern Algebra	3

Chemistry

Code	Title	Credits
CHEM 109	Advanced General Chemistry	5
CHEM 115	Chemical Principles I	5
CHEM 116	Chemical Principles II	5
CHEM 343	Organic Chemistry I	3
CHEM 345	Organic Chemistry II	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 329	Fundamentals of Analytical Science	4

CHEM 547	Advanced Organic Chemistry	3
CHEM 561	Physical Chemistry I	3
CHEM 563	Physical Chemistry Laboratory I	1
CHEM 562	Physical Chemistry II	3
CHEM 564	Physical Chemistry Laboratory II	1
CHEM 665	Biophysical Chemistry	3

Physics

Code	Title	Credits
PHYSICS 201	General Physics	5
PHYSICS 202	General Physics	5
PHYSICS 207	General Physics	5
PHYSICS 208	General Physics	5
PHYSICS 241	Introduction to Modern Physics	3
PHYSICS 247	A Modern Introduction to Physics	5
PHYSICS 248	A Modern Introduction to Physics	5
PHYSICS 249	A Modern Introduction to Physics	4

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Identify the fundamental biochemical principles that underlie all biological processes.
2. Communicate biochemical knowledge in both written reports and oral presentations to scientists and non-scientists.
3. Evaluate how biochemistry relates to other scientific disciplines and to contemporary issues in our society.
4. Demonstrate professional and ethical responsibility in scientific research.
5. Design and conduct quantitative experiments and/or interpret data to address a scientific question.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE BIOCHEMISTRY FOUR-YEAR PLAN

Students must complete at least 120 total credits to be eligible for graduation.

First Year

Fall	Credits Spring	Credits
CHEM 103 or 109	4-5 CHEM 104 (if needed)	5
MATH 221	5 MATH 222	4
Communications Part A	3 BIOCHEM 207 (Recommended elective)	2
BIOCHEM 100	1 Humanities Course	3
13-14		14

Second Year

Fall	Credits Spring	Credits
CHEM 343	3 CHEM 344	2
ZOOLOGY/BIOLOGY/ BOTANY 151 (or BIOCORE 381 & BIOCORE 382) ²	5 CHEM 345	3
Humanities Course	3 ZOOLOGY/BIOLOGY/ BOTANY 152 (or BIOCORE 383 & BIOCORE 384)	5
Social Science Course	3 Ethnic Studies Course	3
	Elective	1-3
14		14-16

Third Year

Fall	Credits Spring	Credits
BIOCHEM 507 ³	3 BIOCHEM 508	3
PHYSICS 207 or 201	5 PHYSICS 208 or 202	5
Upper-Level Biology for major (or BIOCORE 485 & BIOCORE 487 if needed)	Upper-Level Biology for major (or BIOCORE 587)	
CALS International Studies Course	3 CHEM 327	4
Electives	3 Elective	3
14		15

Fourth Year

Fall	Credits Spring	Credits
CHEM 665 or BIOCHEM 551	3-4 BIOCHEM 551 or CHEM 665	3-4
BIOCHEM 691 or 681 (if needed) ⁴	2-3 BIOCHEM 692 or 682 (if needed)	2-3
Electives or Remaining Requirements	10 Electives or Remaining Requirements	10
15-17		15-17

Total Credits 114-121

¹ First-year students interested in exploring the major can enroll in INTER-AG 155 or BIOCHEM 100.

- ² BIOCORE sequence requires four lecture courses plus two lab courses. Student may also take ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/BIOLOGY/BOTANY 152 plus 6 credits of upper-level biology instead of BIOCORE.
- ³ Students must take either: (1) both BIOCHEM 507 and BIOCHEM 508 or (2) BIOCHEM 501 and one additional course in biochemistry from the 500/600-level electives.
- ⁴ Senior thesis, independent study or work experience in laboratory are recommended, but are not required. However, a senior honors thesis is required to earn honors in the major.

ADVISING AND CAREERS

ADVISING AND CAREERS

HOW TO SEEK ADVISING

- To schedule an appointment with the advisor, use Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).
- Send an email with brief questions to the undergraduate advising email address listed in the Contact Information box.
- Drop-in advising hours for quick (10–15 minute) questions, on a first-come, first-served basis, are posted on the Biochemistry / Microbiology Undergraduate Advising Hub website (<https://biochemmicrobio.wisc.edu/>) each semester.

CAREER EXAMPLES

- Take your skills to a rewarding career in product development, quality control, hospitals, biotechnology, university labs, pharmaceuticals, forensics, and more. Possibilities at top organizations and leading companies include positions such as protein purification scientist, lab manager, medical scribe, clinical research coordinator, and food safety and quality chemist.
- Pursue a professional degree in medical, dental, or veterinary school, using your background in biochemistry to aid your admission and success.
- Build on your research experience and continue graduate studies in biochemistry or a related field to shape a career in academia as a professor or in industry.
- Use your science background to inform patent law, science policy and ethics, sales and marketing for science and technology companies, scientific article publishing, and related fields.

CALS CAREER RESOURCES

CALS Career Services (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>) provides expertise to support students and alumni of the college as they explore, experience, and achieve their career goals. In short, CALS Career Services helps students in the College of Agriculture and Life Sciences discover themselves, find opportunities, and develop the skills they need for success after graduation.

CALS Career Services can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as assisting undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://wisc.joinhandshake.com/login/>) to take care of everything they need to explore career events, manage their campus interviews, and apply to jobs and internships from 200,000+ employers around the country.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biochemistry, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- The American Society for Biochemistry and Molecular Biology (ASBMB) UW–Madison Student Chapter (<https://win.wisc.edu/organization/ASBMB/>) is a student organization for students interested in biochemistry. ASBMB provides information about careers and job opportunities, how to get involved in research, and volunteer and outreach opportunities.
- Several biochemistry faculty members offer experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biochemistry Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biochemistry/>) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Students are encouraged to get involved in research, whether in the biochemistry department or through other life science or chemistry-related departments. Research can be performed for either course credit or pay, depending on the opportunity. The Biochemistry website (<https://biochem.wisc.edu/academics/undergraduate-major-programs/>) and the advisors can provide more information on finding research opportunities. Summer funding awards for research are available through the department.

BIOLOGICAL SYSTEMS ENGINEERING

Biological systems engineering (BSE), an accredited engineering program in the College of Agricultural and Life Sciences, applies engineering principles to natural systems and machinery design that impact production of food, water, energy, and more. Uniquely positioned at the intersection of engineering and sustainability with multiple flexible study options to match a wide range of interests, students can follow defined tracks in natural resources and environmental engineering, food or bioprocess engineering, machinery systems engineering, or customize their classes using the general option.

Students benefit from a low student to faculty ratio and individualized advising that fosters teamwork. They have access to all resources for UW–Madison students in the College of Engineering, plus those available to students in the College of Agricultural and Life Sciences. Admission is not competitive, meaning all students who meet the criteria are admitted. The program provides a broad education in physical sciences and engineering, but also teaching skills in fabrication, electronics, design, product development, and management.

The BSE program, like all undergraduate engineering programs on the UW–Madison campus, is accredited by ABET (<http://www.abet.org>) (Accreditation Board for Engineering and Technology) and prepares students for licensure as a professional engineer. Students who graduate from the program are well prepared for research and engineering

careers in industry or government, or to continue their studies in graduate school.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

BSE offers hands-on courses and experiences. First-year and senior-level design courses challenge students to develop solutions, build and test prototypes, and analyze results. Students integrate practical work experience through co-operative education (co-op) programs where students earn full-time salaries while working for a firm or through for-credit internships (paid or unpaid).

BUILD COMMUNITY AND NETWORKS

The program fosters community building through advising, coursework, and outside activities. Students can join the UW-Madison student chapter of the professional American Society of Agricultural and Biological Engineers (ASABE) to meet professionals, tour companies, explore career paths, and participate in national design competitions. Additionally, the department hosts student events, such as our fall mixer or Thanksgiving meal, to allow students to get to know each other and the faculty.

CUSTOMIZE A PATH OF STUDY

All majors take core engineering courses, then specialize in areas including machinery systems, natural resources and engineering, food engineering, or bioprocessing. Students can also develop their own customized focus areas. Many students also complete certificates in sustainability or renewable energy.

MAKE A STRONG START

An introductory engineering design course allows students to make personal connections with peers and learn fabrication skills on various industry machines in the BSE shop. In all courses, instructors offer homework help sessions to support students and encourage the formation of study groups.

GAIN A GLOBAL PERSPECTIVE

Students can choose from study abroad options, including courses taught in English, offered through the College of Agricultural and Life Sciences, the College of Engineering, or campus-wide opportunities. Recent students have traveled to China, France, Costa Rica, Africa, and more. Programs occur over full semesters or during summer and winter breaks. International internships, many with summer options, offer additional opportunities to gain global experience.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Biological Systems Engineering, BS (p. 117)

BIOLOGICAL SYSTEMS ENGINEERING, BS

Biological systems engineering (BSE), an accredited engineering program in the College of Agricultural and Life Sciences, applies engineering principles to natural systems and machinery design that impact production of food, water, energy, and more. Uniquely positioned at the intersection of engineering and sustainability with multiple flexible study options to match a wide range of interests, students can follow defined tracks in natural resources and environmental engineering, food or bioprocess engineering, machinery systems engineering, or customize their classes using the general option.

An introductory engineering design course allows students to make personal connections with peers and learn fabrication skills on various industry machines in the BSE shop. In all courses, instructors offer homework help sessions to support students and encourage the formation of study groups.

GAIN GLOBAL PERSPECTIVE

Students can choose from study abroad options, including courses taught in English, offered through the College of Agricultural and Life Sciences, the College of Engineering, or campus-wide opportunities. Recent students have traveled to China, France, Costa Rica, Africa, Ireland and more. Programs occur over full semesters or during summer and winter breaks. International internships, many with summer options, offer additional opportunities to gain global experience. Students can explore studying abroad as a BSE major utilizing the Biological Systems Engineering Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

CURRENT UW-MADISON STUDENTS

Entry to this professional program requires students to meet the five admission requirements detailed below. Students are admitted as pre-Biological Systems Engineering until they meet the admission criteria listed below. **Admission eligibility must be confirmed by the department.**

1. Must complete a minimum of 24 degree credits.
2. Must complete a minimum of 17 graded credits of calculus, statistics, chemistry, statics, and physics courses required for a BSE degree.
3. Must have a math and science grade point average (M&SGPA) of at least 2.65 with a minimum grade of C in every course used to calculate the M&SGPA. The M&SGPA is based on:
 - a. MATH (<https://guide.wisc.edu/courses/math/>) courses numbered 217 and above (MATH 228 is excluded)
 - b. STAT (<https://guide.wisc.edu/courses/stat/>) courses numbered 324 and above
 - c. CHEM (<https://guide.wisc.edu/courses/chem/>) courses (all)
 - d. PHYSICS (<https://guide.wisc.edu/courses/physics/>) courses numbered 201 and above
 - e. E M A 201
 - f. BSE 380
4. For any course that a student repeats, only the most recent grade will be used in the M&SGPA calculation. Any transfer course from another university that is included in the previous list must be included in the GPA calculation.
5. Must be in good academic standing—i.e., not on academic probation or dropped status.
6. Must successfully complete introductory chemistry (CHEM 103 & CHEM 104, or CHEM 109, or equivalent) and math through MATH 222.

Students must meet the admissions criteria listed above before they receive admission to the Biological Systems Engineering professional degree program. Students with fewer than 30 credits at the time they

declare the pre-BSE major must achieve full admission to the professional program within three regular semesters from the time of pre-BSE major declaration. Students with 30 or more credits at the time they declare the pre-BSE major must achieve full admission within two regular semesters of transferring into the program. Students who do not meet full admission criteria according to these time limits will not be allowed to continue in the pre-BSE program.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select Biological Systems Engineering as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare pre-Biological Systems Engineering at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and

Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

NAMED OPTIONS WITHIN THE MAJOR

Students may complete the Biological Systems Engineering General Program or select a Named Option. The course requirements on this page represent the general program. Students are encouraged to consider one of the Named Options (Food and Bioprocess Engineering; Machinery Systems Engineering; or Natural Resources and Environmental Engineering). Links to learn more about these options, including the course requirements, are included below.

View as listView as grid

- **BIOLOGICAL SYSTEMS ENGINEERING: FOOD AND BIOPROCESS ENGINEERING (P. 123)**
- **BIOLOGICAL SYSTEMS ENGINEERING: MACHINERY SYSTEMS ENGINEERING (P. 125)**
- **BIOLOGICAL SYSTEMS ENGINEERING: NATURAL RESOURCES AND ENVIRONMENTAL ENGINEERING (P. 127)**

MAJOR REQUIREMENTS

Code	Title	Credits
Major Requirements		
	Common Requirements	53
	General Program Classes and Technical Electives	43

Capstone	5
Total Credits	101

COMMON REQUIREMENTS

The Biological Systems Engineering program requires completion of a minimum of 125 credits to be eligible for graduation. Note that this is higher than the minimum for other CALS programs.

Code	Title	Credits
Mathematics and Statistics		
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 319	Techniques in Ordinary Differential Equations	3
or MATH 320	Linear Algebra and Differential Equations	
STAT 324	Introduction to Statistics for Science and Engineering	3
Chemistry		
Complete one of the following:		5-9
CHEM 109	Advanced General Chemistry (Recommended)	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II ¹	
Biology		
BSE 349	Quantitative Techniques for Biological Systems	3
Complete one additional Biological Science Breadth Course; the following courses are preferred choices: ²		2-5
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	
BIOLOGY/ BOTANY 130	General Botany	
BIOLOGY/ ZOOLOGY 101	Animal Biology	
AN SCI/ DY SCI 101	Introduction to Animal Sciences ²	
MICROBIO 101	General Microbiology ³	
MICROBIO 303	Biology of Microorganisms ³	
PLANTSCI 110	Introduction to Plant Science and Technology ²	
Physics		
E M A 201	Statics ⁴	3
PHYSICS 202	General Physics	5
Foundation		
BSE 270	Introduction to Computer Aided Design	3
BSE 380	Introductory Data Science for the Agricultural and Life Sciences	3
BSE 310	Project Economics & Decision Analysis (preferred)	3
or I SY E 313	Engineering Economic Analysis	

Core

BSE 249	Engineering Principles for Biological Systems ⁵	3
or CBE 250	Process Synthesis	
BSE 365	Measurements and Instrumentation for Biological Systems	3
BSE 308	Career Management for Engineers	1

Total Credits **53-60**

¹ Taking the combination of CHEM 103 and CHEM 104 instead of CHEM 109 may increase the total minimum number of credits required to complete the program.

² Machinery Systems students may select AN SCI/DY SCI 101 or PLANTSCI 110 to also satisfy the Machinery Systems Production Agriculture requirement. Any biological science course of 2 or more credits is accepted. Additional courses taken may be counted as Technical Electives.

³ MICROBIO 101 or MICROBIO 303 required for Food & Bioprocess Engineering specialization.

⁴ E M A 201 Statics is an acceptable prerequisite for PHYSICS 202 General Physics.

⁵ Students selecting the Food & Bioprocess Engineering option who plan to enroll in CBE 310 Chemical Process Thermodynamics and CBE 320 Introductory Transport Phenomena must take CBE 250 here as a prerequisite. Students selecting the Food & Bioprocess Engineering option who plan to enroll in M E 361 Thermodynamics and M E 363 Fluid Dynamics are recommended to take BSE 249 here.

GENERAL PROGRAM REQUIREMENTS

Code	Title	Credits
M E 361	Thermodynamics ¹	3
or CBE 310	Chemical Process Thermodynamics	
BSE 464	Heat and Mass Transfer in Biological Systems	3
E M A 303	Mechanics of Materials	3
Complete one of the following courses: ¹		3-4
M E 363	Fluid Dynamics	
CIV ENGR 310	Fluid Mechanics	
CBE 320	Introductory Transport Phenomena	
Complete a minimum of three of the following:		6-9
BSE 301	Land Information Management	
BSE 364	Engineering Properties of Food and Biological Materials	
BSE/ ENVIR ST 367	Renewable Energy Systems	
BSE/CIV ENGR/ SOIL SCI 372	On-Site Waste Water Treatment and Dispersal	
BSE 405	Artificial Intelligence in Agriculture	
BSE 460	Biorefining: Energy and Products from Renewable Resources	
BSE 461	Food and Bioprocessing Operations	
BSE 472	Sediment and Bio-Nutrient Engineering and Management	
BSE 473	Water Management Systems	

BSE/M E 475	Engineering Principles of Agricultural Machinery	
BSE/M E 476	Engineering Principles of Off-Road Vehicles	
M E/BSE 474	Fluid Power	
AN SCI/BSE 344	Digital Technologies for Animal Monitoring	
BSE 305	Introduction to Precision Agriculture	
BSE 571	Small Watershed Engineering	
Complete a minimum of 9 credits of coursework numbered 300 or above non-BSE engineering courses		9
Total Credits		27-31

¹ Take BSE 249 and M E 361 and M E 363, or take CBE 250 and CBE 310 and CBE 320.

TECHNICAL ELECTIVES

Select courses from one or more of the following four technical elective categories to bring the total number of credits in the General Program Area or in the selected specialization area to 43.

A. INTRODUCTION TO ENGINEERING COURSES (FIRST-YEAR STUDENTS ONLY)

Code	Title	Credits
INTEREGR 170	Design Practicum	3

B. INDEPENDENT STUDY/INSTRUCTION COURSES

CALS or CoE courses with a 001, 299, 399, or 699 course number.

No more than 3 credits of coursework in this category can be used to meet technical elective requirements.

C. UPPER-LEVEL COURSES

Part 1. Upper-Level Engineering Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/instruction courses.

Code	Title	Credits
Any Engineering course numbered 300 or above		
E M A 202	Dynamics	3

Part 2. Upper-Level Science Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/instruction courses.

Code	Title	Credits
Advanced biological, natural, and physical science courses (i.e., courses with a B, N, or P designation)		
CHEM 341	Elementary Organic Chemistry	3
CHEM 342	Elementary Organic Chemistry Laboratory	1
CHEM 343	Organic Chemistry I	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Organic Chemistry II	3

CHEM/M S & E 421	Polymeric Materials	3
PLANTSCI/ ATM OCN 532	Environmental Biophysics	3

D. LOWER-LEVEL SCIENCE AND ENGINEERING COURSES, BREADTH COURSES

Elementary and intermediate biological, natural, and physical science courses except elementary and intermediate math courses; College of Engineering courses numbered 100 through 299; College of Agricultural and Life Sciences courses, Institute of Environmental Studies courses, and/or School of Business courses. Independent study/instruction courses cannot be counted in this category. No more than 12 credits of coursework in this category can be used to meet technical elective requirements.

CAPSTONE

Code	Title	Credits
BSE 508	Biological Systems Engineering Design Practicum I	2
BSE 509	Biological Systems Engineering Design Practicum II	3
Total Credits		5

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Display effective communication with a range of audiences.
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the

impact of engineering solutions in global, economic, environmental, and societal contexts.

5. Display teamwork skills, functioning effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

FOUR-YEAR PLAN SAMPLE BIOLOGICAL SYSTEMS ENGINEERING FOUR-YEAR PLAN—GENERAL PROGRAM

Students must complete at least 125 total credits to be eligible for graduation.

First Year

Fall	Credits Spring	Credits
MATH 221 ¹	5 MATH 222	4
CHEM 109 ²	5 BSE 310	3
Biological Science Course	3 INTEREGR 170	3

Technical Electives	4 Technical Electives	4
BSE General Program Elective	3 Elective Course	3
Humanities	3	
	16	13

Total Credits 127

¹ MATH course dependent on placement score and transfer credit evaluation.

² If CHEM 103 & CHEM 104 are taken in place of CHEM 109, it is suggested to take CHEM 103 in the fall semester and CHEM 104 in the spring semester of the first year, and move BSE 310 to the fall semester of the second year.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

All students are assigned an advisor when they join the department. First-year students work with a professional staff advisor; more advanced students transition to a faculty advisor in their specialization area. The BSE department promotes personalized advising through accessible appointments and requires advising meetings at least once each semester.

CAREER OPPORTUNITIES

BSE graduates have great careers developing new products, processes, and systems to protect soil, air, and water quality while meeting demand for food, materials, and energy. Alumni hold positions in research and engineering in organizations developing off-road equipment, food production, renewable energy systems, animal housing, environmental control systems, irrigation and drainage systems, and with engineering consulting companies. Earning a BSE degree puts students on track to become a professional engineer and take the Fundamentals of Engineering (FE) exam, the first step toward licensure which opens even more career opportunities.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE STUDENT ORGANIZATIONS

The American Society of Agricultural and Biological Engineers (ASABE) Pre-professionals Club (<https://asabe.bse.wisc.edu/>) connects students to professional development opportunities.

UW-Madison offers many other student groups to encourage networking and development of leadership skills. Some cater to agricultural interests, while others focus on engineering and biosciences. Many food and bioprocess engineering students are active in the Food Science Club. Other options include Minorities in Agriculture, Natural Resources and Related Sciences (<https://win.wisc.edu/organization/manrrs/>), Engineers for a Sustainable World (UW-Madison Chapter) (<https://win.wisc.edu/organization/esw-uwmadison/>), and more. Many student organizations exist to support engineering students who identify as Native American,

Black, Latinx, or part of the LGBTQIA+ community in professional development and academic success.

Find more student organizations (<https://win.wisc.edu/organizations/>).

COMPETITIVE TEAMS

The BSE department is the home of several engineering design teams that compete in one of several National Student Design Competitions through the American Society of Agricultural and Biological Engineers (ASABE). The Quarter-Scale Tractor Team (<https://badgerpulling.bse.wisc.edu/>) designs and builds a small-scale tractor judged by industry experts and put to the test in performance events against other national and international university teams. The Robotics Student Design Competition allows students to develop skills in robotic systems, electronics, and sensing technologies by simulating a fully autonomous robotic solution to a common agricultural process.

Many BSE students participate in or hold leadership positions in other engineering design competition teams, such as Formula SAE (<https://vehicles.wisc.edu/formula/formulaabout.html>), SAE Clean Snowmobile (<https://vehicles.wisc.edu/SNOWMOBILE/SNOWMOBILEabout.html>), ASCE Concrete Canoe (<https://win.wisc.edu/organization/canoe/>), Human Powered Vehicle Challenge (<https://hpvc.slc.engr.wisc.edu/new/>), Collegiate Wind Power Competition, (<https://energy.wisc.edu/news/uw-madison-team-compete-2022-collegiate-wind-competition/>) Baja Team (<https://vehicles.wisc.edu/BAJA/BAJAabout.html>), and UW Hybrid. (https://vehicles.wisc.edu/hybrid/team/mechanical_team.html)

INTERNSHIPS

Internships are an excellent way for students to ground what they have learned in practical applications. Students also participate in co-operative (co-op) education programs where they earn full-time salaries while working for a company. The program supports students in finding co-ops and internships and provides flexibility in class plans for opportunities that occur during fall or spring semesters. Students learn of pre-professional internships through on-campus career fairs – primarily by those hosted by the CoE and CALS – and through regular email announcements. Students also have opportunities to intern with professors performing research over the summer. Although not a program requirement, school credit may be earned for internships.

RESEARCH EXPERIENCE

Many professors in BSE and across campus provide opportunities for students to gain hands-on experience in research labs. Undergraduate researchers learn how knowledge is constructed, gain independence, and increase their self-confidence. These benefits are an advantage in any career path. BSE students are sought out by research groups across campus and governmental agencies because of their unique research experiences.

GLOBAL ENGAGEMENT

The program supports study abroad and international experiences with flexible scheduling. In addition to study abroad programs and internships, students can volunteer with student organizations like Engineers Without Borders (<http://ewbuwmadison.weebly.com/>). Students can choose to fulfill their International Studies requirement with an appropriate study abroad course.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

BSE students participate in campus-wide volunteer programs like Badger Volunteers, offering their expertise in education, sustainability, and

public health to support community organizations. In addition, BSE students volunteer through student organizations to work on special projects related to engineering. Past projects included the fabrication of bioreactors for communities in Uganda or Habitat for Humanity projects in Madison.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually from a standard application (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

Each year dozens of outstanding Biological Systems Engineering students are awarded scholarships from funds designated exclusively for this major. These funds seek to support students based on many different criteria, such as financial need, specific academic interests, extracurricular involvement, and academic success.

RESOURCES

BSE students have full access to the resources of both the College of Agricultural and Life Sciences and the College of Engineering, including Career Services, Study Abroad programs, access to specialized engineering software, and computer labs.

The Biological Systems Engineering Shop (<https://bse.wisc.edu/shop-information/shop-info-for-students/>) provides students hands-on experience with machining equipment commonly used in industry. Students can learn machining and metal fabrication techniques, as well as woodworking skills, and improve their understanding of design and assembly processes. Training and support are available for all skill levels. In addition, BSE students have access to all College of Engineering fabrication shops and the UW Makerspace (<https://making.engr.wisc.edu/>).

Other resources in the Agricultural Engineering Building include a dedicated student computer lab and a student lounge available for group study or individual work. Department-wide social events are also held here.

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the commission's General Criteria and Program Criteria for Biological and Similarly Named Programs.

PROGRAM#EDUCATIONAL OBJECTIVES#FOR THE BACHELOR OF SCIENCE IN BIOLOGICAL SYSTEMS ENGINEERING

The Biological Systems Engineering Department recognizes that our graduates will choose to use acquired knowledge and skills to pursue a wide variety of career and life goals. Whether they choose a professional

career, pursue further education, or engage in volunteer work, our graduates will:

1. Develop exceptional problem-solving, leadership, teamwork, and communication skills in the intersecting fields of biological systems and engineering, covering various scales, from microbial to global.
2. Utilize skills to make meaningful contributions to communities in addressing pressing societal and ecological challenges.
3. Be prepared for professional licensure and career development in the public, private, or nonprofit sectors.

Note: Undergraduate Program Educational Objectives and Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Biological Systems Engineering#Undergraduate Program website (<https://bse.wisc.edu/undergraduate-studies/>). (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

BIOLOGICAL SYSTEMS ENGINEERING: FOOD AND BIOPROCESS ENGINEERING

Food and bioprocess engineers develop and manage equipment and systems that process and distribute food and other biologically based materials. They are required by the food industry to help develop processes that add value to food products. These processing technologies are designed to improve the storage life and marketability of food products, reduce their transportation costs, handle processing wastes, and develop alternative uses for biological materials. (For example, newspaper and soy flour are used to make the construction material EnvironTM, and corn stalks can be used to make chemical absorbent pads.)

The food industry makes up one of the largest segments of our nation's economy and continues to enjoy steady growth due to the ever-changing needs of consumers and increased awareness of nutritional and environmental issues. Food and bioprocess engineers play a vital role in meeting this need. From potato chips to microwavable entrees, food and bioprocess engineers continue to develop processes to convert raw materials from the farm to food products for the dining room table.

Total Credits 126-128

¹ MATH course dependent on placement score and transfer credit evaluation.

² If CHEM 103 & CHEM 104 are taken in place of CHEM 109, it is suggested to take CHEM 103 in the fall semester and CHEM 104 in the spring semester of the first year, and move BSE 310 to the second year.

BIOLOGICAL SYSTEMS ENGINEERING: MACHINERY SYSTEMS ENGINEERING

Machinery systems engineering is what many students initially perceive biological systems engineering to be. These engineers are trained to design machines for production agriculture and construction. Concepts covered in this field include power transmission, traction, hydraulic power, and crop handling, such as planting and harvesting.

Over the past 50 years, machines have improved production efficiency in all aspects of life. Machinery systems engineers have played a key role in moving society from the highly manual culture of the early 20th century to the highly technical culture of the late 20th century. Even with these advances, the job of the machinery systems engineer is not complete. Concern for our natural environment and worker safety, and the constant desire to reduce costs and energy consumption while improving production efficiency, will continue to challenge machinery systems engineers.

REQUIREMENTS

BIOLOGICAL SYSTEMS ENGINEERING: NATURAL RESOURCES AND ENVIRONMENTAL ENGINEERING

Natural resources and environmental engineers work with all kinds of natural resources, like water, soil, plants, and air. For example, they could be responsible for the design of livestock or wildlife watering stations in a natural forest or the design of a recycling waste management system on a dairy farm. Graduates find challenging and rewarding work with engineering and environmental consultants, with government agencies like the Forest Service, and with companies such as Valmont Irrigation and Creative Habitat.

Conserving soil and water resources is critical to our future. Expanding populations and increasing needs for food, goods, and services are placing an ever growing demand upon our precious soil and water resources. Natural resources and environmental engineers are finding ways to manage and conserve our resources today so that we can meet the demands of the future.

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY

Faculty, students, and staff in the University of Wisconsin's Department of Community and Environmental Sociology are concerned with a wide array of issues from environmental degradation and globalization to

sustainability and local food systems. The faculty is made up of an interdisciplinary group trained in fields ranging from sociology to science and technology studies and environmental studies. We are an engaged group whose work, while theoretically informed, is often directed at intervening in and affecting real-life situations. The issues discussed in Community and Environmental Sociology classes can also be applied outside of the classroom.

Community and Environmental Sociology majors go on to a wide variety of careers in environmental conservation, community and international development, food systems, law, public policy, sociology, and public health – in the private, public, and non-profit sectors. Alumni hold positions as directors, managers, administrators, policymakers, data analysts, planners, consultants, researchers, teachers, health care workers, and civil servants. The program also provides excellent preparation for graduate school.

The Department of Community and Environmental Sociology is also home to the undergraduate Food Systems Certificate, which assembles an interdisciplinary program of study, that explored the social, economic, and environmental outcomes of different patterns of food production, processing, distribution, and consumption.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Community and Environmental Sociology, BS (p. 128)
- Food Systems, Certificate (p. 132)

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY, BS

Community and environmental sociology explores the communities in which people live and the relationships between people and their natural environments. Using an integrative approach, the major provides students a broad view of the societal factors involved in issues of environment, food systems, health, and community development, as well as strategies for promoting a more just and sustainable world.

Through core courses, students receive foundational knowledge in sociology and select from a wide range of electives covering environmental stewardship, resource conflicts, public health, social change, social justice, agroecology, rural development, labor, science and technology, colonialism, and globalization.

Graduates go on to a wide variety of careers in environmental conservation, community and international development, food systems, law, public policy, sociology, and public health – in the private, public, and non-profit sectors. A Community and Environmental Sociology major also provides excellent preparation for graduate school. Alumni hold positions as directors, managers, administrators, policymakers, data analysts, planners, consultants, researchers, teachers, health care workers, and civil servants.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCE

Students can apply their course learning to real life through internships, field courses, and research projects. During their final year, majors complete a senior capstone course where they receive instruction helping them integrate what they have learned through previous courses, and also build knowledge and skills that will help them transition into professional careers or graduate school. This can be done through either seminar-style discussion involving guest speakers and other resources or community-based research projects in collaboration with community groups.

BUILD COMMUNITY AND NETWORKS

Students get to know faculty and instructors through departmental courses and social activities, and they can build their networks by participating in student organizations, internships, and research experiences.

CUSTOMIZE A PATH OF STUDY

In addition to a set of core courses, students choose from a wide array of electives to explore their areas of interest within the major. Many choose to add a certificate or double major to their degree. Common certificate options include global health, food systems, organic agriculture, science and technology policy, and environmental studies. Common second majors include environmental sciences, nutritional sciences, agronomy, biology, and wildlife ecology.

MAKE A STRONG START

An introductory course provides an overview of topics such as community organizing, local food systems, energy transitions, environmental justice, resource dependence, and sustainable development.

GAIN A GLOBAL PERSPECTIVE

Majors learn about different cultures, communities, and environments through the classes they take, and many choose to study abroad to further expand their perspectives. Majors can choose semester-long programs or summer opportunities at top universities in Africa, Asia, Europe, and Latin America, or shorter faculty-led study abroad experiences. Students can explore studying abroad as a Community and Environmental Sociology major by utilizing the Community and Environmental Sociology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None

Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and

Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3

CREDIT REQUIREMENT

Must complete a total of 30 credits of C&E SOC courses. Students may count up to 4 credits of Independent Study (C&E SOC 299 Independent Study, C&E SOC 699 Special Problems), Internship (C&E SOC 399 Coordinative Internship/Cooperative Education), or Thesis (C&E SOC 681 Senior Honors Thesis/C&E SOC 682 Senior Honors Thesis/C&E SOC 691 Senior Thesis/C&E SOC 692 Senior Thesis) here, with permission of their advisor.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand how social science arguments are constructed and evaluated.
2. Develop ability to assess data quality and understand whether particular data is appropriate to answer specific questions.
3. Learn general theories on basic social processes, especially those related to the relationships between society and the environment and the social organization of communities.
4. Learn communication skills in the social sciences.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE COMMUNITY AND ENVIRONMENTAL SOCIOLOGY FOUR-YEAR PLAN

Students must complete at least 120 total credits to be eligible for graduation.

¹ Electives should be chosen in order to satisfy university and CALS requirements. See requirements tab for details.

² Community and environmental sociology electives include the community course set and the environmental course set. See requirements tab for details.

³ Students may take the capstone course either semester of their senior year. The fall semester and spring semester courses may have different content.

The above plan assumes that a student enters with standard high school preparation (algebra, geometry, third-year math, two years' foreign language).

ADVISING AND CAREERS**ADVISING AND CAREERS****ADVISING**

Students have an academic advisor who helps them with course planning and mapping out their degree plans. They also have a faculty mentor, with whom they can discuss internship opportunities and career goals.

CAREER OPPORTUNITIES

Graduates go on to a wide variety of careers that help support environmental sustainability, sustainable agricultural systems, community development, and public health – in the private, public, and non-profit sectors. The major also provides excellent preparation for graduate school. Alumni hold professional positions as directors, managers, administrators, policymakers, data analysts, planners, consultants, researchers, teachers, health care workers, and civil servants.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE****INTERNSHIPS**

Many students complete internships, including with campus clubs, community groups, and national and international non-profit organizations. Learn more about internship opportunities. (<https://dces.wisc.edu/programs/opportunities/possible-internships/>)

RESEARCH EXPERIENCE

Community and Environmental Sociology majors can gain research experience by participating in a faculty-led research project or conducting their own project supervised by a faculty member. Students can choose to write thesis papers, and some become authors or co-authors on published research papers.

GLOBAL ENGAGEMENT

Majors are encouraged to participate in study abroad experiences across all continents. Options include a sustainable development course in

Uganda, a food systems and health course in South Africa, and many other options.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

There are many opportunities to engage in volunteer activities. The Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

STUDENT ORGANIZATIONS

There are numerous campus student organizations of interest to majors, including F.H. King Students for Sustainable Agriculture, Campus Food Shed, and REthink Wisconsin. A full list of UW–Madison student organizations is available on the Wisconsin Involvement Network website (<https://win.wisc.edu/organizations/>).

RESOURCES AND SCHOLARSHIPS**RESOURCES AND SCHOLARSHIPS**

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

The Department of Community and Environmental Sociology awards an average of \$15,000 in scholarships each year to undergraduate students in the department. This includes numerous Crowe Scholarships, which are awarded to students to support research, study abroad, conference fees, and professional society memberships. Crowe Scholarships are also awarded for financial need and academic achievement. Learn more about Community and Environmental Sociology scholarships. (<https://dces.wisc.edu/programs/scholarships/>)

FOOD SYSTEMS, CERTIFICATE

The certificate in food systems is an option open to all undergraduate students. It assembles an interdisciplinary curriculum, integrating different paradigms across all aspects of food production, distribution, and consumption, along with the context and values inherent to the systems.

For students in food or agriculture-related majors, the certificate in food systems will provide a broader context to their disciplinary studies. For students in fields that include food as a possible orientation of their studies, it will provide exposure to the full range of food systems, potentially inspiring an orientation to food as a focus of their studies. For students of any discipline, the certificate will help students be more informed consumers and citizens, hopefully leading to better choices about what they eat through knowledge of food and the social, economic, and environmental outcomes of different patterns of production, processing, distribution, and consumption.

HOW TO GET IN

HOW TO GET IN

Undergraduate students of any major are welcome to pursue the Certificate in Food Systems. While there are different pathways to complete the certificate, students who declare and plan their coursework earlier in their careers will be in a better position to complete the required coursework.

Students are eligible to declare the certificate once they complete one of the three core courses with a grade of B or better:

Code	Title	Credits
AGROECOL/ C&E SOC/ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	3
C&E SOC/A A E/ SOC 340	Issues in Food Systems	3-4
DY SCI 471	Food Production Systems and Sustainability	3

Students who meet the eligibility criteria should fill out this short questionnaire (https://uwmadison.co1.qualtrics.com/jfe/form/SV_0JPABackGujKA2p/) and then contact the undergraduate coordinator listed in the contact information box to declare the certificate.

REQUIREMENTS

REQUIREMENTS

The Certificate in Food Systems requires that students take two highly interdisciplinary core courses (6 total credits), and at least one course in each of three thematic elective categories (for 9 total credits across electives), plus a one credit culminating activity such as an internship, independent study, or appropriate capstone. The course list below provides a complete list of courses that satisfy each requirement.

MINIMUM REQUIREMENTS:

- 2.0 GPA in certificate courses
- At least 50% of certificate courses taken in-residence (i.e. at UW-Madison or through a UW-Madison sponsored study abroad program)
- Minimum of 16 credits total

Code	Title	Credits
Core Courses		
Complete two of the following:		6-7
AGROECOL/ C&E SOC/ ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	
C&E SOC/A A E/ SOC 340	Issues in Food Systems	
DY SCI 471	Food Production Systems and Sustainability	
Elective Courses		
Complete at least one course from each list: Provisioning, Context, and Values for a total of at least 9 credits		9

Provisioning (production, processing, distribution)

PLANTSCI 110	Introduction to Plant Science and Technology

Total Credits	16-17

¹ Culminating activities must be formally pre-approved and incorporated into an independent study (299) or internship (399) within the Department of Community and Environmental Sociology. Click [HERE](https://uwmadison.co1.qualtrics.com/jfe/form/SV_eaks3WTTYEkj7Xn/) (https://uwmadison.co1.qualtrics.com/jfe/form/SV_eaks3WTTYEkj7Xn/) for more information and a form to request approval of a culminating activity.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Evaluate critically the key elements of a food system.
2. Evaluate critically how political, social, economic, and environmental forces interact to shape food systems.
3. Evaluate critically the biophysical processes inherent in various agricultural production systems.
4. Evaluate critically how individuals from different backgrounds interact with local and global food systems as humans, consumers, producers, and citizens.
5. Evaluate critically the social, economic, and environmental outcomes of different food systems.

ADVISING AND CAREERS

ADVISING AND CAREERS

Questions about the certificate may be directed to the undergraduate coordinator.

CAREERS

For students in food or agriculture related majors, the certificate in food systems will provide a broader context to their disciplinary studies. As they seek careers, they will be able to provide evidence of enhancing their disciplinary learning and skills with a broader framework of food system concepts, including ideas for enhancing food system sustainability. For students in fields that include food as a possible orientation of their studies, it will provide exposure to the full range of food systems, potentially inspiring an orientation to food as a focus of their studies. For students in any discipline, the certificate in food systems will help them be more informed consumers and better informed citizens, hopefully leading to better choices about what they eat through knowledge of food and the social, economic, and environmental consequences of production, processing, distribution, and consumption.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

- Integrated, interdisciplinary course work
- Professional development opportunities, including options to intern off campus
- Hands-on culminating experience

ENTOMOLOGY

Insects have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insect species – with estimates ranging from three million to 30 million unique species. At any given moment, 200+ million insects live for every human on Earth; over 70% of all animal species are insects. They have achieved something that has eluded humans – sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology and behavior, to molecular biology, physiology and development, to medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time, an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory or classroom.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university

teaching, research and extension work, state and federal government service, industry, and research institutes.

Students can complete an undergraduate major in entomology or global health in the Entomology department.

Students interested in graduate work should consult the Graduate Guide (<https://guide.wisc.edu/graduate/>).

ENTOMOLOGY, BS

Entomology is the study of insects, which have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insect species – with estimates ranging from three million to 30 million unique species. At any given moment, 200+ million insects live for every human on Earth; over 70% of all animal species are insects. They have achieved something that has eluded humans – sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology, and behavior, to molecular biology, physiology, and development, to medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time, an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory, classroom, or museum settings.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university teaching, community education, research and extension work, state and federal government service, industry, and research institutes.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Entomology students learn in many field and lab courses, including classes that focus on taxonomy, physiology, parasitology, insects and human culture, issues in global health, and medical entomology. Students can complete their capstone requirement as part of a summer field course. There are also numerous internships and research opportunities available both on and off campus.

BUILD COMMUNITY AND NETWORKS

The UW–Madison Entomology Department is committed to the UW System’s (<http://www.wisconsin.edu/campuses/>) goal to provide Wisconsin’s citizens with opportunities to benefit from and contribute to the state’s growing “knowledge economy” through the land-grant university three-fold mission of teaching, research and public service.

In the spirit of The Wisconsin Idea (<http://www.wisconsinidea.wisc.edu/>), Entomology Department faculty and students fulfill the public service mission through entomology outreach engagement. Entomology Department interactions with the surrounding and statewide community encompass a wide range of insect and human affairs from human medical issues such as West Nile Virus and Lyme disease, to forest products and natural resources entomology, integrated pest management programs for agriculture, turf and ornamental and household settings, K-12 primary and secondary school education, and more.

CUSTOMIZE A PATH OF STUDY

Students are often able to customize their program of study by exploring a double major and/or undergraduate certificates based on their unique areas of interest. Both faculty and staff advisors are available to help students choose electives based on their educational and professional goals.

MAKE A STRONG START

Freshmen who are interested in Entomology are encouraged to participate in a First-Year Interest Group (<https://figs.wisc.edu/what/>) (FIG) program. During fall semesters, the department has historically offered a fascinating FIG titled “Global Biodiversity and the 6th Mass Extinction” where students explore what the immense richness of biodiversity means not only to the human species but to the very health of the planet. This program includes field trips, a museum experience, and other hands-on and experiential learning opportunities to bring concepts and classmates together for an eye-opening journey.

GAIN GLOBAL PERSPECTIVE

The Entomology major is a great choice for students who wish to participate in a study abroad experience. Students can choose from a multitude of destinations worldwide and can travel abroad during summer, spring, or fall terms. Students can explore studying abroad as an Entomology major by utilizing the Entomology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None

Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79 (https://go.wisc.edu/g85h79/)) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none">• Breadth–Humanities/Literature/Arts: 6 credits• Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits• Breadth–Social Studies: 3 credits• Communication Part A & Part B *• Ethnic Studies *• Quantitative Reasoning Part A & Part B *
-------------------	---

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and

Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
	CHEM 103 General Chemistry I	
	or CHEM 108 Chemistry in Our World	
	or CHEM 109 Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Code	Title	Credits
	Mathematics	9-11
	Chemistry	5-9
	Biology	10
	Physics	3-5
	Biological and Physical Science Electives	12
	Entomology Core	15
	Capstone	3
Total Credits		57-65

MATHEMATICS

Code	Title	Credits
Complete one of the following (or may be satisfied by placement exam):		
MATH 112 & MATH 113	College Algebra and Trigonometry	6
MATH 114	Precalculus	5
MATH 171	Calculus with Algebra and Trigonometry I	5
Complete one of the following:		
MATH 211	Survey of Calculus 1	4
MATH 217	Calculus with Algebra and Trigonometry II	5
MATH 221	Calculus and Analytic Geometry 1	5
STAT 371	Introductory Applied Statistics for the Life Sciences	3

CHEMISTRY

Complete one of the following:

Code	Title	Credits
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5

BIOLOGY

Complete one of the following options:

Code	Title	Credits
Option 1:		
BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	10
Option 2:		
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BIOLOGY/ BOTANY 130	Animal Biology and Animal Biology Laboratory and General Botany	10
Option 3:		
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	10

PHYSICS

Complete one of the following:

Code	Title	Credits
PHYSICS 103	General Physics	4
PHYSICS 107	The Ideas of Modern Physics	3
PHYSICS 109	Physics in the Arts	3
PHYSICS 115	Energy and Climate	3
PHYSICS 201	General Physics	5
PHYSICS 207	General Physics	5

BIOLOGICAL AND PHYSICAL SCIENCE ELECTIVES

Complete 12 additional credits from any biological or physical science course (at least 8 credits must be numbered 300-399 or 200-299 with the intermediate-level designation). Recommended courses are listed below.

Recommended Biological and Physical Science Electives

Code	Title	Credits
GENETICS 466	Principles of Genetics	3
CHEM 341	Elementary Organic Chemistry	3
CHEM 342	Elementary Organic Chemistry Laboratory	1
CHEM 343	Organic Chemistry I	3

CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Organic Chemistry II	3
PHYSICS 104	General Physics	4
PHYSICS 202	General Physics	5
PHYSICS 208	General Physics	5
ENTOM (not used to meet other requirements), BOTANY, ZOOLOGY, F&W ECOL, MICROBIO, or PL PATH.		

ENTOMOLOGY CORE

Code	Title	Credits
ENTOM/ ZOOLOGY 302	Introduction to Entomology	4
Subset Courses		11

Must complete at least 3 credits from at least two subsets (organismal, suborganismal, or applied).
Courses may not double count in more than one subset.
May complete up to 3 credits from the subset labeled "other." See course lists below.

Organismal

Code	Title	Credits
ENTOM 331	Taxonomy of Mature Insects	4
ENTOM 432	Taxonomy and Bionomics of Immature Insects	4
ENTOM 450	Basic and Applied Insect Ecology	3
ENTOM 468	Studies in Field Entomology	3
ENTOM/BOTANY/ ZOOLOGY 473	Plant-Insect Interactions	3
ENTOM 490	Biodiversity and Global Change	3

Suborganismal

Code	Title	Credits
ENTOM 321	Physiology of Insects	3
ENTOM/ ZOOLOGY 371	Medical Entomology: Biology of Vector and Vector-borne Diseases	3-4
ENTOM/BOTANY/ PL PATH 505	Plant-Microbe Interactions: Molecular and Ecological Aspects	3
ENTOM/GENETICS/ ZOOLOGY 624	Molecular Ecology	3

Applied

Code	Title	Credits
ENTOM 344	From Flowers to Food: Pollinator Ecology and Conservation	3
ENTOM/M M & I/ PATH-BIO/ ZOOLOGY 350	Parasitology	3
ENTOM 351	Principles of Economic Entomology	3
ENTOM/ ZOOLOGY 371	Medical Entomology: Biology of Vector and Vector-borne Diseases	3
ENTOM 450	Basic and Applied Insect Ecology	3

Other

Code	Title	Credits
ENTOM 375	Special Topics	1-4
ENTOM 399	Coordinative Internship/ Cooperative Education	1-8
ENTOM 681	Senior Honors Thesis	2-4
ENTOM 682	Senior Honors Thesis	2-4
ENTOM 691	Senior Thesis	2
ENTOM 699	Special Problems	1-4

CAPSTONE

ENTOM 468 Studies in Field Entomology is the recommended capstone course (can double count in Entomology Core). ENTOM 681 Senior Honors Thesis, ENTOM 682 Senior Honors Thesis, ENTOM 691 Senior Thesis, ENTOM 699 Special Problems can be substituted in special circumstances (and can double count up to 3 credits in Entomology Core Category); see advisor.

Code	Title	Credits
ENTOM 468	Studies in Field Entomology	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences focusing on insects.
2. Knowledge of laboratory and/or field methodology.
3. Explain and apply scientific methods including designing and conducting experiments and testing hypotheses.
4. Recognize relationships between structure and function at all levels including molecular, cellular, organismal and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physics, and technology to answer biological questions using the scientific method.

FOUR-YEAR PLAN

FOUR-YEAR PLAN
SAMPLE ENTOMOLOGY FOUR-YEAR PLAN

Students must complete at least 120 total credits to be eligible for graduation.

This sample four-year plan is a tool to assist students and their advisors. Students should use their DARS report, the degree planner, Guide requirements, and the course search & enroll tools to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Total Credits 120**ADVISING AND CAREERS****ADVISING AND CAREERS****ADVISING**

Undergraduate students are assigned to an Entomology undergraduate faculty advisor and academic staff advisor. However, since the vast majority of Entomology BS students conduct independent research during their undergraduate career, it is important to meet with other entomology faculty members (<https://entomology.wisc.edu/people/faculty/>) to learn about all of the research possibilities.

Undergraduates in Entomology are strongly urged to meet with their advisor before they enroll for the upcoming term. If you have questions about advising or declaring the major, please contact the academic advisor.

CAREER OPPORTUNITIES

Entomologists from all educational levels are able to seek employment in a variety of areas. Graduates find employment in college and university teaching, community education, research and extension work, state and federal government service, industry, and research institutes. Some examples include:

- college and universities
- biotechnology companies
- state and federal agencies
- international agricultural research centers
- nurseries, greenhouses, and garden centers
- non-governmental organizations
- golf courses, public parks, and landscape maintenance companies
- agricultural companies
- a variety of private consulting firms

For more information on careers available to Entomology students, please visit our Internship & Job Resources (<https://entomology.wisc.edu/graduate-study/internships-and-job-resources/>) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to Entomology BS students, please visit the CALS Career Services (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>) page. Students in the major are welcome to make an individual appointment with their advisor to discuss a number of career-related topics such as career exploration,

search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE**

While entomology clearly is “big science,” our department prides itself on a “small campus” feel in which we get to know our undergraduate students during their time with us.

In the classroom, we strive to maintain labs at not more than 15-20 students to maximize individualized and participatory learning. Students are given additional opportunities for deep and engaged learning experiences through honors options that are generally available for most courses and field and/or lab experiences in many of the upper-level courses.

INTERNSHIPS

Please visit our Internships & Job Resources (<https://entomology.wisc.edu/graduate-study/internships-and-job-resources/>) page for more information on the multitude of internship and employment opportunities available to Entomology students. Research and internship opportunities are also available in the UW Insect Research Collection (WIRC) (<http://labs.russell.wisc.edu/wirc/>), as well as possible participation in WIRC-sponsored collecting expeditions in Wisconsin and around the United States.

RESEARCH EXPERIENCE

Very nearly all our undergraduate students have opportunities to work alongside our faculty and graduate students in research labs and in the field. Our major accommodates 1-3 credits (of the 15 entomology credits required to major) in the area of directed/independent study and internships to promote extracurricular and outside the traditional classroom learning.

STUDENT ORGANIZATIONS

Undergraduate students are also involved in service learning and teaching through our departmental “Insect Ambassadors (<https://entomology.wisc.edu/outreach/insect-ambassadors/>)” outreach program to K-12, various clubs, and organizations. We are committed to the UW System goal to provide Wisconsin’s citizens with opportunities to benefit from, and contribute to, the state’s growing “knowledge economy” through the land-grant university three-fold mission of teaching, research, and public service. We also have an active Undergraduate Entomology Society for majors – or any UW–Madison students interested in entomology.

GLOBAL ENGAGEMENT

Entomology students are encouraged to participate in a study abroad experience. Students can find more information about study abroad on the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

COMMUNITY ENGAGEMENT AND VOLUNTEERING

In the spirit of The Wisconsin Idea (<http://www.wisconsinidea.wisc.edu/>), Entomology Department faculty and students fulfill the public service mission through entomology outreach engagement. Entomology Department interactions with the surrounding and statewide community

encompass a wide range of insect and human affairs from human medical issues such as West Nile Virus and Lyme disease, to forest products and natural resources entomology, integrated pest management programs for agriculture, turf and ornamental and household settings, K-12 primary and secondary school education, and more. Please visit our Outreach (<https://entomology.wisc.edu/outreach/>) page for more information.

On campus, the Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Department scholarships are available to Entomology students and fellowships are available to support research work with a professor. Please visit our Awards & Scholarships (<https://entomology.wisc.edu/undergraduate-study/awards-scholarships/>) page for additional details. Students across the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships here (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

GLOBAL HEALTH, BS

Global health is about improving health for everyone while considering the connections among people, animals, plants, and the planet. Students explore how human health intersects with economic development, healthcare access, food systems, environmental health, and climate change in order to address the root causes of disease around the world. The program helps students develop broad public health and planetary-scale perspectives that can be applied to community, state, national, and international health challenges.

Students in the Global Health Major study human health and well-being with an emphasis on empathy, cultural awareness, and collaborative approaches. The major combines bioscience and social science to provide students with foundational knowledge in disease biology, epidemiology, food systems, environmental health, and public health. Majors are encouraged to pursue their own areas of interest through coursework and by participating in field experiences, laboratory research, internships, and volunteer work.

The Global Health Major prepares students for a wide variety of careers. Students can become healthcare professionals well-informed about the systems that impact patient health. They can become epidemiologists or research scientists in academia or with government agencies, or community health professionals working on policy, education, or communication for governmental agencies or non-governmental organizations anywhere in the world. The program supports students who intend to go directly into the workforce after graduation, as well as those who plan to further their education through graduate or professional programs.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Students can apply their course learning to real life by participating in global health field experiences (<https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/>), which provide opportunities to study and help mitigate real-world health challenges. Additionally, students gain experience through laboratory courses and through independent study in research labs that focus on health-related issues such as infectious diseases, environmental health, sustainable agriculture, and community engagement. Campus internship programs through the Wisconsin Area Health Education Centers (<https://ahec.wisc.edu/>), Center for Patient Partnerships (<https://patientpartnerships.wisc.edu/>), and Study Abroad (<https://studyabroad.wisc.edu/intern-abroad/>) are also options for global health majors.

BUILD COMMUNITY AND NETWORKS

Many advanced courses enroll 15-50 students allowing students to get to know faculty and instructors personally. Students also have opportunities to connect with other global health major and certificate students through classes, events, field experiences, and student organizations.

CUSTOMIZE A PATH OF STUDY

In addition to a set of core courses, students are encouraged to take classes to explore and identify their particular areas of interest within the broader field of global health. Students also tailor their major and Wisconsin Experience through global health field programs, laboratory research, capstone courses, internships, and volunteer work.

MAKE A STRONG START

A number of first-year seminar courses are available to help new students understand academic programs, access student services, and develop time management and study skills.

GAIN GLOBAL PERSPECTIVE

Global health students learn to take a broad, planetary-scale perspective, and apply it to challenges at community, state, national, and international levels. This big-picture perspective is interwoven through nearly all aspects of the Global Health Major, including classes, capstone experiences, lab opportunities, and internships. Global health field experiences, which range from one week to a full semester, expose students first-hand to complex global health challenges in diverse settings and give them the opportunity to learn from community members and practitioners who are working to address these issues. Students can explore studying abroad as a Global Health major by utilizing the Global Health Major Advising Page. Students work with their advisor and the CALS Study Abroad Office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.

Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79 (https://go.wisc.edu/g85h79/)) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

Students cannot earn both the Global Health certificate and the Global Health major. Additionally, students declared in the Global Health major cannot earn the Health and the Humanities certificate.

ADDITIONAL MAJOR IN GLOBAL HEALTH

Current UW-Madison students in other schools and colleges interested in completing an additional ("double") major in Global Health should consult with a global health advisor. Advisor contact information is found on the advising and careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Describe the current status of health, well-being and sustainability for humans and all life, the environment, and the planet.
2. Compare and contrast health and environmental conditions in the context of local settings and our state with national, international and global settings.
3. Quantify health challenges in terms of the global burden of disease, the human development index, and the metrics associated with the sustainable development goals and the planetary health boundaries.
4. Evaluate the strengths and weaknesses of contemporary initiatives and programs to improve global public health and sustainable systems.
5. Use socioeconomic and political frameworks to characterize health challenges and demonstrate social awareness.
6. Demonstrate interpersonal and communication skills necessary for teamwork and leadership, ethical conduct, cross-cultural collaboration and civic engagement.
7. Use a systems approach to analyze complex relationships related to creating conditions for healthy life, sustainability and survival and describe the challenges and opportunities related to sustainable systems and survival.

Total Credits 119-121**ADVISING AND CAREERS****ADVISING AND CAREERS**

Each student is assigned an academic advisor who works to understand student goals and helps each student shape their unique Wisconsin Experience and make the most of their time at UW-Madison. Advisors also provide students career advising, as well as resources and guidance on planning for post-college activities such as graduate/professional school and "gap year" experiences.

Connect with Global Health Advisors (<https://globalhealth.cals.wisc.edu/advising/>)
CAREER OPPORTUNITIES

The knowledge and skills developed through the Global Health Major prepare students for success in a wide range of careers. Global health students are prepared to become physicians, nurses, researchers, public health officials, policy makers, data analysts, administrators, non-profit

employees, educators, and communications specialists in fields related to public health, epidemiology, environmental health, and international development.

Examples of employers seeking individuals with global health training include international agencies (such as the World Health Organization); federal agencies (such as the Centers for Disease Control and Prevention); state and county health departments (such as the Wisconsin Department of Health Services); non-profit organizations (such as the Bill and Melinda Gates Foundation), hospitals; universities; research centers; and biotech companies.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE**
FIELD EXPERIENCES

Issues related to global health occur everywhere – at community, state, national, and international levels – and global health majors are strongly encouraged to participate in one of many field experience options (<https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/>) to learn about and help mitigate these challenges. Field experiences can take place locally or internationally, and they range in length from one week to an entire semester. All options emphasize human health and sustainable systems and help provide students a more personal connection to what they are learning – whether in Kenosha or Kenya.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Students have numerous volunteer activities to choose from related to health improvement. The Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESEARCH EXPERIENCE

Global health majors are encouraged to join research teams and laboratories, where they can get involved in health-related research on infectious diseases, environmental health, sustainable agriculture, and community engagement. Many students take advantage of such research opportunities (<https://globalhealth.cals.wisc.edu/involvement/research/>), receiving direct mentorship from professors, scientists, and graduate students.

STUDENT ORGANIZATIONS

There are numerous campus student organizations (<https://globalhealth.cals.wisc.edu/involvement/student-orgs/>) that global health majors can join to connect with students with similar interests. A full list of organizations is available on the Wisconsin Involvement Network website (<https://win.wisc.edu/>).

INTERNSHIPS

A number of campus internship programs are available that are a good fit for global health majors, including opportunities through the Wisconsin Area Health Education Centers (<https://ahec.wisc.edu/>), Center for Patient Partnerships (<https://patientpartnerships.wisc.edu/>), and Study Abroad (<https://studyabroad.wisc.edu/intern-abroad/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually, including funding to help support Global Health Majors who participate in field experiences and study abroad. Students apply for these scholarships through a single application in the Wisconsin Scholarship Hub (WiSH). To learn more about college scholarships, please visit the CALS scholarship website (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

GLOBAL HEALTH, CERTIFICATE

The 15-credit certificate provides interdisciplinary perspectives on well-being, health inequities, and the root causes of global health challenges, and it is a great complement to many majors. The certificate is open to all UW–Madison undergraduate students and welcomes all who are passionate about improving the health of populations across the world.

Students build knowledge about the global burden of disease and threats to well-being and are able to identify parallels between local, domestic, and international health issues. Through coursework and field experiences, students learn about public and global health careers and build valuable cross-cultural communication skills.

CUSTOMIZE A PATH OF STUDY

The certificate curriculum is flexible including core courses, a diverse range of electives, and a credit-bearing field experience requirement, allowing students to enhance the connection between the certificate and their major field of study as desired. Students have added the certificate to more than 50 majors in Agricultural and Life Sciences, Letters & Science, Human Ecology, Education, Nursing, Engineering, and Business.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

A required field experience (<https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/>) allows students to apply their coursework in a real-life setting where they examine global health issues and explore the connections among human, animal, plant, and environmental health alongside community members and health practitioners in Wisconsin, the U.S., and abroad.

GAIN GLOBAL PERSPECTIVE

Core courses provide students with a strong global and comparative framework for understanding complex health challenges, and faculty-led field experiences, whether international or within the U.S., allow students to learn about global health challenges from leading experts in the field.

BUILD COMMUNITY AND NETWORKS

Field experience courses provide opportunities for community-building and high-impact educational experiences in courses with fewer than 20 students. Many students also build connections and develop leadership skills through participation in the many student organizations (<https://globalhealth.cals.wisc.edu/involvement/student-orgs/>) on campus related to global health.

HOW TO GET IN

HOW TO GET IN

Undergraduate students from across campus are encouraged to consider completing the Certificate in Global Health. There are no prerequisites for declaring, and students pursuing the program are encouraged to declare as early as possible so that they can best align the coursework with their interests and plan their field experience.

Students can declare the program by scheduling an appointment with their assigned Global Health advisor, or by filling out the online declaration form on the program's website (<https://globalhealth.cals.wisc.edu/about-the-certificate/declaring-the-certificate/>).

Students declared in the certificate should plan to complete the program before or alongside their degree and major requirements, as they are not able to extend their time on campus to complete a certificate. Students declared in the Global Health major are not eligible to declare the certificate. Students may not declare both the Certificate in Global Health and the Health and the Humanities Certificate.

REQUIREMENTS

REQUIREMENTS MINIMUM REQUIREMENTS

- Minimum grade of C in all certificate coursework
- At least 50% of certificate coursework taken in residence

Code	Title	Credits
Foundation Course Requirement		
NUTR SCI/ ENTOM 203	Introduction to Global Health	3
or ENTOM/ ENVIR ST 205	Our Planet, Our Health

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Identify and articulate the global burden of disease, opportunities and threats to well-being, and the root causes and possible solutions to these challenges.
2. Demonstrate a holistic and critical perspective on human health and well-being.
3. Utilize global frameworks for policy development and action for improved health, well-being, and equity.
4. Identify local, national and international health issues, and the connections between these challenges.
5. Engage and communicate respectfully with diverse colleagues and local partners.
6. Reflect and demonstrate self-awareness, humility, and empathy toward multiple cultural perspectives and knowledge.

ADVISING AND CAREERS

ADVISING AND CAREERS

Each certificate student is assigned an advisor who works to understand student goals and helps each student shape their path through the certificate. Advisors also provide students with advising around options to fulfill the field experience requirement and post-graduation plans such as "gap year" opportunities, jobs, fellowships, and graduate school.

Connect with Global Health Advisors (<https://globalhealth.cals.wisc.edu/advising/>)

CAREER OPPORTUNITIES

Many graduates connect their major and certificate studies to best match employers looking for a global health perspective. Areas for future careers are extremely varied, but include healthcare professions, public health and epidemiology, research, policy, education, health communications, environmental health, and international development.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Local or international internships may be part of students' field experience requirement. Examples include: Community Health Internship Program with the Wisconsin Areas Health Education Centers (<https://ahec.wisc.edu/>); Resource Navigator Internship Program with the Center for Patient Partnerships (<https://patientpartnerships.wisc.edu/>); Wisconsin in Washington Internship Program (<https://studyabroad.wisc.edu/uwindc/>); and internships through the International Internship Program (<https://internships.international.wisc.edu/>).

GLOBAL ENGAGEMENT

Immersive field experiences (<https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/>) are a hallmark of the certificate program and include both local and international opportunities. Local field experiences are offered in Madison and throughout Wisconsin. International field experiences are offered across the globe: Mexico, Costa Rica, Ecuador, Tanzania, Ghana, Uganda, Sri Lanka, India, Nepal, Thailand, Japan, Austria and Italy.

RESEARCH EXPERIENCE

Many students pursuing the certificate choose to be involved in research (<https://globalhealth.cals.wisc.edu/involvement/research/>) and are mentored by leading researchers in global health. Examples include: studying the effects of climate change on human and ecosystem health; researching ways to prevent Lyme disease spread by ticks; examining how women's empowerment leads to better health outcomes; or investigating methods to evaluate population vitamin A status which informs global health policy.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Several student organizations (<https://globalhealth.cals.wisc.edu/involvement/student-orgs/>) on campus are related to global health. These organizations can be a great way to connect with other students with similar interests, network, get involved in the local community (<https://globalhealth.cals.wisc.edu/involvement/community-engagement/>), and learn more about global health or other similar topics. Examples include Slow Food, Community Health Volunteers of Madison, and Partners in Health Engage.

FOOD SCIENCE

Food science is the application of science and engineering to the production, processing, distribution, preparation, and evaluation of food.

The Department of Food Science at the University of Wisconsin–Madison has been a part of the College of Agricultural and Life Sciences for more than 100 years, instructing generations of food science and industry leaders. Housed in the recently remodeled Babcock Hall, the Department of Food Science offers students a unique undergraduate and graduate experience. Known for our distinguished and dedicated faculty and staff, students find the Department of Food Science a stimulating and encouraging environment to study and conduct research.

The Department of Food Science's undergraduate program offers students valuable real-world experience and leadership skills by providing an innovative curriculum; various club and extracurricular activities; research lab opportunities; access to a fully functional and award-winning dairy plant; professional and industry contacts and experience; numerous internships and scholarships, and nearly 100% job placement.

Students find career opportunities in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Fermented Foods and Beverages, Certificate (p. 151)
- Food Science, BS (p. 153)

FERMENTED FOODS AND BEVERAGES, CERTIFICATE

The Certificate in Fermented Foods and Beverages is open to all UW–Madison undergraduates, providing the opportunity to develop skills and knowledge in the science, development, production, and marketing of fermented foods and beverages. The program introduces all students to the theoretical and practical aspects of food and beverage fermentation through required introductory coursework. Experiential learning courses emphasize an exciting, hands-on approach to learning. Beer, wine, spirits, sourdough, kimchi, sauerkraut, cheese, and yogurt are among the food products explored in required coursework. The certificate also allows students to engage with cutting-edge developments in the use of precision fermentation for food and non-food applications. Students interested in finding solutions to global environmental challenges can examine the role of fermentation in the development of sustainable feedstocks, renewable materials, and biofuels.

While all students will receive a foundation in the science of fermentation, the certificate allows students to personalize their coursework to explore their own interests and advance individual career goals. Students can choose to deepen their scientific knowledge with a focus on chemistry, genetics, or microbiology or enhance their business acumen with a focus on marketing, supply chains, or management.

HOW TO GET IN

HOW TO GET IN

Undergraduate students in any major or college may earn this certificate. There are no prerequisites for declaring the certificate; however, there may

be prerequisites for individual courses in the certificate. Students will be informed of these prerequisites through Guide and advised to fulfill those requirements. Students pursuing the program are encouraged to declare as early as possible so that they can best align the coursework with their interests and plan their field experience.

Students wishing to declare the Certificate in Fermented Food and Beverages should meet with one of the advisors (listed in the Contact Information box) to declare the certificate.

REQUIREMENTS

REQUIREMENTS

Code	Title	Credits
Certificate Requirements

CBE 426	Mass Transfer Operations	3

COMP SCI 540	Introduction to Artificial Intelligence	3
COMP SCI 571	Building User Interfaces	3

Additional Requirements:

- 2.000 GPA in certificate courses.
- At least 50% of certificate courses taken in-residence (i.e. at UW-Madison or through a UW-Madison sponsored study abroad program.)
- Courses taken on a pass/fail (satisfactory/unsatisfactory) basis will not count toward the certificate.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Design and produce fermented foods and/or beverages that meet specified quality standards.
2. Discuss the general characteristics of fermentative organisms and the role of metabolic engineering in precision fermentation.
3. Describe the wider sustainability features of fermentation and its emerging role in decarbonizing the economy and addressing climate change
4. Describe the concepts of branding, business management, and labeling that are relevant to marketing fermented foods and beverages.
5. Identify the components and roles of information technology and computer interfaces in largescale traditional and precision fermentative processes.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Advising is essential for student success in the Fermented Foods and Beverages Certificate. There are many individual pathways through the certificate allowing students to explore their interests and individual educational goals. Students are encouraged to meet with a Certificate Advisor to ensure that they are enrolled in appropriate coursework to complete certificate requirements on time as well as to become aware of new opportunities and events within the certificate program.

Please contact the certificate advisor listed in the contact box with questions or to set up an advising appointment.

CAREERS

Careers that support the fermentation industry are numerous and varied in focus and discipline. The Certificate in Fermented Foods and Beverages prepares all students to have a foundational knowledge to enter the fermentation industry from a variety of career entry points. Students may seek business or marketing-oriented careers in the food and beverage industry or leverage their knowledge of fermentation to pursue a career

in scientific research or product development. Others may go on to post-secondary work in the field.

An interest in fermentation can lead to many different careers. Students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and CALS Career Services. These resources can help students reflect on their values, identify career goals, and outline strategies to achieve them.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Opportunities to apply classroom learning to real-world experiences are integral to the Certificate in Fermented Foods and Beverages. Connections with local brewers, cheesemakers, winemakers, bakers, engineering firms, and entrepreneurs ranging from small to large-scale operations, allow students to learn from local experts and apply their knowledge to help industries solve problems. Students are able to benefit from the rich history of Wisconsin in the fermented food and beverage industry while exploring the latest developments in the field such as precision fermentation.

Our instructors as well as our industry and campus partners encourage curiosity and exploration by allowing students to experiment with ingredients such as wild yeasts and winter hardy grapes as well as future-focused biotechnological advancements. Students can see their work make an immediate contribution to food and beverage products that are launched into the Wisconsin marketplace and economy. These experiences and connections create a lasting impact on students in their post-graduate studies and/or careers.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Financial support such as scholarships, part-time employment, paid internships, and work-study programs is available to qualified undergraduate students enrolled in the certificate. We express our appreciation to Leinenkugel family in support of fermentation programming. Students with a primary major in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually.

FOOD SCIENCE, BS

The study of food science incorporates real-life aspects of chemistry, physics, microbiology, and engineering to solve today's global and local food problems. The curriculum emphasizes high-level technical competence while instilling communication, critical thinking, and problem-solving skills, with a focus on sustainability and health.

Housed in Babcock Hall, the food science major offers close contact with faculty and instructors, opportunities to conduct research, skill-building extracurricular activities, networking with industry professionals, and access to the modern Food Application Lab and a commercial dairy processing plant that manufactures the campus' famous Babcock ice cream.

With a nearly 100% job placement rate, graduates are equipped to compete and succeed in a modern global economy. Students find career opportunities with corporations, government agencies, and nonprofits in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCE

Hands-on, practical learning is essential to the program, and laboratory courses are included at every level. Most courses use real food examples to teach principles. A capstone course allows students to apply knowledge from earlier coursework to conduct a lab-based research project and analyze and present their findings. Students are encouraged to pursue internships to gain additional experience; many complete more than one before graduation. Some gain practical experience by working in the Babcock Dairy Plant, making consumer dairy products sold on campus. Others participate in undergraduate research projects on food quality, microbiology, chemistry, and food and health.

BUILD COMMUNITY AND NETWORKS

Faculty teach courses at every level and are on a first-name basis with students. The Food Science Club student organization is active and provides students with leadership opportunities and connections to alums and industry professionals. Additionally, more than 50 companies recruit students annually, providing many links to professionals and job opportunities.

CUSTOMIZE A PATH OF STUDY

Students can select from lab-based elective courses focused on dairy, candy, meat, or fermented foods. The program also offers students the option to participate in honors in research and the flexibility to complete a variety of certificates.

MAKE A STRONG START

A course for first-year students, FOOD SCI 120, focuses on discovering food science and includes study skills, on-campus networking, resume writing, job interview skills, and learning from alums about career options.

GAIN GLOBAL PERSPECTIVE

Study abroad is encouraged and students can use the program's roadmap to take advantage of summer and winter break study abroad opportunities or even a semester abroad with careful planning. Students can explore studying abroad as a Food Science major by utilizing the Food Science Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.

Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79 (https://go.wisc.edu/g85h79/)) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none">• Breadth–Humanities/Literature/Arts: 6 credits• Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits• Breadth–Social Studies: 3 credits• Communication Part A & Part B *• Ethnic Studies *• Quantitative Reasoning Part A & Part B *
-------------------	---

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

NUTR SCI/A A E 350 World Hunger and Malnutrition is recommended to fulfill the CALS international studies requirement.

Code	Title	Credits
Mathematics and Statistics		
This major requires calculus. Prerequisites may need to be taken before enrollment in calculus.		
Complete one of the following:		5
MATH 217	Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1

Complete one of the following (2 credits minimum):		2
FOOD SCI 511	Chemistry and Technology of Dairy Products	
FOOD SCI/ AN SCI 515	Commercial Meat Processing	
FOOD SCI 535	Confectionery Science and Technology	
Capstone		
FOOD SCI 602	Senior Project	2
FOOD SCI 603	Senior Seminar	1
Total Credits		71-76

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Clearly and effectively communicate, both verbally and written, to a diverse range of audiences including technical experts and a lay audience.
2. Apply quantitative problem solving and critical thinking skills in all aspects of food science.
3. Rigorously apply scientific principles and quantitative reasoning to solve food science problems (technical competence).
4. Demonstrate the ability to work both independently and in groups across a wide range of situations.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist students and their advisors. Students should use their DARS report, the degree planner, Guide requirements, and the course search & enroll tools to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. Students must complete a minimum of 120 credits. This may require taking 16 credits per semester for at least four semesters.

SAMPLE FOOD SCIENCE FOUR-YEAR PLAN

First Year

Fall	Credits Spring	Credits
CHEM 103 or 109 ¹	4 CHEM 104 ¹	5
MATH 221	5 BIOLOGY/BOTANY/ZOOLOGY 151	5

Total Credits 120¹ Students taking CHEM 109 do not take CHEM 104.² Note that the communications B requirement is met through FOOD SCI 602 Senior Project & FOOD SCI 603 Senior Seminar³ Students may choose to complete a general education course requirement this semester. Note: Enrolling in 17 credits this semester is not recommended.⁴ Students are required to take at least one integrated food product elective course; students may choose to meet the integrated food product elective requirement during this semester.**ADVISING AND CAREERS****ADVISING AND CAREERS**
ADVISING

All students are assigned a faculty advisor, who they will come to know on a first-name basis, once they declare the major. Advisors are prepared to help with curricular planning and course access; major and degree questions; discussion of independent study and lab research experience;

and navigating internship and scholarship opportunities. Declared food science majors must meet with their assigned advisor each semester before enrolling in coursework. Additional information can be found on the department's website listed in the Contact Information Box.

Prospective food science majors should contact the Department of Food Science for more information (see the Contact Information Box).

CAREER OPPORTUNITIES

More than 50 organizations recruit students each year, and nearly all food science majors receive a job offer before graduation. Careers include working in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations for corporations, nonprofits, and government agencies. Faculty advisors and course assignments help prepare students to write resumes, interview for jobs, and network with professionals in the field.

GRADUATE STUDY

Students considering post-graduate study should consult with their advisor and review the admissions requirements for graduate programs of interest. Post-graduate study may require preparatory coursework beyond the food science major requirements.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE**
STUDENT ORGANIZATIONS

The Food Science Club organizes many programs, including mentoring first-year students, organizing company visits and tours, monthly socials, K-12 educational outreach, a food and health initiative, and a food systems initiative. Club meetings usually include presentations by companies and include food. Faculty advise the club, and activities are coordinated with coursework.

COMPETITIVE TEAMS

The Food Science Club coordinates many competitions. Each year, there are several different product development competitions, which are very popular with students. There is also a College Bowl, which is a food science trivia competition, and a dairy judging team that competes regionally and nationally.

INTERNSHIPS

Advisors encourage students to pursue internships with one of the dozens of companies connected to the program. Most students complete at least one internship before graduation, but some complete as many as three. Students spend their summers at companies that include General Mills, Pepsico, Kraft-Heinz, Organic Valley, Danone, Agropur, Schreiber Cheese, Lindt Chocolate, and many more. These internships are generally paid, and many have lodging subsidies.

Students can also gain experience in several campus centers and programs focused on food, including the Babcock Dairy Plant, Center for Dairy Research, Food Research Institute, or Bucky's Varsity Meats.

RESEARCH EXPERIENCE

First-year students are encouraged to pursue research experiences in faculty labs to get involved. Undergraduates can participate for credit through independent study or work for pay. Students working in faculty

labs have been co-authors of scientific publications in food science and nutrition journals.

GLOBAL ENGAGEMENT

With advance planning, students can study abroad and complete the degree in four years. Opportunities include France, the Netherlands, and Australia. Read more about study abroad as a food science major. (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/food-science/>)

COMMUNITY ENGAGEMENT AND VOLUNTEERING

The Food Science Club organizes various volunteer activities. These have included dinners at the Ronald McDonald House, working with food pantries, and reducing food waste.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships.

Food science students are additionally eligible for approximately \$50,000-60,000 in annual scholarships. Well-qualified students receive awards ranging from \$1,000-\$3,000.

RESOURCES

Babcock Dairy Plant: Want practical experience in a fully operational dairy plant? Consider signing up for part-time work in the Babcock Dairy Plant to gain experience in a wide range of practical jobs, from quality control to production.

Babcock Hall Food Application Lab: This lab has 11 culinary workstations, food service equipment, and other amenities needed to prepare food at both small and food service scales.

Center for Dairy Research (CDR): Also within Babcock Hall is the internationally-renowned Center for Dairy Research. Students can conduct research, work in the analytical labs, or participate in the CDR Sensory Panel to gain invaluable practical experience.

Food Research Institute (FRI): Housed in the Microbial Sciences Building, FRI conducts industry-oriented research on various food safety topics.

Bucky's Varsity Meats: Interested in meat science? The meat processing facilities within the Department of Animal and Dairy Sciences apply many food science principles and provide a unique opportunity for students to get hands-on experience with all aspects of meat production.

FOREST AND WILDLIFE ECOLOGY

The Department of Forest and Wildlife Ecology provides science-based teaching that prepares future natural resource professionals to sustainably manage and conserve forests and wildlife. Building on the

rich traditions of Aldo Leopold (the department's first chair), we offer students an interdisciplinary environment to learn about the natural world, apply science to management toward sustainable ecological systems, and understand complex human-environment relationships. We offer two undergraduate majors – Forest Science and Wildlife Ecology – that provide opportunities for employment in the public, private, and non-governmental sectors. Students can also gain a strong foundation for graduate training in forestry, wildlife, ecology, and related fields. The Forest Science program is accredited by the Society of American Foresters. The Wildlife Ecology major provides a path to becoming a certified wildlife biologist. Both degrees provide a mix of field, lab, and classroom experiences.

The department also offers graduate programs at the MS and PhD levels. See the Graduate Guide (<https://guide.wisc.edu/graduate/>) for additional information.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Forest Science, BS (p. 157)
- Wildlife Ecology, BS (p. 164)

FOREST SCIENCE, BS

Forests cover one-third of Earth and nearly half of Wisconsin. They provide diverse habitat, wood and fiber, clean water, carbon storage, recreation, beauty, and connections to many cultures. Forest managers and scientists work largely outdoors to conserve and manage forest resources and respond to disturbances from insects, diseases, wildfire, fragmentation, deforestation, and other changes. They also use technology to map and inventory forests.

Students in forest science learn the skills needed for many career paths through a mix of classroom, laboratory, and field instruction. They make frequent visits to forests and engage in professional and student-led trainings and networking. Students have flexibility to customize their learning experience through a variety of different elective options.

The department offers excellent teaching, research, and computing facilities. Classes are sized to ensure that undergraduates receive individual attention. Each student has a faculty adviser, and many students gain experience assisting faculty with research projects.

Students go on to work as foresters, park rangers, conservation scientists, educators, researchers, environmental planners, arborists, and more. Graduates of the program also pursue graduate training in forestry, ecology, natural resource policy, or environmental law. Forest science has an excellent job placement track record.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Forest science students learn in many field and laboratory courses, putting their knowledge to work in outdoor, everyday circumstances. They also participate in a variety of opportunities beyond campus, including a three-week introduction to forest ecosystems in northern Wisconsin and summer research opportunities. All forest science undergraduates are required to

complete an internship, often with a federal, state, or local government agency, an environmental nonprofit organization, timber industry firm, or environmental consultant.

BUILD COMMUNITY AND NETWORKS

Students can join a competitive quiz bowl team and the Forestry Club (<https://www.facebook.com/WUMadisonForestryClub/>), UW–Madison’s Student Chapter of the Society of American Foresters. Students can attend a national foresters conference and take part in trainings for prescribed burns, chainsaw use, and tree identification. Forest science undergraduates also have opportunities to work with local schools to help kids understand the forests around them.

CUSTOMIZE A PATH OF STUDY

Forest science students select from a large variety of classes to fit their career goals. Students can customize their learning experience and choose electives in focus areas such as forest conservation, forests and the environment, and forest management. In consultation with advisors, students will choose electives in alignment with their unique professional interests. The program meets accreditation standards of the Society of American Foresters, a key credential for many jobs.

MAKE A STRONG START

Students can take introductory courses that focus on forest science and the department’s curriculum. One course explores forests of the world, as well as threats to forests, their roles in climate change, and strategies to conserve and manage them.

GAIN GLOBAL PERSPECTIVE

Forest science students are encouraged to complete study abroad experiences. Students can explore studying abroad as a Forest Science major utilizing the Forest Science Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/forest-science/>). Students work with their advisor and the CALS study abroad office (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>) to identify appropriate programs. The department also offers an international course focused on the extinction of species.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.

Other Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (<https://go.wisc.edu/g85h79>) (<https://go.wisc.edu/g85h79/>) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|---|
| General Education | <ul style="list-style-type: none">• Breadth–Humanities/Literature/Arts: 6 credits• Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits• Breadth–Social Studies: 3 credits• Communication Part A & Part B *• Ethnic Studies *• Quantitative Reasoning Part A & Part B * |
|-------------------|---|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly,

courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
	CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)	

MAJOR REQUIREMENTS

Code	Title	Credits
	Mathematics	5-6
	Statistics	3
	Chemistry	4-5
	Biology	10
	Wildlife Ecology	3
	Core	38-39
	Major Electives	12
	Capstone	3
	Additional credits required to meet University General Education and College specific requirements	42
Total Credits		120

MATHEMATICS

Complete one of the following (or may be satisfied by placement exam):

Code	Title	Credits
MATH 112 & MATH 113	College Algebra and Trigonometry	6
MATH 114	Precalculus	5

STATISTICS

Complete one of the following:

Code	Title	Credits
STAT 301	Introduction to Statistical Methods	3
STAT 371	Introductory Applied Statistics for the Life Sciences	3

CHEMISTRY

Complete one of the following:

Code	Title	Credits
CHEM 103	General Chemistry I	4
CHEM 108	Chemistry in Our World	5
CHEM 109	Advanced General Chemistry	5

BIOLOGY

Complete one of the following sequences:

Code	Title	Credits
BIOLOGY/ BOTANY 130 & BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	General Botany and Animal Biology and Animal Biology Laboratory	10
BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	10
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	10

WILDLIFE ECOLOGY

Complete one of the following courses. Courses completed beyond the requirement may count as major electives.

Code	Title	Credits
F&W ECOL 110	Living with Wildlife – Animals, Habitats, and Human Interactions	3
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species	3
F&W ECOL 379	Principles of Wildlife Management	3
F&W ECOL/AN SCI/ ZOOLOGY 520	Ornithology	3

CORE

Complete all of the following courses. A grade of C or better is required in each core course. Students who receive a grade of D or below will be required to retake the course to qualify for graduation.

Code	Title	Credits
SOIL SCI 301 or SOIL SCI/ ENVIR ST/ GEOG 230	General Soil Science Soil: Ecosystem and Resource	3
F&W ECOL 300	Forest Measurements	4
BOTANY/F&W ECOL 402	Dendrology: Woody Plant Identification and Ecology	3
F&W ECOL 395	Data and GIS Tools for Ecology	3-4

or GEOG/ CIV ENGR/ ENVIR ST 377	An Introduction to Geographic Information Systems	
or F&W ECOL/ ENVIR ST/G L E/ GEOG/GEOSCI/ LAND ARC 371	Introduction to Environmental Remote Sensing

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student’s first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn honors in the major, students are required to take at least 20 honors credits. In addition, students must take F&W ECOL 681 and F&W ECOL 682 when completing their thesis project; please see the honors program page (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.
-----------------	--

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Ecology) Understanding of taxonomy and ability to identify forest and other tree species, their distribution, and associated vegetation and wildlife.
2. (Ecology) Understanding of soil properties and processes, hydrology, water quality, and watershed functions.
3. (Ecology) Understanding of ecological concepts and principles including the structure and function of ecosystems, plant and animal communities, competition, diversity, population dynamics, succession, disturbance, and nutrient cycling.
4. (Ecology) Ability to make ecosystem, forest, and stand assessments.
5. (Ecology) Understanding of tree physiology and the effects of climate, fire, pollutants, moisture, nutrients, genetics, insects and diseases on tree and forest health and productivity.
6. (Forest Resources Measurement and Management) Ability to identify and measure land areas and conduct spatial analysis.
7. (Forest Resources Measurement and Management) Ability to design and implement comprehensive inventories that meet specific objectives using appropriate sampling methods and units of measurement.
8. (Forest Resources Measurement and Management) Ability to analyze inventory data and project future forest, stand, and tree conditions.
9. (Forest Resources Measurement and Management) Ability to develop and apply silvicultural prescriptions appropriate to management objectives, including methods of establishing and influencing the composition, growth, and quality of forests, and understand the impacts of those prescriptions.
10. (Forest Resources Measurement and Management) Ability to analyze the economic, environmental, and social consequences of forest resource management strategies and decisions.
11. (Forest Resources Measurement and Management) Ability to develop management plans with specific multiple objectives and constraints.
12. (Forest Resources Measurement and Management) Understanding of the valuation procedures, market forces, processing systems, transportation and harvesting activities that translate human demands for timber-based and other consumable forest products into the availability of those products.
13. (Forest Resources Measurement and Management) Understanding of the valuation procedures, market, and non-market forces that avail humans the opportunities to enjoy non-consumptive products and services of forests.
14. (Forest Resources Measurement and Management) Understanding of the administration, ownership, and organization of forest management enterprises.
15. (Forest Resource Policy, Economics, and Administration) Understanding of forest policy and the processes by which it is developed.

16. (Forest Resource Policy, Economics, and Administration) Understanding of how federal, state, and local laws and regulations govern the practice of forestry.
17. (Forest Resource Policy, Economics, and Administration) Ability to understand the integration of technical, financial, human resources, and legal aspects of public and private enterprises.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

The four-year plan is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and Course Search & Enroll to determine your program of study. Your program of study will likely look different from this sample four-year plan. Consult with your advisor to determine the best path for you. Courses may not be offered every year, so plan ahead with your advisor. Students must complete at least 120 total credits to be eligible for graduation.

SAMPLE FOREST SCIENCE FOUR-YEAR PLAN

First Year

Fall	Credits Spring	Credits
MATH 112 ¹	3 MATH 113 ¹	3

Humanities	3	
Electives	5	
	16	15

Total Credits 120

- ¹ MATH course dependent on placement score and transfer credit evaluation.
- ² BIOLOGY/BOTANY 130, BIOLOGY/ZOOLOGY 101 & BIOLOGY/ZOOLOGY 102 are strongly recommended to satisfy the introductory biology requirement for forest science, but students may use BIOLOGY/BOTANY/ZOOLOGY 151 & BIOLOGY/BOTANY/ZOOLOGY 152.
- ³ Students should plan ahead for this course with their advisor, as it may not be offered every year.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Students are assigned an academic advisor as well as a faculty advisor. Faculty members lead undergraduate research, advise students on career planning, and help students with critical thinking. Professional academic advisors help students plan their coursework and identify internship opportunities, as well as ways to get involved in department and campus activities.

CAREER OPPORTUNITIES

Undergraduates in forest science prepare for a variety of career opportunities. They can work as foresters, arborists, park rangers, conservation scientists, environmental educators, geospatial analysts, researchers, and more. They also pursue graduate training in forestry, ecology, natural resource policy, or environmental law. Graduates of the program work for many organizations including the U.S. Forest Service, the Wisconsin Department of Natural Resources, the Society of American Foresters, the Aldo Leopold Foundation, environmental consultants, and private corporations.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

All forest science undergraduates are required to complete an internship. Students find positions outdoors, as well as laboratory

and analytical positions. See the Internship & Job Resources (<https://forestandwildlifeecology.wisc.edu/academics/undergraduate-programs/internship-job-resources/>) page for more information.

RESEARCH EXPERIENCE

Forest science undergraduates can undertake independent research by joining a professor's field- or lab-based research activities. In their research experiences, students gain skills in a variety of forest science areas including forest structure and function, forest policy, human dimensions of forest management, forest economics, and plant species identification.

STUDENT ORGANIZATIONS

Students can join the Forestry Club, UW–Madison's Student Chapter of the Society of American Foresters. The club organizes the annual holiday tree sale, and students can attend a national foresters conference and take part in trainings for prescribed burns, chainsaw use, and tree identification.

COMPETITIVE TEAMS

Students can join a quiz bowl team that competes at the national Society of American Foresters annual conference.

GLOBAL ENGAGEMENT

Forest science students are encouraged to complete a study abroad experience. The department also offers an international course focused on the extinction of species that meets the CALS International Studies requirement. Students can find more information on the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Students involved in the Forestry Club volunteer at a number of activities including the annual holiday tree sale. Forest science undergraduates also have opportunities to work with local schools to help kids understand the forests around them.

On campus, the Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

There are five scholarships available to forest science students and fellowships are available for students to conduct research with professors. Students across the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships here (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

UW–Madison offers a special practicum course for majors known as "Forestry Camp." The Forest Resources Practicum is an intensive, three-week field course at the Kemp Natural Resources Station (<https://kemp.wisc.edu/>) in Woodruff, Wisconsin. Students learn firsthand about forest ecosystem structure, function, processes, and services. Subject areas include basic field skills, plant identification, GPS, forest soils, wildlife

survey methods, and forest ecology. Students at Forestry Camp work closely with faculty and natural resource professionals.

ACCREDITATION

ACCREDITATION

Society of American Foresters (<https://www.eforester.org/>)

Accreditation status: Accredited. Next accreditation review: 2027.

WILDLIFE ECOLOGY, BS

Students in the wildlife ecology program learn about species ecology, habitat management, monitoring techniques, and conservation through courses that are based in the natural sciences. Wildlife ecologists study wild animals and their interactions with people. Working largely outdoors, they manage and conserve wildlife populations and their habitats, aiming to meet the complex needs of wildlife in a human-dominated world.

The Department of Wildlife Ecology was the first wildlife program in an American university. Students learn through a mix of classroom, laboratory, and field instruction. They have flexibility to customize their learning experience within one of two tracks: natural sciences and natural resources. Students can work toward substantively completing requirements for being recognized as an Associate Wildlife Biologist by The Wildlife Society (<https://wildlife.org/learn/professional-development-certification/certification-programs/>), a professional organization, if they choose to.

Wildlife ecology graduates work in public resource management agencies, educational institutions, private industry, and non-governmental organizations such as the National Wildlife Federation and The Nature Conservancy. Students in the wildlife ecology major are also well prepared to pursue advanced degrees in wildlife and related fields or veterinary medicine.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Wildlife ecology students learn in many field and lab courses, including classes that focus on wildlife management, reptiles, amphibians, birds, and mammals. They can also take part in a summer field course in northern Wisconsin, numerous internships, and research opportunities.

BUILD COMMUNITY AND NETWORKS

Students can join the Student Chapter of the Wildlife Society and the Audubon Society, UW–Madison. Members of the Wildlife Society work with elementary school students, volunteer for numerous projects, and send a competitive team to the Quiz Bowl at the Wildlife Society annual meeting.

CUSTOMIZE A PATH OF STUDY

Students learn through a mix of classroom, laboratory, and field instruction. They have flexibility to customize their learning experience by selecting from a variety of courses in consultation with their advisor. Courses include options in the natural sciences, as well as coursework that

meets educational requirements for certification as a wildlife biologist by The Wildlife Society.

MAKE A STRONG START

Students can take an introductory course that gives students an orientation to wildlife ecology and introduces them to the major and professions within the field of wildlife management and conservation.

GAIN GLOBAL PERSPECTIVE

Wildlife ecology students are encouraged to participate in a study abroad experience. The program also offers an international class focused on the extinction of species (meeting the CALS International Studies Requirement), as well as a study abroad experience in Mexico. Students can explore studying abroad as a Wildlife Ecology major utilizing the Wildlife Ecology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic

values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Complete one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	College Algebra and Trigonometry	
MATH 114	Precalculus	
MATH 171	Calculus with Algebra and Trigonometry I	
Complete one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Complete one of the following:		4-5
CHEM 103	General Chemistry I	
CHEM 108	Chemistry in Our World	
CHEM 109	Advanced General Chemistry	
Biology		
Complete one of the following options:		10
Option 1 (recommended):		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
Option 2:		
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	
Option 3:		
BIOCORE 383 & BIOCORE 384 & BIOCORE 485 & BIOCORE 486	Cellular Biology and Cellular Biology Laboratory and Principles of Physiology and Principles of Physiology Laboratory	
Core		
<i>Wildlife Ecology and Management</i>		
F&W ECOL 101	Orientation to Wildlife Ecology (Counts for CALS First Year Seminar)	1
F&W ECOL 306	Terrestrial Vertebrates: Life History and Ecology	4
F&W ECOL 318 or BOTANY/ F&W ECOL/ ZOOLOGY 460	Principles of Wildlife Ecology General Ecology	3
F&W ECOL 379	Principles of Wildlife Management	3
F&W ECOL 561	Wildlife Management Techniques	3
F&W ECOL 655	Animal Population Dynamics	3

<i>Plant Taxonomy</i>		
BOTANY 400 or BOTANY 401	Plant Systematics Vascular Flora of Wisconsin	4
<i>Evolution/Genetics</i>		
Complete one of the following:		3-5
ZOOLOGY/ ANTHRO/ BOTANY 410	Evolutionary Biology	
GENETICS 466	Principles of Genetics	
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory ¹	
<i>Vertebrate Taxonomy and Natural History</i>		
Complete one of the following:		5-6
ZOOLOGY/ AN SCI/ F&W ECOL 520 & ZOOLOGY/ AN SCI/ F&W ECOL 521	Ornithology and Birds of Southern Wisconsin	
ZOOLOGY/ ENVIR ST 510 & ZOOLOGY/ ENVIR ST 511	Ecology of Fishes and Ecology of Fishes Lab	
Major Electives		
Complete 15 credits from across at least 3 different categories (see course list below):		15
Physical Science		
Wildlife Resources and Technical Skills		
Anatomy/Physiology/Disease		
Conservation		
Forestry/Botany		
Ecosystem Ecology		
Policy, Administration, and Law		
Social Aspects of Natural Resources Management		
Capstone		
Complete one of the following:		3
F&W ECOL 577	Complexity and Conservation of White-tailed Deer	
F&W ECOL 599	Wildlife Research Capstone	
Total Credits		69-74

¹ Only allowed for students who completed the rest of the Biocore curriculum listed under biology.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Define and explain basic principles in biological sciences and major concepts in wildlife ecology including, population ecology, organismal biology, plant ecology/taxonomy, and genetics/evolution.
- 2. Explain and discuss principles of wildlife management including natural resource legislation, policy, and applications.
- 3. Explain and apply the scientific methods including designing and conducting experiments and testing hypotheses.
- 4. Explain and demonstrate techniques for collection of data in laboratory and field settings, keep accurate records, and analyze data to address hypotheses.
- 5. Demonstrate a style appropriate for communicating scientific results in written and oral form. Provide opportunity to develop these communication skills.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

The four-year plan is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and Course Search & Enroll to determine your program of study. Your program of study will likely look different from this sample four-year plan. Consult with your advisor to determine the best path for you. Students must complete at least 120 total credits to be eligible for graduation.

SAMPLE WILDLIFE ECOLOGY FOUR-YEAR PLAN

First Year		
Fall	Credits Spring	Credits
F&W ECOL 101 (Counts for CALS First Year Seminar)	1 F&W ECOL 379	3

F&W ECOL 318	3 MATH 113 ¹	3
MATH 112 ¹	3 Humanities	3
Communication Part A	3 CHEM 103	4

F&W ECOL 577 or 599	3 Electives	9
15		15

Total Credits 120

¹ MATH course dependent on placement score and transfer credit evaluation.
² BIOLOGY/BOTANY/ZOOLOGY 151 & BIOLOGY/BOTANY/ZOOLOGY 152 are recommended, but students may complete BIOLOGY/ZOOLOGY 101, BIOLOGY/ZOOLOGY 102, & BIOLOGY/BOTANY 130 to satisfy the introductory biology requirement.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Students are assigned an academic advisor and a faculty advisor in the department. Professional academic advisors help students plan their coursework and identify opportunities to get involved in department and campus activities. Faculty advise students on career planning and challenge students to think critically.

CAREER OPPORTUNITIES

Undergraduates in wildlife ecology prepare for a variety of careers. They can become wildlife biologists, habitat restoration technicians, attorneys, wildlife enforcement officers, researchers, and more. Students are also

well prepared to pursue advanced degrees in wildlife and related fields, including veterinary medicine. Graduates of the program work for many organizations, such as state departments of natural resources, the U.S. Fish and Wildlife Service, the Chicago Zoological Society, and The Nature Conservancy.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Many wildlife ecology students include internships and professional work experiences in their studies. Students are encouraged to talk to their advisor about internship possibilities. See the Internship & Job Resources (<https://forestandwildlifeecology.wisc.edu/academics/undergraduate-programs/internship-job-resources/>) page for more information.

RESEARCH EXPERIENCE

Wildlife ecology undergraduates are encouraged to get involved in field- or lab-based research with a professor. In their research experiences, students gain skills in a variety of areas including measuring habitats, reviewing literature, identifying species, deploying wildlife cameras, and more.

STUDENT ORGANIZATIONS

Students can join the Student Chapter of the Wildlife Society and the Audubon Society, UW-Madison. Members of the Wildlife Society can work with elementary school students and volunteer for numerous projects.

COMPETITIVE TEAMS

Wildlife ecology undergraduates can join a team that competes at the Quiz Bowl at the Wildlife Society annual meeting.

GLOBAL ENGAGEMENT

Wildlife ecology students are encouraged to participate in a study abroad experience. The program offers an experience in Mexico focused on wildlife ecology, as well as an international course focused on the extinction of species that meets the CALS International Studies requirement. Students can find more information about study abroad on the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

COMMUNITY ENGAGEMENT AND VOLUNTEERING

The Student Chapter of the Wildlife Society organizes several volunteer activities, including spring and summer frog surveys, summer fawn searches, and roadside clean-up. Students also have opportunities to work with elementary school students and give presentations about wildlife.

On campus, the Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE WILDLIFE BIOLOGIST CERTIFICATION

Work with your advisor to ensure you select courses that will meet the requirements of the Wildlife Biologist Certification through The Wildlife Society (TWS) (<https://wildlife.org/learn/professional-development-certification/certification-programs/>). Membership in TWS is required for certification. Certification is for 5 years and may be renewed upon demonstration of adequate continual learning and professional development.

Curriculum

1. Wildlife management and wildlife biology (12 hours)
2. Ecology (3 hours)
3. Zoology (9 hours)
4. Botany (9 hours)
5. Physical sciences (9 hours)
6. Basic statistics (3 hours)
7. Quantitative sciences (6 hours)
8. Humanities and social sciences (9 hours)
9. Communications (12 hours)
10. Policy, administration, and law (6 hours)

Experience

1. A minimum 60 work months of full-time professional biologist experience gained within the ten (10) years prior to applying for certification (or up to 13 years if granted an extension).

Renewal

1. To renew certification, applicants must log a minimum of 80 contact hours related to participation in organized activities and mentorship within the five years prior to submission.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Department scholarships are available to wildlife ecology students and fellowships are available to support research work with a professor. Students across the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships here (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

GENETICS

This program explores how genetic material shapes life – from the cellular level to the population level – and prepares students to solve some of society's most pressing challenges in the fields of medicine, biotechnology, biomedical research, and agriculture. Genetics and genomics are at the heart of many important issues of the day, including genetic testing, genetic therapies, genome sequencing, evolution, and the genetic engineering of humans, plants, and animals.

Students who major in Genetics and Genomics take courses in biology, chemistry, physics, statistics, and introductory genetics, and then delve into specialized genetics topics focused on humans, plants, populations, cancer, biological development, neurology, and epigenetics. They gain laboratory research experiences by taking laboratory courses and conducting independent research projects in faculty labs.

The Genetics and Genomics major provides a solid foundation for careers in medicine, public health, research, life sciences, agriculture, biotechnology, education, law, and science communication – in the private, public, and non-profit sectors. Many students choose to pursue graduate and professional studies, including research-focused PhD programs, medical school, veterinary school, and law school. Alumni go on to be physicians, medical directors, genetic counselors, epidemiologists, research scientists, data analysts, plant breeders, veterinarians, professors, teachers, attorneys, and science writers.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

All Genetics and Genomics majors participate in hands-on research, which equips them with real-world skills valued by graduate and professional schools and employers. In addition to laboratory coursework, students have numerous opportunities to conduct independent research in faculty labs, where they receive mentoring from faculty, staff, and graduate students.

BUILD COMMUNITY AND NETWORKS

Students get to know faculty and instructors through small classes, and they can grow their networks by getting involved in student organizations or participating in undergraduate research experiences mentored by faculty. The Undergraduate Genetics Association (<https://win.wisc.edu/organization/UGA/>), a club for students interested in genetics and genomics, provides professional development, volunteer, and social opportunities for members. The Pre-Genetic Counseling Organization (<https://win.wisc.edu/organization/pregeneticcounseling/>), a club for students interested in genetic counseling, specializes in bringing counseling opportunities and information to undergraduates. Students can also participate in the Genetics and Genomics Peer Mentorship Program, which connects incoming students with those further along in their college careers.

MAKE A STRONG START

Freshman Seminar in Genetics is a course for first-year students that introduces new majors to faculty researchers and fellow classmates and allows them to begin making campus connections. It also prepares them to work in research labs, teaches study skills needed to succeed in college, and provides peer networking opportunities.

CUSTOMIZE A PATH OF STUDY

Students have many options to pursue coursework that meets their career goals. They also may pursue honors in research, an option that includes conducting hands-on research in campus labs and preparing a thesis from the research that was conducted.

GAIN GLOBAL PERSPECTIVE

Majors can choose from a variety of study abroad programs including short-term field experiences, summer research opportunities and semester-long exchange programs at top universities around the world.

A study abroad program in Costa Rica specifically tailored for genetics and genomics majors is typically offered each spring and is led by genetics program faculty from UW–Madison. Students can explore studying abroad as a Genetics and Genomics major by utilizing the Genetics and Genomics Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

DEGREES/MAJORS/CERTIFICATES

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	

Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.	
First year seminar (p. 47)	1
International studies (p. 47)	3
Physical science fundamentals	4–5
CHEM 103	General Chemistry I
or CHEM 108	Chemistry in Our World
or CHEM 109	Advanced General Chemistry
Biological science	5
Additional science (biological, physical, or natural)	3
Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)	

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Complete one of the following:		5–10
MATH 221	Calculus and Analytic Geometry I	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
Complete one of the following:		3–4
STAT 371	Introductory Applied Statistics for the Life Sciences	
STAT 301	Introduction to Statistical Methods	
STAT 240	Data Science Modeling I	
Chemistry		
Complete one of the following:		5–9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Complete one of the following:		3–6
CHEM 341	Elementary Organic Chemistry	
CHEM 343 & CHEM 345	Organic Chemistry I and Organic Chemistry II ¹	
Physics		
Complete one of the following:		10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics (recommended)	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics (recommended)	
Biology		
Complete one of the following options:		10
Option 1:		

BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology (recommended)
--	---

Option 2:

BOTANY/ BIOLOGY 130	General Botany
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory

Option 3:

BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology
------------------------------	---

Select two of the following labs:

BIOCORE 382	Evolution, Ecology, and Genetics Laboratory
BIOCORE 384	Cellular Biology Laboratory
BIOCORE 486	Principles of Physiology Laboratory

Core Requirements

BIOCHEM 501 or BIOCHEM 507	Introduction to Biochemistry ² General Biochemistry I	3
-------------------------------	---	---

Complete one of the following options: 6

Option 1:

GENETICS 467 & GENETICS 468	General Genetics 1 and General Genetics 2 (preferred)
--------------------------------	--

Option 2:

GENETICS 466	Principles of Genetics (consult advisor)
--------------	--

additional 3 credit genetics depth course (see course list below) ³

Select 2 credits from the following: 2

GENETICS 545	Genetics Laboratory
GENETICS 299	Independent Study ⁴
GENETICS 699	Special Problems ⁴
GENETICS 681	Senior Honors Thesis
GENETICS 682	Senior Honors Thesis
GENETICS 399	Coordinative Internship/ Cooperative Education

Genetics Depth 9

See course list below

Genetics Breadth 6

See course list below

Capstone

Select one of the following: 3–6

Option 1:

GENETICS/ BIOLOGY 522	Communicating Evolutionary Biology (Three-credit version only) ⁵
--------------------------	---

Option 2:

GENETICS 527	Developmental Genetics for Conservation and Regeneration (offered in fall semester) ⁵
--------------	--

Option 3:

GENETICS 566	Advanced Genetics (offered in spring semester)
Option 4:	
GENETICS 564	Genomics and Proteomics (offered in spring semester) ⁵
Option 5 (must be taken concurrently):	
GENETICS 699	Special Problems (offered in fall semester)
GENETICS 567	Companion Research Seminar (offered in fall semester)
Option 6 (must be taken concurrently):	
GENETICS 681	Senior Honors Thesis
GENETICS 682	Senior Honors Thesis
GENETICS 567	Companion Research Seminar (offered in fall semester)
Total Credits	65-81

¹ If CHEM 343 is taken, it must be taken as a part of CHEM 343 & CHEM 345, the latter of which counts as a genetics breadth requirement.

² If BIOCHEM 507 is taken, it must be taken as a part of BIOCHEM 507 & BIOCHEM 508, the latter of which counts as a genetics breadth requirement.

³ Additional depth course will not count toward the 9-credit genetics depth requirement.

⁴ Consult with your advisor if genetics-related research will be performed in a department other than genetics.

⁵ May count for genetics depth or capstone, but not both.

GENETICS DEPTH & BREADTH COURSES

Depth

Code	Title	Credits
GENETICS 520	Neurogenetics	3
GENETICS/ BIOLOGY 522	Communicating Evolutionary Biology	2-3
GENETICS 525	Epigenetics	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
GENETICS 528	Banking Animal Biodiversity: International Field Study in Costa Rica	1
GENETICS 548	The Genomic Revolution	3
PLANTSCI 550	Molecular Approaches for Crop Improvement	3
GENETICS 564	Genomics and Proteomics	3
GENETICS/ MD GENET 565	Human Genetics	3
GENETICS 566	Advanced Genetics	3
GENETICS 588	Immunogenetics	3
GENETICS 605	Clinical Cases in Medical Genetics	3
GENETICS/ BIOCHEM/ MICROBIO 612	Prokaryotic Molecular Biology	3
GENETICS/ PLANTSCI 615	Genetic Mapping	3

GENETICS/ BIOCHEM/ MD GENET 620	Eukaryotic Molecular Biology	3
GENETICS/ CHEM 626	Genomic Science	2

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Analyze the transmission of genes and chromosomes between cells during cell division and within pedigrees over generations.
2. Demonstrate a deep understanding of how information encoded in DNA can be mutated, epigenetically modified, transcribed into RNA,

and translated for protein production, enabling this information to orchestrate the activities of cells singly or collectively throughout development in multicellular organisms.

3. Predict the impact of the forces of mutation, natural selection, chance, and genetic recombination on the amount of genetic variation in populations at the DNA and phenotypic levels using quantitative models.
4. Formulate research questions about the genetic control of biological processes and design experiments to answer these questions using appropriate genetic tools including model organisms.
5. Demonstrate team-work, interpersonal and problem-solving skills to address societal, ethical and scientific issues related to genetics, and communicate their findings through written, oral and multi-media reports.

FOUR-YEAR PLAN

FOUR-YEAR PLAN SAMPLE GENETICS AND GENOMICS FOUR-YEAR PLAN

Students must complete at least 120 total credits to be eligible for graduation.

First Year

Fall	Credits Spring	Credits
CHEM 103 or 109	4-5 CHEM 104	5
MATH 221 (or math placement)	5 Elective	3
GENETICS 155 (CALS First Year Seminar)	1 COMM A Course (if needed)	3
Humanities	3 Ethnic Studies	3
	14	14

Second Year

Fall	Credits Spring	Credits
Genetics Depth/Breadth	6 Genetics Depth/Breadth	3

Elective (research or thesis recommended) ³	2-3 Elective (research or thesis recommended) ³	2-3
Humanities	3 Genetics Capstone	3
Electives	3 Electives	6
	15	15

Total Credits 120

¹ Instead of ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/BIOLOGY/BOTANY 152, students can take either BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101 & ZOOLOGY/BIOLOGY 102, or BIOCORE 381, BIOCORE 383 & two labs (BIOCORE 382, BIOCORE 384, or BIOCORE 486).

² Physics could be taken in second year (consult your advisor).

³ If in CALS honors in research.

Notes:

- First-year students are recommended to take GENETICS 155 to fulfill the CALS first year seminar requirement.
- Study abroad is an enriching experience. Check with your advisor on how you can fulfill your curriculum and study abroad.

ADVISING AND CAREERS**ADVISING AND CAREERS****ADVISING**

Each student is assigned a professional academic advisor who works to understand student goals and helps to craft a path that best suits their needs. Additionally, students receive professional and scientific mentorship through interactions with faculty, staff, and graduate students.

CAREER OPPORTUNITIES

Alumni go on to a wide variety of careers in medicine, public health, research, life sciences, biotechnology, education, law, and science communication – in the private, public, and non-profit sectors. They hold professional positions as physicians, medical directors, genetic counselors, epidemiologists, research scientists, data analysts, plant breeders, veterinarians, professors, teachers, attorneys, and science writers.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE****RESEARCH EXPERIENCE**

Many genetics and genomics majors conduct research in a faculty-led research lab where they receive direct mentorship from faculty, staff, and graduate students. With hundreds of faculty members on campus using genetic strategies in their labs, students have many research options.

STUDENT ORGANIZATIONS

The Undergraduate Genetics Association (<https://win.wisc.edu/organization/UGA/>), a club for all students interested in genetics and genomics, brings in guest speakers to discuss their research and career paths; provides guidance on finding campus research and internship opportunities; holds informational sessions on jobs and careers; and hosts networking, volunteer, and social events. The Pre-Genetic Counseling Organization (<https://win.wisc.edu/organization/pregeneticcounseling/>), for students interested in genetic counseling, hosts talks by genetic

counselors, clinicians, and ethicists; informs students of advocacy opportunities; provides training in practical counseling skills; and offers networking, volunteer, outreach, and social events.

GLOBAL ENGAGEMENT

Genetics and genomics majors participate in study abroad programs in countries around the world, including in China, Costa Rica, England, Germany, Mexico, New Zealand, and Uganda. Students can find more information on the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/study-abroad-advising/>).

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Students have opportunities to engage in volunteer activities through the Undergraduate Genetics Association, including participating in campus' annual Darwin Day (<https://evolution.wisc.edu/darwin-day/>) science outreach event. The Pre-Genetic Counseling Organization also offers outreach opportunities.

INTERNSHIPS

Majors are encouraged to participate in internships. With a large biotech industry presence in the Madison area, there are many opportunities for students to participate in genetically-relevant internship experiences. Students can use these internship opportunities to complete the research requirement for the genetics and genomics major.

A RICH HISTORY OF GENETICS AND GENOMICS

Established in 1910, the UW-Madison Department of Genetics is among the oldest genetics departments in the nation and is highly regarded for its research contributions in diverse areas of the field. Many of the greatest discoveries in Genetics and Genomics took place at UW-Madison, including cracking the genetic code, sequencing one of the first bacterial genomes, synthesizing the first gene, and developing targeted gene knockout methods in mice.

RESOURCES AND SCHOLARSHIPS**RESOURCES AND SCHOLARSHIPS****SCHOLARSHIPS**

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

The genetics department offers a Genetics and Genomics Excellence in Research Award of up to \$6,000 to support undergraduate research in genetics- and genomics-related areas. There are also scholarships available for students who participate in certain genetics-focused study abroad programs.

RESOURCES

The Center for Pre-Health Advising (<https://prehealth.wisc.edu/>) provides information about health careers including pre-med, pre-nursing, pre-vet, and pre-physical therapy, and offers course suggestions.

GENETICS IN A MODERN WORLD, CERTIFICATE

This certificate provides students from a wide array of academic backgrounds with an opportunity to explore the relationship between modern genetics research and society. Students learn how genetics research has influenced society and how society shapes the direction of genetics research.

Expert instructors from the Department of Genetics provide students with a strong foundation in the challenges and opportunities that arise from innovations in genome sequencing technology, particularly in the areas of human health and disease. Elective coursework located in a variety of departments allows students to situate this foundational, scientific knowledge within an area of personal or career interest.

This certificate equips students pursuing diverse academic paths with the knowledge to think critically about their unique place within the ever-changing landscape of genetic knowledge and application. Students will be called to engage in ethical, evidence-based discussions about the relationship between cutting-edge genetics research and our world in the classroom and beyond. The Genetics in a Modern World certificate, guided by our team of dedicated instructors and advisors, will open doors into both public and private sector careers and promises to be a cornerstone of your Wisconsin Experience (<https://wisconsinexperience.wisc.edu/>).

HOW TO GET IN

HOW TO GET IN

Undergraduate students in any major or college may earn this certificate. There are no prerequisites for declaring the certificate; however, there may be prerequisites for individual courses in the certificate. Students will be informed of these prerequisites through Guide and advised to fulfill those requirements. Students pursuing the program are encouraged to declare as early as possible so that they can best align the coursework with their interests.

Students wishing to declare the Certificate in Genetics in the Modern World should meet with one of the advisors (listed in the Contact Information box) to declare the certificate.

REQUIREMENTS

REQUIREMENTS

Code	Title	Credits
Foundation Courses		
Complete the following courses:		
GENETICS 133	Genetics in the News	3
GENETICS 234	Genomes and Society	3
Interdisciplinary Electives		
Complete one course. See list below.		3
Integration Course		
Complete the following course:		
GENETICS 335	Genomes in a Modern World	3
Total Credits		12

INTERDISCIPLINARY ELECTIVES

Code	Title	Credits
ZOOLOGY 415	Genetics of Human History	3
PLANTSCI 340	Plant Genome Engineering and Editing	3
PLANTSCI 338	Plant Breeding and Biotechnology	3
MED HIST/PATH-BIO 370	Addressing Controversy: The Science, Ethics, and Public Discussion of Animal Research	3
MED HIST/C&E SOC/PHILOS 565	The Ethics of Modern Biotechnology	3
PSYCH 601	Current Topics in Psychology	3
PSYCH 603	Epigenetics and the Brain	3
RELIG ST/JEWISH 340	The American Jewish Life of DNA	3
GEN&WS 530	Biology and Gender	3
HIST SCI 133	Biology and Society, 1950 - Today	3
ANTHRO 304	Heredity, Environment and Human Populations	3
PUB AFFR 523	Policy, Privacy, and Personal Identity in the Postgenomics Era	3

Additional Requirements:

- 2.000 GPA in certificate courses.
- At least 50% of certificate courses taken in-residence (i.e. at UW-Madison or through a UW-Madison sponsored study abroad program.)
- Courses taken on a pass/fail (satisfactory/unsatisfactory) basis will not count toward the certificate.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Explain current topics in genetics and genomics by applying basic genetic knowledge and simple scientific methodologies from current research.
2. Engage in dialogue about the implications of genetics and genomics on everyday life, addressing ethical, societal, legal, and/or scientific perspectives.
3. Describe applications, practices, and policies to address ethical, economic, environmental, legal, and/or social challenges and opportunities created by genomics-based innovations.
4. Integrate life sciences and humanities/social sciences perspectives to address current questions related to ethics, history, social science, and/or public policy, and their interaction with contemporary genetics and genetics research.
5. Present your interdisciplinary perspective on the relationship between genomes and society to diverse audiences.

ADVISING AND CAREERS

ADVISING AND CAREERS

Each certificate student is assigned an advisor who helps the student navigate a path to achieve their academic and career goals. Advisors and CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>) can help students connect their major and certificate studies to enhance future career opportunities in areas such as healthcare, biomedical research, education, technology, law, and journalism among others.

Students may email the certificate advisors listed in the contact information box with questions or to set up an advising appointment.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE RESEARCH EXPERIENCE

Students pursuing the certificate can choose to be involved in campus research mentored by renown geneticists who are leaders in their field. Many opportunities exist to gain hands-on expertise in both plant and human genetics.

COMMUNITY ENGAGEMENT

Several student organizations related to genetics are available on campus: the Undergraduate Genetics Association (UGA) (<https://win.wisc.edu/organization/UGA/>) and the Pre-Genetics Counseling Organization (PGCO) (<https://win.wisc.edu/organization/pregeneticcounseling/>). Campus-wide and greater Madison opportunities exist for students pursuing the certificate, whereby they can become involved in summer STEM programs and community-based scientific outreach (among others) to help elevate scientific literacy and facilitate excitement for science in our community.

INTERNSHIPS AND INDUSTRY EXPOSURE

Opportunities to apply classroom learning to the biotech industry are particularly ripe on and near campus as Madison is one of the fastest growing biotech centers (Wisconsin Biohealth Tech Hub (<https://www.bioforward.org/wisconsin-biohealth-tech-hub/tech-hub-overview/>)) in the nation. With this certificate students may be strong candidates for available internships.

LIFE SCIENCES COMMUNICATION

The Department of Life Sciences Communication (LSC) is one of the world's leading science communication programs, working at the intersection of science, media, and society. The LSC major teaches students how to understand the way we all make sense of increasingly complex scientific breakthroughs. This theoretical background is a foundation to effectively communicate about controversial science topics in areas such as the environment and natural resources, health, agriculture, and new science technologies like gene editing and artificial intelligence.

Students receive instruction across multimedia platforms such as print, audio, video, and web. They are taught how to target and create

communications for both news and marketing. Most important, they learn how to plan strategically and implement the most effective communications for diverse audiences.

Many courses in LSC have a strong professional focus, combining classroom instruction with projects that have real-world clients from industry and non-profit. Our faculty and instructors work with clients from a variety of industries and the policy world and bring those experiences into the classroom. These collaborations and projects prepare LSC students for careers in a wide variety of fields, including healthcare, digital marketing, education, media, agriculture, information technology, consumer goods, life sciences, and consulting. LSC students also pursue graduate and professional school after graduation in the health, biological, social, and physical sciences.

Students can also participate in an honors in major program in LSC (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/life-sciences-communication/life-sciences-communication-bs/#requirementstext>).

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

State-of-the-art computer labs, radio labs, and video production equipment support student learning and preparation for careers.

Capstone courses provide students with an opportunity to put their LSC education into practice. Students apply their skills in the real world through these capstones, working with a real-life client on a social marketing campaign to influence behavioral change or participate in a science communication internship.

Students interested in science communication research can participate in research projects with professors leading the field of science communication.

BUILD COMMUNITY AND NETWORKS

LSC instructors are world-class researchers and real-world practitioners. Many courses enroll between 15-50 students, allowing students to get to know award-winning faculty and instructors personally throughout their time in the major.

CUSTOMIZE A PATH OF STUDY

LSC is an attractive major, and double major, to students interested in a variety of fields including genetics, global health, environmental science, physics, legal studies, psychology, and more. The LSC major is highly customizable both in terms of course selection in the major and in the ability to add majors and certificates to the LSC bachelor's degree based on each student's interests and career goals.

MAKE A STRONG START

LSC introduces students to the field of science communication, the College of Agricultural and Life Sciences, and the university by offering LSC 155: First Year Seminar in Science Communication, a seminar course for first-year students.

GAIN GLOBAL PERSPECTIVE

LSC students often participate in study abroad opportunities around the world including places like Spain, Uganda, Denmark, England, and Ecuador.

Programs range from two weeks in duration to an entire year. Learn more about studying abroad as an LSC major by checking out the LSC Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Life Sciences Communication, BS (p. 178)
- Science Communication, Certificate (p. 184)

LIFE SCIENCES COMMUNICATION, BS

The Life Sciences Communication BS is being renamed Science Communication BS. Students will be able to earn a Life Sciences Communication BS through the end of Summer 2027. Beginning in Fall 2027, the program awarded will be the Bachelor of Science in Science Communication.

The Department of Life Sciences Communication (LSC) is one of the world’s leading science communication programs, working at the intersection of science, media, and society. The LSC major teaches students how to understand the way we all make sense of increasingly complex scientific breakthroughs. This theoretical background is a foundation to effectively communicate about controversial science topics in areas such as the environment and natural resources, health, agriculture, and new science technologies like gene editing and artificial intelligence.

Students receive instruction across multimedia platforms such as print, audio, video, and web. They are taught how to target and create communications for both news and marketing. Most important, they learn how to plan strategically and implement the most effective communications for diverse audiences.

Students work with their advisor and the CALS study abroad office (<https://cals.wisc.edu/academics/undergraduate/current-students/study-abroad/>) to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.

Other Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (<https://go.wisc.edu/g85h79> (<https://go.wisc.edu/g85h79/>)) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

Students are not allowed to earn both the Science Communication Certificate and the Life Sciences Communication BS.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and

Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. Students must have a minimum of 15 credits within the Life Sciences Communication major that do not double count toward CALS or university general education requirements.

MATH AND STATISTICS FOUNDATION

We strongly recommend that all students complete MATH 112 College Algebra or MATH 114 Precalculus to complete the university quantitative reasoning A requirement and either STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences or SOC/C&E SOC 360 Statistics for Sociologists I to complete the university quantitative reasoning B requirement.

REQUIRED COURSES

Code	Title	Credits
Foundation Course		
LSC 212	Introduction to Scientific Communication	3
Core		
LSC 250	Research Methods in the Communication Industry	3
LSC 251	Science, Media and Society	3
Complete two of the following:		6
LSC 270	Marketing Communication for the Sciences	
LSC 314	Introduction to Digital Video Production	

LSC 332	Digital and Print Media Design
LSC 340	Misinformation, Fake News, and Correcting False Beliefs about Science
LSC 350	Visualizing Science and Technology
LSC 360	Science Podcasting & Radio

Depth within the Major

Complete 6 credits from one of the following depth categories (see course lists below): 6

Communication Strategy Depth

Communication Skills and Technologies Depth

Capstone

LSC 515	Social Marketing Campaigns in Science, Health and the Environment	3
or LSC 640	Case Studies in the Communication of Science and Technology	

Total Credits 24

DEPTH WITHIN THE MAJOR**Communication Strategy Depth**

This depth category focuses on the skills and theory necessary to effectively communicate with audiences in the life sciences context, while satisfying the long terms strategic goals of an organization. The depth category includes courses in marketing, strategic and risk communication, and data analysis.

Code	Title	Credits
Complete two of the following:		6
LSC 435	Brand Strategy for the Sciences	
LSC 440	Digital Media and Science Communication	
LSC 480	Culturally Responsive Science Communication	
LSC/COM ARTS/ JOURN 617	Health Communication in the Information Age	
LSC 625	Risk Communication	
LSC 660	Data Analysis in Communications Research	

Communication Skills and Technologies Depth

This depth category focuses on the skills required to translate organized information into informative and persuasive messages for a variety of media, such as writing, documentary photography, social media, web design and video production.

Code	Title	Credits
Complete two of the following:		6
LSC 430	Communicating Science with Narrative	
LSC 432	Social Media for the Sciences	
LSC 450	Documentary Photography for the Sciences	
LSC 460	Social Media Analytics	
LSC 480	Culturally Responsive Science Communication	

LSC 532 Web Design for the Sciences

LSC 614 Advanced Video Production

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

LIFE SCIENCES COMMUNICATION HONORS IN THE MAJOR REQUIREMENTS

Students may apply for admission to honors in the major in Life Sciences Communication at any time but are strongly advised to apply before their junior year. Interested students are encouraged to meet with the Life Sciences Communication advisor with any questions about honors in the major.

- 24–28 credits of coursework, as outlined in the chart below.
- For the 15 credits of LSC coursework taken for honors credit:
 - Students must earn at least a 3.5 cumulative GPA in this coursework.
 - It is the student's responsibility to enroll in honors sections or to select honors optional in order for courses to count toward honors in the major.
 - Thesis and independent study credits do not count toward the required 15 credits of LSC honors coursework.
- Complete a senior honors thesis and present the thesis at the CALS Undergraduate Research Symposium or another public venue.

Code	Title	Credits
Required Coursework		
STAT 301 or STAT 371 or C&E SOC/ SOC 360	Introduction to Statistical Methods Introductory Applied Statistics for the Life Sciences Statistics for Sociologists I	3
LSC 289 or LSC 299 or LSC 699	Honors Independent Study Independent Study Special Problems	2
LSC 681 & LSC 682	Senior Honors Thesis and Senior Honors Thesis	4-8
15 credits of LSC coursework taken for honors credit		15
Total Credits		24-28

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Specialized knowledge in theoretical and applied communication of science and technology, along with an education broad enough to meet the challenges of changing careers and opportunities.
2. The ability to think critically and creatively: to synthesize, analyze, and integrate ideas for decision making and problem solving.
3. The ability to communicate effectively across media and a broad range of audiences.
4. A global perspective; an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
5. The ability to work with others in small or large groups, to recognize civic and social responsibilities, and to appreciate the uses of public policy in a democracy.
6. A respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE LIFE SCIENCES COMMUNICATION FOUR-YEAR PLAN

Students must complete at least 120 total credits to be eligible for graduation.

First Year

Fall	Credits Spring	Credits
LSC 100 ¹	3 LSC 212	3
MATH 112 or 114 ²	3-5 LSC 250	3
CALS First Year Seminar	1 CHEM 103, 108, or 109	4-5
Humanities Elective	3 Ethnic Studies	3
Electives ³	4-5 Elective	3
14-17		16-17

Second Year

15		15

Fourth Year

Fall	Credits Spring	Credits
LSC Concentration	3 LSC 515 or 640	3
Additional Science Elective	3 Electives	12
Electives	9	
15		15

Total Credits 121-126

¹ LSC 100 is not required for the major but is strongly encouraged for students who need to take a communication A course.

² The program recommends MATH 112 or MATH 114 for students who need to complete the university quantitative reasoning A requirement.

³ Many Life Sciences Communication students choose to use elective spaces throughout their career to complete an additional major or certificate. Other students choose to take more LSC courses than the minimum required. Students should consult the advisor for more information and to create a personalized four-year plan based on their background, interests, and career goals.

⁴ The program strongly recommends STAT 301, STAT 371, or C&E SOC/ SOC 360 to fulfill the university quantitative reasoning B requirement.

THREE-YEAR PLAN

THREE-YEAR PLAN

This sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it –along with their DARS report, the Degree Planner, and Course Search & Enroll tools – to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, post-graduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

These three-year road maps below are designed to provide an example of how a student could complete their BS in Life Sciences Communication within three years. One plan assumes you are entering college with 29 credits from Advanced Placement, International Baccalaureate, or college transfer courses, including fulfilling UW-Madison's quantitative reasoning A requirement through credit or placement scores. The other plan assumes you are entering without bringing in outside credits. Your specific program of study could, and probably will, look different. You should customize the road map to fit your unique path at UW-Madison. Consult with your advisor about the best path for you.

Students must complete at least 120 total credits to be eligible for graduation.

SAMPLE LIFE SCIENCES COMMUNICATION THREE-YEAR PLAN #1¹

First Year

Fall	Credits Spring	Credits Summer	Credits
LSC 100 (Comm A) ²	3 LSC 212	3 Social Science Elective	3
CALS First Year Seminar	1 LSC 250	3	
Humanities Elective	3 CHEM 103, 108, or 109	4-5	
Electives ³	7 Ethnic Studies	3	
14		13-14	3

Second Year

Fall	Credits Spring	Credits
LSC 251	3 LSC Core	3
STAT 301, 371, or C&E SOC 360 ⁴	3-4 Biological Science Elective	3
LSC Core	3 Humanities Elective	3
Additional Science Elective	3 Electives	7
Electives	3	
15-16		16

Third Year

Fall	Credits Spring	Credits
LSC Concentration	3 LSC Capstone	3
CALS International Studies	3 LSC Concentration	3
Science Breadth Elective	3 Biological Science Elective	3
Electives	6 Electives	6
15		15

Total Credits 91-93

¹ Plan #1 assumes that students are coming to UW-Madison with approximately 29 credits from AP/IB or college transfer credits and that the University quantitative reasoning A requirement is fulfilled through transfer credit or placement scores. Your plan may look different depending on the number of credits you bring in.

² LSC 100 is not required for the major but is strongly encouraged for students who need to take a communication A course.

³ Many Life Sciences Communication students use their elective coursework to take additional LSC courses, to add one or more certificates, to add a double major, or to take other coursework to work to achieve their academic and career goals.

⁴ The program recommends STAT 301, STAT 371, or C&E SOC/SOC 360 to fulfill the university quantitative reasoning B requirement.

SAMPLE LIFE SCIENCES COMMUNICATION THREE-YEAR PLAN #2¹

First Year

Fall	Credits Spring	Credits Summer	Credits
LSC 100 ²	3 LSC 212	3 LSC 251	3
MATH 112 or 114 ³	3-5 LSC 250	3 Electives	6
CALS First Year Seminar	1 CHEM 103, 108, or 109	4-5	
Humanities Elective	3 Ethnic Studies	3

16-17		16	9

Third Year

Fall	Credits Spring	Credits Summer	Credits
LSC Concentration	3 LSC Capstone	3 LSC Concentration	3

CALS International Studies	3 Biological Science Elective	3 Electives	6
Electives	9-11 Electives	10	
15-17	16	9	

Total Credits 120-126

- ¹ Plan #2 assumes that you are coming to UW-Madison without credits from AP/IB or another college/university.
- ² LSC 100 is not required for the major but is strongly encouraged for students who need to take a communication A course.
- ³ The program recommends MATH 112 or MATH 114 for students who need to complete the university quantitative reasoning A requirement.
- ⁴ Many Life Sciences Communication students use their elective coursework to take additional LSC courses, to add one or more certificates, to add a double major, or to take other coursework to work to achieve their academic and career goals.
- ⁵ The program strongly recommends STAT 301, STAT 371, or C&E SOC/ SOC 360 to fulfill the university quantitative reasoning B requirement.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Each LSC student is assigned to both an academic advisor and a faculty mentor in LSC. The academic advisor is a professional advisor who works with students on planning their coursework, as well as navigating and getting involved on campus. Current and prospective students should contact the advisor with questions.

The faculty mentors are LSC faculty and instructors who provide students with another direct contact and resource in the department specifically focusing on career conversations as well as how to get involved in research as a student.

CAREER OPPORTUNITIES

LSC alumni hold professional positions in communications, digital marketing, environmental advocacy, and research or consulting in a variety of industries including health care, media, education, agriculture, information technology and life sciences. Many pursue advanced degrees in graduate and professional programs in the health, biological, social and physical sciences.

Graduates are recognized for their skills in social media, event management, marketing, leadership, public speaking, customer service, public relations, strategic planning, research, data analysis, writing and digital video production.

LSC has a large alumni network across many industries and fields. To connect students to these networks, LSC hosts career panels during the academic year, posts alumni profiles (<https://lsc.wisc.edu/alumni-friends/what-our-undergraduate-alumni-are-doing/>) on its website, and manages a LinkedIn group to share job opportunities and facilitate connections between alumni and students.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Most LSC students participate in internships during their time as undergraduates. LSC staff notify students of opportunities to apply for summer and academic year internships related to science communication and students are encouraged to discuss their goals with their career mentor (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/life-sciences-communication/life-sciences-communication-bs/#advisingandcareerstextcontainer>). Students intern with marketing agencies, environmental and sustainability organizations, and healthcare and agricultural agencies. Read about student internship experiences (<https://lsc.wisc.edu/?s=internship&submit=Search>).

STUDENT ORGANIZATIONS

LSC is home to both the Science Communication Club, Journal of Undergraduate Science and Technology, and the National Agri-Marketing Association UW-Madison chapter (<https://lsc.wisc.edu/student-organizations/>), and there are many additional opportunities for students to get involved with other student organizations on campus.

GLOBAL ENGAGEMENT

LSC students are encouraged to gain global perspective by participating in study abroad opportunities all over the world including places like Spain, Uganda, Denmark, England, and Ecuador. Students choose programs ranging anywhere from two weeks in duration to an entire year. Learn more about studying abroad as an LSC major (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/life-sciences-communication/>).

LSC offers a course introducing students to communication at the intersection of science, politics, and society to provide students with an international perspective on science communication. Taught by faculty from around the world, LSC courses provide an overview of the theoretical foundations of science communication and their relevance for societal debates about science and emerging technologies across different parts of the world.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

LSC students often volunteer in healthcare, non-profits, advocacy agencies, and more. The Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. LSC awards over \$42,000 in scholarships each year to students in the department. Students apply for CALS and LSC scholarships through a single application in the Wisconsin Scholarship Hub (WiSH). Learn more about college scholarships (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

SCIENCE COMMUNICATION, CERTIFICATE

The Department of Life Sciences Communication (LSC) is one of the world's leading science communication programs, working at the intersection of science, media and society. The certificate in science communication teaches students how to understand the way we all make sense of increasingly complex scientific breakthroughs. Certificate students will gain an introduction to science communication theory and practical experience which allows them to more effectively communicate about controversial science in areas such as gene editing, the environment, health, agriculture, and artificial intelligence.

HOW TO GET IN

HOW TO GET IN

Students are eligible to declare the certificate at any point in their undergraduate career but are encouraged to declare as early as possible to plan the required coursework. Students are encouraged to meet with the advisor to discuss certificate requirements and ensure it fits with their academic and career goals. Students who are ready to declare the certificate can do so by completing this form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_294pS5tCjs8sjV/).

Students are not allowed to earn both the science communication certificate and life sciences communication major.

REQUIREMENTS

REQUIREMENTS

- Minimum 2.0 GPA on all certificate courses
- At least 9 credits must be taken in residence at UW-Madison
- Courses in which a student elects the pass/fail option will not count toward completion of the certificate requirements

Code	Title	Credits
Core Course (Required)

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Apply knowledge in theoretical and applied communication to help meet society's biggest challenges in science and technology.
2. Discuss the interdependencies among individuals and their workplaces, communities, environments, and world; and the interrelationships between science and society.
3. Communicate effectively across media and a broad range of audiences.

4. Collaborate with others in small and large groups, demonstrating an appreciation for diverse views and a strong sense of personal and professional ethics.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Current and prospective students should contact the advisor with questions or schedule an advising meeting using Starfish.

CAREERS

The interdisciplinary education provided through the certificate in science communication will make graduates highly sought after by employers across both scientific and communication industries. Graduates can pursue careers in science writing, digital media and marketing, public health, environmental advocacy, and research in industry, non-profits and the government. Alternatively, others may go on to graduate and professional schools in the health, biological, social and physical sciences.

We encourage you to check out our website (<http://lsc.wisc.edu/>) to view recent alumni profiles.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

INTERNSHIPS

LSC staff notify certificate students of opportunities to apply for summer and academic year internships related to science communication. Students could intern with marketing agencies, environmental and sustainability organizations, and healthcare and agricultural agencies.

STUDENT ORGANIZATIONS

LSC is home to the Science Communication Club, Journal of Undergraduate Science and Technology (JUST), and the National Agri-Marketing Association UW-Madison chapter (<https://lsc.wisc.edu/student-organizations/>), and there are many additional opportunities for students to get involved with other student organizations on campus.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Certificate students could volunteer in healthcare, non-profits, advocacy agencies, and more. The Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

NUTRITIONAL SCIENCES

Nutritional sciences is an interdisciplinary field rooted in biology and biochemistry. The majors integrates the study of nutrition within the role of diet in health and disease and combines the basic and applied sciences to health and medicine.

The Department of Nutritional Sciences offers two areas of undergraduate study in nutrition, both of which require core courses within the chemistry,

physiology, biochemical, clinical, business, and public health aspects of nutrition.

With focus on nutrition and preventative health, the Nutritional Sciences majors provide an excellent foundation for students who are looking to work in clinical and community nutrition, prepare for graduate education in the health and biochemical sciences, and/or pursue careers in research and industry.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Nutritional Sciences, BS (p. 185)
- Nutritional Sciences, BS Nutrition and Dietetics (p. 190)

NUTRITIONAL SCIENCES, BS

Nutritional sciences is the study of the biochemical and physiological basis of how diet impacts health and disease. Students explore a variety of biological concepts including biochemistry, genetics, microbiology, kinesiology, community nutrition, and epidemiology to understand how nutrients in food affect the body.

Students can tailor their studies by selecting from more than 20 courses covering a wide variety of topics, including, microbiology, genetics, obesity, metabolism, kinesiology and sports nutrition, as well as ethics of public health, global health, community nutrition, and cultural aspects of food. Many students supplement their studies outside of the classroom by contributing to research in a university lab or volunteering in the community.

With an emphasis on human health, the program prepares students for health and research careers in a variety of settings, including healthcare, education, corporate wellness, sports nutrition, government agencies, food companies, or pharmaceuticals.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCE

In the classroom, students apply what they learn to real-world cases and approach nutritional health as they would in a clinical setting. Some courses also include field experiences or community-based learning experiences.

Because of the emphasis on biological sciences, many students choose to join a professor's research lab and may earn credit for their work within the lab. Students also have opportunities for community service internships under the guidance of a faculty member.

BUILD COMMUNITY AND NETWORKS

The Dietetics and Nutrition Club (DNC) (<https://nutrisci.wisc.edu/undergraduate/dietetics-and-nutrition-club/>) is a registered student organization open to undergraduate and graduate students. The club offers a variety of opportunities for members to engage in networking events, participate in volunteer and community outreach opportunities, and learn about the field of nutrition and the dietetics profession.

CUSTOMIZE A PATH OF STUDY

With nearly 20 elective courses available in the third and fourth years of the program, students can plan their coursework to best fit their professional goals and explore scientific principles of greatest interest to them.

Students may participate in the college’s Honors in Research program (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/honors-research/>). Many students enhance their major by participating in a certificate program such as the Biology Core Curriculum Honors (Biocore) Certificate (<https://guide.wisc.edu/undergraduate/letters-science/biology-core-curriculum/biology-core-curriculum-honors-certificate/>).

MAKE A STRONG START

First-year seminar courses (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/#requirementstext>) help students maximize their education, develop professional skills, and make informed decisions about their classes, internships, and career paths.

GAIN GLOBAL PERSPECTIVE

Several courses emphasize global health and world nutrition. Many students pair a major in Nutritional Sciences with the Global Health Certificate, which includes a field experience/internship focused on a health-related topic of global importance. Students can explore studying abroad as a Nutritional Sciences major by utilizing the Nutritional Sciences Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option

to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	
	Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.	
	First year seminar (p. 47)	1

International studies (p. 47)	3
Physical science fundamentals	4-5
CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
Biological science	5
Additional science (biological, physical, or natural)	3
Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)	

MAJOR REQUIREMENTS

Code	Title	Credits

Capstone

Complete one of the following:	1-8
NUTR SCI 500	Undergraduate Capstone Seminar Laboratory

NUTR SCI 681 & NUTR SCI 682	Senior Honors Thesis and Senior Honors Thesis
NUTR SCI 691 & NUTR SCI 692	Senior Thesis-Nutrition and Senior Thesis
NUTR SCI 699	Special Problems ⁶

Total Credits**66-91**

- ¹ Consult advisor about combining MICROBIO 303 with MICROBIO 102.
- ² If the Biocore sequence is taken to fulfill the first biology requirement, it must be taken to fulfill the second biology requirement.
- ³ These courses are taught primarily to graduate students. Permission to enroll from instructor may be required.
- ⁴ Note that for NUTR SCI 681/NUTR SCI 682 (Senior Honors Thesis) and NUTR SCI 691/NUTR SCI 692 (Senior Thesis), both courses in the sequence must be completed in order to earn a grade.
- ⁵ May count up to 6 credits of NUTR SCI 699 Special Problems towards the electives requirement.
- ⁶ Consult advisor regarding the possibility of completing NUTR SCI 699 Special Problems for capstone.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- Obtains and can articulate specialized knowledge in the field of nutritional sciences and dietetics along with an education broad enough to meet the challenges of future careers and opportunities.
- Obtains and can articulate foundational knowledge in areas relevant to the field of nutrition and dietetics.
- Communicates complex ideas in a clear and understandable manner through both written and oral presentations.
- Demonstrates quantitative literacy in math and statistics relevant to nutritional sciences and dietetics.
- Demonstrates the ability to think critically and creatively, to synthesize, analyze, and integrate ideas for decision making and problem solving.
- Develops the skills for life-long learning and is capable of locating, interpreting, and critically evaluating professional literature and current research.
- Develops a global perspective and an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
- Develops a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE NUTRITIONAL SCIENCES FOUR-YEAR PLAN

Students must complete at least 120 total credits to be eligible for graduation.

First Year

Fall	Credits Spring	Credits
CHEM 103 or 109 ¹	4-5 CHEM 104 ¹	5
MATH 113 (if needed) ²	3 Social Sciences	3-4
COMM A	3 Ethnic Studies	3

	16	14-17

Total Credits 116-125

- ¹ In order to take CHEM 103/CHEM 104 or CHEM 109, students must have a suitable math placement score or completion of MATH 112, MATH 114, MATH 221, or equivalent.
- ² MATH course dependent on placement score and transfer credit evaluation.
- ³ BIOLOGY/BOTANY/ZOOLOGY 151 & BIOLOGY/BOTANY/ZOOLOGY 152 fulfills the COMM B requirement.
- ⁴ BIOCORE 381/BIOCORE 382, BIOCORE 383/BIOCORE 384, BIOCORE 485/BIOCORE 486, BIOCORE 587 also accepted.
- ⁵ Select 6 credits from major elective options.

ADVISING AND CAREERS**ADVISING AND CAREERS
ADVISING**

Students are assigned a professional advisor who assists them with building their personalized Wisconsin Experience – including a strong curriculum to match student interests – and provides advising on career paths including graduate school or pursuing advanced degrees in the health sciences.

Professors provide mentorship to students in the program through work on faculty-led research, including learning research paper- and grant-writing skills, communicating about scientific concepts, and presenting research results to different audiences.

CAREER OPPORTUNITIES

Graduates of the program are working as physicians, scientists, physician assistants, nutrition product developers, food service directors, nutrition educators, wellness directors, and professors; and have a wide range of employers, including hospitals, clinics, nursing homes, school districts, food companies, universities, grocery stores, and non-profit organizations.

Alumni are recognized for their skills in healthcare, leadership, clinical research, communication, critical thinking, and problem-solving.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE
RESEARCH EXPERIENCE**

Undergraduate students have the opportunity to take for-credit and not-for-credit hours in labs (<https://cals.wisc.edu/academics/undergraduate/future-students/learn-through-hands-on-real-world-experiences/>) to participate in research and learn additional lab skills. Faculty-led research programs inform the scientific understanding of nutrition's role in health. Students can work with internationally recognized researchers who study metabolism, genetics, genomics, physiology, and nutritional management of diseases including phenylketonuria (PKU), cystic fibrosis, and diabetes.

GLOBAL ENGAGEMENT

Faculty and students in the program have many connections with global activities. The UW Mobile Clinic and Health Care in Uganda (<https://studyabroad.wisc.edu/program/?programId=532>) study abroad

program provides students an opportunity to visit Uganda and learn about nutrition and public health. The Village Health Project (<https://www.villagehealthproject.org/>) student organization grew out of students traveling to Uganda on UW-Madison programs and supports ongoing public health projects in the region.

STUDENT ORGANIZATIONS

The Dietetics and Nutrition Club (DNC) (<https://nutrisci.wisc.edu/undergraduate/dietetics-and-nutrition-club/>), open to undergraduate and graduate students, hosts biweekly evening meetings featuring speakers on many topics related to nutrition. The group also assists students in finding volunteer and job opportunities in the field of nutrition.

VOLUNTEER ACTIVITIES

Students volunteer through many different programs in the community. Examples include:

- Volunteering at UW Hospitals and Clinics or other local hospitals to gain experience in patient care
- Joining the student organization Slow Food UW, a group that hosts dinners in the Madison community
- Addressing food insecurity through student groups including Food Justice Collective, Campus Food Shed, UW Frozen Meals program, Open Seat food pantry, Food Recovery Network-Madison Chapter, F.H. King: Students for Sustainable Agriculture; and Madison-area food pantries such as Madison Community Fridges

The Dietetics and Nutrition Club also offers volunteer opportunities.

INTERNSHIPS

Students may obtain academic credit along with community-based engagement by creating their own internship under the supervision of a faculty member.

RESOURCES AND SCHOLARSHIPS**RESOURCES AND
SCHOLARSHIPS**

The Department of Nutritional Sciences awards tens of thousands of dollars in scholarship funds (<https://nutrisci.wisc.edu/undergraduate/scholarships/>) for students each year and Nutritional Sciences students are also eligible for scholarships in the College of Agricultural and Life Sciences.

Students in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships. (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>)

**NUTRITIONAL SCIENCES, BS
NUTRITION AND DIETETICS**

In this major, students explore nutrition through clinical and management courses and prepare for postgraduate training required to become registered dietitian nutritionists (RDN). With an increased emphasis on the role of food and nutrition in treating and preventing disease, employment of registered dietitians is projected to grow faster than other occupations.

Registered dietitian nutritionists work in a wide variety of settings, including health care, business and industry, community and public health, education, research, government agencies, and private practice. Many organizations, particularly those in medical and health care settings, require RDN credentials.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Courses expose students to clinical problem-solving, assessing medical record data, evaluating food intake, planning modified diets, and reviewing medical and research literature related to certain diseases or conditions. This training develops critical thinking, teamwork, and communication skills needed by dietetic interns and registered dietitians.

BUILD COMMUNITY AND NETWORKS

The Dietetics and Nutrition Club (<https://win.wisc.edu/organization/dnc/>) is an academic and professional registered student organization offering a variety of opportunities for members to participate in networking events, volunteer activities, and community outreach opportunities.

CUSTOMIZE A PATH OF STUDY

Students in the program can pursue Honors in Research (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/honors-research/>) through the College of Agricultural and Life Sciences.

Many students enhance their major by participating in a certificate program, including Global Health (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/nutritional-sciences/global-health-certificate/>).

MAKE A STRONG START

First-year seminar courses (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/#requirements-text>) help students maximize their education, develop professional skills, and make informed decisions about their classes, internships, and career paths.

GAIN GLOBAL PERSPECTIVE

Several courses emphasize global health and world nutrition, and UW–Madison offers more than a dozen study abroad and exchange programs that include a nutritional science component. Students can explore studying abroad utilizing the Nutrition and Dietetics Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO NUTRITIONAL SCIENCES BS NUTRITION AND DIETETICS DEGREE PROGRAM

Students will have Pre-Dietetics classification until admission to the nutrition and dietetics degree program (Dietetics classification) as defined by completion of prerequisite courses with a cumulative GPA of #2.0, as well as, an overall GPA of #2.0. Students must apply for and be admitted to the program no later than the end of the semester in which the student

accumulates 86 credits, which is senior standing. Department approval is required for admission. Students who are not admitted to the program by the time they accumulate 86 credits will not be allowed to continue in the Pre-Dietetics classification.¹

To be admitted to the BS Nutritional Sciences nutrition and dietetics program, the following requirements must be met effective fall 2019:

1. A minimum overall cumulative GPA of #2.0. Cumulative GPA will be based on UW–Madison courses only.
2. Students **must** have completed one semester at UW–Madison before applying.
3. A minimum mean GPA of #2.0 in the following required² prerequisite courses:

Code	Title	Credits
Select one of the following:		5–9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Select one of the following:		5
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
ANAT&PHY 335	Physiology	5
NUTR SCI 332	Human Nutritional Needs	3
Select one of the following:		3–4
PSYCH 202	Introduction to Psychology	
MICROBIO 101	General Microbiology	
PSYCH 210	Basic Statistics for Psychology	
SOC/ C&E SOC 360	Statistics for Sociologists I	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
GEN BUS 360	Workplace Writing and Communication	

¹ This policy is applicable to undergraduate students entering or transferring into Pre-Dietetics classification fall 2018 and beyond. Students who have already completed a college degree (BS or BA) may choose to pursue the Nutritional Sciences nutrition and dietetics program as either a second degree candidate, or as a Didactic Program in Dietetics (DPD) completer. Because they have already completed a bachelor's degree, second-degree candidates and DPD completers are not required to follow this progression policy. Progression for these students will be closely monitored by the program coordinator.

² Any transfer course from another university that will be used to meet the above required courses **cannot** be included in the GPA calculation. If the same course is taken more than once, only the grade from the last time the course was taken will be used in the GPA calculation.

Note: Admission to the DPD program is competitive, as enrollment is limited by accreditation standards; students meeting the minimum criteria are not guaranteed admission.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth–Humanities/Literature/Arts: 6 credits
	• Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth–Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.

Students are assigned a professional advisor who assists them with building their personalized Wisconsin Experience – including a strong curriculum to match student interests – and provides advising on career paths including graduate school or pursuing advanced degrees in the health sciences.

Professors provide mentorship to students in the program through work on faculty-led research, including learning research paper- and grant-writing skills, communicating about scientific concepts, and presenting research results to different audiences.

CAREER OPPORTUNITIES

Alumni of the program are working as Registered Dietitian Nutritionists (RDNs), clinical nutritionists, physician assistants, nutrition directors and counselors, and health coaches. RDNs work in hospitals, outpatient clinics, schools, colleges, wellness programs, and nursing homes, as well as in public health agencies, the food industry, and research labs. See the Certification/Licensure tab to learn more about the requirements to become an RDN.

The Academy of Nutrition and Dietetics offers more information on career paths (<https://www.eatrightpro.org/about-us/become-an-rdn-or-dtr/high-school-students/exploring-a-career-in-dietetics/>) in dietetics.

Students can connect with CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>) to explore various career paths and opportunities.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE STUDENT ORGANIZATIONS**

The Dietetics and Nutrition Club (DNC) (<https://nutrisci.wisc.edu/undergraduate/dietetics-and-nutrition-club/>), open to undergraduate and graduate students, hosts biweekly evening meetings featuring speakers on many topics related to nutrition. The group also assists students in finding volunteer and job opportunities in the field of nutrition.

Students can join the Academy of Nutrition and Dietetics (<http://eatright.org/>), the world's largest organization of food and nutrition professionals, providing public information on advocacy, leadership, career development, dietetics resources, position, and practice papers.

COMMUNITY ENGAGEMENT AND VOLUNTEERING

Students in the program volunteer throughout the community on projects related to nutrition and food through student organizations like Slow Food UW (<https://win.wisc.edu/organization/slowfood-uw/>) or the Campus Food Shed (<https://goldman.horticulture.wisc.edu/outreach-and-program-resources/uw-campus-food-shed/>). Several students have developed their own community projects to educate people about nutrition and to fight food insecurity.

GLOBAL ENGAGEMENT

Faculty and students in the program have many connections with global activities. The UW Mobile Clinic and Health Care in Uganda (<https://studyabroad.wisc.edu/program/?programId=532>) study abroad program provides students an opportunity to visit Uganda and learn about nutrition and public health. The Village Health Project student organization (<http://villagehealthproject.org/>) grew out of students traveling to Uganda on UW–Madison programs and supports ongoing public health projects in the region.

RESEARCH EXPERIENCE

Undergraduate students have the opportunity to participate in independent research in labs to learn research techniques. Students can expand their scientific knowledge outside of the classroom and contribute to ongoing papers, research, and discoveries. These experiences lead some students to pursue graduate studies in research after graduation. Read more about faculty research opportunities (<https://nutrisci.wisc.edu/people/faculty-staff/>).

CERTIFICATION/LICENSURE**CERTIFICATION/LICENSURE REGISTERED DIETITIAN NUTRITIONIST (RDN) CREDENTIAL**

A Nutritional Sciences BS in Nutrition and Dietetics fulfills the Didactic Program in Dietetics (DPD) portion of the DPD + Dietetic Internship pathway to become an RDN. Following completion of the Nutritional Sciences BS in Nutrition and Dietetics (DPD), students must complete

a supervised practicum (dietetic internship) and a master's degree to be eligible to sit for the national RDN examination.

For more information see: <https://www.eatright.org/become-an-rdn> (<https://www.eatright.org/become-an-rdn/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The Department of Nutritional Sciences awards tens of thousands of dollars in scholarship funds (<https://nutrisci.wisc.edu/undergraduate/scholarships/>) for students each year, and Nutrition and Dietetics students are also eligible for scholarships in the College of Agricultural and Life Sciences (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

The Academy of Nutrition and Dietetics Foundation provides dietetic scholarships to students. Visit eatrightfoundation.secure-platform.com/a/ for more information.

ACCREDITATION

ACCREDITATION

Accreditation Council for Education in Nutrition and Dietetics (<https://www.eatrightpro.org/acend/>)

Accreditation status: Accredited. Next accreditation review: 2027.

PLANT AND AGROECOSYSTEM SCIENCES

The Department of Plant and Agroecosystem Sciences addresses humanity's grand challenges through programs of research, education, and outreach that range from investigations of the inner workings of plants to their interactions with landscapes and climate. Our scholarly interests include the disciplines of agronomy, horticulture, ecology, agroecology, plant breeding and plant genetics, crop science, weed science, and production agriculture as they relate to agronomic and horticultural systems. Many plant species and cropping systems are studied for a diversity of uses that contribute to ecosystem, community, and individual health and well-being. Many faculty and staff in the department have appointments partially funded by the Division of Extension, which supports the people of Wisconsin (and beyond) through educational programming and applied research. Members of the department engage in transdisciplinary efforts that leverage advances in technology and data science to improve the resilience and adaptiveness of agricultural systems in the face of climate change; improve the sustainability of agricultural systems; and contribute to positive socio-ecological outcomes by increasing access to more sustainably produced food, feed, fiber and fuel.

The department was formed in 2023 by joining together the Department of Agronomy and the Department of Horticulture. The new department offers undergraduate and graduate degrees in Agronomy, Agroecology,

Horticulture, and Plant Science and Technology, and our faculty train graduate students in a wide range of graduate programs, including Plant Breeding and Plant Genetics.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Agroecology, BS (p. 195)
- Agronomy, BS (p. 201)
- Horticulture, BS (p. 207)
- Plant Science and Technology, BS (p. 213)

AGROECOLOGY, BS

Agroecology works to make agriculture and food systems more sustainable. Agroecologists consider agricultural and food systems as a whole to improve human health and well-being. Agroecologists study plants, animals, microbes, soils, water, air, and people. They examine the role of ecology, sociology, economics, and politics in agriculture, and work to support solutions to global challenges like climate change, food insecurity, biodiversity decline, and social inequality.

WHAT WILL I STUDY IN AGROECOLOGY?

- First-Year Seminar: Make a strong start through a CALS First-Year seminar (p. 46). These seminars allow students to explore different areas of study, learn how to access campus resources, and make friends and connections.
- Foundation Courses: Build a strong, basic understanding of the biological and social sciences.
- Core Courses: AGROECOL/C&E SOC/ENTOM/ENVIR ST 103, the introductory core course in agroecology, introduces all students to the field and provides the opportunity to establish academic and social networks. Students continue to learn agroecological theory and apply it to the improvement of agricultural systems in AGROECOL 303. The capstone course, AGROECOL 503, provides a connection between the classroom and real-world issues.
- Major Depth and Breadth Electives: Pursue personal and career interests in the field of agroecology through flexible course options. Study animals and plants, microscopic life, ecosystems, natural resources, agricultural practices, health and nutrition, and communities.
- Hands-On-Learning: Get involved in greenhouses, fieldwork, or research in labs with faculty and staff in CALS.

The knowledge and skills developed through the agroecology major prepare students for a wide variety of careers. Some of the areas students may work in include conservation and environmental organizations; the agricultural industry; local, state, and federal agencies; consulting; watershed and farm management; and agricultural policy, research, and education.

Many students continue their education in graduate programs. Some specialize in plant science, entomology, plant pathology, soil science, or

sociology, while others continue in cross-disciplinary programs such as agroecology, public policy, and environmental science.

The agroecology major is housed in the Department of Plant and Agroecosystem Sciences, but faculty and staff from many CALS departments come together to support the program.

HOW TO GET IN

HOW TO GET IN
CURRENT UW-MADISON STUDENTS

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are able to declare. For information on how to declare, see Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://cals.wisc.edu/academics/undergraduate/current-students/academic-policies/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL
EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL
AND LIFE SCIENCES
REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS
DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Code	Title	Credits
	Foundation	31-37
	Major Core	6
	Major Breadth	12

Major Depth	12
Capstone	3
Total Credits	64-70

FOUNDATION

Mathematics

Complete one of the following:

Code	Title	Credits
MATH 112 & MATH 113	College Algebra and Trigonometry	6
MATH 114	Precalculus	5

Statistics

Complete one of the following:

Code	Title	Credits
STAT 240	Data Science Modeling I	4
STAT 301	Introduction to Statistical Methods	3
STAT 371	Introductory Applied Statistics for the Life Sciences	3
C&E SOC/SOC 360	Statistics for Sociologists I	4

Chemistry

Complete one of the following:

Code	Title	Credits
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5

Biology

Complete one of the following options:

Code	Title	Credits
Option 1		
BIOLOGY/BOTANY/ ZOOLOGY 151	Introductory Biology	5
BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology	5

Total Credits 10

Code	Title	Credits
Option 2		
BOTANY/ BIOLOGY 130	General Botany	5
ZOOLOGY/ BIOLOGY 101	Animal Biology	3
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	2

Total Credits 10

Social Science

Complete the following courses:

Code	Title	Credits
C&E SOC/SOC 140	Introduction to Community and Environmental Sociology	4

A A E 101	Introduction to Agricultural and Applied Economics	4
or ECON 101	Principles of Microeconomics	

MAJOR CORE

Complete the following courses:

Code	Title	Credits
AGROECOL/ C&E SOC/ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	3
AGROECOL 303	Agroecological Systems: Working Towards Sustainability	3

MAJOR BREADTH

Complete one course from each of four thematic areas (organisms, land, ecosystems, people) for a total of at least 12 credits. Courses cannot double count within the major.

Organisms

Code	Title	Credits
Growth, Development, & Metabolism		
ENTOM/ ZOOLOGY 302	Introduction to Entomology	4
BOTANY 500	Plant Physiology	3-4

AGROECOLOGY CAPSTONE

Complete the following course:

Code	Title	Credits
AGROECOL 503	Agroecology Capstone	3

Students considering post-graduate study should consult with their advisor and review the admissions requirements for graduate programs of interest. Post-graduate study may require preparatory coursework beyond the agroecology major requirements.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Apply foundational knowledge about the form and function of living and non-living components of agroecosystems to describe their role within agricultural systems and predict their responses to management
2. Identify stocks and flows of energy and matter within and between organizational levels of agroecosystems from the cellular to the global

- level and consider their impact on ecological resilience, social justice, equity, and health.
3. Analyze approaches to improving plant and animal traits including breeding and management and how they affect pests and diseases, soils, water, nutrients, and the atmosphere
 4. Compare and contrast agroecosystems in a variety of social, economic, political, geographic, and historical contexts
 5. Devise agroecological solutions using effective written and oral communication for multiple audiences

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist students and their advisors. Students should use their DARS report, the degree planner, Guide requirements, and the course search & enroll tools to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Note: Math course selection is based on placement scores. Agroecology majors must complete MATH 112 & MATH 113 or MATH 114.

ADVISING AND CAREERS

ADVISING AND CAREERS
ADVISING

Each student receives one-on-one guidance from their professional advisor. Academic advisors will help students build an individualized, four-year plan. Many Agroecology majors complete certificates or double majors.

CAREER OPPORTUNITIES

The knowledge and skills developed through the agroecology major prepare students for a wide variety of careers. The program is designed to allow students to pursue their interests and career goals. Some of

the areas students may work in include: conservation and environmental organizations, the agricultural industry, state and federal agencies, consulting, land/ farm management, or agricultural policy, research, and education. Students may also continue their education in graduate programs in areas focused on agriculture, conservation, ecology, and the environment.

CAREER ADVISING

Students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>). These resources can help students reflect on their values, identify career goals, and outline strategies to achieve them. CALS Career Services advisors can help students one-on-one with their career goals, resume and cover letter help, interview prep, and more.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Agroecology students have many opportunities for hands-on experience through internships. On campus, students can get experience by working at one of the green spaces on campus. Some examples are Allen Centennial Garden, D.C. Smith Greenhouse, the UW Student Organic Farm, and the Lakeshore Nature Preserve. Students can also intern off-campus. Some examples are working at an agricultural business, a farm, a non-governmental organization, or one of the Agricultural Research Stations, etc. Students can connect with their advisor or CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>) to learn more about internships.

RESEARCH EXPERIENCE

Students are encouraged to get involved with agroecology research on campus. Students primarily find research opportunities by directly contacting faculty or searching on the Student Job Center.

STUDENT ORGANIZATIONS

Connect with other agroecology students and those interested in food and agriculture by joining a student organization. Organizations of particular interest to agroecology students include People's Farm: Students for Sustainable Agriculture (<https://win.wisc.edu/organization/thepeoplesfarm/>), Slow Food UW (<https://win.wisc.edu/organization/slowfood-uw/>), WUD Cuisine Committee (<https://win.wisc.edu/organization/cuisine/>), Food Recovery Network – Madison Chapter (<https://win.wisc.edu/organization/frnuw/>), UW Campus Food Shed (<https://goldman.horticulture.wisc.edu/outreach-and-program-resources/uw-campus-food-shed/>), and Minorities in Agriculture, Natural Resources and Related Sciences (MANRRS) (<https://win.wisc.edu/organization/manrrs/>). A full list of organizations is available on the Wisconsin Involvement Network website (<https://win.wisc.edu/>).

GLOBAL ENGAGEMENT

Agroecology students can study or intern abroad through one of UW-Madison's 260+ programs. Visit our Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages/maps/agroecology/>) to learn more about studying abroad as an Agroecology major.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

RESOURCES

Agroecology students have access to hands-on experiences on and off campus at UW-Madison facilities such as:

- Agricultural Research Stations (<https://ars.wisc.edu/>) – there are over 10 research stations across the state of Wisconsin that are used by faculty, staff, and students to conduct research
- Allen Centennial Garden (<https://allencentennialgarden.wisc.edu/>) – a free, public garden that is located right down the street from the Department of Plant and Agroecosystem Sciences. The garden hosts events, classes, festivals, workshops, and more.
- CALS Greenhouses (<https://greenhouses.ars.wisc.edu/>) – located right on campus, a variety of Wisconsin agricultural crops are studied here.
- D.C. Smith Greenhouse (<https://dcsmithgreenhouse.cals.wisc.edu/>) – an instructional greenhouse that grows plants for departments and programs of the College of Agricultural and Life Sciences. Many classes are also taught in the greenhouse.
- Lakeshore Nature Preserve (<https://lakeshorepreserve.wisc.edu/>) – a 300-acre natural area right next to Lake Mendota. The preserve is used for teaching & research, and is also a great place for students to explore nature on campus.
- UW Arboretum (<https://arboretum.wisc.edu/>) – located off campus on Seminole Hwy, the UW Arboretum's mission is to "Conserve and restore Arboretum lands, advance restoration ecology, and foster the land ethic (<https://www.aldoeopold.org/about/the-land-ethic/>)."

SCHOLARSHIPS

College of Agricultural and Life students receive more than \$1.25 million annually in scholarship awards. Agroecology majors can apply for these scholarships through a single application in the Wisconsin Scholarship Hub (WiSH). To learn more about college scholarships please visit the CALS scholarship website (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

AGRONOMY, BS

Admissions to the Agronomy BS will be suspended as of summer 2026 and will be discontinued as of fall 2030. If you have any questions, please contact the department.

Students interested in the Agronomy BS may be interested in the Plant Science and Technology BS, a new major as of fall 2025 or the Agroecology BS (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/plant-agroecosystem-sciences/agroecology-bs/>), a new major as of fall 2024.

Creating a healthier, more productive, more resilient agriculture for Wisconsin and the world.

That is the challenge taken up by the faculty, staff, and students of the agronomy program in the Department of Plant and Agroecosystem Sciences.

We generate and apply knowledge about the plants that feed and benefit humankind. Agronomic crops are typically grown for grain to feed people and livestock, or are processed into products. Feed crops are grown specifically to meet the nutritional needs of livestock. Forage crops are grown for their stems, leaves, and other edible plant parts.

We find and implement solutions to problems and opportunities concerning efficiency and sustainability of crop production and in safe and environmentally sound ways.

We generate knowledge on the genetics, genomics, biochemistry, and physiology of plants.

We study the interactions among cropping systems, climate, and the environment. We emphasize sustainable agriculture, whether precision, traditional or organic, in order to reduce the impact on the environment and the inhabitants of our planet.

We work to ensure that agricultural systems and products in Wisconsin and the world are able to meet rapidly-changing needs and those of future generations.

Undergraduates in the agronomy program earn a bachelor of science degree to prepare them for everything from pursuit of a graduate degree to careers in science, education, agriculture, agribusiness, and environment and conservation.

HOW TO GET IN

HOW TO GET IN

Admissions to the Agronomy BS will be suspended as of summer 2026 and will be discontinued as of fall 2030. If you have any questions, please contact the department.

Students interested in the Agronomy BS may be interested in the Plant Science and Technology BS (p. 213), a new major as of fall 2025 or the Agroecology BS (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/plant-agroecosystem-sciences/agroecology-bs/>), a new major as of fall 2024.

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79 (https://go.wisc.edu/g85h79/)) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

Students declared in the Agronomy BS may not also declare the Plant Science and Technology BS.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth–Humanities/Literature/Arts: 6 credits
 - Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth–Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First year seminar (p. 47)		1
International studies (p. 47)		3
Physical science fundamentals		4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
Biological science		5
Additional science (biological, physical, or natural)		3
Science breadth (biological, physical, natural, or social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Complete one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	College Algebra and Trigonometry	
MATH 114	Precalculus	
MATH 171	Calculus with Algebra and Trigonometry I	
MATH 211	Survey of Calculus I	
MATH 221	Calculus and Analytic Geometry I	
Complete one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
STAT/B M I 541	Introduction to Biostatistics	
STAT/ F&W ECOL 571	Statistical Methods for Bioscience I	
Chemistry		
Complete one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Biology		
Complete one of the following options:		10
Option 1:		
BOTANY/ BIOLOGY 130	General Botany	
ZOOLOGY/ BIOLOGY 101	Animal Biology	

ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & ZOOLOGY/ BIOLOGY/ BOTANY 152	Introductory Biology and Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
Economics		
Complete one of the following:		3-4
A A E 101	Introduction to Agricultural and Applied Economics	
ECON 101	Principles of Microeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
Foundation		
Complete 8 credits from any Foundation category (see list below)		8
Core		
Complete all of the following:		12
SOIL SCI 301 & SOIL SCI 302	General Soil Science and Meet Your Soil: Soil Analysis and Interpretation Laboratory	
PLANTSCI 110	Introduction to Plant Science and Technology	
PL PATH 300	Introduction to Plant Pathology	
Complete one of the following:		3
GENETICS 466	Principles of Genetics	
PLANTSCI 338	Plant Breeding and Biotechnology	
PLANTSCI 310	Plant Science and Technology in Cropping Systems	
Complete one of the following:		3-4
ENTOM/ ZOOLOGY 302	Introduction to Entomology	
ENTOM 351	Principles of Economic Entomology	
Complete one of the following:		3-4
AGROECOL 370	Grassland Ecology	
BOTANY/F&W ECOL 455	The Vegetation of Wisconsin	
BOTANY/F&W ECOL/ZOOLOGY 460	General Ecology	
ENVIR ST/LAND ARC 361	Wetlands Ecology	
Electives within the Major		
Complete 14 additional credits of plant science (PLANTSCI) courses ¹		14
Capstone		

PLANTSCI 510	Senior Capstone Experience	2
Total Credits		71-79

¹ No more than 3 credits total in PLANTSCI 299 Independent Study, PLANTSCI 399 Coordinative Internship/Cooperative Education, PLANTSCI 699 Special Problems. Credits used to satisfy the capstone experience may not count here.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Articulate the role of biological processes, management systems, environmental influences, and economic and social factors on world food, feed, and fiber production. Specific topics that all students should have knowledge of include: photosynthesis, nutrient cycling, genetic inheritance, and management and uses of primary U.S. crop species.
2. Demonstrate the ability to critically and creatively analyze problems and evaluate systems.
3. Communicate effectively through writing and speaking and will be able to identify and critically evaluate available sources of information
4. Develop a global perspective and appreciate the interdependencies among individuals and their workplaces, communities, environments, and the planet; and an understanding of the role of science in society

¹ Determined by placement exam. Consult SOAR advisor.

² Eight (8) credits of foundation courses required. See requirements tab for details.

³ Fourteen (14) credits of plant science electives required. See requirements tab for details.

ADVISING AND CAREERS

ADVISING AND CAREERS

The Agronomy program is faculty-advised, meaning that faculty members take on the responsibility of guiding and advising undergraduates through graduation. Students and faculty are matched as closely as possible by interest. All new first-year and transfer students are temporarily advised by the student services coordinator until the advising relationship between professor and student is established. If you would like to have a conversation about joining Agronomy, please contact the advisor listed in the Contact Information box.

CAREERS

An Agronomy degree is an open door to careers in many related fields such as biotechnology, plant genetics, crop management, agricultural financial management, farming, seed sales, crop consulting, Certified Crop Advising, Certified Professional Agronomy, agribusiness, extension agronomy, agricultural education, government work, and international agronomy.

GENETICS

The fastest growing sector of agriculture is plant breeding, genetics, and genomics. Plant scientists are working at the field, plant, cellular, and molecular level to create cultivars that are hardier, disease resistant, nutritious, and affordable. The industry's growth is currently outstripping

the rate of graduation; graduates can take their pick of interesting, fulfilling careers in the public and private sectors.

BIOFUELS

The biofuel industry is also experiencing rapid growth, with research and development being focused on sugar-based biofuels, cellulosic biofuels, and biodiesels, made from plants as varied as switchgrass, sugar cane, corn, and wood pulp. These energy crops are harvested and processed into alternatives to fossil fuels.

AGRIBUSINESS

In agribusiness, agronomists take data and translate it into real-world applications. They sell tools for crop production, provide agricultural loans, consult on crops, manage businesses, and much more. They are often responsible for translating technical research data into applications. Numerous agronomy graduates are also involved in the sale of agricultural products, which are vital to today's economy. Other successful agronomists serve as crop advisers, farm managers, consultants, bank loan specialists, managers, and much more.

RESEARCH/EDUCATION AND EXTENSION

Agronomic educators specialize in teaching and working with high school and college students. They also teach and advise students who chose advanced studies for a master's degree and/or PhD. They are extensively involved in research, publishing findings on a regular basis and making scientific advances.

Extension agronomists usually work for a state, local, or national government; they consult with farmers and others to help find answers to their specific problems and help farmers translate research results into usable management practices. Government-employed agronomists also work with farmers and ranchers to plan for soil and water conservation so crops and land can be managed efficiently and with minimal impact to the environment.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in agronomy, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Badger Crops Club (<https://www.facebook.com/badgercropsclub/>), a professional, social, and educational group for agronomy students and students in related fields interested in any aspect of crop production.
- Collegiate FFA (<http://collegiateffamadison.weebly.com/>), an official collegiate chapter of the National FFA organization.
- AWA (<http://awamadison.org/>)—the Association of Women in Agriculture, a professional student organization for young women with a passion for agriculture.
- WISELI (<http://wiseli.engr.wisc.edu/>)—Women in Science and Engineering Leadership Institute, a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW–Madison.
- Study Abroad: Agronomy majors have the opportunity to go on experiential study abroad programs, where students can immerse themselves in research or global agronomy field experiences. Students can review the International Academic Programs website (<https://studyabroad.wisc.edu/>) and the CALS study abroad advising

page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>) for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.

- **Research/Lab experience:** Students are encouraged to get involved in research, whether in the agronomy department or through other plant-, soil-, or ecology-related departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with faculty members.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The Agronomy program is proud to participate in the CALS Scholarship Program, which awards thousands of dollars to undergraduate scholars every year. The majority of our students have some form of financial aid through CALS, the university, or work-study or laboratory jobs.

HORTICULTURE, BS

Admissions to the Horticulture BS will be suspended as of summer 2026 and will be discontinued as of fall 2030. If you have any questions, please contact the department.

Students interested in the Horticulture BS may be interested in the Plant Science and Technology BS (p. 213), a new major as of fall 2025 or the Agroecology BS (p. 195), a new major as of fall 2024.

Horticulturists work to enrich our lives by integrating and applying plant science, environmental science, molecular biology, biotechnology, genetics, physiology, and management. Specifically, horticultural science deals with the development, production, growth, distribution, and use of fruits, vegetables, greenhouse crops, ornamentals, and specialty plant crops (used for flavoring and medicine). Horticultural science is one of the most diverse biological sciences one can study at a university. Not only are the biology and genetics of crop plants interesting, but the application of this knowledge is equally important in a myriad of situations. Undergraduate horticulture majors will obtain specialized training in greenhouse/field management and the production and use of fruits, vegetables, nuts, and herbaceous/woody ornamentals through the bachelor of science degree program.

In addition to obtaining a job with an undergraduate degree in horticulture, the major provides an excellent background for graduate study in the field of plant sciences. Areas of graduate study include plant breeding and plant genetics, horticulture, agronomy, plant pathology, or other related fields such as biology, environmental science, natural resource management, agroecology, and genetics.

Students with either undergraduate or graduate degrees in horticulture have a variety of career opportunities. Recent studies show that there are more jobs in agriculture in the U.S. than there are students graduating with agricultural bachelor of science degrees to fill them. As our world grapples with the need to contribute science-based solutions to feeding 9 billion people by 2050, students trained in the agricultural and horticultural sciences will be called on to contribute.

Horticulture graduates may find opportunities to develop higher-yielding crops or crops that can withstand more stressful growing conditions. Others may find opportunities working on improving qualities such as flavor, appearance, texture, and post-harvest shelf life for a wide range of horticultural commodities from fruits to vegetables to flowers. Sustainable production is an area of growth where horticultural expertise can make a contribution.

The horticulture degree serves as excellent preparation for careers in food production, plant nurseries, community-supported agriculture (CSA), public gardens, greenhouse production, teaching, public parks, vegetable production, urban agriculture, extension- and community-based educational work, work in research labs, and the health sciences. In addition, many horticultural science majors go on to work in public sector jobs including city and state positions with the Department of Natural Resources, the Wisconsin Department of Agriculture, and the University of Wisconsin Division of Extension. Students with degrees in horticulture also work in hospitals (horticultural therapy), aerospace (food and recycling in space labs), and zoos (managing environments for animals and visitors). Although the career opportunities are numerous, horticulture students have a common desire to work intensively with plants to improve our environment and our health.

HOW TO GET IN

HOW TO GET IN

Admissions to the Horticulture BS will be suspended as of summer 2026 and will be discontinued as of fall 2030. If you have any questions, please contact the department.

Students interested in the Horticulture BS may be interested in the Plant Science and Technology BS (p. 213), a new major as of fall 2025, or the Agroecology BS (p. 195), a new major as of fall 2024.

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option

to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

Students declared in the Horticulture BS may not also declare the Plant Science and Technology BS.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth–Humanities/Literature/Arts: 6 credits
 - Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth–Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		

Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.

PLANTSCI 234	Herbaceous Ornamental Plant Identification, Culture, and Use	
PLANTSCI/ PL PATH 261 & PLANTSCI/ PL PATH 262	Sustainable Turfgrass Use and Management and Turfgrass Management Laboratory	
PLANTSCI/ LAND ARC 263	Woody Landscape Plant Identification, Culture, and Use	

PLANTSCI 310	Plant Science and Technology in Cropping Systems
PLANTSCI 370	World Vegetable Crops
PLANTSCI 338	Plant Breeding and Biotechnology

Electives

Complete 5 elective credits (see list below) 5

Capstone

Students can complete a pre-approved course or an independent study or internship. Independent study and internship require individual pre-approval from the program, and students should talk to the Horticulture advisor to learn more about the process and forms.

Pre-approved course options:

PLANTSCI 376 & PLANTSCI 378	Tropical Horticultural Systems and Tropical Horticultural Systems International Field Study
PL PATH 315	Plant Microbiomes

Independent Study or Internship options (require individual pre-approval):

PLANTSCI 399	Coordinative Internship/ Cooperative Education
PLANTSCI 699	Special Problems
PL PATH 499	Independent Study in Organic Agriculture

Total Credits **74-88**

¹ If MATH 171 is taken, MATH 217 must also be taken.

ELECTIVE COURSES

Students may not double count courses within the major requirements (Agricultural Breadth, Horticultural Core, Electives, Capstone)

Code	Title	Credits
Business and Economics		
A A E 101	Introduction to Agricultural and Applied Economics	4
A A E/ENVIR ST 244	The Environment and the Global Economy	4
A A E 246	Climate Change Economics and Policy	3
A A E 319	The International Agricultural Economy	3

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn honors in the major, students are required to take at least 20 honors credits. In addition, students must take HORT 289, HORT 681 and HORT 682 when completing their thesis project; please see the h (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>) onors program page (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>) for more information. The Department of Plant and Agroecosystem Sciences also works collaboratively to strongly support students through the honors in research program.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Acquire, integrate and apply knowledge of plant science to horticultural systems.

- 2. Demonstrate interdisciplinary knowledge and competency in managing horticultural systems.
- 3. Synthesize knowledge and use insight and creativity to better understand and improve horticultural systems.
- 4. Appreciate and communicate the diverse impacts of horticulture on people.
- 5. Demonstrate professionalism and proficiency in skills that relate to horticulture.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN WITH BIOLOGY/ BOTANY 130 IN THE FIRST SEMESTER

Students must complete at least 120 total credits to be eligible for graduation.

First Year

Fall	Credits Spring	Credits
PLANTSCI 121	1 MATH 113	3
PLANTSCI 110	4 BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	5
BIOLOGY/BOTANY 130 ¹	5 Ethnic Studies	3
MATH 112	3 Electives	5
COMM A Course	3	
CALS First Year Seminar	1	
	17	16

Second Year

Fall	Credits Spring	Credits
PLANTSCI 320	3 CHEM 104	5
CHEM 103	4 PLANTSCI 227	3
COMM B Course	3 PLANTSCI 334 & PLANTSCI 335	3
Horticulture Breadth	6 Humanities	3-4
	16	14-15

Third Year

Fall	Credits Spring	Credits
Agricultural Breadth ²	6 Agricultural Breadth ²	6
Horticulture Breadth	3 Math / Statistics / Computer Science	3
CALS International Studies ³	3 Humanities	3-4
Electives	4-5 Elective	3
	16-17	15-16

Fourth Year

Fall	Credits Spring	Credits
Agricultural Breadth ²	3 Agricultural Breadth ²	3-4
Horticulture Breadth	6 Electives	9
Horticulture Capstone	3	

Social Sciences	3-4	
	15-16	12-13

Total Credits 121-126

- ¹ BIOLOGY/BOTANY 130, BIOLOGY/ZOOLOGY 101, and BIOLOGY/ZOOLOGY 102 is the preferred course to complete the biology requirement.
- ² Please consult with a horticulture advisor to discuss when specific courses are typically offered.
- ³ Students can choose to complete the CALS international studies requirement using PLANTSCI 370 or PLANTSCI 376 & PLANTSCI 378, which also fulfill horticulture major requirements.

SAMPLE FOUR-YEAR PLAN WITH CHEM 103 IN THE FIRST SEMESTER

Students must complete at least 120 total credits to be eligible for graduation.

First Year

Fall	Credits Spring	Credits
PLANTSCI 110	4 CHEM 104	5
PLANTSCI 121	1 BIOLOGY/BOTANY 130 ¹	5
CHEM 103	4 MATH 113	3
MATH 112	3 Ethnic Studies	3
COMM A Course	3	
CALS First Year Seminar	1

Agricultural Breadth ²	3 Agricultural Breadth ²	3-4
Social Sciences	3 Electives	9
Horticulture Capstone	3	

Electives	6-7	
	15-16	12-13

Total Credits 118-123

- ¹ BIOLOGY/BOTANY 130, BIOLOGY/ZOOLOGY 101, and BIOLOGY/ZOOLOGY 102 is the preferred biology track.
- ² Please consult with a horticulture advisor to discuss when specific courses are typically offered.
- ³ Students can choose to complete the CALS international studies requirement using PLANTSCI 370 or PLANTSCI 376 & PLANTSCI 378, which also fulfill horticulture major requirements.

ADVISING AND CAREERS**ADVISING AND CAREERS****ADVISING**

Students interested in learning more about the Horticulture major should meet with Kathryn Jones, kjones26@wisc.edu, or schedule an advising appointment **via Starfish** (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).

CAREERS

Majoring in horticulture prepares students for numerous career paths, including plant breeding and genetics, applied plant science, food crop production, greenhouse production, urban agriculture, community-supported agriculture (CSA), gardening and landscaping, horticulture education, extension- and community-based education, horticultural therapy, and the health sciences.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE
INTERNSHIPS**

Internships are a great way for Horticulture students to get hands-on experience. Many of our students intern at locations that vary from seed companies to greenhouses to wineries to public gardens. Horticulture students also have many opportunities to intern during the year on or near campus at facilities such as the Allen Centennial Garden (<https://allencentennialgarden.wisc.edu/>), the UW Arboretum (<https://arboretum.wisc.edu/>), and the Agricultural Research Stations (<https://ars.wisc.edu/>). Students have also interned abroad through the International Internship Program (<https://internships.international.wisc.edu/>).

RESEARCH EXPERIENCE

Horticulture students have many opportunities to get involved in research labs and fieldwork in the department. Students primarily find research opportunities by directly contacting faculty (<https://pasdept.wisc.edu/people/faculty/>). Occasionally, opportunities are posted on the Student Job Center (<https://studentjobs.wisc.edu/>).

STUDY ABROAD

Horticulture students are encouraged to participate in study abroad experiences. Studying abroad provides students the unique opportunity to contextualize the learning acquired in traditional face-to-face courses on campus. There are many opportunities for Horticulture students to study abroad through short-term and semester-long programs. Students

can explore opportunities utilizing the Horticulture Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/horticulture/>) and consulting with their advisor.

Horticulture students also have some exciting opportunities to participate in short-term field experiences abroad led by program leaders from the Department of Plant and Agroecosystem Sciences. Some of these programs include UW Tropical Horticulture in Costa Rica (<https://studyabroad.wisc.edu/program/?programId=517>) and UW Food Systems and the Environment in Northern Japan (<https://studyabroad.wisc.edu/program/?programId=650>).

STUDENT ORGANIZATIONS

Connect with other Horticulture students and those interested in food and agriculture by joining a student organization. Organizations of particular interest to Horticulture students include People's Farm: Students for Sustainable Agriculture (<https://win.wisc.edu/organization/thepeoplesfarm/>), Slow Food UW (<https://win.wisc.edu/organization/slowfood-uw/>), WUD Cuisine Committee (<https://win.wisc.edu/organization/cuisine/>), Food Recovery Network - Madison Chapter (<https://win.wisc.edu/organization/frnuw/>), UW Campus Food Shed (<https://goldman.horticulture.wisc.edu/outreach-and-program-resources/uw-campus-food-shed/>), and Minorities in Agriculture, Natural Resources and Related Sciences (MANRRS) (<https://win.wisc.edu/organization/manrrs/>).

**COMMUNITY ENGAGEMENT AND
VOLUNTEERING**

Students can choose from a variety of volunteer opportunities related to food, agriculture, gardening, etc. The Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

**PLANT SCIENCE AND
TECHNOLOGY, BS**

The study of plants is crucial for the survival of humankind and of the planet. Our entire diet comes either directly or indirectly through plants, and plants are a key source of fuel and energy, medicines, and oxygen in the environment. Plants grown in cultivated environments have critical roles in sustaining life and in supporting our economy.

**PLANT SCIENCE AND
TECHNOLOGY STUDENTS WILL:**

- learn about the biology of plants
- investigate the role of plants in food and industrial systems, and how these systems affect climate and resource management
- study the impact of biotechnology, automation, and artificial intelligence in crop production
- learn from experts in a wide variety of plant species such as grains, fruits, vegetables, herbs, ornamental crops, weeds, and plants that appear in agricultural ecosystems.

This training will open up a wide range of careers in crop production, precision agriculture, biotechnology, and more. Additionally, students will be well prepared to attend graduate school in many disciplines from agronomy and crop science to plant biotechnology.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Core coursework in Plant Science and Technology includes hands-on learning experiences. Examples include using remote sensing to collect data on plant performance, growing crops in hydroponics systems, pollinating plants to create genetic variation, and propagating herbaceous and woody plants.

In addition, students can apply their course learning to real life through research projects, independent studies, and internships with guidance from faculty and staff members. During their final year, majors complete a senior capstone course where they work closely with fellow students and a faculty or staff advisor on a semester-long project designed to bring together a number of aspects of their educational experiences. Through their capstone, students can choose to participate in hands-on projects. For instance, a student's capstone could require they collect data on plant performance in a field or greenhouse and use those data to develop models that can predict future performance. Students can pursue complex scientific interests during their capstone such as studying the distribution of mineral content in crop seeds. Typically, the capstone project involves problem solving and data analysis in a real-world context.

BUILD COMMUNITY AND NETWORKS

Students get to know faculty and instructors through the courses they take, and they can build their networks through independent studies, participation in seminars, paid work in a research or outreach program, field trips, student organizations, and attendance at conferences and workshops. Examples of student organizations include the Badger Crops Club (<https://pasdept.wisc.edu/badger-crop-club/>) and The People's Farm (<https://www.the-peoples-farm.com/>). One of the strengths of our program is the opportunity to work with university research and outreach programs and experience scientific inquiry and the communication of scientific findings on real-world problems.

CUSTOMIZE A PATH OF STUDY

Plant Science and Technology students can select from a wide array of elective options to complete coursework that fits their interests and career goals. For some students, gaining experience in a variety of plant materials will be an important career objective, while for other students, exposure to fields such as economics, life sciences communication, foreign languages, or food science might be critical. The Plant Science and Technology major provides ample opportunities for students to identify electives that help build career skills and provide a well-rounded undergraduate experience.

MAKE A STRONG START

A number of first-year seminar courses (p. 46) are available to help new students understand academic programs, access student services, and develop time management and study skills.

GAIN A GLOBAL PERSPECTIVE

Many Plant Science and Technology majors study abroad to gain an international perspective and prepare to participate in today's global economy. Students work with their advisor and the CALS study abroad office (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>) to identify appropriate programs. The Plant Science and Technology major is also home to a study abroad program in tropical agriculture (<https://studyabroad.wisc.edu/program/?programId=517>) that

includes a fall semester course and a winter break study abroad experience in Central America.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

Students declared in the Agronomy or Horticulture BS may not also declare the Plant Science and Technology BS.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First year seminar (p. 47)		1
International studies (p. 47)		3
Physical science fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological science		5
Additional science (biological, physical, or natural)		3
Science breadth (biological, physical, natural, or social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Code	Title	Credits
Foundation (p. 215)		27-33
Plant Science and Technology Core (p. 216)		22-25
Plant Science and Technology Electives (p. 216)		15

Capstone (p. 217)	2
Total Credits	66-75

FOUNDATION

Mathematics

Complete one of the following (or requirement may be fulfilled through placement exam):

Code	Title	Credits
MATH 112 & MATH 113	College Algebra and Trigonometry	6
MATH 114	Precalculus	5
MATH 171	Calculus with Algebra and Trigonometry I	5

Statistics

Complete one of the following:

Code	Title	Credits
STAT 240	Data Science Modeling I	4
STAT 301	Introduction to Statistical Methods	3
STAT 371	Introductory Applied Statistics for the Life Sciences	3

Chemistry

Complete one of the following:

Code	Title	Credits
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5

Biology

Complete one of the following sequences:

Sequence 1

Code	Title	Credits
BIOLOGY/ BOTANY 130	General Botany	5
BIOLOGY/ ZOOLOGY 101	Animal Biology	3
BIOLOGY/ ZOOLOGY 102	Animal Biology Laboratory	2

Total Credits		2

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Define biological processes related to plant growth, development, and productivity and explain their role in plant and agroecosystem sciences
- 2. Apply scientific and technological concepts and critical thinking skills to analyze global issues in plant and agroecosystem sciences
- 3. Communicate solutions to complex problems in the field of plant science and technology to diverse audiences composed of peers, scientists, and/or professionals

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist students and their advisors. Students should use their DARS report, the degree planner, Guide requirements, and the course search & enroll tools to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Note: Math course selection is based on placement scores. Plant Science and Technology majors must complete MATH 112 & MATH 113 or MATH 114 or satisfy the math requirement by placement exam.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Each student receives one-on-one guidance from their professional advisor. Academic advisors will help students build an individualized, four-year plan. Many Plant Science and Technology majors complete certificates or double majors.

CAREER OPPORTUNITIES

The knowledge and skills developed through the Plant Science and Technology major prepare students for a wide variety of careers. The program is designed to allow students to pursue their interests and career goals. Some of the areas students may work in include: crop production and consulting, precision agriculture, biotechnology, state and federal agencies, and other policy positions. Students may also continue their education in graduate programs in several different plant science programs that incorporate a wide range of interests such as crop science, agronomy, horticulture, and plant biotechnology.

CAREER ADVISING

Students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>). These resources can help students reflect on their values, identify career goals, and outline strategies to achieve them. CALS Career Services advisors can help students one-on-one with their career goals, resume and cover letter help, interview prep, and more.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

RESEARCH EXPERIENCE

Students are encouraged to get involved with plant science and technology research on campus. Students primarily find research opportunities by directly contacting faculty or searching on the Student Job Center.

INTERNSHIPS

Plant Science and Technology students have many opportunities for hands-on experience through internships. On campus, students can get experience by working at one of the green spaces on campus. Some examples are Allen Centennial Garden, D.C. Smith Greenhouse, the Wisconsin Crop Innovation Center, Walnut Street Greenhouses, and UW Student Organic Farm. Students can also intern off-campus. Some examples are working at an agricultural business, a farm, a non-governmental organization, or one of the Agricultural Research Stations. Students can connect with their advisor or CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>) to learn more about internships.

STUDENT ORGANIZATIONS

Connect with other Plant Science and Technology students and those interested in plants and technology by joining a student organization. Organizations of particular interest to Plant Science and Technology students include Badger Crops Club, UW Campus Food Shed, and Minorities in Agriculture, Natural Resources and Related Sciences (MANRRS). A list of organizations is available on the Department of Plant and Agroecosystem Sciences website (<https://pasdept.wisc.edu/undergraduate/student-orgs/>).

GLOBAL ENGAGEMENT

Plant Science and Technology students can study or intern abroad through one of UW-Madison's 260+ programs. Visit our Major Advising Page to learn more about studying abroad as a Plant Science and Technology major.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Plant Science and Technology students have access to hands-on experiences on and off campus at UW-Madison facilities such as:

- Agricultural Research Stations (<https://ars.wisc.edu/>) – there are over 10 research stations across the state of Wisconsin that are used by faculty, staff, and students to conduct research
- Allen Centennial Garden (<https://allencentennialgarden.wisc.edu/>) – a free, public garden that is located right down the street from the Department of Plant and Agroecosystem Sciences. The garden hosts events, classes, festivals, workshops, and more.
- CALS Greenhouses (<https://greenhouses.ars.wisc.edu/>) – located right on campus, a variety of Wisconsin agricultural crops are studied here.
- D.C. Smith Greenhouse (<https://dcsmithgreenhouse.cals.wisc.edu/>) – an instructional greenhouse that grows plants for departments and programs of the College of Agricultural and Life Sciences. Many classes are also taught in the greenhouse.
- UW Arboretum (<https://arboretum.wisc.edu/>) – located off campus on Seminole Hwy, the UW Arboretum's mission is to "Conserve and restore Arboretum lands, advance restoration ecology, and foster the land ethic (<https://www.aldo Leopold.org/about/the-land-ethic/>)."
- Wisconsin Crop Improvement Center (WCIC) (<https://cropinnovation.cals.wisc.edu/>) – located off campus in Middleton, the WCIC is a 100,000 square foot agricultural biotechnology/greenhouse complex. The building houses a state-of-the-art transgenic plant laboratory which supports unprecedented scientific advancement opportunities to improve plants for humans, livestock, and the environment.

SCHOLARSHIPS

College of Agricultural and Life students receive more than \$1.25 million annually in scholarship awards. Plant Science and Technology majors can apply for these scholarships through a single application in the Wisconsin Scholarship Hub (WiSH). To learn more about college scholarships please visit the CALS scholarship website (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

PLANT PATHOLOGY

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin–Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong.

Undergraduates in plant pathology can choose between two focus areas. The plant–microbe biology focus area has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This focus area is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree. The plant health and industry focus area includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/management and upper-level courses in plant pathology, entomology, and other agricultural sciences. This focus area is designed for students who intend to work in industry after receiving their undergraduate degree. More information about careers in plant pathology is available from the department.

For those interested in graduate studies, the Department of Plant Pathology offers a broad program leading to MS and PhD degrees, which is described in the Graduate Guide (<https://guide.wisc.edu/graduate/>).

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Organic Agriculture, Certificate (p. 220)
- Plant Pathology, BS (p. 222)

ORGANIC AGRICULTURE, CERTIFICATE

As consumer, industry, and society engagement with organic agriculture expands, the Certificate in Organic Agriculture provides undergraduate students excellent opportunities for learning on a variety of levels, including hands-on experiences. While the certificate focuses on the production and processing approaches that define organic agriculture, students can also explore other dimensions including economic, environmental, health, food systems, and policy. This interdisciplinary

certificate can help UW students from various majors to develop employment opportunities in organic agriculture businesses (farm to fork), policy, public and non-governmental agency work, individual wellness and health initiatives, and sustainable development efforts.

HOW TO GET IN

HOW TO GET IN

Students may declare the certificate after completing one of these courses:

Code	Title	Credits
AGROECOL/ C&E SOC/ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	3
PL PATH/ BOTANY 123	Plants, Parasites, and People	3
PLANTSCI 110	Introduction to Plant Science and Technology	4
C&E SOC/SOC 222	Food, Culture, and Society	3

Students who meet the eligibility criteria must contact the certificate advisor listed in the contact information box to declare the certificate and be assigned an advisor. Students are encouraged to meet with the certificate advisor at any stage of their interest in the certificate.

Students cannot declare the Certificate in Food Systems along with Certificate in Organic Agriculture.

REQUIREMENTS

REQUIREMENTS

Code	Title	Credits
Foundation		3–4
Core		6
Electives		6
Total Credits		15–16

- Minimum of 15 credits and successful completion of all course requirements
- A minimum cumulative GPA of 2.5 in certificate coursework is required
- Courses in which a student elects the pass/fail option will not count toward completion of requirements.

Code	Title	Credits
Foundation		
Complete one of the following courses:		
AGROECOL/ C&E SOC/ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	3
C&E SOC/SOC 222	Food, Culture, and Society	3
PL PATH/ BOTANY 123	Plants, Parasites, and People	3
PLANTSCI 110	Introduction to Plant Science and Technology	4
Core		

Complete all of the following courses:

PLANTSCI/A A E/ PL PATH 367	Introduction to Organic Agriculture: Production, Markets, and Policy	3
PLANTSCI 372	Seminar in Organic Agriculture	1
PL PATH 499	Independent Study in Organic Agriculture	2

Electives

Complete 6 credits from the following list – courses can be chosen from any topic area:

Public Policy & Administration

A A E/ENVIR ST 244	The Environment and the Global Economy	4
A A E 319	The International Agricultural Economy	3
FOOD SCI/ AN SCI 321	Food Laws and Regulations	1
PLANTSCI 360	Genetically Modified Crops: Science, Regulation & Controversy	2
LSC 251	Science, Media and Society	3
PUB AFFR 240	Evidence-Based Policy Making	3
PUB AFFR 380	Analytic Tools for Public Policy	3

Business/Entrepreneurship

A A E 101	Introduction to Agricultural and Applied Economics	4
A A E 320	Agricultural Systems Management	3
A A E 323	Cooperatives and Alternative Forms of Enterprise Ownership	3
GEN BUS 310 or GEN BUS 311	Fundamentals of Accounting and Finance for Non-Business Majors Fundamentals of Management and Marketing for Non-Business Majors	3
OTM/ MARKETNG 421	Fundamentals of Supply Chain Management	3
ENVIR ST/A A E/ ECON 343	Environmental Economics	3-4

PLANTSCI 380	Indigenous Foodways: Food and Seed Sovereignty	2

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Describe the history of current organic systems and how it influences the way that organic farms and industries work.
2. Explore the biological, ecological, and agricultural underpinnings of organic production systems
3. Examine how organic systems, social initiatives, and regulations are developed and how they shape business activities, community development efforts, and human and environmental health outcomes.
4. Evaluate the benefits and limitations of organic systems, social initiatives, and regulations from environmental, social, economic, and racial justice perspectives
5. Apply knowledge of organic production through experiential opportunities within local, national and/or international communities.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Advising is an essential resource for students in the Certificate for Organic Agriculture and helps students shape their unique Wisconsin Experience and career path by making the most of their time at UW–Madison. Advisors can help students make well-informed decisions about coursework and academics, share strategies for success, support them as they encounter challenges, connect them to resources, and provide information about campus policies and procedures. Students are encouraged to regularly meet with their advisor to help ensure that they are aware of opportunities and are progressing in their academic and career goals.

Advising is typically done through individual in-person appointments, but advisors are also able to meet with students over the phone or through video conferencing if needed. Quick questions can be answered via email, but an appointment should be scheduled if a conversation is needed.

CAREERS

The knowledge and skills developed through the Certificate in Organic Agriculture equip students for success in a range of career paths. Some certificate graduates may use this background to go into organic production, while others may choose a career path in relation to economics, policy, environmental stewardship, health, food systems, and beyond. This certificate has the potential to positively impact the employability of UW students across a variety of disciplines that intersect with organic agricultural production, policy, marketing, business, management, wellness, and community development.

Because an interest in organic agriculture can lead to many different careers, students are encouraged to begin the career exploration process early in their UW–Madison journey by working with advisors, faculty, and career resources on campus. These resources can help students reflect on their values and goals, identify career paths, and outline strategies for pursuing their goals.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Students who are engaged in the Certificate in Organic Agriculture can be involved in an array of opportunities across campus. In addition to the hands-on experiences in the certificate program, students are highly encouraged to complement their coursework with out-of-classroom experiences such as research, volunteering, and study abroad.

The following opportunities can help students connect with other students interested in organic agriculture, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Association of Women in Agriculture (<https://awamadison.org/>)
- GreenHouse Learning Community (<https://www.housing.wisc.edu/residence-halls/learning-communities/greenhouse/>)
- Women in Science and Engineering Learning Community (<https://www.housing.wisc.edu/residence-halls/learning-communities/wise/>)
- The People's Farm (<https://www.the-peoples-farm.com/>)
- Slow Food UW (<https://slowfood-uw.org/>)

- Minorities in Agriculture, Natural Resources and Related Sciences – MANRRS (<https://www.manrrs.org/>)
- CALS Study Abroad (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>)
- Badger Volunteers (<https://morgridge.wisc.edu/students/badger-volunteers/>)
- UW Student Organic Farm (<https://uworganic.wisc.edu/uw-student-organic-farm/>)
- UW Organic Collaborative (<https://uworganic.wisc.edu/>)
- Badger Crops Club (<https://pasdept.wisc.edu/academics/undergraduate/agronomy-major/badger-crop-club/>)

PLANT PATHOLOGY, BS

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

LEARN THROUGH REAL-WORLD, HANDS-ON EXPERIENCES

Plant Pathology students learn in many field and lab courses, including classes that focus on economics of plant disease, interactions between plants and people, fungi, organic agriculture, and global food security. They can also take part in a summer field course, numerous internships, and research opportunities.

BUILD COMMUNITY AND NETWORKS

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin–Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong. Please visit the department's Extension and Outreach (<https://plantpath.wisc.edu/extension-overview/>) overview page for additional details on the department's outreach activities, public education programs, and student organizations.

CUSTOMIZE A PATH OF STUDY

Undergraduates in Plant Pathology can choose between two tracks. The plant–microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree.

The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/management and upper-level courses in plant pathology, entomology, and

other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree.

Students are also able to explore double majors and a multitude of undergraduate certificates based on their unique educational and professional interests. More information about careers in plant pathology is available from the department.

MAKE A STRONG START

Freshmen who are interested in Plant Pathology are encouraged to participate in a First-Year Interest Group (<https://figs.wisc.edu/what/>) (FIG) program. Topics of interest to Plant Pathology students include global food security, plants and human well-being, and many other fascinating options. See the latest Choose Your FIG (<https://figs.wisc.edu/choose/>) catalog for details.

GAIN GLOBAL PERSPECTIVE

The Plant Pathology program is a great choice for students who wish to participate in a study abroad experience. Students can choose from a multitude of destinations worldwide and can travel abroad during summer, spring, or fall terms. Students can explore studying abroad as a Plant Pathology major by utilizing the Plant Pathology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) (https://go.wisc.edu/g85h79/) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	
	Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.	
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5

CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological science		5
Additional science (biological, physical, or natural)		3
Science breadth (biological, physical, natural, or social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used to complete university or college requirements.

Code	Title	Credits

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences including Plant Pathology.
2. Appropriately use biological instrumentation and laboratory techniques.

3. Explain and apply the scientific method including designing and conducting experiments and testing hypotheses.
4. Recognize the relationship between structure and function at all levels: molecular, cellular, organismal, and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physical sciences, and technology to answer biological questions using the scientific method.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Students must complete at least 120 total credits to be eligible for graduation.

Amanda Gevens
Mehdi Kabbage
Paul Koch
Richard Lankau

Details can be found on our faculty webpage (<https://plantpath.wisc.edu/faculty/>). Undergraduates in plant pathology are strongly encouraged to consult with an advisor before enrollment for the upcoming term.

For more information about the Plant Pathology major or the department in general, please see the contact information on this page. Students with questions regarding Plant Pathology lab positions – both paid and unpaid – should contact Professor Jeri Barak.

CAREER OPPORTUNITIES

Please visit our Internship & Job Resources (<https://plantpath.wisc.edu/undergrad-overview/undergrad-student-internship-job-resources/>) page for information on career opportunities available to plant pathology students. For more information on other academic, co-curricular, financial aid, and career services available to plant pathology students, please visit the CALS Career Services (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>) page. Students in the major are welcome to make an individual appointment with an advisor to discuss career-related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

Plant Pathologists from all educational levels are able to seek employment in a variety of areas. Some examples include:

- colleges and universities
- biotechnology companies
- state and federal agencies
- international agricultural research centers
- nurseries, greenhouses, and garden centers
- non-governmental organizations
- golf courses, public parks, and landscape maintenance companies
- diagnostic laboratories
- seed, plant production, and tissue culture companies
- a variety of private consulting firms

If you would like to know more about what is Plant Pathology and how an undergraduate education in Plant Pathology can help you make an impact on the world around you, please check out the “Plant Pathology: taking you further than you ever imagined (<https://www.youtube.com/watch?v=mzTE3StOHIQ>)” video from the American Phytopathological Society (<http://www.apsnet.org/Pages/default.aspx>).

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Undergraduates majoring in plant pathology at UW–Madison will find an inclusive, welcoming community where professors know their students and are able to provide guidance based on students’ specific academic and career goals. There are numerous opportunities to conduct research with internationally prominent faculty and to take part in the Wisconsin Idea, whereby faculty and students extend the knowledge developed at the

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Students in plant pathology are assigned to both a professional staff advisor and one of our faculty advisors. Current faculty advisors include:

Leslie Holland

university to stakeholders in Wisconsin and beyond for the betterment of society.

INTERNSHIPS

Plant Pathology offers paid research internships during summer term, as well as paid or credit-earning research opportunities year-round. Undergraduates get a firsthand view of how research is conducted and what it means to be a professional scientist. For more information on internship opportunities available to plant pathology students, please visit our Internship & Job Resources (<https://plantpath.wisc.edu/undergrad-overview/undergrad-student-internship-job-resources/>) page.

RESEARCH EXPERIENCE

Nearly all Plant Pathology undergraduates participate in field- or lab-based research with a professor. Research in the department has a long tradition of supporting grower needs. Many faculty are using the plethora of research tools available, including molecular biology and systematics, to answer questions that are directly applicable to grower groups. Please visit the department's Research (<https://plantpath.wisc.edu/research/>) page for additional details on research activities in Plant Pathology.

STUDENT ORGANIZATIONS

By joining the Plant Pathology Undergraduate Club, majors get to know their fellow students outside the classroom. The department provides resources for students to meet experts who lead discussions on a range of topics including cutting-edge research and technology, career options, and how to apply and compete for jobs.

Undergraduate students are also welcome to join What's Eating My Plants (<https://www.facebook.com/wemp.uw/>) (WEMP). This organization, founded in 2010 by Plant Pathology graduate students, is dedicated to bridging the gap between the University and the greater Madison community. The students visit Family Science Nights at schools, community centers, and Saturday Science at the Wisconsin Institute for Discovery (WID) throughout the year.

GLOBAL ENGAGEMENT

Plant Pathology students interested in studying issues on a global scale are encouraged to enroll in Plant Path 311: Global Food Security, which explores drivers of food insecurity: barriers to food production (pests, land availability, climate), barriers to food availability (politics, price, biofuels), and a greater need due to population growth. The Plant Pathology program is an excellent choice for students wishing to participate in a study abroad experience. Students can find more information about study abroad on the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>).

COMMUNITY ENGAGEMENT AND VOLUNTEERING

The UW–Madison Division of Extension provides statewide access to the resources and research of the University of Wisconsin, other universities, and the United States Department of Agriculture so that the people of Wisconsin can learn, grow, and succeed at all stages of life. The UW–Madison Division of Extension carries out the tradition of the Wisconsin Idea (<http://www.wisconsinidea.wisc.edu/>) – extending the boundaries of the university to the boundaries of the state. UW–Madison Extension and outreach activities support educational programs for farmers, businesses, communities, families, and youth. More details can be found on the department Extension & Outreach (<https://plantpath.wisc.edu/extension-overview/>) page.

On campus, the Morgridge Center for Public Service (<https://morgridge.wisc.edu/>) provides resources to help students connect with volunteer opportunities based on their interests and goals.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Department scholarships are available to Plant Pathology students and fellowships are available to support research work with a professor. Students across the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Learn more about college scholarships here (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/>).

SOIL AND ENVIRONMENTAL SCIENCES

The Department of Soil and Environmental Sciences provides undergraduate and graduate education in the environmental, agricultural, and natural resource aspects of soils. Areas of emphasis include soil ecology, soil erosion management, soil fertility and plant nutrition, soil physical and chemical characterization, biogeochemistry, urban soils, soil carbon, soil health, soil contaminants, waste management, pedology, and land-use analysis.

Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets are integrated into the department's course offerings and research programs. Soil Science majors prepare for professional, technical, consulting, and project positions in environmental sciences, ecology and restoration, crop and timber production, soil informatics, soil conservation, environmental pollution control, turf and grounds management, and land-use planning. Please contact the department for further information on career opportunities.

Students completing an undergraduate major in Soil Science earn a bachelor of science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

The department also serves as the administrative home for the Environmental Sciences major in the College of Agricultural and Life Sciences.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Environmental Sciences, BS (CALS) (p. 229)
- Environmental Soil Science, Certificate (p. 237)
- Soil Science, BS (p. 239)

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Financial support – in the form of approximately 15 scholarships, part-time employment, paid internships, and work-study programs – is available to qualified undergraduate students.

ENVIRONMENTAL SCIENCES, BS (CALS)

The Environmental Sciences major satisfies the growing demand among entry-level students for a rigorous, science-based program that promotes critical thinking and emphasizes environmental problem solving in service to society. The program is designed to prepare graduates who will be highly competitive for entry-level positions in nonprofit and private sectors, and for master's programs and doctoral research programs in environmental fields. Possible career paths include environmental monitoring, consulting, education, research, and planning, as well as natural resource management, ecology restoration, remediation, water and air quality assessment, sustainability practices, and more. Undergraduates in Environmental Sciences prepare for a variety of career and graduate school opportunities that require a strong background in the natural sciences. Foundational course work in the major includes calculus, biology, chemistry, and physics. Core and elective course work is fulfilled through diverse offerings from both the College of Agricultural and Life Sciences and the College of Letters & Science.

The Environmental Sciences major can be earned in either the College of Agricultural and Life Sciences (CALS) or the College of Letters & Science (L&S) under the bachelor of science (BS) or bachelor of arts (BA) degree program. An undergraduate BS degree is offered through both colleges. A BA option is offered through L&S only. Students are encouraged to review the degree requirements for both L&S and CALS and choose the college from which they would prefer to earn their degree; students may choose only one degree "home."

- In CALS, the major is housed in the Department of Soil and Environmental Sciences.
- In L&S, the major is housed in the Department of Atmospheric and Oceanic Sciences.

The major can be taken as a stand-alone or as a double major with a variety of other majors on campus, including Biology, Community & Environmental Sociology, Life Sciences Communication, foreign language/culture, and a number of other disciplines.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.

Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW-Madison application. Admitted students who enroll at UW-Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First year seminar (p. 47)		1
International studies (p. 47)		3
Physical science fundamentals		4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
Biological science		5
Additional science (biological, physical, or natural)		3
Science breadth (biological, physical, natural, or social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

REQUIREMENTS FOR THE MAJOR

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of **15 credits** must be completed in the major that are not used elsewhere.

MATHEMATICS AND STATISTICS

This major requires calculus. Prerequisites may need to be taken before enrollment in calculus. Refer to the Course Guide for information about calculus prerequisites.

Code	Title	Credits

MAJOR ELECTIVES

Students may consult with their environmental sciences advisor regarding pathways to complete the major electives requirement. Students must complete 12 credits of electives either by:

1. distributing 12 credits across at least three categories;
2. focusing 12 credits in a single category.

Distributed Electives

Students choosing the Distributed Electives path must complete a total of **12 credits** of Environmental Sciences Electives from the categories below, including **at least one course** from **each** category (Ecology, Physical Environment, Geospatial Sciences)¹.

Ecology

Code	Title	Credits
AGROECOL 370	Grassland Ecology	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/ F&W ECOL/ ZOOLOGY 460	General Ecology	4
ENTOM/BOTANY/ ZOOLOGY 473	Plant-Insect Interactions	3
ENTOM 450	Basic and Applied Insect Ecology	3
ENTOM 490	Biodiversity and Global Change	3
ENVIR ST/ ZOOLOGY 510	Ecology of Fishes	3
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species	3

¹ Students may consult their environmental sciences advisor regarding alternate ways to complete the major electives requirement.

CAPSTONE ¹

Code	Title	Credits
CIV ENGR 515	Hydroclimatology for Water Resources Management	3
BOTANY/ENVIR ST/ F&W ECOL/ ZOOLOGY 516	Conservation Biology	3
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	3
F&W ECOL/ A A E 430	Decision Methods for Natural Resource Managers	3
LAND ARC 668	Restoration Ecology	3
PL PATH 315	Plant Microbiomes	4
PLANTSCI 510	Senior Capstone Experience	2
SOIL SCI 499	Soil Management	3
PLANTSCI 376 & PLANTSCI 378	Tropical Horticultural Systems and Tropical Horticultural Systems International Field Study	4

¹ Students may speak with their environmental science advisor about alternatives (e.g., courses, directed study, senior thesis) to complete the capstone. To be approved, the alternative must be taken for a minimum of 3 credits, clearly focused on environmental science, and approved by the Environmental Sciences Administrative Committee. Students must consult with their environmental sciences advisor and fill out all necessary paperwork before registering.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate understanding of Environmental Science fundamentals in the context of biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate a quantitative and qualitative understanding of the ecological relationships (material and energetic) between organisms, both as individuals and in groups, and their biotic and abiotic environment. This may include processes influencing the distribution and abundance of organisms.
3. Demonstrate a quantitative and qualitative understanding of the physical, largely abiotic, conditions (e.g. climate, water, soil, air, noise, greenspace, etc.) of the environment. The physical environment can include natural or managed settings such as urban environments.
4. Demonstrate a quantitative and qualitative understanding of geospatial processes and information as it relates to the environment including how to collect, interpret, and analyze geospatial information regarding the features of the Earth's surface. These technologies may include geographic information systems (GIS), the global positioning system (GPS), digital maps, and satellite based remote sensing.
5. Demonstrate a basic understanding of relationships that focus on the organization and implementation of laws, regulations, and other policy mechanisms concerning environmental issues and sustainability and their effect on society. This includes how human behaviors influences, and are also influenced by, the natural environment.
6. Apply skills in critical thinking, problem identification and resolution of a complex environmental issues that require interdisciplinary solutions and team-based work.
7. Articulate the role of environmental science in one or more focused areas of a specific environmental discipline (e.g. geology, soils, atmosphere, water, plants, animals).
8. Demonstrate expertise in organizing and presenting (written and oral) scientific information to both lay and professional audiences.

FOUR-YEAR PLAN

FOUR-YEAR-PLAN SAMPLE ENVIRONMENTAL SCIENCES FOUR-YEAR PLAN

Students must complete at least 120 total credits to be eligible for graduation.

First Year		
Fall	Credits Spring	Credits
CHEM 103 or 109	4-5 CHEM 104	5
MATH 114 or 171 ¹	5 MATH 221, 217, or 211 ¹	5

Total Credits 120		

¹ Sequence of MATH 112/MATH 113 (or MATH 114) and MATH 221 is recommended.
² Completion of BIOLOGY/BOTANY/ZOOLOGY 152 fulfills the Communication Part B university requirement.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Students wishing to declare the Environmental Sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosci.wisc.edu/advising/>).

CALS undergraduate students interested in pursuing the Environmental Sciences major in the College of Agricultural and Life Sciences should contact Zach Wyman, zwyma@wisc.edu (zwyma@wisc.edu) or 608-265-2925.

L&S undergraduate students interested in pursuing the Environmental Sciences major in the College of Letters & Science should contact the Sabrina Manero, smanero@wisc.edu.

CAREERS

A major in Environmental Sciences serves as excellent preparation for careers of great diversity, including environmental modeling, agricultural scientist, botanist, ecologist, park ranger, agricultural technician, air and water quality manager, environmental analyst, air pollution analyst, environmental consultant, environmental educator, GIS analyst, project manager, hazardous waste manager, hydrologist, environmental lawyer, soil conservation technician, and natural resource specialist. For more info about careers, please visit our website (<http://envirosci.wisc.edu/careers-internships/>).

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

As an interdisciplinary cross-college major, students majoring in Environmental Sciences are involved in a wide array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (<https://research.wisc.edu/information-for-undergraduate-students/>), volunteering (<https://morgridge.wisc.edu/>), internships (<https://envirosci.wisc.edu/careers-internships/>), and study abroad (<https://www.studyabroad.wisc.edu/>).

Many students are also involved in environmental and sustainability organizations (<https://sustainability.wisc.edu/student-organizations/>).

ENVIRONMENTAL SOIL SCIENCE, CERTIFICATE

The Environmental Soil Science Certificate is a gateway to understanding the dynamics of Earth's thin living skin. Soil is where the atmosphere, lithosphere, and hydrosphere connect and is pivotal in shaping ecosystems' biodiversity, health, and resilience. Mastery of soil properties, processes, and distribution is necessary for addressing pressing environmental challenges, including food and energy security, water quality protection, climate change, and ecosystem health.

This certificate equips students with a holistic understanding of soil and its intersection with environmental issues. Rooted in a foundational soil

science course, students delve into thematic areas, forming connections between soils and various environmental domains.

Designed as a launchpad, this certificate empowers students to pursue careers and certification in the field of soil science, opening doors for employment in the public and private sectors. Our dedicated advisors will guide students in selecting courses tailored to prepare them for their journey toward expertise in soil science and environmental stewardship.

HOW TO GET IN

HOW TO GET IN

The Certificate in Environmental Soil Science is open to all undergraduate students. Students pursuing the program are encouraged to declare as early as possible so that they can best align the coursework with their interests and plan their field experience.

PREPARATORY COURSEWORK

No courses are required to declare the certificate; however, general chemistry is a prerequisite to complete required courses in the certificate.

Code	Title	Credits
CHEM 103	General Chemistry I	4
CHEM 109	Advanced General Chemistry	5
CHEM 115	Chemical Principles I	5

REQUIREMENTS

REQUIREMENTS

Code	Title	Credits
	Soil Science Foundation	4
	Soil Science Themes	9
	Allied Sciences	2-4
Total Credits		16

- The certificate requires a minimum of **16 credits**.
- A minimum grade of C is required in all certificate coursework.
- Courses taken on a pass/fail (satisfactory/unsatisfactory) basis will not count toward the certificate.
- All certificate coursework must be completed in residence at the UW-Madison.

SOIL SCIENCE FOUNDATION

Complete the following courses for a total of **4 credits**:

Code	Title	Credits
SOIL SCI 301	General Soil Science	3
or SOIL SCI/ ENVIR ST/ GEOG 230	Soil: Ecosystem and Resource	
SOIL SCI 302	Meet Your Soil: Soil Analysis and Interpretation Laboratory	1
Total Credits		4

SOIL SCIENCE THEMES

Complete at least one course from three of the four thematic areas for a minimum of **9 credits**. Courses may only count towards one thematic area. Additional courses from this section may be completed to meet the overall minimum credits for the certificate.

Soil Fertility & Chemistry

Code	Title	Credits
SOIL SCI 326	Plant Nutrition Management	3
SOIL SCI/BSE/ CIV ENGR 372	On-Site Waste Water Treatment and Dispersal	2
SOIL SCI 430	Soil Pollution and Human Health	3
SOIL SCI/ F&W ECOL 451	Environmental Biogeochemistry	3
SOIL SCI 621	Soil and Environmental Chemistry	3
SOIL SCI/ CIV ENGR/ M&ENVTOX 631	Toxicants in the Environment: Sources, Distribution, Fate, & Effects	3

Soil Physics & Development

Code	Title	Credits
PLANTSCI/ ATM OCN 532	Environmental Biophysics	3
SOIL SCI 327	Environmental Monitoring and Soil Characterization	3
SOIL SCI/ GEOG 525	Soil Geomorphology	3
SOIL SCI/ GEOG 526	Human Transformations of Earth Surface Processes	3
SOIL SCI 622	Soil Physics	3

Soil Biology & Ecology

Code	Title	Credits
SOIL SCI 323	Soil Biology	3
SOIL SCI/ MICROBIO 425	Environmental Microbiology	3
AGROECOL 370	Grassland Ecology	3
SOIL SCI/ F&W ECOL 451	Environmental Biogeochemistry	3
SOIL SCI/ MICROBIO 523	Soil Microbiology and Biochemistry	3

Soils and the Environment

Code	Title	Credits
SOIL SCI 211	Soils and Climate Change	2
SOIL SCI 250	Introduction to Environmental Science	3
SOIL SCI/ ENVIR ST 324	Soils and Environmental Quality	3
SOIL SCI 327	Environmental Monitoring and Soil Characterization	3
SOIL SCI 430	Soil Pollution and Human Health	3
SOIL SCI 499	Soil Management	3
SOIL SCI/ ENVIR ST 575	Assessment of Environmental Impact	3
SOIL SCI 585	Using R for Soil and Environmental Sciences	3

ALLIED SCIENCES

Complete one course from the following for a minimum of **2 credits**:

Course List

Code	Title	Credits
A A E 101	Introduction to Agricultural and Applied Economics	4
A A E/ENVIR ST 244	The Environment and the Global Economy	4
A A E 352	Global Health: Economics, Natural Systems, and Policy	4
AGROECOL/ C&E SOC/ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	3
AGROECOL 370	Grassland Ecology	3
BSE 301	Land Information Management	3
AGROECOL 377	Global Food Production and Health	3
BSE/CIV ENGR/ SOIL SCI 372	On-Site Waste Water Treatment and Dispersal	2
BSE 473	Water Management Systems	3
C&E SOC/SOC 140	Introduction to Community and Environmental Sociology	4
C&E SOC/SOC 222	Food, Culture, and Society	3
C&E SOC/ F&W ECOL/ SOC 248	Environment, Natural Resources, and Society	3
C&E SOC/A A E/ SOC 340	Issues in Food Systems	3-4
ENTOM/ NUTR SCI 203	Introduction to Global Health	3
ENTOM 570	Systems Thinking in Global Health	3
PLANTSCI 110	Introduction to Plant Science and Technology	4
PLANTSCI 227	Propagation of Horticultural Plants	3
LSC 212	Introduction to Scientific Communication	3
PLANTSCI/ PL PATH 261	Sustainable Turfgrass Use and Management	2
PLANTSCI 370	World Vegetable Crops	3
LSC 251	Science, Media and Society	3
LSC 430	Communicating Science with Narrative	3
PL PATH 311	Global Food Security	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Discuss, debate, and communicate those aspects of soil science pertinent to their primary major, specialization, and career goals.

2. Describe how soil integrates into larger environmental issues using its properties, processes, and distribution from local to global scales and natural to anthropogenic environments.
3. Identify potential solutions to issues related to soil that promote the ecosystem services soil provides.
4. Communicate, in written or oral form, potential environmental impacts of land-use practices involving soil.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Each certificate student is assigned an advisor who works to understand student goals and help students shape their path through the certificate. Advisors also provide support for post-graduation plans such as jobs, fellowships, or graduate school.

There may be additional requirements for students seeking a Professional Soil Scientist certification beyond the Certificate requirements.

The certificate advisor can help you identify courses that will meet requirements for the Professional Soil Scientist Certification through The Soil Science Society of America.

CAREER OPPORTUNITIES

The Certificate in Environmental Soil Science provides an attractive addition to a science, engineering, or allied science major for students interested in careers in environmental sciences, agricultural science, natural resources, and other related industries. Students in majors across campus can also use the certificate to diversify their skills and knowledge to be better informed citizens.

Questions about advising or careers may be directed to the certificate advisor listed in the contact box.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Students in the Certificate in Environmental Soil Science are involved in an array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (<https://soilenvsci.wisc.edu/research-and-extension/research/>), volunteering (<https://morgridge.wisc.edu/>), internships (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/internships/>), and study abroad (<https://www.studyabroad.wisc.edu/>).

Students in the certificate can participate in the UW-Madison Soil Judging Team.

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE

CERTIFIED PROFESSIONAL SOIL SCIENTIST

There may be additional requirements for students seeking a Professional Soil Scientist certification beyond the Certificate requirements. Work with your advisor to ensure that you complete courses that will meet

requirements for the Professional Soil Scientist Certification through The Soil Science Society of America.

Please refer to <https://www.soils.org/certifications/become-certified/> for current requirements.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Financial support in the form of scholarships, part-time employment, paid internships, and work-study programs is available to qualified undergraduate students. Students with a primary major in the College of Agricultural and Life Sciences receive more than \$1.25 million in scholarships annually. Additionally, the Department of Soil and Environmental Sciences is proud to offer numerous scholarships annually to students pursuing the Certificate in Environmental Soil Science.

SOIL SCIENCE, BS

Admissions to the Soil Science, BS were suspended as of summer 2025 and will be discontinued as of fall 2029. If you have any questions, please contact the department.

The Department of Soil and Environmental Sciences provides undergraduate and graduate education in the environmental, agricultural, and natural resource aspects of soils. Areas of emphasis include soil ecology, soil erosion management, soil fertility and plant nutrition, soil physical and chemical characterization, biogeochemistry, urban soils, soil carbon, soil health, soil contaminants, waste management, pedology, and land use analysis.

Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets are integrated into the department's course offerings and research programs. Soil science majors prepare for professional, technical, consulting, and project positions in environmental sciences, ecology and restoration, crop and timber production, soil informatics, soil conservation, environmental pollution control, turf and grounds management, and land-use planning. Please contact the department for further information on career opportunities.

Students completing an undergraduate major in soil science earn a bachelor of science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

HOW TO GET IN

HOW TO GET IN

Admissions to the Soil Science, BS were suspended as of summer 2025 and will be discontinued as of fall 2029. If you have any questions, please contact the department.

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.

Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	Must have fewer than 86 credits.
Other	Students who do not meet the requirements above or are not in good academic standing should schedule a meeting with CALS Dean on Call (https://go.wisc.edu/g85h79 (https://go.wisc.edu/g85h79/)) to discuss exceptions.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students interested in this major should select it as the first choice major on their UW–Madison application. Admitted students who enroll at UW–Madison and attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. More information is available here (<https://cals.wisc.edu/academics/undergraduate/future-students/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none">• Breadth–Humanities/Literature/Arts: 6 credits• Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits• Breadth–Social Studies: 3 credits• Communication Part A & Part B *• Ethnic Studies *• Quantitative Reasoning Part A & Part B *
-------------------	---

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS BS DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First year seminar (p. 47)	1
	International studies (p. 47)	3
	Physical science fundamentals	4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
	Biological science	5
	Additional science (biological, physical, or natural)	3
	Science breadth (biological, physical, natural, or social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "major requirements") (p. 48)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following courses:		3-5
MATH 112	College Algebra	
MATH 114	Precalculus	
MATH 171	Calculus with Algebra and Trigonometry I ¹	
Select one of the following courses:		3-4
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take SOIL SCI 681 Senior Honors Thesis and SOIL SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. To instill in our undergraduate majors the knowledge base required for them to intelligently discuss, debate and communicate those aspects of soil science pertinent to their degree, specialization and career goals.
2. To provide our undergraduates with the skills and experience needed to identify and solve problems and issues of the types they may encounter in their professions.
3. To ensure that our undergraduates possess an awareness of and an appreciation for the potential impacts of soil, water, crop and waste management practices, and land use on the quality of the environment.

ADVISING AND CAREERS

ADVISING AND CAREERS

Students are assigned a faculty advisor once they declare the major. Prospective students should contact the undergraduate coordinator, Zach Wyman (zwyman@wisc.edu, 608-265-2925), with questions.

Most of our graduates find employment in a diversity of private and commercial enterprises and governmental agencies. Recent examples of employment include laboratory technician, turf and grounds manager, agrichemical sales representative, environmental scientist, land use planner, land zoning administrator, project manager, wetlands delineator, and hydrogeologist. Approximately 12% of our undergraduates pursue advanced degrees.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Students majoring in soil science are involved in an array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (<https://soilenvsci.wisc.edu/research-and-extension/research/>), volunteering (<https://morgridge.wisc.edu/>), internships (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/internships/>), and study abroad (<https://www.studyabroad.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Financial support – in the form of approximately 15 scholarships, part-time employment, paid internships, and work-study programs – is available to qualified undergraduate students. The department also provides opportunities and limited financial support in the form of research assistantships to qualified students seeking MS and/or PhD degrees – see the Graduate Guide (<https://guide.wisc.edu/graduate/>).

COLLEGE OF ENGINEERING

The University of Wisconsin–Madison College of Engineering is one of the best places in the world for an engineering education. Here, you'll be among some of the smartest, most innovative people anywhere. You'll learn directly from many of the world's best professors and teachers. Your classes will prepare you to be exceptional engineers. You'll actually do engineering, work in multi-disciplinary teams, and design and build solutions to real challenges people experience.

You'll gain the technological tools, resources and knowledge to develop solutions to problems in fields ranging from health to energy to materials to communication—and many more. You'll also have the resources (and the prestige of a Badger engineering education) to help you find a great job!

Beyond learning and doing engineering in the classroom and in the lab, you can broaden and customize your Badger engineering experience: Study abroad, join a student organization or two, volunteer, share the love of all things Badger engineering as a student ambassador, do real engineering at a company through an internship or co-operative work... and the list goes on. The possibilities are as limitless as your imagination! (Across the university, there also are countless ways to get involved in the campus community—from playing an instrument in the UW Marching Band to playing a leadership role in student government, there's something to interest everyone here.)

In a college internationally renowned for its research, you'll have abundant opportunities to contribute. As an undergraduate researcher, you can hone your own research skills alongside professors, graduate students and other undergrads. You may be able to propose and conduct your own research, and to publish and patent your results!

Importantly, you'll be a valued member of a strong, supportive community with lots of resources—and people—you can tap to help you succeed. In short, as a Badger engineer, you'll have the time of your life... while you prepare to make an impact on life as we know it.

- Six Sigma, Certificate (p. 325)
- Technical Communication, Certificate (p. 315)

ENTERING THE COLLEGE

ENTERING THE COLLEGE

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree

requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

POLICIES AND REGULATIONS

POLICIES AND REGULATIONS

Official regulations regarding enrollment, scholarship, and graduation for undergraduates in the College of Engineering.

A printer-friendly PDF can be found on the College of Engineering Regulations page (<https://engineering.wisc.edu/student-services/undergraduate-regulations/>).

ADMISSIONS

1. Direct Admission

New students are admitted directly to the degree program (major) of their choice or to the College of Engineering as Engineering Undecided. Progression requirements must then be satisfied as described in Regulations 3–8.

2. Degree Programs (Majors)

Biomedical Engineering (BME)
 Chemical Engineering (CHE)
 Civil Engineering (CEE)
 Computer Engineering (CMPE)
 Electrical Engineering (EE)
 Engineering Mechanics (EM)
 Engineering Physics (EP)
 Environmental Engineering (EnvE)
 Geological Engineering (GLE)

Industrial Engineering (IE)
 Materials Science and Engineering (MSE)
 Mechanical Engineering (ME)
 Nuclear Engineering (NE)

PROGRESSION

3. First Year Progression Requirements

To guarantee progression in a College of Engineering (CoE) degree program (major) after direct admission or to switch between engineering degree programs, students must complete the following requirements after their first two semesters of residency at UW-Madison. Students who do not meet the first year progression requirements to guarantee progression in a degree program (major) can be considered for progression (Regulation 4) or extension (Regulation 5).

Course and Credit Requirements:

A. 24 graded credits completed at UW-Madison. English as a Second Language course credits count toward the 24 credit minimum.

B. General Education Communications Part A (Comm A) course taken at UW-Madison. If Comm A is completed through placement test, test credit (AP/IB), or transfer credit, then a liberal studies course of at least 3 credits with a breadth designation of Humanities, Literature, or Social Sciences must be taken on a graded basis at UW-Madison.

C. Introduction to Engineering course specified by degree program; INTEREGR 170 Design Practicum is recommended for Engineering Undecided students.

D. Math course sequence through MATH 222 Calculus and Analytic Geometry 2.

E. Four Foundational Courses as defined in 3.E.1, 3.E.2, and 3.E.3 completed at UW-Madison:

1. Math Foundation: A minimum of two math courses numbered MATH 221 Calculus and Analytic Geometry 1 or above; one math course numbered 300 or above; or calculus sequence completed through MATH 234 Calculus--Functions of Several Variables. Excludes MATH 228 WES Calculus Supplement, MATH/HIST SCI 473 History of Mathematics, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

2. Engineering Foundation: A minimum of two courses as defined below.

- For Chemical Engineering majors, the following engineering foundation requirements apply:

- i. One course must be CHEM 104 General Chemistry II or higher
- ii. One course must be PHYSICS 201 General Physics/E M A 201 Statics or higher

If (i) and (ii) are complete, select from additional engineering foundation courses below.

- For majors in Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics,

Engineering Physics, Environmental Engineering, Geological Engineering, Industrial Engineering, Materials Science and Engineering, Mechanical Engineering, and Nuclear Engineering, the following engineering foundation requirements apply:

- i. One course must be either CHEM 104 General Chemistry II or higher OR PHYSICS 201 General Physics/E M A 201 Statics or higher
- ii. One other engineering foundation course, from the following subject codes:

- Chemistry
- E M A 201 Statics, E M A 202 Dynamics, E M A 303 Mechanics of Materials
- PHYSICS 201 General Physics and above
- Statistics, calculus-based
- COMP SCI 200 Programming I, COMP SCI 220 Data Science Programming I, COMP SCI 300 Programming II or above, excluding COMP SCI 304 Peer Collaboration in Computer Sciences (WES-CS)
- Excludes special topics, independent study, seminar, pass/fail, and credit/no credit courses

3. If the math and engineering foundational courses for the degree program are complete, then degree program engineering courses 200 level and above can be taken to complete the Four Foundational Courses requirement. Excludes EPD, InterEGR, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

GPA Requirements:

F. To guarantee progression, Core and Overall GPA requirements must be satisfied as defined by CoE departments for each engineering degree program (major) <https://intranet.engineering.wisc.edu/undergraduate-students/progression/>. All graded UW-Madison courses referenced in 3.E.1. and 3.E.2. above and any departmental engineering courses level 200 or above will be counted in the Core GPA (excludes EPD, InterEGR, special topics, independent study, and seminar courses). All graded UW-Madison courses are counted in the Overall GPA. For one and only one of these core courses that a student has repeated, the more recent of the two grades will be used in the calculation of Core and Overall GPAs. Students are not eligible for guaranteed progression if they have earned a D or F in any course that counts towards the Core GPA without repeating it for a C or higher at UW-Madison, or have been on academic probation at any time.

4. Consideration for Progression

Students who do not meet progression GPAs but have at least a 2.500 Core GPA and meet all other progression requirements will be considered for progression in the selected degree program (major). The consideration process includes review of written statement(s), rigor of completed courses, and grade trends.

5. Extension for First Year Progression Requirements

Students who do not meet the requirements in Regulation 3 or Regulation 4 may be considered for a one semester extension but not beyond their fourth semester. Students granted this type of extension will be considered for progression in the selected degree program (major). The consideration process includes review of written statement(s), rigor of completed courses, and grade trends. Extensions will be evaluated only in cases where it is reasonable during the one semester extension to meet progression GPAs for an engineering program.

6. Placement Continuation for First Year Progression Requirements

Students who will not meet progression requirements due to University of Wisconsin placement and/or assessment tests (math and ESL) will be granted a one semester placement continuation up to their fourth semester if they are making satisfactory progress in a degree program (major). Students who receive a placement continuation and complete the requirements outlined in Regulation 3A-F over the summer term with UW-Madison coursework can be evaluated for guaranteed progression at the end of that summer term.

7. Program Capacity

When the number of applications for progression consideration for a degree program (major) exceeds the capacity of that program, progression will be limited to capacity. Selection of students under consideration for a program operating at capacity will be based on written statement(s), rigor of completed courses, and grade trends.

8. Progression Requirement Completion and Extension Application

Students must submit their request for progression for a degree program (major) or an extension to the Dean's office by the deadline. Deadlines will be posted on the College of Engineering website at <https://intranet.engineering.wisc.edu/undergraduate-students/progression/> and emailed to students in the College of Engineering.

9. Consideration for Interdepartmental Transfer

Students who have previously met progression in a degree program (major) may apply to be considered for interdepartmental transfer to a different engineering program by posted deadlines. Interdepartmental transfer may be competitive and is not guaranteed. Selection is based on the academic record, written statement(s), and program capacity.

REGISTRATION

10. Definition

- A. Full-time student: One carrying a minimum credit load of 12 credits. All students are expected to be full-time unless they have the permission of the Dean to be part-time. A student carrying less than the minimum credit load without the Dean's permission will be placed on part-time warning at the end of the semester.
- B. Part-time student: One who has the Dean's permission to carry less than the minimum credit load (Regulation 11.E.).
- C. Semester: A term of 15 weeks minimum duration.
- D. Session: A term of less than 15 weeks duration (e.g., Summer Session or Intersession).

E. Modular Course: A course that is offered during a semester, but which lasts fewer than 15 weeks.

11. Credit Overload Constraints

- A. Maximum credit load: 20 enrolled credits per semester. Undergraduate full-time range is 12 to 18 credits; see Bursar's Office website for tuition charges outside the full-time range.
- B. Minimum credit load: 12 enrolled credits per semester, or one credit of College of Engineering cooperative education course during a co-op work period.
- C. For sessions there is no minimum credit load; the maximum credit load equals the number of weeks in the session.
- D. A student may carry more than a maximum credit load only with the recommendation of an advisor and with permission from the Dean.
- E. A student who wishes to carry less than a minimum credit load in a specific semester for definitive reasons must request permission from the Dean to become a part-time student. Definitive reasons may include disability, health challenge, necessity of employment, other significant barriers to maintaining a full-time schedule. Part-time permissions must be renewed during the first two weeks of each semester part-time permission is requested.
- F. A student on academic probation is advised to consult with their advisor regarding credit load and course selection.

12. Student Responsibility for Scheduling

Each student is responsible for developing a course plan and registering for courses that will (a) permit satisfactory progress towards degree requirements, (b) avoid class and final exam scheduling conflicts, and (c) avoid an excessively demanding final exam schedule.

13. Access to Courses

Departments may specify courses as open only to students in a specific degree program (major) or to students who have met progression requirements.

14. Transfer of Degree Applicable Credits

Credits from courses taken anywhere other than UW-Madison are only transferable to the College of Engineering if they are transferable to UW-Madison. Credits may count toward degree requirements only if the course was passed with a grade of C (2.0 on a 4.0 scale) or better.

15. Transfer of Grades

Grades for courses taken anywhere other than UW-Madison are not transferable, even if the credits for those courses are transferable.

16. Adding Courses

Students may add full-semester courses only through the first two weeks of classes. The deadline to add a course is specified on the Office of the Registrar's website (Regulation 21).

17. Dropping Courses

Students may drop full-semester courses during the first twelve weeks of classes. Courses dropped after the initial drop deadline are noted on the transcript as DR. The deadlines to drop a course are

specified on the Office of the Registrar's website (Regulations 21 and 24.G.).

18. Course Substitutions

A student may substitute courses that deviate from the requirements of a published curriculum of the College of Engineering upon the recommendation of the student's degree-granting department and with the approval of the college governance committee.

19. Credit/No Credit and Pass/Fail Courses

Credit/no credit describes courses approved for two-level grading. Courses designated as credit/no credit will not be counted in determining the number of pass/fail courses the student may elect.

Pass/fail is an alternative way of being graded in a regularly graded course. A student may change the grading option of a full-semester course to or from pass/fail only during the first four weeks of classes (Regulation 21). Courses graded on a pass/fail basis can only count as free electives. Only students in good standing may elect the pass/fail privilege.

The pass/fail agreement is between the student and the Registrar, and is not revealed to the course instructor. The instructor submits the appropriate letter grade to the Registrar, who converts C or higher grades to S (Satisfactory), D and F grades to U (Unsatisfactory).

20. Audited Courses

A student may audit a course only if the instructor consents. Auditors are expected to attend with a reasonable regularity and to participate in the class, as determined by the instructor. Audited courses carry no degree credit, do not count in determining the minimum number of credits permitted in each term, and are not included in the calculation of the GPA. The only valid grade for audited courses is a grade of S (Satisfactory) or NR (No Report). A student may change to or from credit to audit only during the first four weeks of classes (Regulation 21).

21. Deadlines for Semesters and Sessions

Deadlines for semesters, sessions and modular courses are listed on the Office of the Registrar's website.

PERFORMANCE AND EVALUATION

22. Attendance

Each student is expected to attend all assigned classes during the regular meeting times, and take all of the examinations for those courses at the regularly scheduled times. In the case of course or examination absences excused for a reason acceptable to the course instructor, the student is expected to make up the work within a reasonable time, and may do so without a grade penalty.

23. Grading System

Course grades are reported by letter only; plus and minus grades are not authorized. The following grades are included in computing grade point average (GPA) and point-credit ratio (PCR).

Grade: A (Excellent)
Grade Points Per Credit: 4.0

Grade: AB (Intermediate)
Grade Points Per Credit: 3.5

Grade: B (Good)
Grade Points Per Credit: 3.0

Grade: BC (Intermediate)
Grade Points Per Credit: 2.5

Grade: C (Fair)
Grade Points Per Credit: 2.0

Grade: D (Poor)
Grade Points Per Credit: 1.0

Grade: F (Failure)
Grade Points Per Credit: 0.0

24. Special Purpose Grades

The following ways of reporting course grades are also used and do not affect GPA or PCR:

A. S (Satisfactory) or U (Unsatisfactory) – used to report pass/fail courses (Regulation 19). S is also used in audited courses (Regulation 20).

B. CR (Credit) or N (No Credit) – used to report credit/no credit courses (Regulation 19).

C. NR (No Report) – signifying that no grade has been reported to the Registrar's Office – a temporary grade that must be replaced by an A-F grade; also used for a permanent grade in audited courses (Regulation 20).

D. NW (No Work) – student enrolls in a course and then never attends. This means that instructor has no evidence that student ever attended.

E. I (Incomplete) – a temporary grade; EI is used for an extended incomplete (requires a Dean's action); IN is used to indicate an incomplete in a credit/no credit course. (Regulations 29-31)

F. P (Progress) – a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.

G. DR (Dropped) – indicates the course was dropped after the initial drop deadline noted on the Office of the Registrar's website.

25. Course Grade Changes

The final course grade may be changed only by the instructor of record for the course section, and then only to correct a clerical error in the computation or reporting of the original grade.

26. Grade Point Average (GPA) and Point-Credit Ratio (PCR)

Grade Point Average (GPA) is computed by dividing the total number of grade points earned at UW-Madison by the total number of credits attempted (excluding pass/fail or credit/no credit courses) at UW-Madison. The Point-Credit Ratio (PCR) differs from the grade point average in that it involves only those credits that count toward graduation and the related grade points. When a course is repeated, the credits and grade points earned only for the final attempt are included in the point-credit ratio.

27. Dean's Honor List

At the end of each semester the names of all full-time students in good standing with a 3.5 or higher semester GPA and cumulative GPA of at least 3.0 and no incomplete or unreported grades will be included on the Dean's Honor List. Credit/no credit and pass/

fail courses are not considered in meeting the full-time standing requirement for the Dean's Honor List. Transcript will show a notation of "Dean's Honor List."

28. Repeating Courses

Any course may be repeated at the student's option. In the case of a required course in which the student earned a grade of D and which is a prerequisite to another required course, the student is strongly encouraged (or may be required by degree requirement) to repeat the course. For courses taken more than once, all grades count in the grade point computations, but only the last grade for the course is applied to the student's point-credit ratio.

29. Incomplete Grade

An incomplete may be reported for a student who, because of illness or other unusual and substantiated cause beyond the student's control, has been unable to complete the final examination or some limited amount of work. To be eligible, the student must be earning a passing grade and have a limited amount of work to complete by the end of the term.

30. Resolution of an Incomplete Grade

The student must initiate the request for a grade of incomplete with the instructor before the end of the term. The instructor and student must agree on the coursework to be completed and establish a plan for the student to submit the work. At the instructor's option, incomplete grades must be updated on the student record by the Friday of the eighth week of the following semester. If the incomplete grade is not changed to a final grade by the Friday of the eighth week, the incomplete grade will be changed (lapse) to a grade of F (or N for Credit/No Credit courses).

31. Extended Incomplete Grade

If an incomplete grade cannot be resolved by the deadline, the instructor may extend the time the student has to complete outstanding work by submitting a request to change the Incomplete grade (I) to a grade of Extended Incomplete (EI). The Extended Incomplete grade must be accompanied by a new deadline no later than the last day of instruction for that semester. If the Extended Incomplete grade is not changed to a final grade by the deadline, the grade will be changed (lapse) to a grade of F (or N for Credit/No Credit courses).

32. Final Exam Rescheduling

A student may be permitted to take an examination at other than the regularly scheduled time only with permission of the instructor. Permission will be granted only for illness or other unusual and substantiated cause beyond the student's control. (Regulation 12).

33. Withdrawal

Students may withdraw from the University after consulting with their advisor and with the approval of the Dean. The withdrawal date and a DR notation will be recorded for courses in progress if the student withdraws after the initial deadline to drop a course and before the withdrawal deadline (Regulations 21 and 24.G.). The deadline to withdraw is specified on the Office of the Registrar's website.

A Medical Withdrawal may be granted to students who experience a serious or unexpected physical or behavioral health condition; who may need to provide care to an immediate family member who is experiencing a serious or unexpected physical or behavioral health

condition; or who have experienced the death of an immediate family member. Approval will be granted on a case-by-case basis.

Withdrawals (other than Medical Withdrawals) are not granted after the deadline to withdraw. Grades of Incomplete, if justified (Regulation 29), or F, N, or U will be recorded for students who leave the University during this time.

34. Year Classification

The year classification of a student is determined by the number of credits passed and the number of grade points earned, applicable to the student's degree, as indicated by the following tabulation:

Freshman

Numerical Classification of Year: 1
Minimum Credits Passed: 0
Minimum Grade Points Earned: 0

Sophomore

Numerical Classification of Year: 2
Minimum Credits Passed: 24
Minimum Grade Points Earned: 48

Junior

Numerical Classification of Year: 3
Minimum Credits Passed: 54
Minimum Grade Points Earned: 108

Senior

Numerical Classification of Year: 4
Minimum Credits Passed: 86
Minimum Grade Points Earned: 172

For the purpose of year classification only, pass/fail and credit/no credit courses and courses transferred from another campus are assumed to have earned 2.0 grade points per credit.

35. Good Standing

A student is in good academic standing unless on academic probation or dropped.

36. Part-time Warning

A student is placed on part-time warning when that student has, in the semester just completed, passed fewer than 12 credits without permission from the Dean.

37. Probation

A student is placed on academic probation when that student has, in the semester just completed, attained less than a 2.0 GPA. Once on probation, the student is continued on probation until either removed from probation or dropped (Regulations 38, 39).

38. Removal From Probation

The following requirements must be satisfied for the removal of a student from academic probation (Regulation 37):

- A. A cumulative GPA of at least 2.0;
- B. A GPA of at least 2.0 for the semester just completed.

39. Drop

- A. A student on academic probation will be dropped at the end of any semester for which that student has attained a GPA of less than 2.0 or has passed fewer than half of the credits attempted (Regulation 37).

B. A student not on academic probation will be dropped at the end of any semester for which that student has passed fewer than half of the credits attempted.

40. Readmission from Dropped Status

A student who has been dropped for academic reasons may be readmitted by the Dean only after the student has been out of the College of Engineering for at least one semester. A student readmitted from dropped status is readmitted on academic probation.

41. Session Actions

No academic actions (part-time warning, probation, drop, removed from probation) will be taken at the end of sessions (Regulation 10.D.).

42. Graduation

It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all the following graduation requirements have been met:

A. Have fulfilled the published graduation requirements of that curriculum, with all substitutions formally approved, and have achieved a minimum 2.0 GPA overall.

B. Have a PCR (Regulation 26) of at least 2.0 for those semesters and sessions containing the last 60 credits taken at UW-Madison or for all credits taken at UW-Madison if fewer than 60.

C. Have a departmental PCR of at least 2.0 for all courses taken in the degree-granting department that count toward graduation.

D. Have completed at least 30 credits in residence in the College of Engineering, including 15 credits of work in the degree-granting department. Students in the Engineering Physics BS program are not required to complete 15 credits in the degree-granting department.

E. Have completed the last two semesters in residence in the College of Engineering. Cannot be on co-op or study abroad in the last semester. Students may seek permission from the Dean to be on co-op or study abroad in their second to last semester.

F. Have completed the last semester in the College of Engineering enrolled in courses required for their engineering degree.

G. Have a GPA of at least 2.0, both for the last semester and also for the combined last two semesters.

43. Graduation with Distinction and Highest Distinction

Students who have earned at least 60 credits on the University of Wisconsin-Madison campus and whose total cumulative GPA is in the top 5 percent of the College graduating class will receive the designation "Graduated with Highest Distinction," or if in the next 15 percent, "Graduated with Distinction." The appropriate designation is entered as a permanent record on the student's transcript.

APPEAL

44. Appeal

The Dean of the College of Engineering has the authority to suspend or modify the operation of these regulations if their enforcement is judged to cause an injustice to the student.

POLICIES

ACCREDITATION

Biomedical Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Bioengineering and Biomedical and Similarly Named Engineering Programs.

Civil Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Civil and Similarly Named Engineering Programs.

Chemical Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Chemical, Biochemical, Biomolecular, and Similarly Named Engineering Programs.

Computer Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Electrical, Computer, Communication, Telecommunication(s), and Similarly Named Engineering Programs.

Electric Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Electrical, Computer, Communication, Telecommunication(s), and Similarly Named Engineering Programs.

Engineering Mechanics BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Engineering Mechanics and Similarly Named Engineering Programs.

Environmental Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Environmental and Similarly Named Engineering Programs.

Geological Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Geological and Similarly Named Engineering Programs.

Industrial Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Industrial and Similarly Named Engineering Programs.

Material Science and Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program

Criteria for Materials (1), Metallurgical (2), Ceramics (3), and Similarly Named Engineering Programs.

Mechanical Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Mechanical and Similarly Named Engineering Programs.

Nuclear Engineering BS is accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>) under the commission's General Criteria and Program Criteria for Nuclear, Radiological, and Similarly Named Engineering Programs.

- Aligning and/or managing expectations
- Understanding university, college, and department policies and procedures

Grievance Resolution Procedure

1. If you are comfortable doing so, attempt to resolve the issue directly with the individual involved.
2. If that approach is not feasible or provides unsatisfactory results, and the grievance involves a teaching assistant (TA), consult the professor in charge of the course.
3. If necessary, discuss the grievance with the appropriate department chair.
4. The next level involves the academic dean. Students should contact the Associate Dean for Academic Affairs, engracademicdean@engr.wisc.edu, 608-262-3484.
5. All students have the right to appeal to the Grainger Dean of the College of Engineering, engr-dean@engr.wisc.edu, 608-262-3482, if they feel their case has not been justly handled by another dean.
6. Only a few grievances are really serious and difficult to resolve. In these instances, the dean seeks a solution that, as best as can be determined, is appropriate, just, legal, and in the best interests of all concerned.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

ADDITIONAL MAJOR

Engineering students may earn an additional major and have the additional major noted on their transcript at the time of graduation. This includes most majors in the College of Letters & Science as well as Health Promotion and Health Equity (HPHE), Education Studies, and Theatre & Drama in the School of Education; and Global Health in the College of Agricultural and Life Sciences. To qualify, the student must have approval in advance from both the department offering the major and the academic dean of the College of Engineering. Students must satisfy all requirements for their declared additional major prior to or concurrently with the engineering degree. For further details, contact the College of Engineering Dean's Office, 2640 Engineering Hall.

Adding additional majors from colleges other than the College of Letters & Science and majors not approved in the College of Agricultural & Life Sciences and the School of Education is not accepted. For example, majors such as art (School of Education) and forestry (College of Agricultural and Life Sciences) cannot be completed in conjunction with an engineering degree. Likewise, students cannot pursue more than one undergraduate engineering degree concurrently.

Authority Limits on Grades

There are areas in which the dean does not have authority to override an instructor, such as determination of a student's grade. However, it has happened that the department chair has intervened, for example, by having a grade determined by committee rather than by the course instructor.

Grievance Examples

Examples of academic grievances and complaints include, but are not limited to, grade disputes, disputes/concerns with faculty/instructor, and course concerns. The following is a sample list of student grievances that have occurred:

- Discrimination based on sex, religion, or political views
- Course or exam grade disputes
- Required class or examination attendance at other than regularly scheduled (timetable) times
- Changes in course content contrary to Guide course description
- Difficulty in obtaining space in a critical course
- Difficulty obtaining an appointment with instructor
- Unwillingness of instructor to provide graded feedback before the course drop deadline date
- Teaching above the level of the class, which includes the assumption of an unlisted course prerequisite
- Excessive instructor class absences
- Rescheduled final exams by majority approval or apparent unanimity, to possible disadvantage of the minority

STUDENT GRIEVANCES

The College of Engineering Dean's Office – Academic Affairs serves as the primary point of contact for students who have complaints or concerns. Students are encouraged to attempt to resolve the issue directly with the individual involved as a first step. Consultation with the Dean's Office (engracademicdean@engr.wisc.edu, 2640 Engineering Hall, 608-262-3484) provides the opportunity to work with an assistant dean to address questions and/or concerns in any of the following areas:

- Navigating conflicts and challenging conversations with peers and/or faculty

Sexual Misconduct Resource and Response Program

The university is committed to creating and maintaining a campus community that is free from sexual harassment and sexual violence. The Sexual Misconduct Resource and Response Program (formerly called the Title IX Program) is overseen by the Title IX Coordinator. They receive reports of sexual harassment and sexual violence – including sexual assault, dating/domestic violence, stalking, and

sexual exploitation – and coordinate the University’s response (<https://compliance.wisc.edu/titleix/>). Students are encouraged to review available resources and additional information on this site.

REQUIREMENTS

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

ENGINEERING CURRICULA

The graduation requirements for each of the engineering degrees are presented in the form of four-year programs of study. These four-year schedules are available, but rarely followed without deviation. Some students can proceed more rapidly; many must proceed more slowly and take nine or more semesters to complete the degree. Flexibility in course selection is also present though elective categories within curricula.

All engineering curricula are designed to meet all criteria for accreditation by the Engineering Accreditation Commission of ABET, www.abet.org (<http://www.abet.org/>). Among other criteria, ABET requires that students complete:

- A minimum of 30 semester credit hours (or equivalent) of a combination of college-level mathematics and basic sciences with experimental experience appropriate to the program.
- A minimum of 45 semester credit hours (or equivalent) of engineering topics appropriate to the program, consisting of engineering and computer sciences and engineering design, and utilizing modern engineering tools.
- A broad education component that complements the technical content of the curriculum and is consistent with the program educational objectives.

- A culminating major engineering design experience that 1) incorporates appropriate engineering standards and multiple constraints, and 2) is based on the knowledge and skills acquired in earlier course work.

Engineering curricula continuously evolve. The requirements that apply to a particular student are determined by the date (catalog year) that a student enters a degree-granting program. At that point, the curriculum becomes fixed throughout the period it takes for a student to complete the degree, although new changes that benefit a student can be adopted by a particular student if they choose.

The curricular descriptions below do not address how these requirements are satisfied; students seldom need to be concerned with these details. However, if deviations from a curriculum are requested, they must not violate any of the accreditation requirements.

DEVIATION FROM PRESCRIBED CURRICULA

Circumstances deemed acceptable for deviating from the outlined engineering curricula are included in each departmental description. The choice of courses to fulfill elective credit requirements provides students with considerable flexibility in their programs. In addition, some departments permit the substitution of elective courses for required ones and also offer outstanding undergraduate students the opportunity to enroll in graduate courses. These options aid the student in tailoring a course of study to meet personal goals more closely.

DEFINITION OF ELECTIVES

There are general types of elective courses including technical electives, liberal studies and free electives.

Technical electives are limited to courses in engineering and closely related fields.

Liberal studies electives are those courses that are classified as either humanities, literature, social studies or as foreign language.

Free electives are courses completely free of any restrictions or requirements other than the course prerequisites.

Other specific elective requirements are established and described in department curricula.

To assist the student in gaining a better understanding of individuals and societies, and to reduce problems of transferring from one curriculum to another, engineering curricula require adherence to the Liberal Studies Guidelines (see below). Some require slight variations from those guidelines.

INDEPENDENT STUDY

Students who have high grade point averages may satisfy some elective credits by independent study of subjects or problems suitable for analytical investigative work. The student must identify a professor who is willing to supervise study of interest to the student. Together they must agree upon the work to be done, the credits earned (usually 1-3), and the course number (199, 299, 399, 499, 599, or 699) for which the student is to enroll before the beginning of a semester. Weekly meetings with the professor to discuss questions and report progress are customary.

LIBERAL STUDIES GUIDELINES

The College of Engineering requires one semester’s worth of liberal elective courses in humanities, literature and social science for graduation.

The college specifies that students should obtain both **breadth** (i.e., both social science *and* literature or humanities), and **depth** (i.e., more than one course in the same subject area).

The college has established general liberal elective guidelines that have been adopted by all departments, some of which have additional stipulations (see below).

FOR ALL ENGINEERING STUDENTS

As a graduation requirement, and to fulfill campus general education guidelines, all engineering undergraduate students must take 15 or 16 credits of liberal electives. These credits must fulfill the following subrequirements.

1. A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectarea/>) (the description before the course number). At least one of these two courses must be above the elementary level (i.e., must have I or A level designator), as indicated in Guide (<https://guide.wisc.edu/courses/>).
2. A minimum of 6 credits designated as humanities or literature, and an additional minimum of 3 credits designated as social science. Foreign language courses count as humanities credits.¹
3. At least one course of at least 3 credits designated as ethnic studies (lower case "e" in the Course Guide). These credits may help satisfy subrequirements 1 or 2 as well, but they count only once toward the total required credits.

¹ **Exception:** "Retrocredits," which are credits awarded by world language departments for successful completion of a higher level course, do not count toward this subrequirement, nor toward the total credits required (15 or 16). They are still helpful: If a student completes one foreign language course at the intermediate level and is awarded retrocredits, then subrequirement 1 above is satisfied because the student is judged to have achieved "depth" in liberal studies.

ADDITIONAL RESTRICTIONS/ SUBREQUIREMENTS FOR SPECIFIC DEPARTMENTS

Civil Engineering: An economics course (from an approved list) and an environmental studies course (with approved characteristics) are required.

Environmental Engineering: An economics course (from an approved list) and an environmental studies course (with approved characteristics) are required.

Industrial Engineering: ECON 101 Principles of Microeconomics or ECON 111 Principles of Economics-Accelerated Treatment is required.

RESOURCES

RESOURCES

Engineering students are part of the engineering community, succeed academically, get involved and connected, develop their careers, take care of their physical and mental wellness, and more. The College of Engineering offers services specifically for engineering students, in addition to the services offered campus-wide.

ACADEMIC ADVISING

Every College of Engineering undergraduate student is assigned an academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) who is there to support and coach them throughout their college experience, from their transition to campus all the way to graduation.

Advisors guide students through the structured engineering curricula, helping them select courses each semester and stay on track with their academic plan.

Whether students are facing personal or academic challenges, or setting short- and long-term academic goals, their academic advisor is the best place to start. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students connect with these opportunities. Advisors also help reduce barriers to accessing campus resources, empowering students to pursue their goals and make the most of their college experience.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu/>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment. ECS also provides programs designed to help students develop career skills, build engineering experiences, and explore majors and career paths with an engineering degree.

ECS offers two large career fairs per year, assists students with resume building, developing networking and interviewing skills, and negotiation offers. Advisors meet one-on-one with students in addition to supporting group-learning through workshops.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit <https://ecs.wisc.edu> (<https://ecs.wisc.edu/>).

ENGINEERING STUDENT CENTER

The Engineering Student Center promotes student engagement and enriches the engineering student experience by fostering a culture of belonging and helping students make meaningful connections within the campus community. The Student Center is a resource hub and offers a welcoming space where engineering students can study, reflect, connect with peers, and engage with people from all backgrounds.

The Student Center offers academic and social programs, and cultivates a campus environment that is supportive of every student. The Student Center hosts a monthly engineering student community meeting that provides opportunities for mentorship, and activities designed to enhance your academic, personal, and professional success.

The Student Center is home to engineering student organizations, two undergraduate scholarship programs, and our first-year engagement program, BE Engaged.

Student Organizations

Outside the classroom, there are endless ways to get involved on a big campus like UW-Madison. Getting involved in a student

organization is a great way to explore different majors and careers, meet other students and find community, serve others, develop your leadership skills, and to learn by doing. UW–Madison has more than 1,000 student organizations and 60 of these are engineering specific. Organizations range from major-related groups to identity-based clubs to competition teams. Learn more here: <https://engineering.wisc.edu/student-life/student-organizations/>.

BE (Badger Engineers) Engaged

Classes, homework, and studying are just the beginning of what you'll need to have a great experience as a Badger Engineer. As a student, getting involved, connected, and engaged are as important to your university experience as your courses. Here in the College of Engineering, you have access to a wide variety of groups, opportunities, organizations and services that will help you build a foundation for your success as a student.

With so many ways to get involved, it can be overwhelming to know where to start. The BE Engaged program is designed to help you navigate the many opportunities available in the College of Engineering. BE Engaged not only highlights key involvement opportunities but also offers signature events and activities specifically for first-year students, providing ways to build connections beyond the classroom.

UNDERGRADUATE LEARNING CENTER

The Undergraduate Learning Center (<https://engineering.wisc.edu/student-services/undergraduate-learning-center/>) (ULC) provides tutoring and academic support programs for engineering undergraduates. It is a place where students can study, form study groups, and discuss engineering concepts and problem-solving strategies – not only with tutors but with other engineering students. The ULC provides services that are designed to fit how each student studies best.

Drop-In-Tutoring Sessions

Drop-in tutoring sessions are offered for over 60 courses in mathematics, chemistry, physics, statistics, computer sciences, and engineering. The sessions provide help with homework problems, concept review, and exam preparation. Drop-in tutoring sessions are offered each evening from Sunday to Thursday during most weeks in the fall and spring semesters.

PrEPS (Practicing Engineering Problem Solving) Labs

PrEPS is an academic support program that helps students succeed in challenging foundational courses, including statics, dynamics, physics, calculus and general chemistry. The twice-per-week PrEPS labs are led by undergraduate students who have excelled in these courses. Students work in small groups with their PrEPS facilitator, who guides the sessions helping students practice strategies for improving their problem-solving skills and mastering concepts covered in lectures. PrEPS helps facilitate student learning by working through course material in a low-stakes setting and provides the opportunity to complete problems similar to those in homework sets and on exams..

Tutoring by Request

Tutoring by Request (TBR) offers one-on-one tutoring for students in critical need including transfer students, returning adult students, those with McBurney support or other barriers to learning in a traditional setting.

Badger Engineering Start (BEST) Program

BEST is an early-start summer program to help first-year engineering students who place into precalculus. The program

provides a space for students to develop a community of learners, get to know campus, learn about campus resources, and review foundational math concepts. At the end of the early start part of the program student retake the math placement test. Regardless of their placement the BEST students receive ongoing academic and community support throughout their first year.

Find more ULC programs here: <https://engineering.wisc.edu/student-services/undergraduate-learning-center/>

ENGINEERING WELLNESS

The College of Engineering partners with University Health Services to offer targeted mental health and wellness resources to engineering students. The College has an embedded mental health provider just for engineering students. This person hosts drop-in counseling consultations, connects students to other resources as needed, and provides information about opportunities and resources that benefit engineering students and their well-being.

University Health Services' mental health (<https://www.uhs.wisc.edu/mental-health/>) providers understand the complexities of student life and offer an open, safe, and confidential environment to help students through issues that may interfere with their development, well-being, and academic productivity.

UHS's no-cost mental health services include individual, couple/partner, group counseling, outreach programming, and stress management. They also offer 24/7 crisis services at 608-265-5600 (option 9). Psychiatry services are also available for medication management.

University Health Services/Mental Health Services
333 East Campus Mall
Madison, WI 53715-1384
608-265-5600

ENGINEERING SCHOLARSHIPS

The College of Engineering recognizes the accomplishments of incoming and enrolled students by supporting their education through a variety of scholarships at the college and departmental level. Each year the College of Engineering awards over \$2 million in scholarships.

Incoming Freshman Awards:

Selection for an Engineering Freshman Award is based on students' UW admissions application materials; no additional application is required. Students are strongly encouraged to submit a Free Application for Federal Student Aid (FAFSA®), but it is not required. After applying to UW–Madison, applicants are also encouraged to visit the Wisconsin Scholarship Hub (<https://wisc.academicworks.com/>) (WiSH), which is a full-service database that houses many other scholarship opportunities on campus.

Continuing Student Awards:

Each spring, continuing undergraduate students in the College of Engineering are eligible to apply for college-wide and departmental scholarships. The application period is usually mid-February through mid-April. Typically, students must have progressed in their major by the time of the scholarship disbursement. Students can apply by visiting the Wisconsin Scholarship Hub (<https://wisc.academicworks.com/>) (WiSH).

Off-campus Transfer Awards:

Transfer students admitted to UW–Madison and the College of Engineering in the fall or spring semester will be considered for several Transfer Student Scholarships based on students' UW admissions application materials; no additional application is required. Students are strongly encouraged to submit a Free Application for Federal Student Aid (FAFSA®) to UW–Madison but it is not required.

Find more about College of Engineering scholarships here: <https://engineering.wisc.edu/admissions/scholarships/>.

STUDY ABROAD

Studying abroad is an exciting way for students to complement and enhance their on-campus learning while earning meaningful credit toward their major and degree requirements. In today's global world, it is also one of the best ways students can acquire global skills, stand out to potential employers, and be more competitive candidates as they enter the job market or seek to further their education.

Engineering students can choose from over 300 UW–Madison study abroad programs, including more than 50 that offer engineering courses. The Major Advising Pages (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/>) are a helpful resource for planning one's time abroad and choosing a program.

For more information about studying abroad including program information, scholarship opportunities, planning, advising and more, please visit: <https://studyabroad.wisc.edu/>.

COMPUTER-AIDED ENGINEERING CENTER

Computer-Aided Engineering (<http://cae.wisc.edu/>) (CAE) provides computing resources, facilities, and services for students, faculty, and staff in the college. The broad range of services and resources include:

- Windows and Linux computer classrooms;
- Open labs which have Windows and Linux workstations;
- Industry-standard engineering software;
- Software and services available on students' personal computers;
- Reliable file storage for coursework; and
- Help-desk services.

For more information, see the CAE website: <http://cae.wisc.edu> (<http://www.cae.wisc.edu/>).

Engineering Honors in Research

Select students in certain degree-granting programs may pursue the Honors in Research distinction. It requires completion of a certain number of semesters of faculty-guided independent study work and completion of a written thesis. Honors in Research programs have been developed for majors in biomedical engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, engineering mechanics, environmental engineering, geological engineering, industrial engineering, materials science and engineering, mechanical engineering, and nuclear engineering. Interested students should contact their department for more information.

Engineering Honors in the Liberal Arts (EHLA)

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters & Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (<https://docs.google.com/forms/d/1FAIpQLSfgNM66tru6Y69xxCmjN5ea34avL0Ogc73t8crCdQoSoLW3gw/viewform/>) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu (<https://guide.wisc.edu/undergraduate/engineering/greenberg2@wisc.edu>) with questions.

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of Honors courses: 6 credits in humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "I" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters & Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

BIOMEDICAL ENGINEERING

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses,

HONORS

HONORS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates – not just a few – excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, in the medical profession, and in academia.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Biology in Engineering for Engineering Majors, Certificate (p. 258)
- Biomedical Engineering, BS (p. 260)

BIOLOGY IN ENGINEERING FOR ENGINEERING MAJORS, CERTIFICATE

The biology in engineering certificate (BEC) is designed for engineering students who want to strengthen their biology backgrounds. It is offered especially to encourage engineering students in traditional disciplines to prepare themselves to understand the special engineering problems in biology, medicine, public health, and environmental health. A student successfully fulfilling the requirements will have the notation "Certificate for Biology in Engineering for Engineering Majors" added to the transcript.

HOW TO GET IN

HOW TO GET IN

The Certificate for Biology in Engineering for Engineering Majors was designed and is administered by a Biology in Engineering Certificate Committee composed of faculty from multiple engineering disciplines. Students normally should begin the program during their sophomore or junior year, but seniors may also apply.

Prerequisites to enter the certificate program:

- Prior admission to an engineering BS degree program (<http://guide.wisc.edu/undergraduate/engineering/#degreesmajorscertificatestext>) or Biological Systems Engineering (<http://guide.wisc.edu/undergraduate/agricultural-life-sciences/biological-systems-engineering/biological-systems-engineering-bs/>) through the College of Agricultural and Life Sciences (<http://guide.wisc.edu/undergraduate/agricultural-life-sciences/>) at the UW-Madison.
- Students pursuing an undergraduate degree at UW-Madison need to have completed at least one intermediate-level (minimum 200-level) engineering course.

Click here (<https://go.wisc.edu/bme-bec-application/>) for certificate application.

REQUIREMENTS

REQUIREMENTS

The certificate requires a minimum of 15 credits.

GENERAL BIOLOGY: 5 CREDITS

Choose one from one of the following options.

Code	Title	Credits
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	5
BIOCORE 383 & BIOCORE 384	Cellular Biology and Cellular Biology Laboratory	5
MICROBIO 101 & MICROBIO 102	General Microbiology and General Microbiology Laboratory	5
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	5
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	5
ZOOLOGY/ BIOLOGY/ BOTANY 152	Introductory Biology	5
ZOOLOGY 153 & BIOLOGY/ ZOOLOGY 102	Introductory Biology and Animal Biology Laboratory	5
ZOOLOGY 153 AND choose 2 additional credits from the advanced biology course list below		5

ADVANCED BIOLOGY: 5 CREDITS MINIMUM

Recommended to choose a lecture/lab combination as outlined below, but any combination of courses is acceptable.

Code	Title	Credits
ANAT&PHY 335	Physiology	5
ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 485 & BIOCORE 486	Principles of Physiology and Principles of Physiology Laboratory	5
BIOCHEM 501	Introduction to Biochemistry	3
BIOCHEM 507	General Biochemistry I	3
BIOCHEM 508	General Biochemistry II	3-4
BIOCHEM 551	Biochemical Methods	4
BIOCORE 587	Biological Interactions	3
GENETICS 466 & GENETICS 545	Principles of Genetics and Genetics Laboratory	5
GENETICS/ MD GENET 662	Cancer Genetics	3
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	5
MICROBIO/ FOOD SCI 324 & MICROBIO/ FOOD SCI 325	Food Microbiology Laboratory and Food Microbiology	5
M M & I 301	Pathogenic Bacteriology	2
M M & I 341	Immunology	3

M M & I/PATH-BIO 528	Immunology	3
M M & I/BIOCHEM 575	Biology of Viruses	2
ZOOLOGY/ENVIR ST 315 & ZOOLOGY 316	Limnology-Conservation of Aquatic Resources and Laboratory for Limnology-Conservation of Aquatic Resources	4-5
ZOOLOGY/ENTOM/M M & I/PATH-BIO 350	Parasitology	3
ZOOLOGY/ANTHRO/BOTANY 410	Evolutionary Biology	3
ZOOLOGY 430	Comparative Anatomy of Vertebrates	5
ZOOLOGY 470 & ZOOLOGY 555	Introduction to Animal Development and Laboratory in Developmental Biology	6
ZOOLOGY/ENVIR ST 510 & ZOOLOGY/ENVIR ST 511	Ecology of Fishes and Ecology of Fishes Lab	5
ZOOLOGY/PSYCH 523	Neurobiology	3
ZOOLOGY 570	Cell Biology	3
ZOOLOGY 611 & ZOOLOGY 612	Comparative and Evolutionary Physiology and Comparative Physiology Laboratory	5

BIOLOGY IN ENGINEERING: 3 CREDITS MINIMUM

Choose from the following courses:

Code	Title	Credits
B M E/M E 414	Orthopaedic Biomechanics - Design of Orthopaedic Implants	3
B M E/M E 415	Biomechanics of Human Movement	3
B M E/PHM SCI 430	Biological Interactions with Materials	3
B M E/E C E 462	Medical Instrumentation	3
B M E/E C E 463	Computers in Medicine	3
B M E/M E 505	Biofluidics	3
B M E 510	Introduction to Tissue Engineering	3
B M E/M E 516	Finite Elements for Biological and Other Soft Materials	3
B M E 520	Stem Cell Bioengineering	3
B M E 545	Engineering Extracellular Matrices	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E/M E 615	Tissue Mechanics	3
B M E/MED PHYS/PHM COL-M/PHYSICS/RADIOL 619	Microscopy of Life	3

BSE 249	Engineering Principles for Biological Systems	3
BSE 349	Quantitative Techniques for Biological Systems	3
BSE 364	Engineering Properties of Food and Biological Materials	3
BSE 365	Measurements and Instrumentation for Biological Systems	3
CBE/B M E 560	Biochemical Engineering	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR 322	Environmental Engineering Processes	3
CIV ENGR/M&ENVTOX/SOIL SCI 631	Toxicants in the Environment: Sources, Distribution, Fate, & Effects	3
COMP SCI/B M I 576	Introduction to Bioinformatics	3

M S & E 553	Nanomaterials & Nanotechnology	3

SEMINAR: 1 CREDIT

Code	Title	Credits
B M E 517	Biology in Engineering Seminar	1

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Develop an understanding of basic biology and a selected area of advanced biology.
2. Develop an understanding of the challenges in biology, medicine, public health, and environmental health that are currently being addressed by engineering research and development.
3. Demonstrate proficiency in the application of engineering principles to solve problems in the field based on biological principles.

BIOMEDICAL ENGINEERING, BS

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses,

therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, in the medical profession, and in academia.

To prepare students for such careers, the 128-credit, four-year BME undergraduate degree emphasizes engineering design; access to cooperatives/internships at local or national medical device manufacturers, hospitals, or laboratories; continuous advising; flexibility in engineering specialization areas; participation in program evaluation and improvement; study-abroad opportunities; and an option to complete a one-year MS degree following the undergraduate program.

The backbone of the BME program is its unique, seven-semester design curriculum. Students take an advising/design project course in their first year and every semester their fourth year (with options to work in industry and/or focus on pre-health requirements). A faculty member advises small teams of students, serving as advisor/consultant/mentor, to guide them through real-world design projects solicited from clients throughout the university, medical profession, industry, and the community. These clients serve as resources for students in their projects, conduct discussions, and expose the students to various aspects of the BME field. Over the course of each semester, teams design, fabricate, and ultimately present a product that meets the needs of the client. This novel approach gives students an exceptionally balanced education by incorporating clinical and biomedical industry experience, thus expanding their network. Overall, the design experiences highlight the very multidisciplinary nature of BME.

Within the program, BME students choose a course of study that emphasizes one of the following four specializations within the field:

1. Bioinstrumentation and medical devices is the application of electronics, measurement principles, and techniques to develop devices used in diagnosis and treatment of disease. Examples include the electrocardiogram, brain-computer interface, implantable electrodes, sensors, tumor ablation, and other medical devices. Neuroengineering, a subfield, involves using engineering technology to study the function of neural systems and the development of implantable technology for neuroprosthetic and rehabilitation applications.
2. Biomedical imaging and optics involves the design and enhancement of systems for noninvasive anatomical, cellular, and molecular imaging. In addition to common imaging techniques such as magnetic resonance imaging (MRI), computed tomography (CT), and positron emission tomography (PET), biomedical imaging includes topics such as biophotonics, optics, and multimode imaging, and is now expanding to serve functional and therapeutic purposes as well. Advanced capabilities result when fundamentals of engineering, physics, and computer science are applied in conjunction with the expertise of clinical collaborators.
3. Biomechanics applies engineering mechanics for understanding biological processes and for solving medical problems at systemic, organ, tissue, cellular, and molecular levels. This includes the mechanics of connective tissues (ligament tendon, cartilage, and bone) as well as orthopedic devices (fracture fixation hardware and joint prostheses), vascular remodeling, muscle mechanics with injury and healing, human motor control, neuromuscular adaptation (with age, injury, and disease), microfluidics for cellular applications, cellular motility and adhesion, and rehabilitation engineering.
4. Biomaterials, cellular and tissue engineering involves the characterization and use of structural materials, derived from synthetic or natural sources, to design medical products that safely interact with tissues for therapeutic or diagnostic purposes such as artificial blood

vessels, heart valves, orthopedic joints, and drug delivery vehicles. Tissue engineers understand structure–function relationships in normal and pathological tissues to engineer living tissues and/or biological substitutes to restore, maintain, or improve function. At the cellular and molecular level this includes the study or manipulation of biological processes such as the cell's differentiation, proliferation, growth, migration, apoptosis, and can involve genetic and stem cell engineering.

Although the various disciplines within BME can be separately defined, solving a biomedical program requires an overall understanding of the field. For example, the design of an artificial hip requires an understanding of the forces and biomechanics of human movement as well as the mechanical and material properties of the prosthetic device. The material choice and topography play a critical role in cellular and tissue integration, which ultimately leads to long-term stability of the implant. In addition, biomedical imaging techniques are required to characterize the morphology of the diseased hip and the success of the procedure. Finally, instrumentation devices are utilized during the hip replacement surgery.

Students choose the biomedical engineering field to be of service to people; for the excitement of working with living systems; and to apply advanced technology to the complex problems of medical care. Students in the BME program can expect to develop skills in innovative thinking, critical analysis of ethics, project management, and technical writing, all in an environment that cultivates creativity, teamwork, and curiosity. With many possible focuses within the major, BME students have the opportunity to explore and cultivate their interests in specific topics while applying the concepts of engineering to medical applications, hands-on projects, and cutting-edge research.

Students successfully completing the BS degree in BME with an overall GPA of 3.0 or a GPA of 3.25 for the last 60 credits of the BS program are eligible to apply for the one-year MS degree.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic

record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
Mathematics		19
Science		32
General Education		21
Free Electives		4
<i>Engineering Courses:</i>		
Introduction to Engineering		3
Engineering Mechanics Core Courses		6
Biomedical Engineering Core Courses		23
Biomedical Engineering Area Technical Electives AND Advanced Biomedical Engineering Technical Elective		18
Engineering Technical Elective		2
Total Credits		128

MATHEMATICS

Code	Title	Credits
MATH 221 & MATH 222 & MATH 234	Calculus and Analytic Geometry I and Calculus and Analytic Geometry 2 and Calculus--Functions of Several Variables	13
MATH 320 or MATH 319	Linear Algebra and Differential Equations Techniques in Ordinary Differential Equations	3
B M E 325 or STAT 324 or STAT/ MATH 431	Applied Statistics for Biomedical Engineers Introduction to Statistics for Science and Engineering Introduction to the Theory of Probability	3
Total Credits		19

SCIENCE

Code	Title	Credits
COMP SCI 220 or COMP SCI 200 or COMP SCI 300	Data Science Programming I Programming I Programming II	3-4
PHYSICS 202 or PHYSICS 208	General Physics General Physics	5

General Chemistry – select one option: 5-9

CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 343	Organic Chemistry I	3

Biology – select one option: 5-6

ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	

BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	
---------------------------	---	--

Human Physiology/Systems Biology – select one option: 5

ANAT&PHY 335	Physiology	
BIOCORE 485 & BIOCORE 486	Principles of Physiology and Principles of Physiology Laboratory	

Advanced Biology/Life Science elective – select one option: 3

ANAT&PHY 337	Human Anatomy	
BIOCORE 587	Biological Interactions	
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507	General Biochemistry I	
BIOCHEM 508	General Biochemistry II	
BIOCHEM/ M M & I 575	Biology of Viruses	
GENETICS 466	Principles of Genetics	
ZOOLOGY 470	Introduction to Animal Development	

ZOOLOGY/ PSYCH 523	Neurobiology	
ZOOLOGY 570	Cell Biology	

Science Elective – select one option: 3

ANAT&PHY 337	Human Anatomy	
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507	General Biochemistry I	
BIOCHEM 508	General Biochemistry II	
BIOCHEM/ M M & I 575	Biology of Viruses	
CHEM 327	Fundamentals of Analytical Science	
CHEM 329	Fundamentals of Analytical Science	
CHEM 345	Organic Chemistry II	
CRB 640	Fundamentals of Stem Cell and Regenerative Biology	

CRB 650	Molecular and Cellular Organogenesis	
---------	--------------------------------------	--

CRB/B M E 670	Biology of Heart Disease and Regeneration	
---------------	---	--

COMP SCI 300	Programming II	
COMP SCI 320	Data Science Programming II	
COMP SCI 400	Programming III	

GENETICS 466	Principles of Genetics	
GENETICS 467	General Genetics I	

GENETICS 468	General Genetics 2
GENETICS 520	Neurogenetics
KINES 531	Neural Control of Movement
MICROBIO 101	General Microbiology
MICROBIO 303	Biology of Microorganisms
M M & I 341	Immunology
M M & I/PATH-BIO 528	Immunology
ZOOLOGY 470	Introduction to Animal Development
ZOOLOGY/PSYCH 523	Neurobiology
ZOOLOGY 570	Cell Biology

Total Credits **32-38**

GENERAL EDUCATION

Code	Title	Credits
------	-------	---------

Communications A

Complete one of the following courses: 3

- LSC 100 Science and Storytelling
- or COM ARTS 100 Introduction to Speech Composition
- or ENGL 100 Introduction to College Composition
- or ESL 118 Academic Writing II

Communications B

Complete one of the following courses: 3

- B M E 301 Biomedical Engineering Design and Communication (if taken Fall 2023 or later)
- ZOOLOGY/BIOLOGY/BOTANY 152
- BIOCORE 384 Cellular Biology Laboratory

At least 15 credits of liberal studies following the College of Engineering guidelines (p. 254) 15

Total Credits **21**

ENGINEERING COURSES

Code	Title	Credits
------	-------	---------

Introduction to Engineering

INTEREGR 170	Design Practicum ¹	3
--------------	-------------------------------	---

Engineering Mechanics Core Courses

E M A 201	Statics ²	3
or PHYSICS 201	General Physics	
or PHYSICS 207	General Physics	

E M A 303	Mechanics of Materials	3
-----------	------------------------	---

B M E Core Courses

B M E 200	Biomedical Engineering Design	2
B M E 201	Biomedical Engineering Design and Fundamentals	3
B M E 300	Biomedical Engineering Design and Leadership	3

Biomedical Engineering Area Technical Electives (see below) AND

One Advanced B M E Technical Elective from any area (see complete list below)	18
---	----

Engineering Technical Elective: Any engineering course(s) from a degree-granting engineering program ³	2
---	---

Total Credits **52**

¹ Students transferring from other engineering majors may count their previous program's introduction to engineering course(s) here (CBE 150 Introduction to Chemical Engineering, E C E 210 Introductory Experience in Electrical Engineering, E C E/COMP SCI 252 Introduction to Computer Engineering, E M A 200 Introduction to Mechanics and Aerospace, G L E 171 Introduction to Geological Engineering, INTEREGR 170 Design Practicum, I SY E 191 The Practice of Industrial Engineering, M E 201 Introduction to Mechanical Engineering, M S & E 260 Materials Experience, and NAV SCI 301 Naval Engineering).

² It is highly recommended that students take E M A 201 Statics instead of PHYSICS 201 General Physics. E M A 201 Statics is a requisite for E M A 303 Mechanics of Materials and thus taking PHYSICS 201/PHYSICS 207 General Physics alone is not recommended.

³ The number of credits in this area can range from 2 or more such that at least 2 credits are met here and 48 engineering credits are met overall. This number of credits depends on how students decide to fulfill various requirements when they enter or progress into program, and if they study abroad. Examples that may add additional credits include (and are not limited to): Taking PHYSICS 201 General Physics instead of E M A 201 Statics may add 3 credits. Transfer students are not required to take INTEREGR 170 Design Practicum, which may add 3 credits. Students who study abroad may miss a design course which may add credit. Regardless of the choices made, all students must have at minimum 48 credits of engineering courses from degree-granting programs.

- InterEGR courses are not included in this category except INTEREGR 170 Design Practicum.
- Only 3 credits of an engineering independent study may count (e.g., B M E 399 Independent Study, B M E 489 Honors in Research, CBE 699 Advanced Independent Studies, etc.) toward the 48 engineering credit count.
- Special topics courses must have prior approval of the B M E Curriculum Committee.

BIOMEDICAL ENGINEERING AREA TECHNICAL ELECTIVE REQUIREMENTS

- Choose area technical electives from one of the following areas below and at least one advanced B M E elective from any area as shown in the complete list below for a total of 18 credits.
- Introduction to engineering courses (CBE 150, E C E 210, E C E/COMP SCI 252, E M A 200, G L E 171, INTEREGR 170, I SY E 191, M E 201, M S & E 260, and NAV SCI 301), seminar courses, and research credits cannot count in these areas. Special topics courses must have prior approval of the BME Curriculum Committee. All courses must be numbered 200 or higher.

Bioinstrumentation and Medical Devices:

Code	Title	Credits
Required Area Elective		
E C E 230	Circuit Analysis	4
Area Electives in Bioinstrumentation		11
Choose from any ECE course, the courses below, and from the advanced BME electives in this area		
M E 445	Mechatronics in Control & Product Realization	3
Advanced B M E Area Technical Electives in Bioinstrumentation and Medical Devices		
B M E/E C E 462	Medical Instrumentation	3
B M E/E C E 463	Computers in Medicine	3
B M E/MED PHYS 535	Introduction to Energy-Tissue Interactions	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E 556	Systems Biology: Mammalian Signaling Networks	3
B M E 603	Special Topics in Bioinstrumentation and Medical Devices	1-3
B M E 640	Medical Devices Ecosystem: The Path to Product	3

Biomedical Imaging and Optics:

Code	Title	Credits
Required Area Elective		
E C E 330	Signals and Systems	3
Area Electives in Biomedical Imaging and Optics		12
Choose from the following and from the advanced BME electives in this area		
E C E 203	Signals, Information, and Computation	3
E C E 204	Data Science & Engineering	3
E C E 331	Introduction to Random Signal Analysis and Statistics	3
E C E 431	Digital Signal Processing	3
E C E/COMP SCI 533	Image Processing	3
B M E/H ONCOL/MED PHYS/PHYSICS 501	Radiation Physics and Dosimetry	3
B M E/MED PHYS 566	Physics of Radiotherapy	3
B M E/MED PHYS 573	Mathematical Methods in Medical Physics	3
B M E/MED PHYS 580	The Physics of Medical Imaging with Ionizing Radiation	4
N E 305	Fundamentals of Nuclear Engineering	3
N E 408	Ionizing Radiation	3
N E 427	Nuclear Instrumentation Laboratory	2
Advanced B M E Area Technical Electives in Biomedical Imaging and Optics		
B M E/MED PHYS 535	Introduction to Energy-Tissue Interactions	3

B M E/MED PHYS 578	Non-Ionizing Diagnostic Imaging	4
B M E 604	Special Topics in Biomedical Imaging and Optics	1-3
B M E/MED PHYS/PHM COL-M/PHYSICS/RADIOL 619	Microscopy of Life	3
B M E 651	Biophotonics Laboratory	3

Biomechanics:

Code	Title	Credits
Required Area Elective		
E M A 202	Dynamics	3
Area Electives in Biomechanics		12
Choose from any E M A or M E course, the courses below, and from the advanced B M E electives in this area		
M S & E 350 or M S & E 351	Introduction to Materials Science Materials Science-Structure and Property Relations in Solids	3
M S & E/CHEM 421	Polymeric Materials	3
CBE 320 or B M E 330	Introductory Transport Phenomena Engineering Principles of Molecules, Cells, and Tissues	4
CBE 324	Transport Phenomena Lab	3

Advanced B M E Area Technical Electives in Biomechanics

B M E/M E 414	Orthopaedic Biomechanics - Design of Orthopaedic Implants	3
B M E/M E 415	Biomechanics of Human Movement	3
B M E/M E 505	Biofluidics	3
B M E/M E 516	Finite Elements for Biological and Other Soft Materials	3
B M E/MED PHYS 535	Introduction to Energy-Tissue Interactions	3
B M E/ISY E 564	Occupational Ergonomics and Biomechanics	3
B M E/M E 605	Special Topics in Biomechanics	1-3
B M E/M E 615	Tissue Mechanics	3
B M E/ISY E 662	Design and Human Disability and Aging	3

Biomaterials, Cellular and Tissue Engineering:

Code	Title	Credits
Required Area Elective		
B M E 330 or CBE 320	Engineering Principles of Molecules, Cells, and Tissues Introductory Transport Phenomena	4
Area Electives in Biomaterials, Cellular and Tissue Engineering		11
Choose from any CBE or M S & E course, the courses below, and from the advanced B M E electives in this area		
M E 417	Transport Phenomena in Polymer Processing	3
M E 418	Engineering Design with Polymers	3
M E/STAT 424	Statistical Experimental Design	3

B M E 511	Tissue Engineering Laboratory	1
Advanced B M E Area Technical Electives in Biomaterials, Cellular and Tissue Engineering		
B M E/M E 505	Biofluidics	3
B M E 510	Introduction to Tissue Engineering	3
B M E/M E 516	Finite Elements for Biological and Other Soft Materials	3
B M E 520	Stem Cell Bioengineering	3
B M E 545	Engineering Extracellular Matrices	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E 556	Systems Biology: Mammalian Signaling Networks	3
B M E/CBE 560	Biochemical Engineering	3
B M E 606	Special Topics in Biomaterials, Cellular and Tissue Engineering	1-3
B M E/M E 615	Tissue Mechanics	3
B M E/MED PHYS/PHMCOL-M/PHYSICS/RADIOL 619	Microscopy of Life	3

One Advanced B M E Technical Elective from any area (complete list) - 1 course:

Code	Title	Credits
Required 1 course		3
B M E/M E 414	Orthopaedic Biomechanics - Design of Orthopaedic Implants	3
B M E/M E 415	Biomechanics of Human Movement	3
B M E/E C E 462	Medical Instrumentation	3
B M E/E C E 463	Computers in Medicine	3
B M E/M E 505	Biofluidics	3
B M E 510	Introduction to Tissue Engineering	3
B M E/M E 516	Finite Elements for Biological and Other Soft Materials	3
B M E 520	Stem Cell Bioengineering	3
B M E/MED PHYS 535	Introduction to Energy-Tissue Interactions	3

B M E/MED PHYS/PHMCOL-M/PHYSICS/RADIOL 619	Microscopy of Life	3
B M E 640	Medical Devices Ecosystem: The Path to Product	3
B M E 651	Biophotonics Laboratory	3
B M E/I S Y E 662	Design and Human Disability and Aging	3

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. For more information about the program and the application form, visit: <https://go.wisc.edu/bme-honors-application> (<https://go.wisc.edu/bme-honors-application/>)

TOTAL DEGREE CREDITS: AT LEAST 128

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Total Credits 128

FOOTNOTES

^{Med} These courses are identified as requirements for most medical schools and are included within the 128 degree credits. Students not wishing to attend medical school may choose any of the listed options. Choosing other options will affect the total number of credits.

Medical schools have varying requirements. Liberal electives, free-general electives, and science electives can often be used to satisfy these. **Check requirements early** and start planning during your first year. For example: science elective and free elective for CHEM 345 and CHEM 344; liberal studies for psychology, sociology, English and writing; advanced life science for biochemistry; engineering technical free elective for research; and one of the recommended biology sequences (noted with Med) taken earlier than shown. A good resource is: <http://prehealth.wisc.edu/>.

¹ INTEREGR 170 Design Practicum is required only for students directly admitted to B M E as freshmen and counts toward the 48 engineering credits. It can be taken in the fall or the spring semester.

² It is highly recommended that students take E M A 201 Statics instead of PHYSICS 201 General Physics. E M A 201 Statics is a requisite for E M A 303 and thus taking PHYSICS 201/PHYSICS 207 General Physics alone is not recommended.

³ It is recommended that students needing additional core course options for progression take computer sciences in the first year. Additionally, STAT 324 Introduction to Statistics for Science and Engineering counts as a science core course. B M E 325 Applied Statistics for Biomedical Engineers is not a science core course, but is preferred. B M E 325 is open to first year students. MATH/STAT 431 Introduction to the Theory of Probability is only recommended for students interested in a math certificate or second major.

⁴ Students who are admitted late to the program and/or students who take part in another experience (such as co-op and/or study abroad), missing B M E 200 Biomedical Engineering Design or B M E 300 Biomedical Engineering Design and Leadership, or students who may

graduate early missing B M E 402 Biomedical Engineering Capstone Design II on a rare approved exception, may substitute for these courses for the semester they are not in the program or at UW-Madison. Students in these situations must still take four of the six BME design courses.

Approved substitutions include: B M E 1 Cooperative Education Program, engineering research credit, or any course numbered 200 or above additional engineering technical elective lab or design experience.

For more information on the unique design sequence see: <http://bmedesign.engr.wisc.edu/about/>.

- ⁵ The three core courses are all required: B M E 310 Bioinstrumentation, B M E 315 Biomechanics, B M E/PHM SCI 430 Biological Interactions with Materials, but they can be taken in any order. It is recommended that students take the one in their track of interest first, or as early as possible.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Bioengineering and Biomedical and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN BIOMEDICAL ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path graduates choose, be it a job, postgraduate education, or volunteer service, be it in engineering or another field, we have for our graduates the following objectives, that they will:

1. continue to exhibit strong skills in problem solving, leadership, teamwork and communication;
2. use these skills to contribute to their communities;
3. make thoughtful, well-informed career choices;
4. demonstrate a continuing commitment to and interest in their own and others' education

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Biomedical Engineering Undergraduate Program website (<https://engineering.wisc.edu/programs/degrees/biomedical-engineering-bs/>). (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

CHEMICAL AND BIOLOGICAL ENGINEERING

As a chemical engineering major, you will be part of a vibrant community of engineers in the Department of Chemical and Biological Engineering (<https://engineering.wisc.edu/departments/chemical-biological-engineering/>) and join a network of alumni who are shaping the modern chemical economy and creating positive impact in our society. Capitalize on advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment.

While chemical engineering is a demanding field, you will find having a degree in chemical engineering from UW-Madison will open doors to many exciting career paths and prepare you for a wide range of career opportunities, including:

- Pharmaceuticals
- Personal/beauty care products
- Food processing
- Public health
- Energy and materials
- Air and water quality
- Artificial intelligence

- Manufacturing
- Plastics & materials recycling
- Environmental sustainability

You will also find that UW-Madison chemical engineers are sought by many companies and industries outside the immediate field. You might choose to join the many alumni who have had successful careers at Fortune 500 companies, pursue graduate studies to become a professor, or pursue other career paths beyond engineering such as entrepreneurship, finance, policy, environmental science, healthcare, law, and business administration.

Through our program, you will acquire a rigorous education in the fundamental chemical engineering sciences from our award-winning faculty and outstanding mentors. Develop valuable design and problem-solving skills, discover tools and technologies that professional chemical engineers use every day, and explore topics like:

- Transport phenomena
- Artificial intelligence
- Kinetics
- Thermodynamics
- Catalysis
- Systems engineering
- Chemical process design
- Material sciences
- Biochemical engineering

Most of our courses involve hands-on learning, and you will have ample opportunity to explore our state-of-the-art labs and high-tech makerspace. You will also have additional learning opportunities through internships and cooperative education experiences, and participation in research labs as an undergraduate. In today's landscape, it's also necessary to be a skilled communicator. To prepare you for after graduation, our curriculum places considerable emphasis on building soft-skills through technical report writing, team projects, and formal and informal presentations.

Along with core chemical engineering courses, classes in chemistry, physics, mathematics, and biology are required. In addition, students broaden their understanding of society and how engineering can have a positive impact by taking several courses in the humanities and social sciences.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

For information about scholarships, see Wisconsin Scholarship Hub (<https://wisc.academicworks.com/>).

FACILITIES

Facilities available for instruction and research include:

Biochemical Process Lab
Electrochemistry Lab
Plastics Lab
Process Dynamics and Control Lab
Research Labs
Transport Phenomena Lab
Unit Operations Lab

CHEMICAL ENGINEERING, BS

As a chemical engineering major, you will be part of a vibrant community of engineers in the Department of Chemical and Biological Engineering (<https://engineering.wisc.edu/departments/chemical-biological-engineering/>) and join a network of alumni who are shaping the modern chemical economy and creating positive impact in our society. Capitalize on advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment.

While chemical engineering is a demanding field, you will find having a degree in chemical engineering from UW-Madison will open doors to many exciting career paths and prepare you for a wide range of career opportunities, including:

- Pharmaceuticals
- Personal/beauty care products
- Food processing
- Public health
- Energy and materials
- Air and water quality
- Artificial intelligence
- Manufacturing
- Plastics & materials recycling
- Environmental sustainability

You will also find that UW-Madison chemical engineers are sought by many companies and industries outside the immediate field. You might choose to join the many alumni who have had successful careers at Fortune 500 companies, pursue graduate studies to become a professor, or pursue other career paths beyond engineering such as entrepreneurship, finance, policy, environmental science, healthcare, law, and business administration.

Through our program, you will acquire a rigorous education in the fundamental chemical engineering sciences from our award-winning faculty and outstanding mentors. Develop valuable design and problem-solving skills, discover tools and technologies that professional chemical engineers use every day, and explore topics like:

- Transport phenomena
- Artificial intelligence
- Kinetics
- Thermodynamics
- Catalysis
- Systems engineering
- Chemical process design

- Material sciences
- Biochemical engineering

Most of our courses involve hands-on learning, and you will have ample opportunity to explore our state-of-the-art labs and high-tech makerspace. You will also have additional learning opportunities through internships and cooperative education experiences, and participation in research labs as an undergraduate. In today's landscape, it's also necessary to be a skilled communicator. To prepare you for after graduation, our curriculum places considerable emphasis on building soft-skills through technical report writing, team projects, and formal and informal presentations.

Along with core chemical engineering courses, classes in chemistry, physics, mathematics, and biology are required. In addition, students broaden their understanding of society and how engineering can have a positive impact by taking several courses in the humanities and social sciences.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW-Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of

transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the chemical engineering degree program.

Code	Title	Credits
Mathematics		16
Physics		10
Chemistry		17
Life Science		3
Advanced Science		6
Core Engineering Requirement		52
Professional Breadth		6
Communication Skills		6
Liberal Studies Requirement		16
Total Credits		132

MATHEMATICS REQUIREMENT

The calculus requirement must be met with a minimum of 12 credits to cover the three-course basic math sequence. Any deficiency in total math credits must be made up with electives in science or engineering.

Code	Title	Credits
MATH 221 or MATH 217	Calculus and Analytic Geometry 1 Calculus with Algebra and Trigonometry II	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
Total Credits		16

PHYSICS REQUIREMENT

Credit shortages caused by transfer physics courses at fewer than 6 credits for the required courses must be made up with another physics course.

Code	Title	Credits
PHYSICS 201 or PHYSICS 207	General Physics General Physics	5
PHYSICS 202 or PHYSICS 208	General Physics General Physics	5
Total Credits		10

CHEMISTRY REQUIREMENT

Credit shortages caused by transfer of freshman chemistry courses at fewer than 9 credits must be made up with chemistry, biochemistry, or chemical engineering courses. Students who complete CHEM 115 & CHEM 116 will fulfill CHEM 103 & CHEM 104 and CHEM 329 requirements.

Code	Title	Credits
General Chemistry (choose one)		5-9
CHEM 109	Advanced General Chemistry (preferred)	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 329	Fundamentals of Analytical Science	4

CHEM 343 & CHEM 345 & CHEM 344	Organic Chemistry I and Organic Chemistry II and Introductory Organic Chemistry Laboratory	8
--------------------------------	--	---

Total Credits **17-21**

LIFE SCIENCE

Students who meet the Introductory Biology requirement with an AP exam are encouraged to take an additional advanced science elective.¹

Code	Title	Credits
Introductory Biology requirement (choose one)		3
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	

Total Credits **3**

ADVANCED SCIENCE

Students who meet the Introductory Biology requirement with an AP exam are encouraged to take an additional advanced science elective.¹

Code	Title	Credits
Advanced Science requirement (choose two)		6
BIOCHEM 501	Introduction to Biochemistry (recommended)	
CHEM 562	Physical Chemistry II (recommended)	
BIOCHEM 507	General Biochemistry I	
BIOCHEM 508	General Biochemistry II	
CHEM 511	Advanced Inorganic Chemistry	
CHEM 547	Advanced Organic Chemistry	
CHEM 665	Biophysical Chemistry	
GENETICS 466	Principles of Genetics	
MICROBIO 303	Biology of Microorganisms	
ZOOLOGY 570	Cell Biology	

Total Credits **6**

¹ BIOCORE 381 Evolution, Ecology, and Genetics and BIOCORE 383 Cellular Biology may be used to satisfy the Life Science Requirement and one Advanced Science Elective. Other courses may be substituted by petition.

CORE ENGINEERING REQUIREMENT

Code	Title	Credits
CBE 150	Introduction to Chemical Engineering	1
CBE 250	Process Synthesis (with a grade of C or better)	3
CBE 255	Introduction to Chemical Process Modeling	3
CBE 310	Chemical Process Thermodynamics (with a grade of C or better)	3
CBE 311	Thermodynamics of Mixtures (with a grade of C or better)	3

CBE 320	Introductory Transport Phenomena (with a grade of C or better)	4
CBE 324	Transport Phenomena Lab	3
CBE 326	Momentum and Heat Transfer Operations	3
CBE 355	Statistics for Chemical Engineers	3
CBE 424	Operations and Process Laboratory	5
CBE 426	Mass Transfer Operations	3
CBE 430	Chemical Kinetics and Reactor Design	3
Materials Requirement, select one of the following:		3
CBE 440	Chemical Engineering Materials	
CBE 540	Polymer Science and Technology	
CBE 547	Introduction to Colloid and Interface Science	
CBE 450	Process Design	3
CBE 470	Process Dynamics and Control	3
CBE Electives ²		6
Total Credits		52

² Chemical Engineering electives may be chosen from any of the CBE courses that are not required, numbered 300 or above (excluding seminar courses). A maximum of two credits of co-op work (CBE 1 Cooperative Education Program) may be used to meet the CBE elective requirement. Qualified undergraduates may take graduate-level (600 or 700) courses to fulfill this requirement.

PROFESSIONAL BREADTH

Select 6 credits

Code	Title	Credits
Professional Breadth Credits ³		6
Courses numbered 300 and above from the following College of Engineering departments and programs may be used:		
	Biomedical Engineering	
	Civil and Environmental Engineering	
	Electrical and Computer Engineering	
	Engineering Mechanics and Astronautics	
	Engineering Professional Development	
	Geological Engineering	
	Industrial Engineering	
	Interdisciplinary Courses (Engineering)	
	Materials Science and Engineering ⁴	
	Mechanical Engineering	
	Nuclear Engineering	
	Engineering Physics	
Courses numbered 300 and above from the following departments in the College of Letters and Sciences may be used:		
	Chemistry	
	Computer Sciences	
	Math	
	Physics	
The following courses may also be used:		

ACCT I S 300	Accounting Principles	
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507	General Biochemistry I	
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 383	Cellular Biology	
BSE 364	Engineering Properties of Food and Biological Materials	
BSE/ ENVIR ST 367	Renewable Energy Systems	
ECON/ A A E/ ENVIR ST 343	Environmental Economics	
ENVIR ST/ GEOSCI 411	Energy Resources	
ENVIR ST/ PHILOS 441	Environmental Ethics	
FINANCE/ ECON 300	Introduction to Finance	
FOOD SCI 550	Fermented Foods and Beverages	
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	
GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	
GENETICS 466	Principles of Genetics	
M H R 300	Managing Organizations	
MICROBIO 303	Biology of Microorganisms	
STAT/ M E 424	Statistical Experimental Design	
ZOOLOGY 570	Cell Biology	
Total Credits		6

Students may petition the department to allow other courses related to engineering professional practice. To request that a course not listed above be used, the student should fill out the Professional Breadth Requirement Course Request form available online and submit it to the faculty advisor. The department will then determine if the course can be counted toward the Professional Breadth Requirement. Petitions must be submitted before the beginning of the semester in which the course is to be taken.

³ The objective of this requirement is to provide students with skills to interact with professionals from other disciplines. Suitable courses for this requirement include courses in engineering (excluding CBE) and science, as well as a variety of other disciplines.

⁴ Full degree credit is not allowed if a student takes both CBE 440 Chemical Engineering Materials and M S & E 350 Introduction to Materials Science. In this case M S & E 350 Introduction to Materials Science will be awarded only 1 degree credit.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition ⁵	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
INTEREGR 397	Engineering Communication	3

- ⁵ Some students will be exempt from this requirement based on their placement test scores or advanced placement in English.

LIBERAL STUDIES ELECTIVES

Complete 16 credits of liberal studies requirements (p. 254).

Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following sub-requirements:

1. A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectareas/>) (the description before the course number). At least one of these two courses must be designated as above the elementary level (I, A, or D).
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for sub-requirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy sub-requirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

FREE ELECTIVES

Students fulfilling their course requirements with fewer than 132 credits must take additional free-elective credits to comply with the 132-credit minimum graduation requirement.

COURSE SUBSTITUTION REGULATIONS

1. Any student may, with advisor approval, replace up to 12 credits of required courses in the curriculum, except CBE 424 Operations and Process Laboratory, by an equal number of credits of other courses within the limitations listed under (3) below.
2. Any student who wishes to amend the curriculum by more than 12 credits or wishes to appeal the advisor's decision in (1) or to request exception to (3) below must submit a written request to the chair of the department, who will bring it to the department faculty for consideration.
3. Restrictions on course substitutions are as follows:
 - a. Physics courses may be replaced by science or engineering courses.
 - b. Chemistry/life science courses must be replaced by courses with significant chemistry/life science content.
 - c. Engineering courses must be replaced by engineering courses.
 - d. Lab courses must be replaced by courses with an equal number of hours of lab courses.
 - e. English as a Second Language courses, and MATH 112 College Algebra, MATH 113 Trigonometry, and MATH 114 Precalculus may not be used for course substitutions.

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

The Honors in Research program in Chemical Engineering is designed for students who wish to have a more in-depth research experience and is particularly recommended for students considering enrollment in a

PhD program. To be accepted into the Honors in Research program, students must have completed at least two semesters on the UW-Madison campus with a cumulative GPA of at least 3.5 and should find a faculty mentor. Students register for 1-3 credits of CBE 489 Honors in Research and are expected to complete at least 8 credits of CBE 489 over 2-3 semesters. Students must also write a senior thesis and present the work to a committee of faculty. Students meeting all requirements, and maintaining a cumulative GPA of at least 3.3, will receive the Honors in Research designation upon graduation.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

² CHEM 343 Organic Chemistry I requires a grade of C or better.

ADVISING AND CAREERS

ADVISING AND CAREERS
ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Chemical, Biochemical, Biomolecular, and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN CHEMICAL ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path our graduates may choose, we expect them to be meeting the following objectives at least three to five years after graduation:

1. continue to exhibit strong skills in problem solving, leadership, teamwork, and communication;

2. use these skills to contribute to the various communities, both local and global, within which they work, live, and function;
3. make thoughtful, well-informed career choices; and
4. demonstrate a continuing commitment to and interest in education (their own and others')

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Chemical Engineering Undergraduate Program website (<https://engineering.wisc.edu/programs/degrees/chemical-engineering-bs/>). (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

CIVIL AND ENVIRONMENTAL ENGINEERING

The Department of Civil and Environmental Engineering is home to research and educational programs that help make our environment, society, and communities better places to live, work, and play – engineering for public good. We do this with a commitment to sustainability – meeting the societal, environmental, and financial needs of today without sacrificing the ability to meet these needs for future generations.

In all three of our undergraduate degree programs, you will find high-impact educational experiences that help you prepare for a career in engineering by:

- Using the tools and technology that engineers use every day;
- Building your professional network of engineers and mentors;
- Touring active job sites and facilities;
- Participating in activities led by student organizations, including design competitions like concrete canoe, steel bridge, and others;
- Gaining hands-on experience through an internship or co-op;
- Collaborating with faculty on innovative research;
- Expanding your horizons by studying abroad; and
- Helping local communities and clients with real-world projects through the NCEES award-winning senior capstone design class.

This mix of coursework, field experiences, and hands-on activity opens the path to professional engineering licensure and career opportunities that impact the world around us by:

- Ensuring the health, safety, and welfare of the public and the environment;
- Developing and maintaining our water, earth, and energy resources;
- Creating and operating smart cities and infrastructure systems using "big data;" and
- Working with next-generation materials and systems that reduce construction costs and have fewer impacts on society and the environment.

You can learn more about our community and programs by exploring the menu on the upper right corner of this page.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Architecture, Certificate (p. 274)
- Civil Engineering, BS (p. 276)
- Environmental Engineering, BS (p. 283)
- Geological Engineering, BS (p. 289)

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS FACILITIES

Facilities available include modern and fully equipped laboratories for instruction and research in the following areas:

- Environmental Engineering
- Fluid Mechanics
- Geoengineering
- Hydraulics
- Data Acquisition and Analysis
- Structures and Materials Testing
- Transportation Engineering
- Environmental Chemistry and Technology

ARCHITECTURE, CERTIFICATE

The mission of the Certificate in Architecture is to provide UW–Madison students an opportunity to explore theories and practices of architecture, and the design and meaning of the built environment within socio-political, historical, cultural, and ecological contexts.

The population of the world now exceeds eight billion, half of which live in cities. These numbers will only increase as the century progresses, and the need to understand the issues and challenges in maintaining health, safety, and quality of life in the built environment has never been greater. A collaboration of architects, engineers, interior designers, landscape architects, and urban planners will be needed to apply art and science to address these challenges, using lessons from history to understand contemporary problems.

The certificate requirements create collaborative opportunities for students in engineering, architecture, art history, interior architecture, landscape architecture, and planning. For example, the certificate offers opportunities for engineering students to take courses in art history with students from art history and other majors. Similarly, art history students have opportunities to take courses in engineering, and so on. These cross-college educational opportunities are rare within established curriculum requirements and offer rich experiences for understanding the perspectives, theories, and practices of those in different professions.

At least three of the 15 credits will be taught online as a UW-Madison course number by architecture faculty at the University of Wisconsin-Milwaukee.

HOW TO GET IN

HOW TO GET IN

All undergraduate students in good academic standing are eligible to apply. We encourage students to declare as early as possible in order to plan their required coursework. Students should complete and submit the declaration form (<https://engineering.wisc.edu/programs/certificates/architecture/declaration/>) to declare the certificate. College of Engineering students must meet progression requirements in their selected major before the certificate can be added to their record.

REQUIREMENTS

REQUIREMENTS

- Students must successfully complete at least 15 credits, including 9 credits in courses numbered 300 or higher.
- Students must complete certificate courses with a GPA of 2.000 or higher.
- Courses completed on a pass/fail or credit/no credit basis will not count toward these requirements.

REQUIRED COURSEWORK

Code	Title	Credits
Studio Requirement		
CIV ENGR 151	Architectural Making I	3
Architectural History Course		
Choose one from the following:		3-4
ART HIST 210	A History of the World in 20 Buildings

CIV ENGR 496	Electrical Systems for Construction
CIV ENGR 497	Mechanical Systems for Construction
DS 223	Interior Architectural Design
M E 461	Thermal Systems Modeling

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate knowledge of basic concepts in architecture and related disciplines
2. Employ skills in scale and proportion, composition and form in both 2D and 3D
3. Distinguish and develop a working knowledge of significant developments in architectural thinking across time and in a cross-cultural context
4. Apply critical thinking to ideas and theories in the history of architecture

CIVIL ENGINEERING, BS

Civil engineering shapes our world by supporting the health and safety of the environment and the communities we call home. It's a multidisciplinary career field dedicated to public good by designing, building, operating, and maintaining:

- Buildings, homes, schools, theaters, and stadiums where we live, learn, work, and play
- Highways, streets, and bridges where we walk, bike, and drive
- Systems and infrastructure that guard us from flooding and provide safe water for drinking, swimming, and recreation
- Transportation hubs like airports, railways, and harbors that support the movement of people and goods
- Treatment and emission systems that ensure the safety of the air we breathe
- Systems for recycling, reusing, and disposing of solid and hazardous waste
- Production and transmission systems for conventional and renewable energy sources

As our infrastructure needs evolve and older generations leave the workforce, the demand for civil engineers is on the rise. The U.S. Bureau of Labor and Statistics projects over 21,000 job openings annually in the civil engineering field now through 2032, exceeding the average for other occupations.

At the University of Wisconsin–Madison, we help future engineers prepare for what's ahead with hands-on learning opportunities in well-equipped labs (<https://engineering.wisc.edu/news/vacuum-box-enhances-structures-lab-testing-capacity/>), computer facilities, on-site and field experiences, and our capstone design course (<https://engineering.wisc.edu/blog/cee-capstone-course-wins-7th-ncees-award-for-renewable-energy-project/>).

You'll learn from supportive professors and practicing engineers while using the tools and technology that civil engineers use every day. Working with other students, you'll create solutions to challenges in our natural

and built environments for real-world clients. And as you move forward in the program, you'll be ready for internships and co-ops (<https://engineering.wisc.edu/blog/a-blueprint-for-success-schiesls-journey-from-student-to-alum/>) that add to your education and offer valuable experience before graduation day.

Required civil engineering courses cover the breadth of fundamental knowledge you will need in this career field. Elective courses in facility design or operation help you tailor your studies and explore the latest innovations and methods for integrating sustainability, resilience to climate change, smart infrastructure, and virtual reality into engineering design and operation. There are also a variety of certificate programs that you can pair with your degree, including a Certificate in Architecture (<https://guide.wisc.edu/undergraduate/engineering/civil-environmental-engineering/architecture-certificate/>).

We encourage students to take the Fundamentals of Engineering (FE) exam before or shortly after graduating (<https://engineering.wisc.edu/blog/taking-the-fe-exam-as-an-undergrad/>), which is the first step in professional engineering licensure and its benefits. A pass rate of 95% among our students surpasses the national average of 70%, ensuring our graduates are well-prepared for their careers.

Alumni from our program find jobs with planning and design consulting firms (<https://engineering.wisc.edu/blog/from-student-to-startup-co-founder-olivia-fritz-sets-sights-on-sustainability-engineering/>); architectural firms; construction companies; local, state, and federal agencies (<https://engineering.wisc.edu/blog/anthony-heddlesten-2023-early-career-award-recipient/>); and beyond. Areas of expertise include construction engineering and management, environmental engineering, geological and geotechnical engineering, structural engineering, transportation engineering, and water resources. Common entry-level job titles include civil engineer, field engineer, design engineer, structural engineer, surveyor, and transportation engineer.

VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

MISSION OF BACHELOR OF SCIENCE IN CIVIL ENGINEERING (BSCE) PROGRAM

Create, integrate, and transfer civil engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have

access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the civil engineering degree program.

Code	Title	Credits
	Introduction to Engineering	3
	Mathematics and Statistics	19
	Basic Science	16
	Engineering Mechanics	10
	Civil Engineering Mechanics	6
	Civil Engineering Tools	6
	Civil Engineering Breadth	21
	Civil Engineering Design	10
	Engineering Electives	13
	Communications	8
	Liberal Studies	16
Total Credits		128

INTRODUCTION TO ENGINEERING

Code	Title	Credits
INTEREGR 170	Design Practicum	3
Total Credits		3

MATHEMATICS AND STATISTICS REQUIREMENT

Code	Title	Credits
Mathematics		
MATH 221 or MATH 217	Calculus and Analytic Geometry I Calculus with Algebra and Trigonometry II	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
Statistics		
One of the following options:		3
STAT 324 or I SY E 210	Introduction to Statistics for Science and Engineering Introduction to Industrial Statistics	
STAT 311 & STAT 312	Introduction to Theory and Methods of Mathematical Statistics I and Introduction to Theory and Methods of Mathematical Statistics II	
Advanced Mathematics		
One of the following options:		3
MATH 319	Techniques in Ordinary Differential Equations	
MATH 320	Linear Algebra and Differential Equations	
Total Credits		19

BASIC SCIENCE REQUIREMENT

Code	Title	Credits
One of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
One of the following:		5
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
One of the following:		3
GEOSCI 100	Introductory Geology: How the Earth Works	
GEOSCI/ ENVIR ST 106	Environmental Geology	
One of the following:		3
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BOTANY/ ENVIR ST 260	Introductory Ecology	
MICROBIO 101	General Microbiology	
Total Credits		16-20

ENGINEERING MECHANICS REQUIREMENT

Code	Title	Credits
E M A 201	Statics (with a grade of C or better)	3
E M A 202	Dynamics	3
E M A 303	Mechanics of Materials	3
E M A/M E 307	Mechanics of Materials Lab	1
Total Credits		10

CIVIL ENGINEERING MECHANICS REQUIREMENT

Code	Title	Credits
CIV ENGR 310	Fluid Mechanics	3
CIV ENGR/ E M A 395	Materials for Constructed Facilities	3
Total Credits		6

CIVIL ENGINEERING TOOLS REQUIREMENT

Code	Title	Credits
CIV ENGR 159	Civil Engineering Graphics (was ME 170 before Fall 2023)	2-3
or M E 231	Geometric Modeling for Design and Manufacturing	
CIV ENGR/G L E 291	Problem Solving Using Computer Tools	4
Total Credits		6-7

CIVIL ENGINEERING BREADTH REQUIREMENT

Code	Title	Credits
CIV ENGR 311	Hydrosience	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/ G L E 330	Soil Mechanics	3
CIV ENGR 340	Structural Analysis I	3
CIV ENGR 370	Transportation Engineering	3
CIV ENGR 494	Civil and Environmental Engineering Decision Making	3
CIV ENGR 498	Construction Project Management	3
Total Credits		21

CIVIL ENGINEERING DESIGN REQUIREMENT

Code	Title	Credits
CIV ENGR 578	Senior Capstone Design	4
Every student must take at least one class in at least two of the following CEE disciplines, for a total of 6 credits. One of the two classes MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.		6
<i>Water Resources</i>		
CIV ENGR 414	Hydrologic Design	
<i>Environmental</i>		
CIV ENGR 426	Design of Wastewater Treatment Plants	
CIV ENGR 427	Solid and Hazardous Wastes Engineering	
CIV ENGR 428	Water Treatment Plant Design	

CIV ENGR 522	Hazardous Waste Management
Structural	
CIV ENGR 445	Steel Structures I
CIV ENGR 447	Concrete Structures I
Geological	
CIV ENGR/ G L E 530	Seepage and Slopes
CIV ENGR/ G L E 532	Foundations
Transportation	
CIV ENGR 573	Geometric Design of Transport Facilities
CIV ENGR 574	Traffic Control
CIV ENGR 576	Advanced Pavement Design
Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other classes will count towards the electives requirement (see section below).	
Total Credits	10

ENGINEERING ELECTIVES REQUIREMENT

- Students must take at least 3 credits of coursework from an ABET-accredited degree-granting program outside of the Bachelor of Science in Civil Engineering program. INTEREGR and E P D courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CIV ENGR) do not qualify for meeting this requirement.
- Students must take at least 3 credits of CEE coursework in addition to the civil engineering design requirement. **Note:** Students in the Construction Engineering Management or Environmental Engineering option programs must select from a set of CIV ENGR courses approved for those options.^{1,2,3}
- Students must take at least 7 credits of coursework that meets at least one of the following^{1,2,3}:
 - Any course offered by an engineering department, including but not limited to CIV ENGR.
 - Any Intermediate or Advanced level course with a breadth designation of Biological Sciences, Physical Sciences and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities or Literature.
 - Any of the following business courses: INTEREGR 303 Applied Leadership Competencies in Engineering, ACCT I S 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process

Total Credits: 13

¹ Up to three credits of CIV ENGR 1 Cooperative Education Program may be used towards Item 2 or 3.

² Up to six credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research, and/or CIV ENGR 699 Independent Study) may be used towards Item 2 or 3.

³ CIV ENGR 121 Sustainability Engineering for Non-Engineers, CIV ENGR 150 Introduction to Architectural Theory, CIV ENGR 151 Architectural Making I, CIV ENGR 152 Architectural Making II, CIV ENGR 155 Architectural Thinking, and

CIV ENGR 250 Architectural Visualization cannot be used in Items 2 or 3 above.

COMMUNICATIONS

Code	Title	Credits
Communications A (choose one)		3
ENGL 100	Introduction to College Composition	
LSC 100	Science and Storytelling	
COM ARTS 100	Introduction to Speech Composition	
ESL 118	Academic Writing II	
Speech-Related Course (choose one)		2
INTEREGR 275	Technical Presentations (was EPD 275) ¹	
COM ARTS 181	Elements of Speech-Honors Course	
COM ARTS 262	Argumentation and Debate	
COM ARTS 266	Theory and Practice of Group Discussion	
Writing-Related Course		3
INTEREGR 397	Engineering Communication	
Total Credits		8

¹ INTEREGR 275 Technical Presentations is strongly recommended.

LIBERAL STUDIES REQUIREMENTS

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 254) ¹		16
Requirements specific to Civil Engineering:		
<i>An economics course must be selected from the following list:</i>		
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
<i>A minimum of three credits of environmental studies course that meets the breadth designations of humanities, literature, and/or social science. Courses that also carry breadth designations of Biological Sciences, Natural Sciences, or Physical Sciences will not count towards this requirement.</i>		
Total Credits		16

¹ All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. An economics elective and an environmental studies elective are required.

Note: See a CEE academic advisor for additional information.

HONORS IN RESEARCH

Students in civil engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of **at least** 3.5 may apply to participate in the Honors in Research program. Students may register for 1 to 3 credits per semester. A grade of P (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based

on research progress and the written thesis, if completed). This becomes the grade for all credits taken in CIV ENGR 489 Honors in Research.

A senior thesis worth 3 credits of CIV ENGR 489 is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the Department of Civil and Environmental Engineering office to complete the program.

The designation “Honors in Research” will be recorded on the student’s transcript if the following criteria are met:

- 1. Satisfaction of requirements for an undergraduate degree in Civil Engineering.
- 2. A cumulative grade-point average of at least 3.3.
- 3. Completion of a total of at least 8 credits in CIV ENGR 489.
- 4. Completion of a senior honors thesis with a final grade of B or better.

Students interested in the Honors in Research program should contact their advisor or the BSCE chair for more information. Applications to the program are to be submitted to the BSCE chair with a supporting letter from the student’s academic and thesis advisors. Decisions regarding acceptance are made by the BSCE chair.

NAMED OPTIONS

- CIVIL ENGINEERING: CONSTRUCTION ENGINEERING AND MANAGEMENT (P. 282)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- 2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- 3. an ability to communicate effectively with a range of audiences
- 4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- 5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- 6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- 7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

CERTIFICATION/LICENSURE**CERTIFICATION/LICENSURE**

Licensure as a Professional Engineer is expected of civil engineers. Information on steps needed to obtain licensure is available from the National Council for the Examination of Engineers and Surveyors (NCEES) at <https://ncees.org/engineering/>.

ACCREDITATION**ACCREDITATION**

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Civil and Similarly Named Engineering Programs.

PROGRAM#EDUCATIONAL OBJECTIVES#FOR THE BACHELOR OF SCIENCE IN CIVIL ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path our graduates may choose, we expect them to be meeting the following objectives at least three to five years after graduation:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge; modern tools; design principles; ethical practice; and communication, leadership, and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation and construction of natural and built systems.
4. Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies and tools for engineering analysis, design, and decision making.
5. Serve others through participation in professional and/or civic activities and responsibilities.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Civil Engineering#Undergraduate Program website (<https://engineering.wisc.edu/programs/degrees/civil-engineering-bs/>). (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

CIVIL ENGINEERING: CONSTRUCTION ENGINEERING AND MANAGEMENT

The Department of Civil and Environmental Engineering offers an undergraduate option in Construction Engineering and Management (CEM). Students taking the CEM option will earn an ABET-accredited BS degree in civil engineering. The transcript will indicate that the student has earned a Bachelor of Science–Civil Engineering with option: Construction Engineering and Management.

REQUIREMENTS

REQUIREMENTS

CIVIL ENGINEERING DESIGN REQUIREMENT FOR CEM OPTION

Code	Title	Credits
Choose one:		3
CIV ENGR 445	Steel Structures I	
CIV ENGR 447	Concrete Structures I	
Must take:		
CIV ENGR 578	Senior Capstone Design ¹	4

Total Credits 132

¹ Taking CHEM 103 General Chemistry I/CHEM 104 General Chemistry II instead of CHEM 109 Advanced General Chemistry adds 4 additional credits to degree requirements.

² Liberal studies coursework should add up to 16 credits, including economics elective, environmental studies elective, and ethnic studies.

³ After completing E M A 201 Statics, students may take E M A 202 Dynamics and then E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab, or take E M A 303/E M A/M E 307 and then E M A 202.

⁴ One design course must be CIV ENGR 445 Steel Structures I or CIV ENGR 447 Concrete Structures I, which must be taken before CIV ENGR 578 Senior Capstone Design. CIV ENGR 445 is offered every Fall; CIV ENGR 447 is offered every Spring.

⁵ CIV ENGR 491 Legal Aspects of Engineering is offered every Fall; CIV ENGR 492 Integrated Project Estimating and Scheduling is offered every Spring.

ENVIRONMENTAL ENGINEERING, BS

Environmental engineering is a career path to protecting, restoring, managing, and enhancing the natural world around us and how we interact with it for today's generation and tomorrow's. Professionals in this field design, build, and operate systems and facilities to:

- Treat and distribute safe and reliable drinking water
- Recover materials, nutrients, and energy resources from wastewater and solid waste
- Protect and restore wetlands, streams, lakes, and groundwater
- Allocate water resources for urban, agricultural, and recreational use
- Protect and develop coastal shorelines and stream banks
- Manage stormwater and minimize flood risk
- Reduce, reuse, and recycle waste
- Minimize the creation of and provide treatment for industrial and agricultural waste and air emissions
- Protect us from the impacts of climate change, like rising sea levels and severe weather
- Slow down or reverse climate change by:
 - Using alternative energy sources, like solar, wind, geothermal, and biofuels
 - Recovering carbon and other greenhouse gases from industrial air emissions

Climate change, resource depletion, and older generations leaving the workforce are increasing the need for environmental engineers. With a focus on environmental, economic, and societal health and sustainability, we're guiding the next generation of environmental engineers with hands-on learning opportunities in well-equipped labs (<https://engineering.wisc.edu/news/one-of-a-kind-environmental-engineering-class-overflows-with-real-world-examples/>), computer facilities, on-site and field experiences, and our capstone design course (<https://engineering.wisc.edu/blog/cee-capstone-course-wins-7th-ncees-award-for-renewable-energy-project/>).

As an environmental engineering student, you'll learn how to ethically use engineering to protect, restore, remediate, reduce, and reuse resources on earth and in the air and water. Supportive faculty, staff, and practicing engineers will help you use and understand the tools and technology that environmental engineers use every day. And as you move forward in the program, you'll be ready for internships, co-ops, and undergraduate research opportunities to build your resume.

Required courses in this program cover the core breadth of knowledge you will need as an environmental engineer. Elective courses in facility design or operation are a way to tailor your studies and learn more about sustainability, resilience to climate change, smart infrastructure, and virtual reality in your career field. There are also certificate programs that you can pair with your degree, including two options on environmental sustainability.

Environmental engineering jobs are found in industries ranging from energy to public health; water resources; environmental protection and restoration; and resource recovery, recycling, and waste management. Employers include planning and design consulting firms; architectural firms; construction companies; manufacturers; laboratories; and local, state, and federal agencies. Entry-level job titles include environmental

engineer, field engineer, environmental scientist, natural resource specialist, and hydrologist.

To stay current in the field, lifelong learning and professional licensure are key. Students are encouraged to take the FE exam before graduation or shortly after (<https://engineering.wisc.edu/blog/taking-the-fe-exam-as-an-undergrad/>), which is the first step in professional licensure. A pass rate of 95% among our students surpasses the national average of 70%, ensuring our graduates are well-prepared for their careers.

VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

MISSION OF BACHELOR OF SCIENCE IN ENVIRONMENTAL ENGINEERING (BSENE) PROGRAM

Create, integrate, and transfer environmental engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

HOW TO GET IN

HOW TO GET IN ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the environmental engineering degree program.

Code	Title	Credits
	Introduction to Engineering	3
	Mathematics and Statistics	19
	Basic Science	16
	Engineering Mechanics	9
	Engineering Tools	6
	Fundamental Principles	18
	Advanced Principles and Practices	33
	Communications	8
	Liberal Studies	16
Total Credits		128

INTRODUCTION TO ENGINEERING

Code	Title	Credits
INTEREGR 170	Design Practicum	3
Total Credits		3

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry I	5
or MATH 217	Calculus with Algebra and Trigonometry II	
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 319	Techniques in Ordinary Differential Equations ²	3
or MATH 320	Linear Algebra and Differential Equations	
One of the following:		3-6
STAT 324	Introduction to Statistics for Science and Engineering	
or I SY E 210	Introduction to Industrial Statistics	

STAT 311 & STAT 312	Introduction to Theory and Methods of Mathematical Statistics I and Introduction to Theory and Methods of Mathematical Statistics II
------------------------	--

Total Credits **19-22**

BASIC SCIENCE

Code	Title	Credits
One of the following:		5-9
CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
One of the following:		5
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
One of the following:		3
GEOSCI 100	Introductory Geology: How the Earth Works	
GEOSCI/ ENVIR ST 106	Environmental Geology	
One of the following:		3
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BOTANY/ ENVIR ST 260	Introductory Ecology	
MICROBIO 101	General Microbiology	
Total Credits		16-20

ENGINEERING MECHANICS

Code	Title	Credits
E M A 201	Statics (with a grade of C or better)	3
E M A 202	Dynamics	3
CIV ENGR 310	Fluid Mechanics	3
Total Credits		9

ENGINEERING TOOLS

Code	Title	Credits
CIV ENGR/G L E 291	Problem Solving Using Computer Tools	4
CIV ENGR 159	Civil Engineering Graphics	2-3
or M E 231	Geometric Modeling for Design and Manufacturing	
Total Credits		6-7

FUNDAMENTAL ENVIRONMENTAL ENGINEERING PRINCIPLES

Code	Title	Credits
CIV ENGR 311	Hydroscience	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR 324	Environmental Engineering Thermodynamics	3
CIV ENGR 325	Environmental Engineering Materials	3

CIV ENGR 494	Civil and Environmental Engineering Decision Making	3
CIV ENGR 498	Construction Project Management	3
Total Credits		18

ADVANCED PRINCIPLES AND PRACTICES

Environmental Engineering Experiments

Note: Courses taken to meet this requirement may not be used to meet the environmental engineering breadth requirement.

Code	Title	Credits
One of the following lab courses:		3
CIV ENGR 322	Environmental Engineering Processes	
CIV ENGR 410	Hydraulic Engineering	
BSE 365	Measurements and Instrumentation for Biological Systems	
GEOSCI/ G L E 627	Hydrogeology	
Total Credits		3

Senior Capstone Design

Code	Title	Credits
CIV ENGR 578	Senior Capstone Design ¹	4
Total Credits		4

¹ At least one engineering design course as designated with an asterisk(*) must be completed before taking CIV ENGR 578 Senior Capstone Design.

² MATH 319 Techniques in Ordinary Differential Equations preferred

Environmental Engineering Breadth Electives

Code	Title	Credits
Electives		
At least one class in at least four of the following sub-disciplines. At least two of the courses must be designated as an engineering design course (*) and must be from different sub-disciplines. At least one engineering design course (*) must be taken prior to CIV ENGR 578. If more than one course is taken from a subdiscipline, then the additional course(s) will be counted towards the Technical and Professional Electives Requirement.		12
<i>Environmental Chemistry</i>		
CIV ENGR 500	Water Chemistry	
SOIL SCI 621	Soil and Environmental Chemistry	
<i>Health Hazards and Risk Assessment</i>		
CIV ENGR 422	Elements of Public Health Engineering	
POP HLTH/ ENVIR ST 471	Introduction to Environmental Health	
POP HLTH/ ENVIR ST 502	Air Pollution and Human Health	
<i>Hydraulics</i>		
CIV ENGR 410	Hydraulic Engineering	
CIV ENGR 411	Open Channel Hydraulics	

Surface Water Resources and Hydrology

BSE 473	Water Management Systems
BSE 571	Small Watershed Engineering
CIV ENGR 414	Hydrologic Design *
CIV ENGR 415	Hydrology
<i>Groundwater, Soils, and Sediments</i>	
CIV ENGR 412	Groundwater Hydraulics
GEOSCI/ G L E 627	Hydrogeology

Water and Wastewater

CIV ENGR 426	Design of Wastewater Treatment Plants *
CIV ENGR 428	Water Treatment Plant Design *
CIV ENGR 521	Membrane Science and Technology

Air Quality and Control

CIV ENGR 423	Air Pollution Effects, Measurement and Control
--------------	--

Solid and Hazardous Waste

CIV ENGR 427	Solid and Hazardous Wastes Engineering *
CIV ENGR 522	Hazardous Waste Management *

Energy and Environment

BSE/ ENVIR ST 367	Renewable Energy Systems
CBE 512	Energy Technologies and Sustainability
CIV ENGR/ G L E 421	Environmental Sustainability Engineering
CIV ENGR/ G L E 535	Wind Energy Balance-of-Plant Design *
GEOSCI/ ENVIR ST 411	Energy Resources

Total Credits **12**

Professional Electives

Note: Courses taken to meet this requirement may not be used to meet the environmental engineering breadth requirement.

Select 14 credits of coursework that meets at least one of the following criteria:

- Any engineering course numbered 300 or higher, excluding E P D and INTEREGR. Up to six credits of independent study (e.g. CIV ENGR 699 Independent Study and others) may be counted
- Any intermediate or advanced-level course¹ from atmospheric and oceanic sciences, botany, chemistry, geography, geoscience, mathematics², microbiology, molecular and environmental toxicology, physics, population health sciences, soil science, statistics², or zoology
- Up to three credits of any intermediate or advanced-level course from agricultural and applied economics, economics, general business, management and human resources, or INTEREGR 303 Applied Leadership Competencies in Engineering
- Up to three credits of CIV ENGR I Cooperative Education Program

¹ Courses with social science, humanities, or literature breadth (H, L, S, W, X, Y, Z) cannot be used

² Transfer/test math elective credits for calculus or STAT 301 Introduction to Statistical Methods may not be used to fulfill Professional Electives

COMMUNICATIONS

Code	Title	Credits
Communications A (choose one)		3
ENGL 100	Introduction to College Composition	
LSC 100	Science and Storytelling	
COM ARTS 100	Introduction to Speech Composition	
ESL 118	Academic Writing II	
Speech-Related Course (choose one)		2
INTEREGR 275	Technical Presentations (was EPD 275) ¹	
COM ARTS 181	Elements of Speech-Honors Course	
COM ARTS 262	Argumentation and Debate	
COM ARTS 266	Theory and Practice of Group Discussion	
Writing-Related Course		3
INTEREGR 397	Engineering Communication	
Total Credits		8

¹ INTEREGR 275 Technical Presentations is strongly recommended to satisfy this requirements.

LIBERAL STUDIES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		16
Complete Requirements (p. 254) ¹		
Requirements specific to Environmental Engineering:		
An economics course must be selected from the following list:		
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
A minimum of three credits of environmental studies course that meets the breadth designations of Humanities, Literature, and/or Social Studies. Courses that also carry breadth designations of Biological Sciences, Natural Sciences, or Physical Sciences will not count towards this requirement.		
Total Credits		16

¹ All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. An economics elective and an environmental studies elective are required.
Note: See an environmental engineering advisor for additional information.

HONORS IN RESEARCH

Students in environmental engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of at least 3.5 may apply to participate in the Honors in Research program. Students

may register for 1 to 3 credits per semester. A grade of P (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based on research progress and the written thesis, if completed). This becomes the grade for all credits taken in CIV ENGR 489 Honors in Research.

A senior thesis worth 3 credits of CIV ENGR 489 is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the Department of Civil and Environmental Engineering office to complete the program.

The designation "Honors in Research" will be recorded on the student's transcript if the following criteria are met:

1. Satisfaction of requirements for an undergraduate degree in Environmental Engineering.
2. A cumulative grade-point average of at least 3.3.
3. Completion of a total of at least 8 credits in CIV ENGR 489.
4. Completion of a senior honors thesis with a final grade of B or better.

Students interested in the Honors in Research program should contact their advisor or the BSEnvE chair for more information. Applications to the program are to be submitted to the BSEnvE chair with a supporting letter from the student's academic and thesis advisors. Decisions regarding acceptance are made by the BSEnvE chair.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and

welfare, as well as global, cultural, social, environmental, and economic factors

3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE

Licensure as a Professional Engineer is expected of environmental engineers. Information on steps needed to obtain licensure is available from the National Council for the Examination of Engineers and Surveyors (NCEES) at <https://ncees.org/engineering/>.

ACCREDITATION

ACCREDITATION

Environmental Engineering BS is seeking accreditation from the Engineering Accreditation Commission of ABET (<https://www.abet.org/>).

Application for accreditation was completed in 2024, with an ABET decision forthcoming in August 2025. If accreditation is awarded, it may be retroactively applied to those who graduated in Academic Year 2023-24.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN ENVIRONMENTAL ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path our graduates may choose, we expect them to be meeting the following objectives at least three to five years after graduation:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge; modern tools; design principles; ethical practice; and communication, leadership, and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation and construction of natural and built systems.
4. Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies and tools for engineering analysis, design, and decision making.
5. Serve others through participation in professional and/or civic activities and responsibilities.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Environmental Engineering Undergraduate Program website. (<https://engineering.wisc.edu/programs/degrees/environmental-engineering-bs/>) (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

GEOLOGICAL ENGINEERING, BS

Geological engineering (GLE) brings the fields of geology and engineering to solve challenges in natural and built environments. It offers opportunities to work outdoors; help communities grow, evolve, and respond to climate change; and guide the sustainable use of Earth's natural resources by:

- Solving issues with rock and soils
- Mitigating the risk of floods, landslides, earthquakes, and other natural hazards
- Managing groundwater and surface water to provide safe drinking water
- Designing and building foundation systems, transportation facilities, dams, tunnels, and other critical infrastructure
- Harnessing and storing alternative energy sources like wind, solar, and geothermal
- Creating systems for recycling, reusing, and disposing of solid and hazardous waste
- Remediating contaminated soil and water

Geological engineers are in demand as society adapts to climate change and resource depletion. Professionals in this field help us sustainably overcome the grand challenges we face in meeting our energy, infrastructure, and resource needs.

At the University of Wisconsin–Madison, geological engineering students excel with hands-on opportunities in well-equipped labs (<https://engineering.wisc.edu/blog/gle-spotlight-sydney-kinzing-reflects-on-undergrad-research-and-student-life/>), computer facilities, and field research sites. We study minerals, rocks, soil, and the history of the Earth to understand the natural world and how we can live and work in concert with it.

You will learn from faculty and staff from the College of Engineering and the College of Letters and Science, as well as practicing engineers. You'll use the tools and technology that geological engineers use every day, and you'll apply your knowledge to create multidisciplinary solutions for real-world challenges in our capstone design course (<https://engineering.wisc.edu/blog/cee-capstone-course-wins-7th-ncees-award-for-renewable-energy-project/>).

As a student in our program, you can increase your career potential by earning a dual major in geological engineering and geology and geophysics (<https://guide.wisc.edu/undergraduate/letters-science/geoscience/geology-geophysics-bs/>) in a single 126-credit program, with no extra coursework. There are also a variety of certificate programs that you can pair with your degree, including two options for sustainable energy, to set yourself up for success.

We encourage students to take the Fundamentals of Engineering (FE) exam before or shortly after graduating (<https://engineering.wisc.edu/blog/taking-the-fe-exam-as-an-undergrad/>), which is the first step in professional engineering licensure. Geological engineering students surpasses the national average, ensuring our graduates are well-prepared for their careers.

Geological engineering (<https://www.youtube.com/watch?v=OAadlhKvleI>) alumni from our program find rewarding careers with planning and design consulting firms; the natural resource sector; construction companies; energy developers and providers; and city/county, state, and federal agencies. Typical entry-level position titles include geological engineer, geotechnical engineer (<https://engineering.wisc.edu/blog/geological-engineering-degree-sparks-rewarding-career-for-devin-welch/>), geologist, design engineer, and project engineer.

HOW TO GET IN

HOW TO GET IN ADMISSION TO THE COLLEGE AS A FIRST- YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>)

progression/) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student’s overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

REQUIREMENTS
UNIVERSITY GENERAL
EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Students must complete the College of Engineering Liberal Studies Requirements (<http://guide.wisc.edu/undergraduate/engineering/#requirementstext>).

Students completing the geological engineering degree are also eligible to earn an additional major in geology and geophysics with no additional coursework. Students must contact an advisor to complete the necessary paperwork to declare the additional geology and geophysics major.

The following curriculum applies to students admitted to the geological engineering degree program.

SUMMARY OF REQUIREMENTS		
Code	Title	Credits
	Mathematics	13
	Engineering Principles and Professional Issues	11-14
	Physical Science, Engineering Science, and Geoscience	44
	Required Geological Engineering Courses	19

Total Credits		23

TECHNICAL ELECTIVES (15 CREDITS)

Students must take a minimum 15 credits in the Technical Electives category, of which 5-6 credits must be design-focused (noted as 'D' in the tracks below), including at least one design-focused course taken prior to G L E 479 Geological Engineering Design. If students take G L E/CIV ENGR 430 Introduction to Slope Stability and Earth Retention, G L E/CIV ENGR 432 Introduction to Shallow and Deep Foundation Systems and G L E/CIV ENGR 434 Introduction to Underground Openings Engineering, these combine to count as one design course. Additionally, if students take G L E/CIV ENGR 530 Seepage and Slopes, they can use G L E/CIV ENGR 432 and G L E/CIV ENGR 434 to count as one design credit; or, if students take G L E/CIV ENGR 532 Foundations, they can use G L E/CIV ENGR 430 and G L E/CIV ENGR 434 to count as one design credit.

The technical electives are organized into five tracks, described below. Students may select courses within these tracks to focus coursework in a particular area. However, students may complete the technical electives requirement using courses listed in multiple tracks. Suggested technical electives and associated design-focused credits (noted as 'D' in the tracks below) for each track are included below.

Students may take up to 6 credits of directed research credits as technical electives. In addition, one credit of G L E 1 Cooperative Education Program can be used as technical elective.

Energy, Minerals & Mining

Geological engineers possess knowledge and a skill set that serve society's need to manage extraction of traditional energy and mineral resources in more sustainable and efficient ways, develop renewable energy systems such as solar and wind energy sites, and to lead in new

technologies to limit carbon emissions through geological sequestration or to develop geothermal exchange fields and reservoirs.

Within this track, the 16 credits of liberal studies can be framed to match those of the Energy Institute certificate in Energy Sustainability (<https://guide.wisc.edu/undergraduate/engineering/engineering-physics/engineering-energy-sustainability-certificate/>).

Code	Title	Credits
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE 562	Special Topics in Chemical Engineering (Topic: Energy & Sustainability)	1-3
CIV ENGR/ENVIR ST/ GEOG 377	An Introduction to Geographic Information Systems	4
E M A 405	Practicum in Finite Elements	3
GEOSCI/ENVIR ST 411	Energy Resources	3
GEOSCI 457	Conducted Field Trip	2
GEOSCI 459	Field Geology	6
GEOSCI 515	Principles of Economic Geology	4
G L E 401	Special Topics in Geological Engineering (D) ¹	1-3
G L E/ CIV ENGR 430	Introduction to Slope Stability and Earth Retention (D)	1
G L E/ CIV ENGR 434	Introduction to Underground Openings Engineering (D)	1
G L E/ CIV ENGR 530	Seepage and Slopes (D)	3
G L E/ CIV ENGR 535	Wind Energy Balance-of-Plant Design (D)	3
G L E/GEOSCI 757	Advanced Rock Mechanics	3
G L E 801	Special Topics in Geological Engineering (Topic: Geomechanics)	1-3

¹ Only certain G L E 401 topics count as design courses. Please consult with your academic advisor for details.

Sustainability & Environment

Methods for quantifying the long-term effects of development, natural resource extraction, and environmental damage are often neglected or misapplied in cost-benefit life cycle analysis. This track intends to educate future professionals capable of leading the field in sustainable design and construction. The Sustainability & Environment track focuses on quantification, design, and optimization in relation to the use of natural resources and construction materials/methods as well as minimizing the long-term impacts of these activities.

Code	Title	Credits
BSE/ENVIR ST 367	Renewable Energy Systems	3

¹ Only certain G L E 401 Special Topics in Geological Engineering topics count as design courses. Please consult with your academic advisor for details.

Geohazards

The number of fatalities and the amount of economic loss due to natural and human-driven geohazards continue to increase. These losses may result from various geohazards, such as landslides, flooding, tsunamis, earthquakes, and volcanic eruptions. The Geohazards track aims to provide students with the necessary skills to perform analyses that minimize loss of life and economic costs associated with geohazards.

Code	Title	Credits
CIV ENGR/ENVIR ST/ GEOG 377	An Introduction to Geographic Information Systems	4
CIV ENGR 514	Coastal Engineering (D)	2-3
E M A 405	Practicum in Finite Elements	3
GEOSCI/GEOG 320	Geomorphology	3
GEOSCI/G L E 350	Introduction to Geophysics: The Dynamic Earth	3
GEOSCI 459	Field Geology	6
G L E/ CIV ENGR 430	Introduction to Slope Stability and Earth Retention (D)	1
G L E/ CIV ENGR/ ENVIR ST/ GEOSCI 444	Practical Applications of GPS Surveying	2
G L E/ CIV ENGR 530	Seepage and Slopes (D)	3

Water

Water is an essential resource for humans and ecosystems. Water is also linked to mineral and energy resource production, waste management, and land reclamation. Population growth and climate change are creating increasing challenges to this resource. Development and sustainable management of groundwater and surface water, including prevention and mitigation of water quality problems, require combined expertise in geoscience, hydrology, and water resources engineering offered through the Water track.

Code	Title	Credits
CIV ENGR 311	Hydrosience	3
CIV ENGR 412	Groundwater Hydraulics	3
CIV ENGR 414	Hydrologic Design (D)	3
CIV ENGR 415	Hydrology	3
CIV ENGR 500	Water Chemistry	3
CIV ENGR 618	Special Topics in Hydraulics and Fluid Mechanics (D) ¹	1-3
CIV ENGR 619	Special Topics in Hydrology	1-3
GEOSCI/GEOG 320	Geomorphology	3
GEOSCI/GEOG 420	Glacial and Pleistocene Geology	3
GEOSCI 430	Sedimentology and Stratigraphy	3
GEOSCI/G L E 629	Contaminant Hydrogeology (D)	3
G L E 401	Special Topics in Geological Engineering (D) ²	1-3
G L E/ CIV ENGR 430	Introduction to Slope Stability and Earth Retention (D)	1

G L E/ CIV ENGR 530	Seepage and Slopes (D)	3
G L E/ CIV ENGR 732	Unsaturated Soil Geoengineering	3

¹ Must take one of these topics: "Waterfront & Coastal Planning" or "Lake & River Rehabilitation."

² Only certain G L E 401 Special Topics in Geological Engineering topics count as design courses. Please consult with your academic advisor for details.

Infrastructure

There are many challenges that need to be overcome to address the aging infrastructure of this country as well as to develop cost effective solutions for new infrastructure in developing nations. The Infrastructure track is developed to provide students a background that enables them to perform engineering calculations to design, construct, assess the current condition (level of safety), and develop repair and retrofit solutions for civil engineering structures resting on, or constructed in, soil or rock.

Code	Title	Credits

INTEREGR 397	Engineering Communication	3
Total Credits		8

LIBERAL STUDIES (16 CREDITS)

Students must complete the **16 credits** of College of Engineering Liberal Studies Requirements (<http://guide.wisc.edu/undergraduate/engineering/#requirementstext>).

FUNDAMENTALS OF ENGINEERING EXAM

All students must take the Fundamentals of Engineering exam.

HONORS IN RESEARCH

Students in geological engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of **at least 3.5** may apply to participate in the Honors in Research program. Students may register for 1 to 3 credits per semester. A grade of P (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based on research progress and the written thesis, if completed). This becomes the grade for all credits taken in G L E 489 Honors in Research.

A senior thesis worth 3 credits of G L E 489 Honors in Research is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the geological engineering office to complete the program.

The designation "Honors in Research" will be recorded on the student's transcript if the following criteria are met:

- 1. Satisfaction of requirements for an undergraduate degree in Geological Engineering.
- 2. A cumulative grade-point average of at least 3.3.
- 3. Completion of a total of at least 8 credits in G L E 489 Honors in Research.
- 4. Completion of a senior honors thesis with a final grade of B or better.

Students interested in the Honors in Research program should contact their advisor or the G L E director for more information. Applications to the program are to be submitted to the G L E director with a supporting letter from the student's academic and thesis advisors. Decisions regarding acceptance are made by the G L E director.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- 2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- 3. an ability to communicate effectively with a range of audiences
- 4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- 5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- 6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

- 7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS LABS AND FACILITIES

The geological engineering program utilizes laboratories that are shared with other departments. They include:

Land Information and Surveying Laboratories
Fluid Mechanics Laboratory
Materials Testing Laboratory
Geology and Hydrogeology Laboratories
Rock Mechanics Laboratory
Geoengineering Laboratories

SCHOLARSHIPS

College of Engineering Scholarships (<https://engineering.wisc.edu/admissions/scholarships/>)

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Geological and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN GEOLOGICAL ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path our graduates may choose, we expect them to be meeting the following objectives at least three to five years after graduation:

1. apply geological engineering principles, analyses, and synthesis to design and implement projects in the natural and built environment;
2. incorporate economic, environmental, political, ethical, social, safety, and global considerations to generate sustainable solutions in the natural and built environment;
3. exhibit strong communication, leadership, and teamwork skills;
4. serve others through professional responsibility and participation in professional and public activities and good citizenship; and
5. demonstrate a continuing commitment to and interest in their own and others' education.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Geological Engineering Undergraduate Program website (<https://engineering.wisc.edu/programs/degrees/geological-engineering-bs/>). (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

ELECTRICAL AND COMPUTER ENGINEERING

The Department of Electrical and Computer Engineering is at the forefront of technological innovation, preparing students to design, analyze, and improve the systems that power modern life. With a curriculum grounded in mathematics, physics, and computing, students gain a strong technical foundation while exploring specialized areas such as artificial intelligence, embedded systems, semiconductor engineering, and renewable energy. Hands-on learning is a key component, with lab courses, research opportunities, and interdisciplinary electives allowing students to develop both technical expertise and problem-solving skills. Whether pursuing careers in industry or advanced research, graduates are equipped to become leaders in their fields.

Electrical engineering focuses on the design and development of systems essential to a wide range of industries. Electrical engineers create technologies such as semiconductor chips, mobile computing systems, wind, solar, and fusion power generators, robotic actuators, medical imaging devices, electric vehicles, and avionics. They also develop algorithms that enable these systems to function efficiently. The

curriculum covers fundamental principles, providing students with the ability to analyze, design, and improve these systems throughout their careers. Technical electives allow students to specialize in emerging fields while gaining practical experience through laboratory courses and design projects.

Computer engineering bridges hardware and software, focusing on the design and manufacturing of computing systems that drive modern technology. Computer engineers work with cutting-edge semiconductor technologies to develop hardware for applications ranging from consumer electronics to defense systems. They also design and optimize systems that process, store, and communicate digital information, with applications in wearable technology, cloud computing, embedded systems, and artificial intelligence. The program includes coursework in digital systems, circuits, and programming, enabling students to develop both theoretical and practical expertise. Like electrical engineering, computer engineering offers opportunities for specialization, hands-on learning, and research in rapidly evolving fields.

Technical elective freedom in both curricula makes it possible for students to choose from approximately 50 specialized courses at the junior and senior levels in electrical and computer engineering areas, as well as courses from other departments. In both curricula, students can choose a broad program covering an introductory treatment of a variety of areas or focus in one or two specialized areas. Students in both degrees have the opportunity to pursue transcripted named options in Machine Learning and Data Science or in Semiconductor Engineering.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/ CERTIFICATES

Photonics Lab
Plasma Processing & Technology Laboratory
Plexus Collaboratory
Power Electronics Lab

Qualcomm Design Labs

Signal Processing Lab

Vacuum Electronic Devices Lab

Wisconsin Advanced Network Design, Experimentation, and Research (WANDER) Lab

COMPUTER ENGINEERING, BS

As a computer engineering major, you will learn how to design and manufacture computer hardware using the latest semiconductor chip technologies, which form the foundation of everything from automobiles to household appliances to defense systems. In addition, you will learn how to design and analyze systems that process, store and convey digital information, and to develop efficient software for them. Examples of systems that computer engineering majors explore include wearable devices, mobile computing devices like smartphones and tablets, personal computers, servers deployed in the cloud, and many types of embedded systems. You can also specialize in emerging technologies such as semiconductor engineering (p. 302) or machine learning and data science (p. 301) and earn a named option on your transcript.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are

considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the computer engineering degree program.

Code	Title	Credits
Mathematics		19
Science		20-21
Computer Engineering Core		33
Computer Engineering Advanced Electives		16
Professional Electives		9
Communication Skills		6
Liberal Studies		15
Free Elective		2
Total Credits		120

MATHEMATICS

Code	Title	Credits
MATH 221 or MATH 217	Calculus and Analytic Geometry 1 Calculus with Algebra and Trigonometry II	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables ¹	4
MATH/ COMP SCI 240 or MATH/ COMP SCI/ STAT 475	Introduction to Discrete Mathematics Introduction to Combinatorics	3
Probability/Statistics Elective (select one)		3
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
MATH/STAT 431	Introduction to the Theory of Probability	
E C E 331	Introduction to Random Signal Analysis and Statistics	
Total Credits		19

¹ MATH 375 and MATH 376 taken in sequence will fulfill the requirement for MATH 234.

SCIENCE

Code	Title	Credits
COMP SCI 300	Programming II	3
COMP SCI 400	Programming III	3
PHYSICS 201	General Physics ¹	5
or PHYSICS 207	General Physics	
or PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
or PHYSICS 248	A Modern Introduction to Physics	
Select one of the following:		4-5
CHEM 109	Advanced General Chemistry	
CHEM 103	General Chemistry I	
CHEM 104	General Chemistry II	
Total Credits		20-21

¹ Students may also fulfill this requirement by taking E M A 201 Statics and E M A 202 Dynamics.

COMPUTER ENGINEERING CORE

Code	Title	Credits
E C E 203	Signals, Information, and Computation	3
E C E 210	Introductory Experience in Electrical Engineering	2

Systems Software Elective ¹		
Select one of the following:		3
E C E/COMP SCI 506	Software Engineering	
COMP SCI 536	Introduction to Programming Languages and Compilers	
COMP SCI 537	Introduction to Operating Systems	
COMP SCI 564	Database Management Systems: Design and Implementation	
Capstone Design		
Select one of the following:		4
E C E 453	Embedded Microprocessor System Design	
E C E 454	Mobile Computing Laboratory ²	
E C E 455	Capstone Design in Electrical and Computer Engineering	
E C E 554	Digital Engineering Laboratory	
CMPE Elective I		
Select one of the following:		3
E C E 537	Communication Networks	
E C E/COMP SCI 552	Introduction to Computer Architecture	
E C E 553	Testing and Testable Design of Digital Systems	
E C E 556	Design Automation of Digital Systems	
CMPE Elective II		
Select one of the following:		3
Select from E C E 399 - E C E 699		
Select from COMP SCI 400 - COMP SCI 699 ²		
Total Credits		16

¹ If a 4-credit course is taken, one credit may be used toward satisfying the professional elective and free elective requirement.

² E C E 454 Mobile Computing Laboratory and COMP SCI 407 Foundations of Mobile Systems and Applications cannot both be taken for degree credit.

PROFESSIONAL ELECTIVES

Code	Title	Credits
Courses to be taken in an area of professional interest. The following courses are acceptable as professional electives if the courses are not used to meet any other degree requirements.		9
E C E 1	Cooperative Education Program (One co-op credit can count towards professional electives.)	
E C E 204	Data Science & Engineering	
E C E/PHYSICS 235	Introduction to Solid State Electronics	
E C E 320	Electrodynamics II	
E C E 330	Signals and Systems	
E C E 331	Introduction to Random Signal Analysis and Statistics	

E C E 332	Feedback Control Systems
E C E 334	State Space Systems Analysis
E C E 335	Microelectronic Devices
E C E 342	Electronic Circuits II (may be used if not already used as an Electronic Circuits Advanced Elective)
E C E 355	Electromechanical Energy Conversion
E C E 356	Electric Power Processing for Alternative Energy Systems
E C E courses numbered 370 and higher	
COMP SCI courses numbered 400 and higher	
MATH 319	Techniques in Ordinary Differential Equations
MATH 320	Linear Algebra and Differential Equations ¹
MATH 321	Applied Mathematical Analysis 1: Vector and Complex Calculus
MATH 322	Applied Mathematical Analysis 2: Partial Differential Equations
MATH 340	Elementary Matrix and Linear Algebra ¹
MATH 341	Linear Algebra
MATH courses numbered 400 and higher	
STAT courses numbered 400 and higher	
Any biological sciences course that is designated as intermediate or advanced level	
Any physical science course that is designated as intermediate or advanced level	
Any natural science course that is designated as advanced level, except that math, computer sciences, and statistics courses must follow the above criteria	
Engineering courses numbered 300 and higher that are not E C E or cross-listed with E C E	
Up to six credits of Professional Electives can be taken from School of Business classes numbered 300 and higher.	
DANCE 560	Current Topics in Dance: Workshop (Making Digital Lighting Controls)

¹ Students may only earn degree credit for MATH 320 Linear Algebra and Differential Equations or MATH 340 Elementary Matrix and Linear Algebra, not both.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or COM ARTS 181	Elements of Speech-Honors Course	
or ESL 118	Academic Writing II	
INTEREGR 397	Engineering Communication	3
Total Credits		6

LIBERAL STUDIES ELECTIVES

College of Engineering Liberal Studies Requirements		
Complete requirements (p. 254)		15
Total Credits		15

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honors in Research designation in their transcript. The Honors in Research program gives an undergraduate the opportunity to participate in a research project under the direction of a faculty member. It is expected that the student will be actively involved in research that could lead to new knowledge. The project can be independent or a component of a larger team effort.

Admission Requirements include:

1. Complete at least one semester on the UW-Madison campus,
2. Have a cumulative GPA of at least 3.5,
3. Major in Computer Engineering (CMPE) or Electrical Engineering (EE),
4. Identify an ECE faculty advisor who is willing to supervise the research project.

Students admitted to the program should register for one to three credits of E C E 489 Honors in Research. A thesis worth three credits of E C E 489 Honors in Research is required. The thesis is a written document that details the objectives of the project, the methods used to carry out the research, and the results of the research activity. The thesis must be approved by the faculty advisor and the student is encouraged to present a seminar.

The "Honors in Research" designation will be awarded to graduates who:

1. Complete either the CMPE or EE degree requirements.
2. Have a cumulative GPA of at least 3.3 at graduation.
3. Complete a total of at least six credits of E C E 489 Honors in Research.
4. Receive a final grade of at least B in E C E 489 Honors in Research.

- **COMPUTER ENGINEERING: SEMICONDUCTOR ENGINEERING, BS (P. 302)**

TOTAL DEGREE CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students

through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW–Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Electrical, Computer, Communication, Telecommunication(s), and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN COMPUTER ENGINEERING

Within the first few years after graduation, our graduates should be engaged in activities such as:

1. Employment in industry, government, academia, or non-profit using their degree knowledge or skills for professional functions such as teaching, research and development, quality control, technical marketing, intellectual property management, or sales. Graduates may eventually reach a leadership position supervising others.
2. Continuing education through self-study or short courses and workshops through their employer, local or online educational institutions, or attendance at professional events such as conferences.
3. Taking a principal role in starting a new business or product line.
4. Pursuing a postgraduate degree.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Computer Engineering Undergraduate Program website (<https://engineering.wisc.edu/programs/degrees/computer-engineering-bs/>).

(In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

COMPUTER ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, BS

The Machine Learning and Data Science option in Computer Engineering prepares students for a career in computer engineering with an emphasis on machine learning and data science. The purpose of this option is to provide guidance and recognition for students pursuing this career path. The option uses 16-17 of the elective credits within the 120-credit Computer Engineering BS degree program to focus on the mathematics, tools, and practices associated with machine learning and data science in engineering. Students selecting this option must submit an option declaration form (<https://engineering.wisc.edu/programs/named-options/declaration/>) to the dean's office in Engineering Hall.

COMPUTER ENGINEERING:
SEMICONDUCTOR
ENGINEERING, BS

The Semiconductor Engineering named option in Computer Engineering prepares students for a career in computer engineering with an emphasis on engineering semiconductor-based devices and systems. This named option provides guidance and recognition for students pursuing this career path. The option uses 20 of the elective credits within the 120-credit Computer Engineering BS degree program to focus on the science, tools, and practices associated with semiconductor engineering. Students selecting this option must submit an option declaration form (<https://engineering.wisc.edu/programs/named-options/declaration/>) to the dean's office in Engineering Hall.

ELECTRICAL ENGINEERING, BS

Today, electrical engineering has applications in every aspect of our daily lives. Electrical engineers are responsible for creating a wide range of devices that are used regularly, such as mobile computing systems, semiconductor chips, wind, solar and fusion power generators, robotic actuators, MRI machines, X-ray scanners, electric vehicles, and avionics. They also work on developing the algorithms that enable these machines to function according to our needs. As an electrical engineering major, you will learn the fundamental principles behind the operation of these devices and systems. You will gain the skills to analyze and design them, as well as improve upon existing technology throughout your career. You can also specialize in emerging technologies such as semiconductor engineering (p. 310) or machine learning and data science (p. 309) and earn a named option on your transcript.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW-Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission

is competitive and selective, and academic performance expectations may increase as demand trends change. The student’s overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the electrical engineering degree program.

Code	Title	Credits
Mathematics		16
Science		17-18
Electrical Engineering Core		32
Electrical Engineering Advanced Electives		24
Professional Electives		9
Communication Skills		6
Liberal Studies		15
Free Elective		1
Total Credits		120-121

MATHEMATICS¹

Code	Title	Credits
MATH 221 or MATH 217	Calculus and Analytic Geometry 1 Calculus with Algebra and Trigonometry II	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables ²	4
Probability and Statistics Elective		3
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT/M E 424	Statistical Experimental Design	
MATH/STAT 431	Introduction to the Theory of Probability	
E C E 331	Introduction to Random Signal Analysis and Statistics	
Total Credits		16

¹ In addition to the courses listed in the Mathematics Requirement at least one additional course must be completed for the advanced mathematics auxiliary condition. Choose: MATH 319 Techniques in Ordinary Differential Equations, MATH 320 Linear Algebra and Differential Equations, MATH 340 Elementary Matrix and Linear Algebra, MATH 341 Linear Algebra, E C E 334 State Space Systems Analysis, or E C E/COMP SCI/M E 532 Matrix Methods in Machine Learning to satisfy the advanced math auxiliary condition. These credits count toward either professional electives or advanced elective credit depending on the course.

² MATH 375 and MATH 376 taken in sequence will fulfill the requirement for MATH 234, professional elective credit, and advanced math auxiliary condition.

SCIENCE

Code	Title	Credits
COMP SCI 300	Programming II	3
PHYSICS 201	General Physics ¹	5
or PHYSICS 207	General Physics	
or PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
or PHYSICS 248	A Modern Introduction to Physics	
Select one of the following:		4-5
CHEM 109	Advanced General Chemistry	
CHEM 103	General Chemistry I	
CHEM 104	General Chemistry II	
Total Credits		17-18

¹ Students may also fulfill this requirement by taking E M A 201 Statics and E M A 202 Dynamics.

ELECTRICAL ENGINEERING CORE

Code	Title	Credits
E C E 203	Signals, Information, and Computation	3
E C E 210	Introductory Experience in Electrical Engineering	2
E C E 222	Electrodynamics I	4
E C E 230	Circuit Analysis	4
E C E/PHYSICS 235	Introduction to Solid State Electronics	3
E C E/COMP SCI 252	Introduction to Computer Engineering	3
E C E 270	Circuits Laboratory I	1
E C E 271	Circuits Laboratory II	1
E C E 330	Signals and Systems	3
E C E 340	Electronic Circuits I	3
E C E/COMP SCI 352	Digital System Fundamentals	3
E C E 370	Advanced Laboratory	2
Total Credits		32

ELECTRICAL ENGINEERING ADVANCED ELECTIVES

Students must take 24 credits of advanced electives. A minimum of 21 credits must be from at least three of the six areas. A minimum of two laboratory courses must be taken.

- At least 9 credits must be in E C E courses numbered 400 and above.
- At least one course must be a capstone design course from the following list: E C E 453 Embedded Microprocessor System Design, E C E 454 Mobile Computing Laboratory, E C E 455 Capstone Design in Electrical and Computer Engineering, E C E 554 Digital

Engineering Laboratory. These courses are also indicated in the areas below with a *.

- At least one course must be MATH 319 Techniques in Ordinary Differential Equations, MATH 320 Linear Algebra and Differential Equations, MATH 340 Elementary Matrix and Linear Algebra, MATH 341 Linear Algebra, E C E 334 State Space Systems Analysis, or E C E/COMP SCI/ME 532 Matrix Methods in Machine Learning to satisfy the advanced math auxiliary condition. MATH 319 Techniques in Ordinary Differential Equations, MATH 320 Linear Algebra and Differential Equations, MATH 340 Elementary Matrix and Linear Algebra, and MATH 341 Linear Algebra count toward professional electives. E C E 334 State Space Systems Analysis and E C E/COMP SCI/ME 532 Matrix Methods in Machine Learning count as advanced electives.
- Students can count 1 credit of E C E 1 Cooperative Education Program toward advanced electives.
- Students can count up to 6 credits of E C E 399 Independent Study, E C E 489 Honors in Research or E C E 699 Advanced Independent Study towards advanced electives.
- Students can take E C E 379 Special Topics in Electrical and Computer Engineering and E C E 601 Special Topics in Electrical and Computer Engineering as advanced electives.
- Students can count up to 5 credits of COMP SCI courses numbered 500 and above (not including independent study)
- E C E courses numbered 300 that are not specified in an area can count toward the total number of advanced elective credits required.

Laboratory

Code	Title	Credits
Select at least one course from E C E 301 to E C E 317		
An additional laboratory course must be taken from the following list:		
E C E 303	Introduction to Real-Time Digital Signal Processing	
E C E 304	Electric Machines Laboratory	
E C E 305	Semiconductor Properties Laboratory	
E C E 313	Optoelectronics Lab	
E C E 315	Introductory Microprocessor Laboratory	
E C E 317	Sensors Laboratory	
E C E 432	Digital Signal Processing Laboratory	
E C E 453	Embedded Microprocessor System Design *

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honors in Research designation in their transcript. The Honors in Research program gives an undergraduate the opportunity to participate in a research project under the direction of a faculty member. It is expected that the student will be actively involved in research that could lead to new knowledge. The project can be independent or a component of a larger team effort.

Admission Requirements include:

1. Complete at least one semester on the UW-Madison campus,
2. Have a cumulative GPA of at least 3.5,
3. Major in Computer Engineering (CMPE) or Electrical Engineering (EE),
4. Identify an ECE faculty advisor who is willing to supervise the research project.

Students admitted to the program should register for one to three credits of E C E 489 Honors in Research. A thesis worth three credits of E C E 489 Honors in Research is required. The thesis is a written document that details the objectives of the project, the methods used to carry out the research, and the results of the research activity. The thesis must be approved by the faculty advisor and the student is encouraged to present a seminar.

The "Honors in Research" designation will be awarded to graduates who:

1. Complete either the CMPE or EE degree requirements.
2. Have a cumulative GPA of at least 3.3 at graduation.
3. Complete a total of at least six credits of E C E 489 Honors in Research.
4. Receive a final grade of at least B in E C E 489 Honors in Research.

- **ELECTRICAL ENGINEERING: SEMICONDUCTOR ENGINEERING, BS (P. 310)**

TOTAL DEGREE CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students

through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW–Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Electrical, Computer, Communication, Telecommunication(s), and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING

Within the first few years after graduation, our graduates should be engaged in activities such as:

1. Employment in industry, government, academia, or nonprofit using their degree knowledge or skills for professional functions such as teaching, research and development, quality control, technical marketing, intellectual property management, or sales. Graduates may eventually reach a leadership position supervising others.
2. Continuing education through self-study or short courses and workshops through their employer, local or online educational institutions, or attendance at professional events such as conferences.
3. Taking a principal role in starting a new business or product line.
4. Pursuing a postgraduate degree.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Electrical Engineering Undergraduate Program website. (<https://engineering.wisc.edu/programs/degrees/electrical-engineering-bs/>) (In

this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

ELECTRICAL ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, BS

The Machine Learning and Data Science option in Electrical Engineering prepares students for a career in electrical engineering with an emphasis on machine learning and data science. The purpose of this option is to provide guidance and recognition for students pursuing this career path. The option uses 15–16 of the elective credits within the 120-credit Electrical Engineering BS degree program to focus on the mathematics, tools, and practices associated with machine learning and data science in engineering. Students selecting this option must submit an option declaration form (<https://engineering.wisc.edu/programs/named-options/declaration/>) to the dean's office in Engineering Hall.

ELECTRICAL ENGINEERING:
SEMICONDUCTOR
ENGINEERING, BS

The Semiconductor Engineering named option in Electrical Engineering prepares students for a career in electrical engineering with an emphasis on engineering semiconductor-based devices and systems. This named option provides guidance and recognition for students pursuing this career path. The option uses 20 of the elective credits within the 120-credit Electrical Engineering BS degree program to focus on the science, tools, and practices associated with semiconductor engineering. Students selecting this option must submit an option declaration form (<https://engineering.wisc.edu/programs/named-options/declaration/>) to the dean's office in Engineering Hall.

ENGINEERING - COLLEGE-WIDE

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/ CERTIFICATES

- College of Engineering Honors in the Liberal Arts (p. 312)
- International Engineering, Certificate (p. 312)
- Naval Science, BNS (p. 313)
- Technical Communication, Certificate (p. 315)

COLLEGE OF ENGINEERING HONORS IN THE LIBERAL ARTS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates – not just a few – excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

HOW TO GET IN

HOW TO GET IN

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters & Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (<https://www.engr.wisc.edu/academics/undergraduate-academics/honors/>) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu with questions.

REQUIREMENTS

REQUIREMENTS

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of at least 6 credits in Honors courses in the humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "I" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters & Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

INTERNATIONAL ENGINEERING, CERTIFICATE

The Certificate in International Engineering provides recognition for a student's efforts to prepare for an international career by learning about a country or region of the world outside the United States. An undergraduate student in the College of Engineering or the Department of Biological Systems Engineering can earn the certificate by completing courses with a primary focus on the language, culture, history, geography, society, or institutions of a particular country or region of the world.

HOW TO GET IN

HOW TO GET IN

Students can apply for the Certificate in International Engineering by completing this form. (<https://engineering.wisc.edu/academics/undergraduate-academics/certificate-in-international-engineering/>) This certificate is open to undergraduate students in the College of Engineering or the Department of Biological Systems Engineering. Students must have a cumulative GPA of at least 2.75 and have met progression requirements to apply.

REQUIREMENTS

REQUIREMENTS

A minimum of 16 credits is required. Up to eight transfer/test (e.g. Advanced Placement)/retro credits and up to three credits of Independent Study or Directed Study can be used toward completing the certificate.

LANGUAGE COURSES (0-9 CREDITS)

Although not required, a maximum of 9 credits may be devoted to courses in a foreign language. Only foreign language courses beyond the initial 8 credits in that particular language may be used to satisfy this requirement. A maximum of 3 credits from Independent Study or Directed Study may be counted toward the language requirements.

AREA STUDIES COURSES (6-15 CREDITS)

A minimum of 6 credits must be devoted to courses with a major emphasis on the culture, history, geography, society, or institutions of one country or the countries in a geographically identifiable region of the world. These courses must be selected from at least two departments. A maximum of three credits from Independent Study or Directed Study may be counted toward the area studies requirements.

INTERNATIONAL EXPERIENCE

A documented stay of five weeks or longer for study or engineering-related volunteer or work (including internship and co-op) in the designated country or region is required.

INTERNATIONAL ENGINEERING COURSE

Successful completion of the one credit course INTEREGR 413 is required after one's international experience. **This course is only offered during the fall semester and students must be admitted into the certificate to enroll in this course.**

Students may not elect the pass/fail option for any course that is used to satisfy the requirements for the certificate, with the exception of courses taken on a study abroad program through International Academic Programs (<https://studyabroad.wisc.edu/>) in collaboration with the College of Engineering. Successful completion of certificate requirements will be noted on the student's official transcript at graduation. For additional information, contact international@engr.wisc.edu.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Study the language and/or culture of a specific area of the world.
2. Obtain a significant international experience in that same area of the world (meaning spending 5 weeks or more in the area).
3. Understand and be able to articulate specific insights about the international dimension of engineering as a profession.

NAVAL SCIENCE, BNS

The College of Engineering recommends candidates for the Bachelor of Naval Science degree.

Earning both the BNS degree and the BS degree in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

For additional information see the Officer Education (p. 28) section of the *Guide*.

HOW TO GET IN

HOW TO GET IN

The Naval Science BNS is not a stand-alone degree. Students interested in pursuing this degree should consult with the Navy ROTC: 1610 University Ave, Madison, WI 53726 | 608-262-3794 | nrotc@aviation.wisc.edu (nrotc@aviation.wisc.edu)

REQUIREMENTS

REQUIREMENTS

The College of Engineering recommends candidates for the Bachelor of Naval Science degree. Requirements for the degree are:

1. A total of 136 credits including no fewer than 100 credits of elected and required courses in one of the engineering curricula.
2. Completion of these additional requirements as approved by the Department of Naval Science: English, two semesters; American Military Affairs/National Security Policy, one semester (see below).

3. Also, to be conferred a BNS degree, the candidate must satisfy the degree requirements for *any* Engineering major, and the above-stated Naval Science requirements.

Earning both the BNS degree and the BS in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

NAV SCI 276	Elementary Naval Laboratory II	
NAV SCI 375	Intermediate Naval Laboratory I	
NAV SCI 376	Intermediate Naval Laboratory II	
NAV SCI 475	Advanced Naval Laboratory I	
NAV SCI 476	Advanced Naval Laboratory II	
NAV SCI 575	Professional Naval Laboratory I ¹	
NAV SCI 576	Professional Naval Laboratory II ¹	
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs	3
or HISTORY 345	Military History of the United States	
or HISTORY 428	The American Military Experience Since 1899	
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 402	Naval Leadership and Ethics	3
Six credits of English. Must be writing-intensive and focus on areas of grammar and composition. Accepted courses include those designated COM A or COM B		6
Three credits of American Military History or National Security Policy. Accepted courses include:		3
POLI SCI 104	Introduction to American Politics and Government	
POLI SCI 140	Introduction to International Relations	
POLI SCI 160	Introduction to Political Theory	
POLI SCI/LEGAL ST 217	Law, Politics and Society	
POLI SCI 347	Terrorism	
POLI SCI 348	Analysis of International Relations	
POLI SCI 356	Principles of International Law	
POLI SCI 377	Nuclear Weapons and World Politics	
HISTORY 427	The American Military Experience to 1902	
HISTORY 428	The American Military Experience Since 1899	
Completion of one of the following:		
Navy Option Focus Area:		
NAV SCI 202	Navigation	
NAV SCI 301	Naval Engineering	
NAV SCI 302	Naval Weapons	
NAV SCI 401	Naval Operations	

Six credits of calculus to include a first- and second-semester course ²	
Six credits of calculus-based physics to include a first- and second-semester course ²	
Three credits of World Culture and Regional Studies. Must have an emphasis on regions encompassed by Sub-Sahara Africa, North Africa, Central Asia, East Asia, South Asia, Southwest Asia, Southeast Asia, Central America, Middle East, or Russia/Eastern Europe	
Marine Corps Option Focus Area:	
NAV SCI 350	Fundamentals of Maneuver Warfare
NAV SCI 351	Land Campaigns

¹ Add NAV SCI 575 Professional Naval Laboratory I if taking a 9th semester, NAV SCI 576 Professional Naval Laboratory II if taking a 10th semester.

² AP/IB/Transfer credits accepted only for first-semester course. Contact the NROTC staff for more information.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Understand and apply the fundamentals and principles of Naval Science.
- 2. Understand and apply Naval Science professional knowledge and core competencies.
- 3. Be prepared to perform successfully in the technical and critical reasoning requirements of their careers and pursue continuing education in a field of application within the Naval Service.
- 4. Understand and demonstrate a strong sense of personal integrity, honor, and individual responsibility and associated ethical leadership required of military officers.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

The Bachelor of Naval Science degree is not a stand-alone degree. The plans below must be integrated with a student's undergraduate College of Engineering major plan. See your engineering advisor and Naval ROTC program staff with questions.

nrotc.aviation@wisc.edu

TECHNICAL COMMUNICATION, CERTIFICATE

Admissions to the Technical Communication, Certificate have been suspended as of fall 2025 and will be discontinued as of fall 2027. If you have any questions, please contact the department.

The Technical Communication Certificate (TCC) has established itself as a program that meets industry and government agencies' demands for students with skills as communicators and for communication specialists. Because employers value well-developed communication skills, TCC courses will enhance success in co-op/intern positions and post-graduation careers. TCC graduates overwhelmingly confirm not only that the certificate gave them an edge over other candidates during the recruitment process, but also that the communication knowledge, skills, and attitudes they acquired while in the program helped them succeed in their jobs and helped prepare them for the diverse communication and management tasks in today's multifunctional team environments.

The Technical Communication Certificate, housed in the College of Engineering, complements all undergraduate degrees, but is especially designed to fit in well with an engineering degree. TCC students gain experience in career-applicable skills by

- Receiving education in principles and processes for communicating about technical subjects (including problem solving methods, audience analysis, rhetorical analysis, conventions of format, and usability testing).
- Gaining education in the fundamentals of written, oral, and visual communication (including organization, structure, style, mechanics, format, and delivery).
- Learning effective interpersonal communication and management skills (including teamwork, interviewing, leading and facilitating groups, project management, and international communication).
- Gaining opportunities to research and think analytically about contemporary issues and to consider ethical issues.
- Using current technology to encourage effective communication in a variety of environments (including use of the web, distance communication, group software, and layout and presentation software).

While the certificate is designed especially for engineering students, students from other fields sometimes seek out the program to enhance

their career options. Students who complete the certificate will have the notation "Technical Communication Certificate" added to their transcripts.

Students in the program often take on leadership roles in other college or campus student organizations and projects, further developing their communication, team, and management skills.

HOW TO GET IN

HOW TO GET IN

Admissions to the Technical Communication, Certificate have been suspended as of fall 2025 and will be discontinued as of fall 2027. If you have any questions, please contact the department.

Undergraduates who would like to enroll in the Technical Communication Certificate (TCC) may download the TCC Application form (PDF) (<https://tc.engr.wisc.edu/certificate/applying-to-the-technical-communication-certificate/>). Email the completed TCC Application along with a PDF of your current DARS report to Laura Grossenbacher, Director of the Tech Comm Program, at lrgrossenbac@wisc.edu. Graduate students and non-degree-seeking students cannot enroll in the TCC.

PREREQUISITES FOR ADMISSION TO THE TCC PROGRAM

- A grade of at least B in Communication A or equivalent course or AP English credits (score of at least 4 out of 5).
- Four courses (12-credit minimum) in science and/or engineering, including at least one intermediate-level (minimum 200-level) course.
- Three courses (9-credit minimum) in humanities, social sciences, and/or foreign language.
- Overall GPA of at least 2.5.

Applications are accepted throughout the semester, though students are encouraged to submit applications as early as possible so they have ample time to plan their coursework. The program will notify all new admissions via email.

REQUIREMENTS

REQUIREMENTS

To graduate with the certificate in technical communication, students must complete at least 21 credits, with a minimum of 6 credits in technical proficiency courses and a minimum of 15 credits in both technical and non-technical communication courses.

In addition to course requirements, students must achieve at least a B in the required Engineering Communication (INTEREGR 397) and the Technical Communications Internship (E P D 398). All students must complete the program within five years from their application date. Students are encouraged to meet with their advisor regularly to ensure they are on track to graduate with their certificate. Students cannot count courses completed on a pass/fail basis toward the certificate.

Substitution of courses substantively equivalent to those listed will be considered by the Technical Communication Curriculum Committee. Students must submit requests for substitution with supporting material before beginning the course.

PREREQUISITES

Code	Title	Credits
A grade of at least B in Communication A or equivalent course or AP English credits (score of at least 4 or 5)		
Select four courses (12-credit minimum) in science and/or engineering, including at least one intermediate-level (minimum 200-level) course		
Select three courses (9-credit minimum) in liberal studies including a foreign language		
Overall GPA of at least 2.5		

TECHNICAL PROFICIENCY

Code	Title	Credits

PSYCH/I SY E 653	Organization and Job Design	3
SOC 535	Talk and Social Interaction	3

Independent Study courses by instructor approval only²

¹ Note: These E P D courses **do NOT count toward** the TCC:

- E P D 654 Teaching in Science and Engineering
- E P D 690 Core Competency in Sustainability
- E P D 690 ATE Powertrain
- E P D 690 Essential Skills for Engineering Productivity

² Special credits in Technical Communication include E P D 499 Senior Independent Study.

SENIOR DESIGN OR CAPSTONE

If students pursuing this Certificate from outside of engineering, can petition for a senior-level communication-intensive course in their chosen discipline to count for this requirement.

Code	Title	Credits
Select one of the following:		3-4
B M E 400	Capstone Design Course in Biomedical Engineering	
B M E 402	Biomedical Engineering Capstone Design II	
BSE 508	Biological Systems Engineering Design Practicum I	
BSE 509	Biological Systems Engineering Design Practicum II	
CBE 424	Operations and Process Laboratory	
CBE 450	Process Design	
CIV ENGR 578	Senior Capstone Design	
E C E 453	Embedded Microprocessor System Design	
E C E 491	Senior Design Project	
E M A 469	Design Problems in Engineering	
G L E 479	Geological Engineering Design	
I SY E 450	Industrial Engineering Design II	
M E 349	Engineering Design Projects	
M E 351	Interdisciplinary Experiential Design Projects I	
M E 352	Interdisciplinary Experiential Design Projects II	
M S & E 470	Capstone Project I	
M S & E 471	Capstone Project II	
N E 412	Nuclear Reactor Design	
N E 571	Economic and Environmental Aspects of Nuclear Energy	

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand and apply principles and processes for communicating about technical subjects to diverse audiences.
2. Understand and apply fundamentals of written, oral, and visual communication.
3. Apply improved skills in interpersonal communication, teamwork, and management.
4. Research, identify, and think analytically about social, global, economic, political, environmental, and ethical issues as they impact technical projects or engineering work.

- 5. Use current technology to communicate effectively in a variety of formats and environments.
- 6. Engage in real world experiences through communication internships and guest lectures.

INDUSTRIAL AND SYSTEMS ENGINEERING

The first bachelor of science in industrial engineering at the University of Wisconsin–Madison was awarded in 1972. Since that time, the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best – the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry, and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW–Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in four main areas:

- Industrial Data Analytics
- Optimization and Operations Research
- Human Factors and Ergonomics
- Applications of Industrial Engineering

Although there is no sub-major within IE, it is possible to achieve a degree of specialization through the choice of a focus area. Courses focusing on teams and design projects prepare students to succeed in the workplace.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Engineering Data Analytics, Certificate (p. 318)
- Industrial Engineering, BS (p. 319)
- Six Sigma, Certificate (p. 325)

ENGINEERING DATA ANALYTICS, CERTIFICATE

This certificate is designed to enhance the skills of engineering students in the field of Data Analytics, which is in high demand across all engineering fields. Students may choose from a wide variety of courses from each of the four main areas: Foundations of Data Analytics, Applications of Data Analytics, Data Science, and Machine Learning. The culminating course in the program focuses on ethical issues in Data Analytics and provides students with principled solutions to address these modern societal challenges.

The program is open to any degree-seeking undergraduate engineering student with a plan of study that fulfills the certificate requirements. Applications can be submitted at any time, but students are encouraged to apply early to ensure a smooth and successful completion of the program.

HOW TO GET IN

HOW TO GET IN

All current undergraduate students in the College of Engineering are eligible to complete the Certificate in Engineering Data Analytics. Students should meet with the Certificate Advisor to discuss their intention to pursue the certificate and submit an online declaration form: <https://engineering.wisc.edu/programs/certificates/engineering-data-analytics/declaration> (<https://engineering.wisc.edu/programs/certificates/engineering-data-analytics/declaration/>).

Students declared in the Certificate in Data Science are not eligible to declare the Certificate in Engineering Data Analytics.

REQUIREMENTS

REQUIREMENTS

Select one course from each area. The ethics course must be taken after the other four courses are completed.

Code	Title	Credits
	Foundations of Data Analytics	3
	Applications of Data Analytics	3–4
	Data Science	3
	Machine Learning	3
	Ethics (Complete last)	3
Total Credits		15

FOUNDATIONS OF DATA ANALYTICS

Choose one of the following courses:

Code	Title	Credits
E C E 203	Signals, Information, and Computation	3
E C E 204	Data Science & Engineering	3
E C E 331	Introduction to Random Signal Analysis and Statistics	3
ISY E 210	Introduction to Industrial Statistics	3
ISY E 312	Data Management and Analysis for Industrial Engineers	3
ISY E 412	Fundamentals of Industrial Data Analytics	3

APPLICATIONS OF DATA ANALYTICS

Choose one of the following courses:

Code	Title	Credits
E C E 334	State Space Systems Analysis	3
E C E 431	Digital Signal Processing	3
E C E 432	Digital Signal Processing Laboratory	3
E C E 454	Mobile Computing Laboratory	4
E C E/COMP SCI 533	Image Processing	3
ISY E/M E 512	Inspection, Quality Control and Reliability	3
ISY E 517	Decision Making in Health Care	3
ISY E 575	Introduction to Quality Engineering	3
M S & E 561	Machine Learning in Materials	3

DATA SCIENCE

Choose one of the following courses:

Code	Title	Credits
E C E/COMP SCI/ISY E 524	Introduction to Optimization	3
E C E/COMP SCI 561	Probability and Information Theory in Machine Learning	3
ISY E 516	Introduction to Decision Analysis	3
ISY E 620	Simulation Modeling and Analysis	3
ISY E 624	Stochastic Modeling Techniques	3
ISY E/MATH/OTM/STAT 632	Introduction to Stochastic Processes	3

MACHINE LEARNING

Choose one of the following courses:

Code	Title	Credits
E C E/COMP SCI/M E 532	Matrix Methods in Machine Learning	3
E C E/COMP SCI/M E 539	Introduction to Artificial Neural Networks	3
ISY E 521	Machine Learning in Action for Industrial Engineers	3

ETHICS

Choose one of the following courses:

Code	Title	Credits
ISY E 562	Human Factors of Data Science and Machine Learning	3
ISY E/E C E 570	Ethics of Data for Engineers	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Apply tools and methods to understand, analyze, and interpret data from a variety of sources
2. Apply tools and methods to draw conclusions from and make decisions based on analysis of data
3. Articulate the potential impact of a data-driven decision in the context of ethics, fairness, and equity
4. Identify how engineers apply data analytics in practice using machine learning, data science, and other fundamental tools of data analytics

INDUSTRIAL ENGINEERING, BS

The first bachelor of science in industrial engineering at the University of Wisconsin-Madison was awarded in 1972. Since that time, the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best – the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry, and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW–Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in four main areas:

- Industrial Data Analytics
- Optimization and Operations Research
- Human Factors and Ergonomics
- Applications of Industrial Engineering

Although there is no sub-major within IE, it is possible to achieve a degree of specialization through the choice of a focus area. Courses focusing on teams and design projects prepare students to succeed in the workplace.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying

to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the Industrial Engineering, BS, degree program. Required courses and electives satisfying the Mathematics and Basic Science, Computer Sciences, IE Focus Area, and General Education Communication requirements are indicated. For Liberal Studies Electives refer to the College of Engineering Liberal Studies Guidelines.

Code	Title	Credits
Mathematics and Basic Science		30-31
Probability and Statistics		6
Computer Sciences		7-8
Required I S Y E Courses		28
I S Y E Focus Area Technical Electives		18
Professional Electives, Communication Skills, and Liberal Studies		27
Free Electives		4
Total Credits		120

MATHEMATICS AND BASIC SCIENCE

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 340	Elementary Matrix and Linear Algebra	3
Select one of the following: ¹		5-6
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
E M A 201 & E M A 202	Statics and Dynamics	
Choose 9 credits from the following list:		9
ANAT&PHY 335	Physiology	
BIOLOGY/	Introductory Biology	
BOTANY/		
ZOOLOGY 151		
or ZOOLOGY 153	Introductory Biology	
BIOLOGY/	Introductory Biology	
BOTANY/		
ZOOLOGY 152		

or STAT/ MATH 309	Introduction to Probability and Mathematical Statistics I	
Total Credits		6

COMPUTER SCIENCES

Code	Title	Credits
COMP SCI 220	Data Science Programming I	4
Select one of the following courses:		3-4
COMP SCI 200	Programming I	
COMP SCI 300	Programming II	
COMP SCI 320	Data Science Programming II	
COMP SCI 400	Programming III	
COMP SCI 412	Introduction to Numerical Methods	
Total Credits		7-8

REQUIRED I SY E COURSES

Code	Title	Credits
I SY E 191	The Practice of Industrial Engineering	2
I SY E 312	Data Management and Analysis for Industrial Engineers	3
I SY E 313	Engineering Economic Analysis	3
I SY E 315	Production Planning and Control	3
I SY E 320	Simulation and Probabilistic Modeling	3
I SY E 321	Simulation Modeling Laboratory	1
I SY E 323	Operations Research-Deterministic Modeling	3
I SY E 348	Introduction to Human Factors Engineering Laboratory	1
I SY E/PSYCH 349	Introduction to Human Factors	3
I SY E 350	Industrial Engineering Design I	3
I SY E 450	Industrial Engineering Design II	3
Total Credits		28

I SY E FOCUS AREA TECHNICAL ELECTIVES

Choose one of the following six focus areas.

Industrial Data Analytics

Code	Title	Credits
Choose at least 3 courses from the following list:		9
I SY E 412	Fundamentals of Industrial Data Analytics	
I SY E/M E 512	Inspection, Quality Control and Reliability	
I SY E 521	Machine Learning in Action for Industrial Engineers	
I SY E 562	Human Factors of Data Science and Machine Learning	
I SY E/E C E 570	Ethics of Data for Engineers	
I SY E 603	Special Topics in Engineering Analytics and Operations Research ¹	
I SY E 612	Information Sensing and Analysis for Manufacturing Processes	
I SY E 649	Interactive Data Analytics	

One elective I SY E course other than those listed in the Industrial Data Analytics area	3
Additional elective I SY E courses in any area	6
Total Credits	18

Applications of Industrial Engineering

Code	Title	Credits
Choose at least 3 courses from the following applications:		9
<i>Manufacturing</i>		
I SY E 415	Introduction to Manufacturing Systems, Design and Analysis	
I SY E/M E 510	Facilities Planning	
I SY E 515	Engineering Management of Continuous Process Improvement	
I SY E 604	Special Topics in Manufacturing and Supply Chain Management	
I SY E 605	Computer Integrated Manufacturing	
I SY E/M E 641	Design and Analysis of Manufacturing Systems	
I SY E 645	Engineering Models for Supply Chains	
<i>Health Systems</i>		
I SY E 417	Health Systems Engineering	
I SY E 517	Decision Making in Health Care	
I SY E 606	Special Topics in Healthcare Systems Engineering	
<i>Quality Engineering</i>		
I SY E 520	Quality Assurance Systems	
I SY E 575	Introduction to Quality Engineering	
One elective I SY E course other than those listed in the Applications of Industrial Engineering area	3	
Additional elective I SY E courses in any area	6	
Total Credits		18

Human Factors and Ergonomics

Code	Title	Credits
Choose at least 3 courses from the following list:		9
I SY E/COMP SCI/ DS 518	Wearable Technology	
I SY E/ PSYCH 549	Human Factors Engineering	
I SY E 555	Human Performance and Accident Causation	
I SY E 562	Human Factors of Data Science and Machine Learning	
I SY E/B M E 564	Occupational Ergonomics and Biomechanics	
I SY E 602	Special Topics in Human Factors	
I SY E/B M E 662	Design and Human Disability and Aging	
One elective I SY E course other than those listed in the Human Factors and Ergonomics area	3	
Additional elective I SY E courses in any area	6	
Total Credits		18

Optimization and Operations Research

Code	Title	Credits
Choose at least 3 courses from the following list:		9
I SY E/COMP SCI/ MATH 425	Introduction to Combinatorial Optimization	
I SY E 516	Introduction to Decision Analysis	
I SY E/COMP SCI/ E C E 524	Introduction to Optimization	
I SY E/COMP SCI/ MATH/STAT 525	Linear Optimization	
I SY E 603	Special Topics in Engineering Analytics and Operations Research ¹	
I SY E 620	Simulation Modeling and Analysis	
I SY E 624	Stochastic Modeling Techniques	
I SY E/MATH/ OTM/STAT 632	Introduction to Stochastic Processes	
One elective I SY E course other than those listed in the Optimization and Operations Research area		3
Additional elective I SY E courses in any area		6
Total Credits		18

Distributed Focus Area

Code	Title	Credits
Choose 6 courses in at least 3 of the 4 areas listed above (Industrial Data Analytics, Applications of Industrial Engineering, Human Factors and Ergonomics, and Optimization and Operations Research)		18
Total Credits		18

Honors in Research Focus Area

Code	Title	Credits
Choose 5 courses in at least 2 of the 4 areas listed above (Industrial Data Analytics, Applications of Industrial Engineering, Human Factors and Ergonomics, and Optimization and Operations Research)		15
I SY E 468	Introduction to Industrial Engineering Research	1
I SY E 478	Research and Beyond in Industrial Engineering	1
I SY E 489	Honors in Research	3
Total Credits		20

¹ The area to which I SY E 603 Special Topics in Engineering Analytics and Operations Research will count is dependent on course topic. Please consult your advisor for details.

PROFESSIONAL ELECTIVES, COMMUNICATION SKILLS, AND LIBERAL STUDIES

Code	Title	Credits
Professional Electives ¹		
Choose courses from the following areas:		6
College of Engineering courses numbered 200 or higher		
Biological, natural, social, or physical sciences; humanities; or literature at the Intermediate or Advanced level		

At most 5 credits of I SY E 699 and/or I SY E 1 (independent study courses from other engineering subject areas can also be used)

School of Business courses numbered 200 or higher (as well as ACCT I S 100)

Communication Skills

Choose courses from the following area:		
ENGL 100	Introduction to College Composition	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
INTEREGR 397	Engineering Communication	3

Liberal Studies

Liberal Studies Electives (according to CoE requirements) ²		11
ECON 101	Principles of Microeconomics	4
Total Credits		27

¹ Professional electives may not include STAT 301 Introduction to Statistical Methods or transfer/test math elective credits for calculus.
² See CoE Liberal Studies Guidelines (p. 254).

FREE ELECTIVES

Code	Title	Credits
Choose 4 credits of Free Electives		4
Total Credits		4

MINIMUM REQUIRED CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies
8. Recognize, describe, predict and analyze systems behavior
9. Understand physiological, cognitive, and sociotechnical aspects of humans as components in complex systems design
10. Apply the techniques, skills, and modern engineering tools necessary for engineering practice, such as quality engineering, optimization, simulation, and project management

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's

General Criteria and Program Criteria for Industrial and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN INDUSTRIAL ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path our graduates may choose, we expect them to be meeting the following objectives at least three to five years after graduation:

1. Demonstrate competence in the professional practice of industrial engineering.
2. Demonstrate industrial engineering skills needed as a foundation for leadership in a career and the profession.
3. Act with professional and ethical responsibility, fostering an inclusive work environment, and appreciate the impact of proposed solutions to a global and/or societal context.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Industrial Engineering Undergraduate Program (<https://engineering.wisc.edu/programs/degrees/industrial-engineering-bs/>) website. (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

SIX SIGMA, CERTIFICATE

This certificate is designed to teach students fundamental Six Sigma principles. Six Sigma is a data-driven approach to improving business processes by increasing process quality and efficiency and is widely adopted in industry. Students may choose from a variety of courses in each of the three main areas: statistical foundations for quality engineering, contemporary industrial data analytics, and manufacturing foundation and project management. Upon completion of this certificate, students will have gained the background knowledge needed to pass the Six Sigma Green Belt certification exam administered by the American Society for Quality (ASQ).

The program is open to any degree-seeking undergraduate engineering student with a plan of study that fulfills the certificate requirements. Applications can be submitted at any time, but students are encouraged to apply early to ensure a smooth and successful completion of the program.

HOW TO GET IN

HOW TO GET IN

All current undergraduate students in the College of Engineering are eligible to complete the Certificate in Six Sigma. Students should submit an online declaration form at <https://engineering.wisc.edu/programs/certificates/six-sigma/declaration> (<https://engineering.wisc.edu/programs/certificates/six-sigma/declaration/>).

REQUIREMENTS

REQUIREMENTS

- Students must complete certificate courses with a GPA of 2.000 or higher.
- Courses completed on a pass/fail or audit basis will not count toward these requirements.

Code	Title	Credits
Statistical foundations for quality engineering		
Choose one:		3
I SY E/M E 512	Inspection, Quality Control and Reliability	
I SY E 612	Information Sensing and Analysis for Manufacturing Processes

I SY E/M E 641	Design and Analysis of Manufacturing Systems	
Elective		
Choose one additional course from any category above		3
Total Credits		12

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand and apply the core Six Sigma methodologies (DMAIC: Define, Measure, Analyze, Improve, Control) to effectively solve real-world problems.
2. Demonstrate an understanding of how Six Sigma enhances process efficiency and reduces variation.

3. Collect, analyze, and interpret data using statistical tools to monitor processes and inform decision-making.
4. Gain experience in managing engineering projects from problem definition through solution implementation and control.
5. Develop the ability to lead and collaborate effectively within cross-functional teams.

MATERIALS SCIENCE AND ENGINEERING

Advances in technology are closely linked to the materials that people can design, manipulate, and produce. How we live is connected to our abilities to process materials and manufacture products; to develop and design nontraditional as well as traditional materials for an increasingly broad range of industries; and to research and develop high-performance materials for practical applications in coming decades. The materials that change the way we live may be the next generation of superalloys for applications in extreme conditions such as high-temperature or highly corrosive environments; new materials for application in energy generation, storage, and transmission; organic and inorganic materials for use and integration in applications ranging from electronics to medicine; or new materials systems yet to be developed for the ever-increasing needs of our society.

Materials experts find employment in a broad range of industries and may practice experimental, computational, or theoretical materials science and engineering, or all of these in combination. The undergraduate curriculum leads to the Bachelor of Science Degree in Materials Science and Engineering. The curriculum is designed to prepare students with the foundation needed to thrive in broad and rapidly changing industries that are based on materials. It also provides substantial flexibility, through electives and with the assistance of a materials science and engineering faculty advisor, for tailoring to students' specific interests within the materials field. Science, engineering, teamwork, broad thinking, and communication skills all are integral parts of the curriculum. Graduates are well prepared for careers in industry or for graduate studies.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Materials Science and Engineering, BS (p. 326)

MATERIALS SCIENCE AND ENGINEERING, BS

Students who aspire to discover new materials that will improve our quality of life, work with chemistry, physics and engineering principles, and learn in a hands-on environment with faculty will thrive in the Department of Materials Science and Engineering. Students in MS&E are pioneers, making materials better through innovation. In MS&E, students aren't just hearing about revolutionary materials – They are the ones making them stronger, faster, lighter, smaller and better.

These materials make the world more equitable, reliable and sustainable, improving fuel efficient vehicles, jet engine performance, integrated

circuits, green energy, electronics and more. Impacting these areas is possible with advanced tools and technology. Atomic resolution microscopes, analytical instruments, computer-based modeling and data science support MS&E's laboratory coursework and research.

Course structure and camaraderie are other factors that set MS&E apart. Instead of teaching from large lecture halls, MS&E prioritizes small class sizes and hands-on laboratories. Doing so establishes a culture where students are more than a number, where faculty know each of them by name. This tight-knit feel fuels results.

Earning a Bachelors of Science in Materials Science and Engineering opens doors. MS&E graduates have a 95% job placement rate, taking on a variety of roles. Aerospace engineer, analytical chemist, design engineer, research scientist and quality manager are just a few titles that MS&E graduates hold. Working for companies across the globe, MS&E graduates continue carrying out the Wisconsin Idea far beyond Madison.

The department is happy to welcome students who are interested in MS&E's principles, coursework, and impact areas. Additional questions about the undergraduate program can be directed toward MS&E's Associate Chair of Undergraduate Studies Mike Arnold (michael.arnold@wisc.edu). (<https://guide.wisc.edu/undergraduate/engineering/materials-science-engineering/materials-science-engineering-bs/michael.arnold@wisc.edu>)

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

LIBERAL STUDIES

Complete 16 credits of liberal studies requirements (p. 254).

- Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following sub-requirements:

- A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectareas/>) (the description before the course number). At least one of these two courses must be designated as above the elementary level (I, A, or D).
- A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for sub-requirement 1 above).
- At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy sub-requirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not

have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

FREE ELECTIVES

Select 3-4 elective credits.

- The above subject requirements can be met with 123 credits of UW courses. Students must complete 128 credits of coursework to earn the B.S. in materials science and engineering. The 3-4 elective credits may be earned by choosing elective courses that carry more credits than the requirement's minimum credit load or by taking any additional coursework of the student's choice.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students

through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW–Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Materials (1), Metallurgical (2), Ceramics (3), and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN MATERIALS SCIENCE AND ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path our graduates may choose, we expect them to be meeting the following objectives at least three to five years after graduation:

1. **Skills and Tools.** Graduates will be applying the tools and skills acquired during their undergraduate experience either in post-graduate educational programs or as employees in materials-related industries.
2. **Early Career Growth.** Graduates will have experienced professional growth in their chosen post-baccalaureate pursuits, for example, through acquisition of advanced degrees or advancement in employment rank.
3. **Professional Citizenship.** Graduates will have demonstrated awareness of contemporary issues in technology and society and ethical responsibility.

4. **Life-Long Learning:** Graduates will have demonstrated a continuing commitment to learning.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Materials Science and Engineering Undergraduate Program website (<https://engineering.wisc.edu/programs/degrees/materials-science-and-engineering-bs/>). (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

MECHANICAL ENGINEERING

The Department of Mechanical Engineering (ME) within the University of Wisconsin–Madison College of Engineering is the home of two undergraduate degree programs (mechanical engineering and engineering mechanics, including an option in aerospace engineering) and two graduate degree programs (mechanical engineering and engineering mechanics). The department's faculty conducts research in the areas of advanced manufacturing, biomechanics, computation & data-driven engineering, energy systems, solid & fluid mechanics, and robotics, controls, & sensing. This combination of topics fosters synergies with respect to polymers, mechatronics, aerospace, thermal, materials, additive manufacturing, and fluids. The mechanical engineering undergraduate program has been ranked in the top twelve, and the mechanical engineering graduate program has been ranked in the top seven, among public universities, according to U.S. News and World Report 2022 rankings.

ENGINEERING MECHANICS, BS

With a degree in engineering mechanics, our graduates design, measure, and analyze complex structures in everything from networks of human cells and novel materials constructed at the nanoscale to roller coasters and spacecraft. Engineering mechanics is the home of aerospace engineering (<https://guide.wisc.edu/undergraduate/engineering/engineering-physics/engineering-mechanics-bs/engineering-mechanics-aerospace-engineering-bs/>) at UW–Madison. Our curriculum prepares students for careers in a wide variety of fields, including health, clean energy, space exploration, and many more.

Engineering mechanics is the study of forces and the resulting deformations, accelerations, motions, vibrations, and other responses they cause. It forms the foundation of aerospace, mechanical or civil engineering, and is fundamental to important parts of biomedical engineering, chemical engineering, materials science, and other engineering disciplines.

Graduates of engineering mechanics apply their expertise in a variety of areas.

Wind turbines, wave power systems, transmission towers, and pipelines all respond to their environments in different ways. The safety and performance of these systems depend on a detailed understanding of how the environmental forces lead to deformations and vibrations that might cause failure. Principles of aerospace engineering are important when wind and water are involved as their flows make the analysis even more challenging, requiring sophisticated mathematical and analytical tools.

At slightly smaller scales, engineering mechanics is fundamental to the design and innovation of vehicles of every type, from sports cars to tractors to aircraft and satellites. Understanding engineering mechanics principles can provide insight to expand the way these vehicles are used while making their operation more sustainable. For some vehicles, aerospace engineering sheds light on their aerodynamic interaction with their environment, as well as the propulsion systems and complexity of controlling vehicles in flight. Landing a rover on Mars requires engineering mechanics to design the rover itself as well as the delivery system.

Innovations in engineering mechanics allow many of the products in our everyday lives to be made lighter, stronger, or cheaper by carefully understanding how they perform and when they fail due to the forces from the outside. In addition to enabling new functionality and aesthetic design, these modifications open the door for improved energy efficiency, selection of green materials, and longer lifetimes, all with broader societal benefits.

Modern technology allows us to fabricate machines at the microscopic scale with moving parts that are only visible under a microscope. Understanding how these micromachines respond to forces from each other or their environment is important to ensure that they function correctly. At this same scale, we can build novel materials whose properties depend on the microscopic structures that define them rather

than their chemical composition. Engineering mechanics allows us to design these materials with properties that are not found in nature.

Our curriculum starts with a rich physics and math base to prepare our graduates for advanced analytical and computational skills that they will apply to this range of technologies. We transition from these fundamentals to engineering problem-solving approaches that can be applied to increasingly complex systems, while students build skills in computational modeling and simulation.

As one of the smaller engineering majors, we focus on building a community that supports our students' success during their degree and as they launch their careers. Many students participate in undergraduate research across one of the biggest research portfolios in the College of Engineering. An alumni network across industry sectors – from John Deere to Tesla to Boeing to SpaceX – provides support for students to find internships and launch their careers.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee

advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth–Humanities/Literature/Arts: 6 credits • Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth–Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

ENGINEERING MECHANICS CURRICULUM

The following curriculum applies to students admitted to the engineering mechanics degree program.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics and Statistics ¹	22
	Science ¹	10
	Engineering Science	28
	Engineering Mechanics Core	31
	EMA Electives	9
	Technical Electives	5
	Communication Skills	8
	Liberal Studies	15
Total Credits		128

¹ If the Mathematics and Statistics and the Science requirements are fulfilled with fewer than 30 credits combined, additional math/science credits will be needed to meet the math/science auxiliary credit condition.

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
MATH 321	Applied Mathematical Analysis 1: Vector and Complex Calculus	3
STAT 324	Introduction to Statistics for Science and Engineering	3
Total Credits		22

SCIENCE

Code	Title	Credits
Select one of the following:		5-9
CHEM 109	Advanced General Chemistry ¹	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
PHYSICS 202	General Physics	5
Total Credits		10-14

¹ It is recommended that students take CHEM 109 Advanced General Chemistry (5 cr). However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

ENGINEERING SCIENCE

Code	Title	Credits
E M A 200	Introduction to Mechanics and Aerospace ¹	3
or M E 201	Introduction to Mechanical Engineering	
M E 231	Geometric Modeling for Design and Manufacturing	3
COMP SCI 220	Data Science Programming I ²	4
M S & E 350	Introduction to Materials Science	3
M E 361	Thermodynamics	3
M E 363	Fluid Dynamics	3
or CIV ENGR 310	Fluid Mechanics	
M E 364	Elementary Heat Transfer	3
E C E 376	Electrical and Electronic Circuits	3-4
or PHYSICS 321	Electric Circuits and Electronics	
or E C E 230	Circuit Analysis	
Computing Elective (Select One)		3
E M A/E P 471	Intermediate Problem Solving for Engineers (preferred, only available in the Spring)	
or COMP SCI 41	Introduction to Numerical Methods	
or M E 459	Computing Concepts for Applications in Engineering	
or COMP SCI 32	Data Science Programming II	
or E P/ E M A 476	Introduction to Scientific Computing for Engineering Physics	

Total Credits **28-29**

¹ E M A 200 or M E 201 are preferred introduction to engineering options. E M A 200 is offered in the fall only. M E 201 can be taken in the first or second semester. If a student begins in another engineering major, other introduction to engineering courses can count for the introduction to engineering requirement.

² COMP SCI 220 Data Science Programming I is the preferred required computer science course. If a student needs to take COMP SCI 300 Programming II to satisfy requirements for another major or certificate, COMP SCI 300 Programming II can count for this computer science requirement.

ENGINEERING MECHANICS CORE

Code	Title	Credits
E M A 201	Statics (with a grade of C or better) ¹	3
E M A 202	Dynamics	3
E M A 303	Mechanics of Materials	3
E M A/M E 307	Mechanics of Materials Lab	1
E M A 405	Practicum in Finite Elements	3
E M A 469	Design Problems in Engineering	3
E M A 506	Advanced Mechanics of Materials I	3
<i>Experimental Mechanics Elective (Select One)</i>		3
E M A/M E 540	Experimental Vibration and Dynamic System Analysis	
E M A 611	Advanced Mechanical Testing of Materials	
E M A 522	Aerodynamics Lab	

E M A 521	Aerodynamics	3
or M E 563	Intermediate Fluid Dynamics	
E M A 542	Advanced Dynamics	3
or E M A 545	Mechanical Vibrations	
E M A 569	Senior Design Project	3
Total Credits		31

¹ Students may substitute PHYSICS 201 General Physics General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.

ENGINEERING MECHANICS AND AEROSPACE ENGINEERING ELECTIVES

Code	Title	Credits
Select 9 credits from any E M A course numbered 500 and above		9

TECHNICAL ELECTIVES

Code	Title	Credits
Select 5 credits from the following:		5

E M A 1 Cooperative Education Program (no more than 3 credits)

Courses numbered 300+ in the College of Engineering except for E P D/INTEREGR

Up to 3 credits of independent study such as E M A 599; independent study from other engineering subjects may be approved on an individual basis

Courses numbered 300+ MATH, PHYSICS, COMP SCI, STAT (except STAT 301), ASTRON, MED PHYS, and CHEM departments

PHYSICS 205 Modern Physics for Engineers
or PHYSICS 241 Introduction to Modern Physics

Students may also propose any class that they feel will benefit their education path with pre-requisite of two physics or calculus classes. For these courses the advisor will review the request and if approved, recommend a DARS substitution.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
INTEREGR 275	Technical Presentations	2
INTEREGR 397	Engineering Communication	3
Total Credits		8

LIBERAL STUDIES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 254) ¹		15
Total Credits		15

- ¹ Students must take 15 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following sub-requirements:
- 1. A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectareas/>) (the description before the course number). At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 - 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 - 3. At least 3 credits in courses designated as ethnic studies (lower case “e” in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. *Note:* Some courses may have “e” designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

TOTAL CREDITS: 128

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations. (<https://guide.wisc.edu/undergraduate/engineering/policiesandregulationstext>)

NAMED OPTIONS IN ENGINEERING MECHANICS

Students may elect to declare a named option under the Engineering Mechanics BS. The named option in Aerospace Engineering can be declared as of Fall 2020. The named option in Astronautics is suspended as of Summer 2020; the last term to earn the named option is Summer 2026.

View as listView as grid

- **ENGINEERING MECHANICS: AEROSPACE ENGINEERING (P. 336)**
- **ENGINEERING MECHANICS: ASTRONAUTICS (P. 339)**

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn a Honors in Research designation on their transcript and diploma by completing 6 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- 2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- 3. an ability to communicate effectively with a range of audiences
- 4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- 5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- 6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- 7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Instructional Computing Lab (in Computer Aided Engineering)
Research Computing Lab

SCHOLARSHIPS

The College of Engineering has several types of scholarships available to incoming and current engineering students. Students should explore the Wisconsin Scholarship Hub (WiSH), where you can apply to and find specific information on scholarships at UW–Madison. You can use WiSH to find engineering scholarships available through the College of Engineering; the Inclusion, Equity, and Diversity in Engineering Student Center; and other UW and external organizations. (Please note: students must be currently enrolled in, or have applied to, the College of Engineering to be considered for engineering scholarships.) To be matched with these available scholarship funds an application is required and the system is typically open to students in the spring of each year. Questions on the process can be directed to: coescholarships@engr.wisc.edu. Additional financial assistance may be awarded through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 E. Campus Mall Room 9701, 608-262-3060).

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Engineering Mechanics and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN ENGINEERING MECHANICS

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path our graduates may choose, we expect them to be meeting the following objectives at least three to five years after graduation:

- 1. Exhibit strong performance and continuous development in problem-solving, leadership, teamwork, and communication, initially applied to engineering mechanics, and demonstrating an unwavering commitment to excellence.
- 2. Demonstrate continuing commitment to, and interest in their training and education, as well as those of others.
- 3. Transition seamlessly into a professional environment and make continuing, well-informed career choices.
- 4. Contribute to their communities.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Engineering Mechanics Undergraduate Program website. (<https://engineering.wisc.edu/programs/degrees/engineering-mechanics-aerospace-bs/>) (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

ENGINEERING MECHANICS: AEROSPACE ENGINEERING

Engineering mechanics is the home of aerospace engineering at UW–Madison. Some of the most exciting innovations in air and space travel require understanding of the engineering mechanics principles

at the heart of this major. Whether there are humans in the cockpit or remote-controlled drones, the interaction of an aircraft with its surroundings results in deformation, vibration, and dynamic motions that are all explained by engineering mechanics. Even without the atmosphere experienced by aircraft, spacecraft, and vehicles that explore distant planets must also withstand a variety of forces and be reliable in environments where repair may not be possible. In both cases, there is a premium on reducing weight and expanding capabilities. This makes aerospace engineering a natural extension of engineering mechanics. Following the same fundamental courses as our engineering mechanics major, students in the aerospace engineering option will apply their education in structural analysis, material science, advanced dynamics, and vibrations to specific courses on aerodynamics, flight dynamics, orbital mechanics, and propulsion. A highlight of this program is the aerodynamics laboratory where students conduct field experiments on the UW–Madison wind tunnel. Talk to your academic advisor about declaring this option.

REQUIREMENTS

REQUIREMENTS

The following curriculum applies to students admitted to the engineering mechanics degree program and declare the aerospace option.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics and Statistics ¹	22
	Science ¹	10
	Engineering Science	28
	Engineering Mechanics/Aerospace Engineering Core	40
	Technical Electives	5
	Communication Skills	8
	Liberal Studies	15
Total Credits		128

¹ If the Mathematics and Statistics and the Science requirements are fulfilled with fewer than 30 credits combined, additional math/science credits will be needed to meet the math/science auxiliary credit condition.

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
MATH 321	Applied Mathematical Analysis 1: Vector and Complex Calculus	3
STAT 324	Introduction to Statistics for Science and Engineering	3
Total Credits		22

SCIENCE

Code	Title	Credits
Select one of the following:		5-9
CHEM 109	Advanced General Chemistry ¹	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
PHYSICS 202	General Physics	5
Total Credits		10-14

¹ It is recommended that students take CHEM 109 Advanced General Chemistry (5 cr). However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

ENGINEERING SCIENCE

Code	Title	Credits
E M A 200	Introduction to Mechanics and Aerospace	3
or M E 201	Introduction to Mechanical Engineering	
M E 231	Geometric Modeling for Design and Manufacturing	3
COMP SCI 220	Data Science Programming I ¹	4
M E 361	Thermodynamics	3
M E 363	Fluid Dynamics	3
or CIV ENGR 310	Fluid Mechanics	
E C E 376	Electrical and Electronic Circuits	3
or PHYSICS 321	Electric Circuits and Electronics	
or E C E 230	Circuit Analysis	
M E 364	Elementary Heat Transfer	3
M E 446	Introduction to Feedback Control	3
or E C E 332	Feedback Control Systems	
Computing Elective (select one)		3
E M A/E P 471	Intermediate Problem Solving for Engineers (preferred, only offered in the Spring)	
or COMP SCI 41:	Introduction to Numerical Methods	
or M E 459	Computing Concepts for Applications in Engineering	
or COMP SCI 32:	Data Science Programming II	
or E P/ E M A 476	Introduction to Scientific Computing for Engineering Physics	
Total Credits		28

¹ COMP SCI 220 Data Science Programming I is the preferred required computer science course. If a student needs to take COMP SCI 300 Programming II to satisfy requirements for another major or certificate, COMP SCI 300 Programming II can count for this computer science requirement.

ENGINEERING MECHANICS/AEROSPACE ENGINEERING CORE

Code	Title	Credits
E M A 201	Statics (with a grade of C or better)	3

E M A 202	Dynamics	3
E M A 303	Mechanics of Materials	3
E M A/M E 307	Mechanics of Materials Lab	1
E M A 405	Practicum in Finite Elements	3
E M A 469	Design Problems in Engineering	3
E M A 506	Advanced Mechanics of Materials I	3
Experimental Mechanics Elective (select one)		3
E M A/M E 540	Experimental Vibration and Dynamic System Analysis	
E M A 611	Advanced Mechanical Testing of Materials	
E M A 522	Aerodynamics Lab	
E M A 521 or M E 563	Aerodynamics Intermediate Fluid Dynamics	3
E M A 542	Advanced Dynamics	3
E M A 545	Mechanical Vibrations	3
E M A 569	Senior Design Project	3
Spacecraft & Structural Dynamics Elective (select one)		3
E M A/ ASTRON 550	Astroynamics	
E M A 610	Structural Finite Element Model Validation	
E M A 642	Satellite Dynamics	
Aerospace Fluid Mechanics Elective (select one)		3
E M A 523	Flight Dynamics and Control	
E M A 524	Rocket Propulsion	
Total Credits		40

¹ Students may substitute PHYSICS 201 General Physics (5 cr) for E M A 201 Statics (3 cr), with the approval of their advisor.

TECHNICAL ELECTIVES

Code	Title	Credits
Choose five credits from:		5
E M A 1	Cooperative Education Program (no more than 3 credits)	
Courses numbered 300+ in the CoE except for E P D/ INTEREGR		
Up to 3 credits of independent study such as E M A 599; independent study from other engineering subjects may be approved on an individual basis		
Courses numbered 300+ MATH, PHYSICS, COMP SCI, STAT (except STAT 301), ASTRON, MED PHYS, and CHEM departments		
PHYSICS 205	Modern Physics for Engineers	
or PHYSICS 241	Introduction to Modern Physics	
Students may also propose any class that they feel will benefit their education path with pre-requisite of two physics or calculus classes. For these courses the advisor will review the request and if approved, recommend a DARS substitution.		
Total Credits		5

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
INTEREGR 275	Technical Presentations (was EPD 275)	2
INTEREGR 397	Engineering Communication	3
Total Credits		8

LIBERAL STUDIES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 254) ¹		15
Total Credits		15

- ¹ Students must take 15 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectareas/>) (the description before the course number). At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. *Note:* Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>). (<https://intranet.engineering.wisc.edu/undergraduate-students/undergraduate-rules-and-regulations/>)

HONORS IN UNDERGRADUATE RESEARCH

Qualified undergraduates may earn an Honors in Research designation on their transcript and diploma by completing 6 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

Total Credits 128

¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

² E M A 200 or M E 201 are preferred introduction to engineering options. E M A 200 is offered in the fall only. M E 201 can be taken in

the first or second semester. If a student begins in another engineering major, other introduction to engineering courses can count for the introduction to engineering requirement.

- ³ Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
- ⁴ After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.
- ⁵ E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540 Experimental Vibration and Dynamic System Analysis or E M A 522 Aerodynamics Lab. Note that E M A/M E 540 Experimental Vibration and Dynamic System Analysis is typically offered in the fall. E M A 611 Advanced Mechanical Testing of Materials and E M A 522 Aerodynamics Lab are typically offered in the spring.
- ⁶ M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 Intermediate Fluid Dynamics is typically offered in the spring semester only.
- ⁷ E M A 523 Flight Dynamics and Control is typically offered in the Spring semester only. E M A 524 Rocket Propulsion is typically offered in the Fall semester only.

ENGINEERING MECHANICS: ASTRONAUTICS

Admissions to the Engineering Mechanics: Astronautics Named Option have been suspended as of fall 2020 and will be discontinued as of fall 2026. If you have any questions, please contact the department (<https://engineering.wisc.edu/departments/mechanical-engineering/>).

The astronautics option in engineering mechanics prepares students for design, development, and research, with an emphasis on applied mathematics and astronautics. Its purpose is to improve and expand the educational opportunities of students at the university who wish to pursue careers in astronautics and space-related areas. This is accomplished by providing in depth exposure to course sequences in astrodynamics, orbital mechanics, and flight dynamics, as well as a core curriculum of structural and material analysis, advanced dynamics, and vibrations. The program requires a minimum of 128 credits.

REQUIREMENTS

Total Credits 128

¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

² Students who were not able to take INTEREGR 170 (<https://guide.wisc.edu/search/?P=INTEREGR%20170>) Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.

³ Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.

⁴ After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.

⁵ E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540 Experimental Vibration and Dynamic System Analysis or E M A/M E 570 Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that E M A/M E 540 and E M A/M E 570 are typically offered in the fall. E M A 611 and E M A 522 are typically offered in the spring.

⁶ M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 is offered in the spring semester only.

⁷ Before Fall 2020, E M A 524 Rocket Propulsion was offered as E M A 601 Special Topics in Engineering Mechanics with the topic of Rocket

Propulsion. It is offered in the fall semester only. E M A 523 Flight Dynamics and Control is offered in the Spring semester only.

ENGINEERING THERMAL ENERGY SYSTEMS, CERTIFICATE

Efficient use of thermal energy is an increasingly popular area of interest for UW–Madison engineering students and employers. The objective of the certificate in engineering thermal energy systems program is to provide students in the College of Engineering with an organized set of courses that will improve their capacity to analyze and design innovative thermal energy systems. These systems include, but are not limited to, energy conversion systems and their fuels, refrigeration, combustion, and solar energy. Thermal energy systems either employ thermal energy directly or convert thermal energy to other energy forms.

HOW TO GET IN

HOW TO GET IN

Students who wish to apply for admission into this certificate program will need to complete a major/certificate declaration form obtained from the student services office. Once approved by the student services office and the student's faculty advisor, the form will be forwarded to the Dean's Office to be added to the student record. The student services office will, in conjunction with the student's advisor and curriculum committee chair, assist the student in selecting appropriate courses that fulfill certificate requirements. If a Special student does not have a home department in the College of Engineering, the Department of Mechanical Engineering will advise and sponsor the student in this program. To receive the certificate, the applicant must achieve a GPA of 3.0 or higher in the proposed courses listed on the completed form.

Submit the completed Declaration of Intent Form (<https://go.wisc.edu/u9x8g2/>) to student services.

REQUIREMENTS

REQUIREMENTS

The certificate, geared toward UW–Madison undergraduate students, requires a total of 18 completed credits. Up to 9 of the credits can be thermal-energy-related courses that are required in the student's undergraduate major. The additional 9 credits must be selected from an assortment of approved elective courses in the College of Engineering.

COURSES

Courses not on this list must be specifically approved by the certificate curriculum committee.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Follow a directed sequence of technical elective courses specializing in thermal energy systems.
2. Synthesize knowledge gained from a curriculum that focuses on applying fundamentals of engineering to the analysis of thermal energy systems.
3. Be prepared for the job market with a solid background in the energy field.

MANUFACTURING ENGINEERING, CERTIFICATE

OVERVIEW

Are you a student interested in manufacturing? Do you like drawing on a variety of skills and knowledge to solve complex problems? If so, you may wish to consider this certificate.

Because manufacturing itself is complex and broad, manufacturing engineers apply many engineering principles and work in a multidisciplinary world. This certificate allows students to emphasize either manufacturing systems or manufacturing processes—or, they can choose to spread courses evenly across both. Through this certificate, students will gain an understanding of these two areas of manufacturing. Undergraduates in industrial and systems engineering or mechanical engineering can pursue this certificate without adding time to the degree.

HOW TO GET IN

HOW TO GET IN ENROLLMENT

This undergraduate certificate is open to all undergraduate students at the University of Wisconsin–Madison. Mechanical Engineering and Industrial & Systems Engineering students can complete this certificate without adding time to degree.

DECLARATION

Declaring the undergraduate Certificate in Manufacturing Engineering requires:

- Undergraduate standing at UW–Madison
- Cumulative GPA (at UW–Madison) greater than or equal to 3.0
- Intro to Machining with additional CNC 1 training complete (College of Engineering D (<https://di.engr.wisc.edu/training/>)esign Innovation Lab (<https://making.engr.wisc.edu/>) at ECB)
- Completion of the declaration form
- Meeting with a faculty advisor

Students must complete a declaration form (<https://go.wisc.edu/ame0j3/>), obtain the required signatures, and bring the form to one of the academic advisors for the Department of Mechanical Engineering located in 1410 Engineering Drive, Suite 170. The form will be used to ensure that students have completed the Intro to Machining with additional CNC 1

training complete in the College of Engineering Design Innovation Lab at ECB, meet the GPA requirement for declaration, meet the course grade requirement for courses already completed, and list courses that are planned in order to satisfy the certificate program. The form will contain fields for the following information:

- Study plan (courses that have been taken, are being taken, and plan to take)
 - Core courses
 - Elective courses
 - Grades for any courses that have already been taken
 - When future courses will be taken
- Cumulative GPA at time of declaration
- Expected graduation date
- Major
- Signature from a key program faculty member indicating that the student meets the declaration requirements and has discussed the study plan with the faculty member

COMPLETION

In order to successfully complete the undergraduate certificate in manufacturing engineering, students must:

- Have declared the certificate
- Maintain a cumulative GPA of 3.0 or greater for the courses taken for the certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.
- Have received a grade of BC or higher in all courses taken for the certificate. If a course is repeated, the highest grade received in the course is used for this criteria.

REQUIREMENTS

REQUIREMENTS

The core courses were chosen to include three manufacturing process-focused courses as well as two manufacturing systems-focused courses. A manufacturing engineer must be multidisciplinary because of the complex and broad nature of manufacturing as an application of many engineering principles. The objective of the core course requirements is to provide students with basic understanding of manufacturing systems and basic understanding of manufacturing processes.

The certificate requires a total of 18 credits.

Code	Title	Credits
Core Courses		
Complete 9 credits with a grade of BC or better:		9
M S & E 332	Macroprocessing of Materials	
M E 310	Manufacturing: Polymer Processing and Engineering	
M E 311	Manufacturing: Metals and Automation ¹	
I SY E 315	Production Planning and Control	
I SY E 415	Introduction to Manufacturing Systems, Design and Analysis ¹	
Elective Courses		

Complete 9 credits from any of the following Elective Courses with a grade of BC or better, with at least one course from each of the two categories:

9

1. Mechanical and Materials Engineering Electives

M E 311	Manufacturing: Metals and Automation ¹
M E 417	Transport Phenomena in Polymer Processing
M E 418	Engineering Design with Polymers
M E 419	Fundamentals of Injection Molding
M E 429	Metal Cutting
M E 437	Advanced Materials Selection
M E/E C E 439	Introduction to Robotics
M E 446	Introduction to Feedback Control
M E 447	Computer Control of Machines and Processes
M E 449	Redesign and Prototype Fabrication
M E 514	Polymer Additive Manufacturing
M E 535	Computer-Aided Geometric Design
M E/E C E 576	Printed and Flexible Electronics: Manufacturing, Devices, and Applications
M E 601	Special Topics in Mechanical Engineering (Advanced Automation Integration)
M S & E 332	Macroprocessing of Materials ¹
M S & E 333	Microprocessing of Materials
M S & E 401	Special Topics in Materials Science and Engineering (Topic: Metal Additive Manufacturing or Topic: Alloy Design)
M S & E 461	Advanced Metal Casting
M S & E 465	Fundamentals of Heat Treatment

2. Industrial & Systems Engineering Electives

I SY E 412	Fundamentals of Industrial Data Analytics
I SY E 415	Introduction to Manufacturing Systems, Design and Analysis ¹
I SY E/M E 510	Facilities Planning
I SY E/M E 512	Inspection, Quality Control and Reliability
I SY E/B M E 564	Occupational Ergonomics and Biomechanics
I SY E 575	Introduction to Quality Engineering
I SY E 604	Special Topics in Manufacturing and Supply Chain Management
I SY E 605	Computer Integrated Manufacturing
I SY E 615	Production Systems Control
I SY E/M E 641	Design and Analysis of Manufacturing Systems
I SY E/M E 643	Performance Analysis of Manufacturing Systems

Total Credits

18

¹ If M E 311 Manufacturing: Metals and Automation, M S & E 332 Macroprocessing of Materials and/or I SY E 415 Introduction to Manufacturing Systems, Design and Analysis are taken as part of the Core Course Requirement, then they cannot also count as an elective.

No exceptions or substitutions to the core courses are allowed.

Elective courses not listed must be specifically approved by the curriculum committee of the department teaching the course. The request must include the course number, course name, name and contact information for the professor currently teaching or planning to teach the course; syllabus; and which category it should be listed under. Courses that are approved by the curriculum committee of the department teaching the course must be sent to the certificate program director. Only formal courses will be considered.

Only courses taken for a letter grade count toward this certificate. Only courses in which a grade of BC or better is received count toward this certificate. Courses taken at other institutions may be counted toward this certificate if they have been identified as equivalent through the existing process. At least 50% of the courses (i.e., three courses) for this certificate must be earned in residence on the UW–Madison campus.

Students must maintain a cumulative GPA of 3.0 or better for the courses taken for this certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate knowledge of the fundamental concepts of manufacturing discrete parts.
2. Utilize skills related to manufacturing engineering.
3. Communicate effectively in the methods related to manufacturing engineering.
4. Generate solutions to problems that may arise in manufacturing engineering.

MECHANICAL ENGINEERING, BS

The Department of Mechanical Engineering (ME) within the University of Wisconsin–Madison College of Engineering is the home of two undergraduate degree programs (mechanical engineering and engineering mechanics, including an option in aerospace engineering) and two graduate degree programs (mechanical engineering and engineering mechanics). The department's faculty conducts research in the areas of advanced manufacturing, biomechanics, computation & data-driven engineering, energy systems, solid & fluid mechanics, and robotics, controls, & sensing. This combination of topics fosters synergies with

respect to polymers, mechatronics, aerospace, thermal, materials, additive manufacturing, and fluids. The mechanical engineering undergraduate program has been ranked in the top twelve, and the mechanical engineering graduate program has been ranked in the top seven, among public universities, according to U.S. News and World Report 2022 rankings.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth–Humanities/Literature/Arts: 6 credits
	• Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth–Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the Mechanical Engineering degree program.

Code	Title	Credits
	Mathematics and Statistics	19
	Basic Science	13-14
	Non-Mechanical Engineering	6
	Mechanical Engineering Core	54
	Technical Electives	12
	Math/Science Electives	3
	Communication Skills	6

Liberal Studies	15
Total Credits	128

MATHEMATICS/STATISTICS¹

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations ²	3
STAT 324	Introduction to Statistics for Science and Engineering	3
or I SY E 210	Introduction to Industrial Statistics	
Total Credits		19

¹ All students must have the equivalent of the above courses. If the above requirement is fulfilled with fewer than 19 credits, additional math/science credits may be needed to meet the math/science auxiliary credit condition.

Transfer students may fulfill the statistics requirement with other statistics courses having a calculus prerequisite and the approval of the mechanical engineering department.

² The MATH 320 requirement may also be satisfied by combining MATH 319 and MATH 340. In that case, MATH 340 may count towards Math/Science elective or non-ME technical elective requirements.

BASIC SCIENCE¹

Code	Title	Credits
Select one of the following:		4-5
CHEM 103	General Chemistry I	
or CHEM 104	General Chemistry II	
or CHEM 109	Advanced General Chemistry	
COMP SCI 220	Data Science Programming I ²	4
PHYSICS 202	General Physics ³	5
Total Credits		13-14

¹ Basic science courses, excluding Computer Science courses, are included in the math/science auxiliary credit condition.

² COMP SCI 220 Data Science Programming I is the preferred required computer science course. If a student needs to take COMP SCI 300 Programming II to satisfy requirements for another major or certificate, COMP SCI 300 Programming II can count for the computer science requirement.

³ Students following the normal M E course sequence need not take PHYSICS 201 General Physics to satisfy the prerequisites for PHYSICS 202 General Physics.

NON-MECHANICAL ENGINEERING

Code	Title	Credits
E M A 201	Statics (with a grade of C or better)	3
M S & E 350	Introduction to Materials Science	3
Total Credits		6

MECHANICAL ENGINEERING CORE

Code	Title	Credits
E M A 202	Dynamics (with a grade of C or better)	3
E M A 303	Mechanics of Materials (with a grade of C or better)	3
M E 201	Introduction to Mechanical Engineering ¹	3
M E 231	Geometric Modeling for Design and Manufacturing	3
M E/E M A 307	Mechanics of Materials Lab	1
M E 310	Manufacturing: Polymer Processing and Engineering	3
M E 311	Manufacturing: Metals and Automation	3
M E 331	Computer-Aided Engineering	3
M E 340	Dynamic Systems	3
M E 342	Design of Machine Elements	3
M E 351 & M E 352	Interdisciplinary Experiential Design Projects I and Interdisciplinary Experiential Design Projects II	6
M E 361	Thermodynamics (with a grade of C or better)	3
M E 363	Fluid Dynamics	3
M E 364	Elementary Heat Transfer	3
M E 368	Engineering Measurements and Instrumentation	4
M E 370	Energy Systems Laboratory	3
M E 376	Introduction to Mechatronics	4
Total Credits		54

¹ M E 201 Introduction to Mechanical Engineering is the preferred introduction to engineering course. If a student begins in another engineering major, other introduction to engineering courses can count for the introduction to engineering requirement.

TECHNICAL ELECTIVES

Code	Title	Credits
The mechanical engineering curriculum requires a total of 12 credits of technical electives. A minimum of 3 of those 12 credits must be from formal M E courses numbered 400 and higher. A formal course is defined as a class that meets regularly in a lecture format to study a selected topic. The educational mission is assisted with homework and exams. Formal courses include online courses but do not include seminar, survey, independent study, research, topics, or similar courses.		12
Additional technical electives may include formal courses in engineering, mathematics, physics, chemistry, statistics, and computer science courses numbered 400 and higher. Course choices may impact the math/science auxiliary credit condition. INTEREGR and E P D courses are limited to those listed below. The following courses are also accepted as technical electives:		
ANAT&PHY 335	Physiology	5

BSE 364	Engineering Properties of Food and Biological Materials	3
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE 320	Introductory Transport Phenomena	4
CBE 326	Momentum and Heat Transfer Operations	3
CHEM 341	Elementary Organic Chemistry	3
CHEM 343	Organic Chemistry I	3
CHEM 345	Organic Chemistry II	3
CIV ENGR 311	Hydrosience	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/ G L E 330	Soil Mechanics	3
CIV ENGR 340	Structural Analysis I	3
CIV ENGR 370	Transportation Engineering	3
CIV ENGR 392	Building Information Modeling (BIM)	3
CIV ENGR 415	Hydrology	3
CNSR SCI 555	Consumer Design Strategies & Evaluation	3
CNSR SCI 657	Consumer Behavior	3
COMP SCI 300	Programming II	3
COMP SCI 320	Data Science Programming II	4
COMP SCI/ E C E 354	Machine Organization and Programming	3
DS 341	Design Thinking for Transformation	3
E C E 320	Electrodynamics II	3
E C E 330	Signals and Systems	3
E C E 340	Electronic Circuits I	3
E C E 342	Electronic Circuits II	3
E C E/ COMP SCI 352	Digital System Fundamentals	3
E C E 353	Introduction to Microprocessor Systems	3
E C E/ COMP SCI 354	Machine Organization and Programming	3
E C E 355	Electromechanical Energy Conversion	3
E C E 356	Electric Power Processing for Alternative Energy Systems	3
E P D 660	Core Competencies of Sustainability	3
INFO SYS 371	Technology of Computer-Based Business Systems	3
INTEREGR 303	Applied Leadership Competencies in Engineering	3
INTEREGR 477	Tools for Prototyping and Manufacturing	1-3
ISY E 315	Production Planning and Control	3
ISY E 323	Operations Research-Deterministic Modeling	3
ISY E/PSYCH 349	Introduction to Human Factors	3
MATH 321	Applied Mathematical Analysis 1: Vector and Complex Calculus	3
MATH 322	Applied Mathematical Analysis 2: Partial Differential Equations	3

M E 273	Engineering Problem Solving with EES	1
M S & E 330	Thermodynamics of Materials	4
M S & E 332	Macroprocessing of Materials	3
M S & E 352	Materials Science-Transformation of Solids	3
NAV SCI 301	Naval Engineering	3
N E 305	Fundamentals of Nuclear Engineering	3
PHYSICS 205	Modern Physics for Engineers	3
PHYSICS 241	Introduction to Modern Physics	3
PHYSICS 311	Mechanics	3
PHYSICS 321	Electric Circuits and Electronics	4
PHYSICS 322	Electromagnetic Fields	3
PHYSICS 325	Optics	4
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	3
STAT 312	Introduction to Theory and Methods of Mathematical Statistics II	3
STAT 333	Applied Regression Analysis	3
STAT 349	Introduction to Time Series	3
STAT 351	Introductory Nonparametric Statistics	3

Up to 3 technical elective credits may be obtained for non-formal courses such as independent study courses (M E 489, M E 491, M E 492, and other engineering independent study courses numbered 399 and higher); Cooperative Education (M E 1); and E P D 690, "Wisconsin Engineer Magazine." Students may propose a course that they feel will benefit their mechanical engineering education path. To be a strong candidate, the proposed course should have pre-requisites of two physics or calculus courses. For these courses, the ME curriculum committee will review the request and if approved, recommend a DARS substitution.

MATH/SCIENCE ELECTIVES

Code	Title	Credits
	The mechanical engineering curriculum requires 3 credits of math/science electives. CHEM 104 or CHEM 109, any formal course listed as a biological science and numbered 100 or higher, any non-engineering formal course listed with physical or natural science breadth and numbered 200 or higher will satisfy this requirement. If the math/science auxiliary credit condition is met with additional coursework, the math/science elective requirement may be met with a formal course offered by an engineering department numbered 200 and above (except INTEREGR and E P D).	3
Total Credits		3

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or ESL 118	Academic Writing II	

INTEREGR 397	Engineering Communication	3
Total Credits		6

LIBERAL ELECTIVES

Code	Title	Credits
The Mechanical Engineering curriculum requires 15 credits of liberal elective courses. See College of Engineering Liberal Studies Requirements for details.		
Complete Requirements (p. 254)		15
Total Credits		15

ADDITIONAL INFORMATION

Students fulfilling all course requirements with fewer than 128 credits must comply with the credit minimum by taking additional free elective credits. Students must meet the math/science auxiliary credit condition with a minimum of 30 credits. Students in good academic standing may take free elective courses pass/fail (see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>) for details). Pass/fail courses do not count toward specific degree requirements.

Independent Studies and projects courses:

Code	Title	Credits
M E 291	Undergraduate Mechanical Engineering Projects	1-3
M E 299	Independent Study	1-3
M E 489	Honors in Research	1-3
M E 491	Mechanical Engineering Projects I	1-3
M E 492	Mechanical Engineering Projects II	1-3

Students must have a cumulative 2.5 GPA or a 3.0 GPA for their previous two semesters and have written permission to enroll from their research advisor.

For information on credit loads, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

HONORS IN RESEARCH PROGRAM

The ME Department's Undergraduate Honors in Research Program allows students to participate in the creation of new knowledge and experience the excitement of the research process. Students in the program write and submit a senior thesis. Admission requirements include:

- At least two semesters completed on the Madison campus with a cumulative GPA of at least 3.5;
- Majoring in Mechanical Engineering;
- Approval of an appropriate professor who will serve as the thesis advisor.

The "Honors in Research" designation will be awarded to graduates who meet the following requirements:

- Satisfaction of the requirements for an undergraduate degree in Mechanical Engineering;
- A cumulative GPA of at least 3.3;

- Completion of a total of at least 6 credits of M E 489 Honors in Research;
- Receive a final grade of at least "B" in M E 489;
- Completion of senior thesis.

Students must certify completion of the program with their M E 489 advisor the term they intend to graduate. To certify program completion students must complete the appropriate form and submit to student services.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

¹ CHEM 109 Advanced General Chemistry may be taken in place of CHEM 103 General Chemistry I. If CHEM 103 is taken, students may need to take additional free electives to meet the minimum number of credits required for the degree.

² E M A 201 Statics, E M A 202 Dynamics, E M A 303 Mechanics of Materials, and M E 361 Thermodynamics each require a minimum grade of C.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Mechanical and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path our graduates may choose, we expect them to be meeting the following objectives at least three to five years after graduation:

1. They will exhibit a fundamental understanding of broader engineering disciplines with strong skills in mechanical engineering, problem solving, leadership, teamwork, and communication.

2. They will use these skills to contribute to their organizations and communities.
3. They will make thoughtful, well-informed decisions in their career and life.
4. They will demonstrate a continuing commitment to and interest in their own and other's education.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Mechanical Engineering Undergraduate Program website (<https://engineering.wisc.edu/programs/degrees/mechanical-engineering-bs/>). (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

NUCLEAR ENGINEERING AND ENGINEERING PHYSICS

The Department of Nuclear Engineering & Engineering Physics (NEEP) within the University of Wisconsin-Madison College of Engineering is the home of two undergraduate degree programs (nuclear engineering, including an option in radiation sciences and a fusion plasma focus area; and engineering physics) and one graduate degree program (nuclear engineering and engineering physics). The department's faculty conducts research in the areas of nuclear systems, and plasma physics and fusion energy science. This combination of topics fosters synergies with respect to neutronics, nuclear materials, fluid dynamics, and computation. The graduate nuclear engineering program has been ranked in the top six nationally by *U.S. News and World Report* in each of the past ten years.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/ CERTIFICATES

- Engineering for Energy Sustainability, Certificate (p. 350)
- Engineering Physics, BS (p. 351)
- Nuclear Engineering Materials, Certificate (p. 357)
- Nuclear Engineering, BS (p. 358)

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS FACILITIES

Facilities available for instruction and research include:

- Fluid Mechanics and Heat Transfer Laboratories
- Instructional Computing Labs (in Computer Aided Engineering)
- Ion Beam Laboratory
- Nanomechanics Laboratory
- Nuclear Instrumentation Laboratory
- Plasma Physics Laboratories
- Superconductivity and Cryogenics Laboratories
- University of Wisconsin Nuclear Reactor

SCHOLARSHIPS

The Department of Nuclear Engineering & Engineering Physics and the College of Engineering have several types of scholarships available to incoming and current engineering students. Students should explore the Wisconsin Scholarship Hub (WiSH) to apply for and find specific information on scholarships at UW–Madison. You can use WiSH to find engineering scholarships available through the College of Engineering; the Inclusion, Equity, and Diversity in Engineering Student Center; the Nuclear Engineering & Engineering Physics Department; and other UW and external organizations. (Please note: students must be currently enrolled in, or have applied to, the College of Engineering to be considered for engineering scholarships.) To be matched with these available scholarship funds an application is required, and the system is typically open to students in the spring of each year. Questions on the process can be directed to coescholarships@engr.wisc.edu. Additional financial assistance may be awarded through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 E. Campus Mall Room 9701; 608-262-3060).

ENGINEERING FOR ENERGY SUSTAINABILITY, CERTIFICATE

Equity and sustainability of energy resources in the face of increasing global population and economic development are key issues at the center of the public discourse today. The objective of this certificate program is to offer undergraduate students a suite of courses addressing energy sustainability. The courses span across the engineering curriculum, with firm roots in real-world design and engineering practices.

Students enrolled as degree-seeking undergraduates with a plan of study to fulfill the certificate requirements may enroll in the program. Applications may be submitted at any time, but students are encouraged to apply early in their undergraduate careers in order to ensure successful completion of the program; however, students may take courses that fulfill certificate requirements before submitting an application.

HOW TO GET IN

HOW TO GET IN
DECLARING THE CERTIFICATE

A student who is interested in declaring the certificate must complete an online application form (<https://engineering.wisc.edu/programs/certificates/energy-sustainability/declaration/>). The application form requires students to fill out a tentative study plan for completing the certificate requirements.

Certificate Application Form (<https://engineering.wisc.edu/programs/certificates/energy-sustainability/declaration/>)

Prior to completing the application form, students should either schedule a meeting with the certificate advisor/coordinator or complete an online orientation (https://uwmadison.co1.qualtrics.com/jfe/form/SV_0VAuEcR28ZNnTyB/) involving a short series of videos and accompanying questions.

Applications may be submitted at any time, but students are encouraged to apply early in their undergraduate careers in order to ensure successful completion of the program. Engineering students must meet progression

requirements in their selected major before the certificate can be added to their record.

REQUIREMENTS

REQUIREMENTS

Total credits required for certificate completion: Minimum of 16

- Minimum of 6 credits required in Liberal Studies and Science category (including one foundational course option)
- Minimum of 6 credits required in Engineering category (including one foundational course option)
- Additional 3 credits from either category above, or students may substitute an applied course such as senior capstone or independent study (with approval). See note under the Capstone heading below.
- 1 credit required in Seminar category
- Grade point average of 2.5 or above for all coursework that counts for the certificate

CAPSTONE (OPTIONAL 3 CREDITS)

Students may request to count no more than 3 credits of applied coursework toward the 16-credit total through an optional Capstone course. This course must be approved by the certificate's faculty chair in consultation with the certificate's oversight committee. Students must submit a description of their course project, demonstrating application of at least one of the certificate's learning outcomes. Details of the project will be verified with the course instructor. Courses that may qualify include:

- Senior Design Project or Capstone
- Independent Study
- Honors Thesis

To submit a Capstone course request, complete this online course substitution form (<https://engineering.wisc.edu/programs/certificates/energy-sustainability/substitution/>). Course substitution requests may be submitted any time, but should be submitted as early as possible once there are sufficient details (such as a course syllabus or a

project description) that demonstrate how the course or project aligns with the certificate's learning outcomes.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand the physical properties and processes related to energy resources and the conversion technologies involved.
2. Understand how energy decisions are impacted by environmental, social, economic or political factors.
3. Synthesize knowledge of the technical/physical aspects of energy with the social/environmental factors to analyze how energy choices impact the sustainability of energy systems.
4. Apply interdisciplinary energy knowledge to analyze, design or solve a matter of real world significance related to sustainability of energy use.

ENGINEERING PHYSICS, BS

As an engineering physics major, you'll dive into research alongside professors who work at the frontier of translating emerging science into novel technologies. With a curriculum designed specifically to launch your research career and a tight-knit community of scholars, you'll find a supportive environment to pursue a flexible math- and physics-centered curriculum and publish an undergraduate thesis. The engineering physics major is ideal for students who are already thinking about graduate school and want the flexibility to design their undergraduate experience to support that goal—but it also prepares students to join high-tech startup companies developing new technologies.

Students choose from three flexible focus areas -- nanoengineering, plasma science and engineering, and scientific computing -- that include graduate-level courses and laboratory experiences. Students in nanoengineering take courses in physics, material science, engineering mechanics, and electrical engineering to learn how to design, build, and use innovative devices and structures at the nanoscale. Plasma science and engineering students join one of the largest university plasma and fusion communities in the world, with collaborations between physics, electrical engineering, and nuclear engineering, and world-leading facilities. Scientific computing can be applied to nearly every discipline in science, combining modern computing practices with scientific discovery in research groups across campus.

As some of our best and brightest engineering students, EP majors move quickly through fundamental math and physics courses, opening the door for more advanced courses that support their research interests. With more flexibility than most engineering majors, each student works with their faculty advisor to find a selection of courses that are tuned to their specific research needs. The senior thesis is a defining aspect of this program, where students summarize their research findings and present them to a committee of professors, and possibly publish a paper in a scientific journal.

At the heart of the engineering physics program is a small learning community where students develop skills for conducting original research, with support from faculty and peers. The curriculum is designed to bring sophomores, juniors, and seniors together in a community where younger students learn from the general research experiences of their more senior counterparts. In addition, every student joins a research group where graduate students, post-docs, scientists, and faculty members support the specific skills and expertise needed for their research. Nearly all of our graduates go on to graduate degrees at the best universities in the U.S. and around the world and ultimately in careers in a variety of fields in academia, industry, or national laboratories.

OBJECTIVES OF THE ENGINEERING PHYSICS PROGRAM

- Educate students to think and participate deeply, creatively, and analytically in emerging areas of engineering technology.
- Educate students in the basics of instrumentation, design of laboratory techniques, measurement, data acquisition, interpretation, and analysis.
- Educate students in the methodology of research.
- Provide and facilitate teamwork and multidisciplinary experiences throughout the curriculum.
- Foster the development of effective oral and written communication skills.
- Expose students to environmental, ethical and contemporary issues.

HOW TO GET IN

HOW TO GET IN ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising ([\[admissions/undergraduate/cross-campus-students/\]\(https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/\)\) for students to learn about the cross-campus transfer process.](https://engineering.wisc.edu/</p>
</div>
<div data-bbox=)

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the engineering physics degree program.

Code	Title	Credits
Mathematics and Statistics		25
Science		28
Engineering Science		25
Research & Development / Focus Area Electives		22
Technical Electives		6
Communication Skills		8
Liberal Studies		16
Total Credits		130

MATHEMATICS AND STATISTICS

¹ This requirement can also be satisfied with a different introductory engineering course

RESEARCH AND DEVELOPMENT/SENIOR THESIS

Expectations for Research Projects

Completion of the engineering physics degree program requires satisfactory completion of the E P 468 Introduction to Engineering Research, E P 469 Research Proposal in Engineering Physics, E P 568 Research Practicum in Engineering Physics I, and E P 569 Research Practicum in Engineering Physics II coursework sequence, which culminates in a senior research thesis. The research topic chosen by the student and agreed upon by the advisor should be on a topic connected to the chosen Focus Area. The research conducted should be such that the student participates in the creation of new knowledge, experiences the excitement of the research process, and makes a contribution so that it would be appropriate to include the student's name on a scholarly publication if one results from the research.

Senior Thesis

A senior thesis, completed during enrollment in E P 569 Research Practicum in Engineering Physics II is required. The senior thesis is a written document reporting on a substantial piece of work. It should be written in the style of a graduate thesis. The faculty advisor, in consultation with a research mentor, determines the grade which the student receives for the thesis.

On or before the Friday of finals week of the semester in which E P 569 Research Practicum in Engineering Physics II is taken, the senior thesis must be presented orally by the student to a committee of three professors in a publicly announced seminar. Interested faculty and students will be invited to attend.

COMP SCI 577	Introduction to Algorithms	
COMP SCI/ MATH 714	Methods of Computational Mathematics I	
COMP SCI/ MATH 715	Methods of Computational Mathematics II	
M E 459	Computing Concepts for Applications in Engineering	
M E/COMP SCI/ E C E/E M A/ E P 759	High Performance Computing for Applications in Engineering	
Any scientific-computing-related special topics course in NE		
Total Credits		14

TECHNICAL ELECTIVE

Code	Title	Credits
Choose from the following courses:		6
Co-op (no more than 3 credits)		
Courses numbered 300+ in the CoE except for E P D/ INTEREGR		
Courses numbered 300+ in MATH, PHYSICS, COMP SCI, STAT (except STAT 301), ASTRON, MED PHYS, and CHEM departments		

Students may also propose any class that they feel will benefit their education path with pre-requisite of two physics or calculus classes. For these courses the advisor will review the request and if approved, recommend a DARS substitution.

Total Credits	6
----------------------	----------

COMMUNICATION SKILLS

Code	Title	Credits
Choose from the following courses:		8
ENGL 100	Introduction to College Composition or COM ARTS 1C Introduction to Speech Composition or LSC 100 Science and Storytelling or ESL 118 Academic Writing II	
INTEREGR 275	Technical Presentations (was EPD 275)	
INTEREGR 397	Engineering Communication	
Total Credits		8

LIBERAL STUDIES

Code	Title	Credits
Complete Requirements (p. 254) ¹		16
Total Credits		16

- ¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectareas/>) (the description before the course number). At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

TOTAL CREDITS: 130-132

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/policiesandregulationstext>).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- 2. an ability to apply engineering research practices to produce results that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- 3. an ability to communicate effectively with a range of audiences
- 4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- 5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- 6. an ability to apply experimental, theoretical, and computational methods to address scientific and engineering objectives
- 7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Total Credits 130-131

¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

² Students are encouraged to take E P 468 Introduction to Engineering Research during their second year to allow for more flexibility in the research sequence.

³ Topics from MATH 321 Applied Mathematical Analysis 1: Vector and Complex Calculus are applied in PHYSICS 322 Electromagnetic Fields, and some students may find it helpful to take PHYSICS 322 Electromagnetic Fields after MATH 321 Applied Mathematical Analysis 1: Vector and Complex Calculus if PHYSICS 322 Electromagnetic Fields is not required for focus area courses.

⁴ Students in the nanoengineering focus area should take PHYSICS 531 Introduction to Quantum Mechanics.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS FACILITIES

Facilities available for instruction and research include:

Fluid Mechanics and Heat Transfer Laboratories
Instructional Computing Labs (in Computer Aided Engineering)
Nanomechanics Laboratory
Nuclear Instrumentation Laboratory
Plasma Physics Laboratories
Superconductivity and Cryogenics Laboratories

SCHOLARSHIPS

The Department of Nuclear Engineering & Engineering Physics and the College of Engineering have several types of scholarships available to incoming and current engineering students. Students should explore the Wisconsin Scholarship Hub (WiSH), where you can apply to and find specific information on scholarships at UW-Madison. You can use

WiSH to find engineering scholarships available through the College of Engineering; the Inclusion, Equity, and Diversity in Engineering Student Center; the Nuclear Engineering & Engineering Physics Department; and other UW and external organizations. (Please note: students must be currently enrolled in, or have applied to, the College of Engineering to be considered for engineering scholarships.) To be matched with these available scholarship funds an application is required and the system is typically open to students in the spring of each year. Questions on the process can be directed to: coescholarships@engr.wisc.edu. Additional financial assistance may be awarded through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 E. Campus Mall Room 9701, 608-262-3060).

NUCLEAR ENGINEERING MATERIALS, CERTIFICATE

The goal of this certificate is to combine a comprehensive set of course curricula that will provide students with an understanding of the challenges and remedial measures associated with materials in nuclear energy systems, including fission and fusion reactors. It includes courses in radiation damage, nuclear fuel performance, and corrosion. A laboratory course will provide hands-on experimental analysis in the areas of corrosion, welding, radiation damage, and non-destructive evaluation.

HOW TO GET IN

HOW TO GET IN

All current undergraduate students in the College of Engineering are eligible to complete the Certificate in Nuclear Engineering Materials.

Students must complete the Certificate Declaration Form (<https://engineering.wisc.edu/programs/named-options/declaration/>). Contact Professor Adrien Couet, Department of Nuclear Engineering & Engineering Physics, 921 Engineering Research Building, for further information.

REQUIREMENTS

REQUIREMENTS

Code	Title	Credits
Required Courses		
N E/M S & E 423	Nuclear Engineering Materials ¹	3
N E 424	Nuclear Materials Laboratory	1
Electives		
Complete a minimum of 12 credits from the elective course list below.		12
Total Credits		16

¹ Because M S & E 350 Introduction to Materials Science or M S & E 351 Materials Science-Structure and Property Relations in Solids are prerequisites for N E/M S & E 423 Nuclear Engineering Materials, students are expected to take one of the two of these courses as prerequisites for the certificate.

M S & E 460	Introduction to Computational Materials Science and Engineering	3
M S & E 463	Materials for Elevated Temperature Service	3
M S & E 570	Properties of Solid Surfaces	3
N E 541	Radiation Damage in Metals	3
N E 545	Materials Degradation in Advanced Nuclear Reactor Environments	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Identify the challenges and remedial measures associated with materials in nuclear energy systems by integrating the contents within each class into a complete understanding.
2. Describe and apply basic radiation damage, nuclear fuel performance, corrosion, and joining/welding concepts.
3. Design and conduct basic hands-on experiments in the areas of nuclear materials characterization.
4. Discuss scientifically and confidently about nuclear materials degradation issues with experts.

NUCLEAR ENGINEERING, BS

Nuclear engineers harness the strongest forces of nature to tackle some of society's biggest challenges. Our curriculum gives students depth and breadth to keep up with rapidly changing technology, and our close-knit learning community supports our students' success during their degree and as they launch their careers. Students interested in clean energy applications can choose from the Nuclear Systems focus area or the Fusion Plasma focus area. The radiation sciences option (p. 364) provides a pathway for careers in medical applications of radiation.

Nuclear energy is the largest source of clean electricity in the United States and new technologies will allow its impact to grow as we decarbonize our economy. Most nuclear engineers design, build, and operate nuclear power plants – today based on fission of uranium, but in the future, based on fusion of hydrogen. With no greenhouse gas emissions, nuclear energy is a reliable and predictable partner to other clean electricity, like wind, solar, and hydro. Nuclear power sources have

even more potential as new technologies and are deployed to remove carbon emissions from industrial processes like hydrogen production, water desalination, and steel manufacturing.

With radiation from man-made radioisotopes and particle accelerators, we can diagnose and treat cancer and other diseases. Nuclear engineers in the radiation sciences option (p. 364) design systems to generate radioactive tracers that can be injected into patients to pinpoint tumors, stress fractures, and cardiac diseases, while others build accelerators that deliver radiation precisely to diseased tissue while avoiding sensitive organs. Talk to your academic advisor about declaring the Radiation Sciences option. Students must have, and are expected to maintain, a 3.0 cumulative GPA.

Today's rovers on Mars are powered by nuclear power sources and tomorrow's spacecraft will need nuclear power to transport humans far into space. Nuclear engineers build radioisotope thermal generators that provide nonstop power with no moving parts to deep-space probes and planetary vehicles, allowing missions that last for many years. Nuclear space propulsion cuts the travel time to other planets by months and surface power ensures reliable energy once the spacecraft lands.

Using advanced radiation detection systems, we can seek out explosives and nuclear weapons being smuggled in shipping containers. Nuclear engineers combine sources and detectors that use penetrating radiation that not only can see objects through thick shields but can also determine the composition of the items inside. Additionally, they use machine learning and artificial intelligence to combine the signals from these systems for even more insight.

Our curriculum starts with an Introduction to Nuclear Engineering designed for first-year students to learn about a variety of technical nuclear topics and also to engage with some societal challenges. Later on, the curriculum focuses on the deepest physics and math base in the College of Engineering to prepare our graduates for careers with constantly evolving technologies based on the newest scientific discoveries. We transition from these fundamentals to more applied topics in radiation transport, thermal systems, plasma physics, materials science, imaging, and detectors, while students build skills in computational modeling and simulation. All of our students also take at least one course that offers an experience with the UW Nuclear Reactor. Students in the Fusion Plasma focus area will take courses in the rich UW-Madison fusion and plasma physics curriculum. Students in the radiation sciences option will complete their degree with graduate courses from the internationally recognized Medical Physics program. This interdisciplinary degree program overlaps with other engineering disciplines, allowing our graduates to transition into a variety of industries and careers.

Small class sizes allow students and professors to get to know each other in a supportive learning community starting in their first year. Many students participate in undergraduate research across one of the biggest research portfolios in the College of Engineering. Faculty collaborations with companies in nuclear science and technology – both established and newcomers, as well as the country's national laboratories – provide a professional network that helps students find internships and launch their careers.

HOW TO GET IN

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FIRST-YEAR STUDENT

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://engineering.wisc.edu/degrees-programs/undergraduate/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission means that students get to start their college career in the engineering program of their choice and have access to engineering-specific resources and facilities. Students who are directly admitted need to meet progression requirements (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet minimum admission requirements (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for admission consideration to engineering degree programs. Cross-campus admission is competitive and selective, and academic performance expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and advising (<https://engineering.wisc.edu/admissions/undergraduate/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://engineering.wisc.edu/admissions/undergraduate/transfer-from-off-campus/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their engineering major. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer & Academic Program Manager in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (<https://engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/>)s (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

RADIATION SCIENCES DECLARATION

Talk to your academic advisor about declaring the Radiation Sciences (p. 364) option. Students must have and are expected to maintain a 3.0 cumulative GPA.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth–Humanities/Literature/Arts: 6 credits • Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth–Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The nuclear engineering curriculum emphasizes nuclear power and is appropriate for students seeking careers in the nuclear power industry.

There is also a Radiation Sciences option (p. 362) available for students interested in medical and other non-power applications.

The following curriculum applies to students admitted to the nuclear engineering degree program.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics and Statistics	22
	Science	13
	Engineering Science	27

Nuclear Engineering Core	23
Nuclear Engineering Focus Area	15
Technical Electives	2
Introduction to Engineering	3
Communication Skills	8
Liberal Studies	16
Total Credits	129

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry I	5
or MATH 217	Calculus with Algebra and Trigonometry II	
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
MATH 321	Applied Mathematical Analysis I: Vector and Complex Calculus	3
STAT 324	Introduction to Statistics for Science and Engineering	3
Total Credits		22

SCIENCE

Code	Title	Credits
Choose from the following courses:		5-9
CHEM 109	Advanced General Chemistry	
or		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
PHYSICS 241	Introduction to Modern Physics	3
or PHYSICS 205	Modern Physics for Engineers	
Total Credits		13-17

ENGINEERING SCIENCE

Code	Title	Credits
E M A 201	Statics	3
E M A 202	Dynamics	3
E M A 303	Mechanics of Materials	3
E P 271	Engineering Problem Solving I	3-4
or COMP SCI 200	Programming I	
or COMP SCI 220	Data Science Programming I	
M S & E 350	Introduction to Materials Science	3
M E 231	Geometric Modeling for Design and Manufacturing	3
M E 361	Thermodynamics	3
E C E 376	Electrical and Electronic Circuits ¹	3
Choose one of the following courses:		3
E M A/E P 471	Intermediate Problem Solving for Engineers	
or COMP SCI 3C	Programming II	
or COMP SCI 4I	Introduction to Numerical Methods	

or E M A/ E P 476	Introduction to Scientific Computing for Engineering Physics
Total Credits	27-28

¹ PHYSICS 321 Electric Circuits and Electronics is an acceptable substitute for E C E 376 Electrical and Electronic Circuits.

NUCLEAR ENGINEERING CORE

Code	Title	Credits
N E 305	Fundamentals of Nuclear Engineering	3
N E 405	Nuclear Reactor Theory	3
N E 408	Ionizing Radiation	3
N E 412	Nuclear Reactor Design	5
N E/M S & E 423	Nuclear Engineering Materials	3
N E 424	Nuclear Materials Laboratory	1
N E 427	Nuclear Instrumentation Laboratory	2
N E 571	Economic and Environmental Aspects of Nuclear Energy	3
Total Credits		23

NUCLEAR ENGINEERING FOCUS AREAS

Choose one of the following two focus areas.

Nuclear Systems Focus Area

Code	Title	Credits
Nuclear Systems Engineering Core		
Complete the following courses:		9-11 credits
CBE 320	Introductory Transport Phenomena	4
or		
M E 363 & M E 364	Fluid Dynamics and Elementary Heat Transfer	
N E 411	Nuclear Reactor Engineering	3
N E 428	Nuclear Reactor Laboratory	2

Nuclear Systems Engineering Electives

Choose from the following courses:		6 credits
N E 234	Principles and Practice of Nuclear Reactor Operations	4
N E/M S & E 433	Principles of Corrosion	3
N E 505	Nuclear Reactor Analysis	3
N E/MED PHYS 506	Monte Carlo Radiation Transport	3
M E/N E 520	Two-Phase Flow and Heat Transfer	3
N E/E C E/ PHYSICS 525	Introduction to Plasmas	3
N E/E C E/ PHYSICS 527	Plasma Confinement and Heating	3
N E/E C E 528	Plasma Processing and Technology	3
N E 536	Feasibility of Fusion Power Plants based on Controlled Nuclear Fusion	3
N E 541	Radiation Damage in Metals	3
N E 545	Materials Degradation in Advanced Nuclear Reactor Environments	3
N E 550	Advanced Nuclear Power Engineering	3
N E 555	Nuclear Reactor Dynamics	3

N E/M E 565	Power Plant Technology	3
N E/MED PHYS 569	Health Physics and Biological Effects	3-4
N E/ISY E 574	Methods for Probabilistic Risk Analysis of Nuclear Power Plants	3
N E 602	Special Topics in Reactor Engineering	3

Students are encouraged to access the online N E future course offering grid to plan their future course schedules and to confirm the offering of a course in the table.

Fusion Plasma Focus Area

Code	Title	Credits
Fusion Plasma Core		
Complete the following courses:		12 credits
PHYSICS 322	Electromagnetic Fields	3
N E/E C E/ PHYSICS 525	Introduction to Plasmas	3
N E 526	Laboratory Course in Plasmas	3
Complete one of the following courses		3
N E/E C E/ PHYSICS 527	Plasma Confinement and Heating	
N E 536	Feasibility of Fusion Power Plants based on Controlled Nuclear Fusion	

Fusion Plasma Engineering Electives

Choose from the following courses:		3 credits
N E 411	Nuclear Reactor Engineering	3
N E/M S & E 433	Principles of Corrosion	3
N E/MED PHYS 506	Monte Carlo Radiation Transport	3
N E/E C E/ PHYSICS 527	Plasma Confinement and Heating	3
N E/E C E 528	Plasma Processing and Technology	3
N E 536	Feasibility of Fusion Power Plants based on Controlled Nuclear Fusion	3
N E 541	Radiation Damage in Metals	3
N E 545	Materials Degradation in Advanced Nuclear Reactor Environments	3
N E/M E 565	Power Plant Technology	3
N E/ISY E 574	Methods for Probabilistic Risk Analysis of Nuclear Power Plants	3
N E 602	Special Topics in Reactor Engineering	3

TECHNICAL ELECTIVES

Code	Title	Credits
Choose from the following courses:		2 credits
N E 1	Cooperative Education Program	
Courses numbered 300+ in the CoE except for E P D/ INTEREGR		
Courses numbered 300+ in MATH, PHYSICS, COMP SCI, STAT (except STAT 301), ASTRON, MED PHYS, and CHEM departments		

Students may also propose any class that they feel will benefit their education path with pre-requisite of two physics or calculus classes. For these courses the advisor will review the request and if approved, recommend a DARS substitution.

INTRODUCTION TO ENGINEERING

Code	Title	Credits
N E 231	Introduction to Nuclear Engineering	3
Total Credits		3

COMMUNICATION SKILLS

Code	Title	Credits
Choose from the following courses:		
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or ESL 118	Academic Writing II	
INTEREGR 275	Technical Presentations (was EPD 275)	2
INTEREGR 397	Engineering Communication	3
Total Credits		8

LIBERAL STUDIES ELECTIVES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 254) ¹		16
Total Credits		16

- ¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectarea/>) (the description before the course number). At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

NAMED OPTION

Talk to your academic advisor about declaring the Radiation Sciences option. Students must have and are expected to maintain a 3.0 cumulative GPA.

View as listView as grid

· NUCLEAR ENGINEERING: RADIATION SCIENCES (P. 364)

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honor in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research N E 489 Honors in Research, including a senior thesis. Further information is available in the department office.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

- ² Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
- ³ After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials in either order or concurrently.
- ⁴ STAT 311 Introduction to Theory and Methods of Mathematical Statistics I or STAT/M E 424 Statistical Experimental Design are acceptable substitutes.
- ⁵ PHYSICS 321 Electric Circuits and Electronics is an acceptable substitute for E C E 376 Electrical and Electronic Circuits.
- N**Students who choose the Nuclear Systems Focus Area are required to complete CBE 320, N E 411, N E 428 and two Nuclear Systems Electives.
- F**Students who choose the Fusion Plasma Focus Area are required to complete PHYSICS 322, N E/E C E/PHYSICS 525, N E 526, either N E/E C E/PHYSICS 527 or N E 536 and one Fusion Plasma Elective.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Every College of Engineering undergraduate has an assigned academic advisor (<https://engineering.wisc.edu/student-services/undergraduate-student-advising/>). Academic advisors support and coach students through their transition to college and their academic program all the way through graduation.

Advisors help students navigate the highly structured engineering curricula and course sequencing, working with them to select courses each semester.

When facing a challenge or making a plan toward a goal, students can start with their academic advisor. There are many outstanding resources at UW-Madison, and academic advisors are trained to help students navigate these resources. Advisors not only inform students about the various resources, but they help reduce the barriers between students and campus resources to help students feel empowered to pursue their goals and communicate their needs.

Students can find their assigned advisor in their MyUW Student Center.

ENGINEERING CAREER SERVICES

Engineering Career Services (<https://ecs.wisc.edu>) (ECS) assists students in finding work-based learning experiences such as co-ops and summer internships, exploring and applying to graduate or professional school, and finding full-time professional employment.

ECS offers two large career fairs per year, assists students with resume building and developing interviewing skills, hosts skill-building workshops, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to engage with the ECS office early in their academic careers. For more information on ECS programs and workshops, visit: <https://ecs.wisc.edu>.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS FACILITIES

Facilities available for instruction and research include:

Nuclear Reactor Laboratory
Nuclear Instrumentation Laboratory
Fluid Mechanics and Heat Transfer Laboratories
Ion Beam Laboratory
Plasma Physics Laboratories
Instructional Computing Labs (in Computer Aided Engineering)

SCHOLARSHIPS

The Department of Nuclear Engineering & Engineering Physics & the College of Engineering have several types of scholarships available to incoming and current engineering students. Students should explore the Wisconsin Scholarship Hub (WiSH), where you can apply to and find specific information on scholarships at UW-Madison. You can use WiSH to find engineering scholarships available through the College of Engineering; the Inclusion, Equity, and Diversity in Engineering Student Center; the Nuclear Engineering & Engineering Physics Department; and other UW and external organizations. (Please note: students must be currently enrolled in, or have applied to, the College of Engineering to be considered for engineering scholarships.) To be matched with these available scholarship funds an application is required and the system is typically open to students in the spring of each year. Questions on the process can be directed to coescholarships@engr.wisc.edu. Additional financial assistance may be awarded through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 E. Campus Mall Room 9701; 608-262-3060).

ACCREDITATION

ACCREDITATION

Accredited by the Engineering Accreditation Commission of ABET (<https://www.abet.org/>), <https://www.abet.org>, under the commission's General Criteria and Program Criteria for Nuclear, Radiological, and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES FOR THE BACHELOR OF SCIENCE IN NUCLEAR ENGINEERING

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. We anticipate graduates will begin their careers in fields that utilize their knowledge, education and training in the interaction of radiation with matter as it applies to power generation, health and medical physics, security and safeguards and other engineering fields.

Whatever path our graduates choose to pursue, our educational objectives for the nuclear engineering program are to allow them to:

1. Exhibit strong performance and continuous development in problem-solving, leadership, teamwork, and communication, initially applied to

- nuclear engineering, and demonstrating an unwavering commitment to excellence.
2. Demonstrate continuing commitment to, and interest in, their training and education, as well as those of others.
 3. Transition seamlessly into a professional environment and make continuing, well-informed career choices.
 4. Contribute to their communities.

Note: Undergraduate Student Outcomes, number of degrees conferred, and enrollment data are made publicly available at the Nuclear Engineering Undergraduate Program website (<https://engineering.wisc.edu/programs/degrees/nuclear-engineering-bs/>). (In this Guide, the program's Student Outcomes are available through the "Learning Outcomes" tab.)

NUCLEAR ENGINEERING: RADIATION SCIENCES

The radiation sciences option of the nuclear engineering major (p. 358) provides a pathway for careers in medical applications of radiation. Understanding how radiation interacts with biological material is a natural extension of the nuclear engineering fundamentals in modern physics and mathematics. Many students continue to graduate school to get advanced degrees in medical physics, either at UW–Madison or elsewhere.

Radiation science students will use their engineering analysis skills on challenges that range from working with patients to developing new medical devices and equipment. Patients experience radiation to diagnose diseases as well as to treat them. In both cases, it may rely on radioactive tracers injected into their bodies or on radiation exposure from outside. Deciding how to administer the radiation to maximize the benefit and minimize the harm requires skills at the intersection between medicine and nuclear engineering. Nuclear engineers in the radiation sciences option also design, analyze, and build devices that will generate novel radioactive tracers, deliver radiation externally in ever more precise ways, and detect the radiation levels to ensure the accuracy of the treatments.

Following the same deep curriculum in physics and math in the early years, students in the radiation sciences option will complete their degree with graduate courses from the internationally recognized Medical Physics program. After learning the consequences of radiation interaction with both healthy and diseased tissue, students can take courses in imaging and radiation detection, the production of radiation with radioisotopes or engineered devices, and dig deeper into the use of radiation in medicine.

Talk to your academic advisor about declaring this option.

REQUIREMENTS

REQUIREMENTS

The Radiation Sciences option is intended for students interested in medical and non-power applications. Students must have and are expected to maintain a 3.0 cumulative GPA.

The following curriculum applies to students admitted to the nuclear engineering degree program with radiation sciences option.

Select credits from Medical Physics Electives Course List below		9
Technical Electives		
Not to be confused with Medical Physics Electives, choose 2 credits from the following:		2
N E 1	Cooperative Education Program (no more than 3 credits)	
Courses numbered 300+ in the CoE except for E P D/ INTERGR		
Courses numbered 300+ in MATH, PHYSICS, COMP SCI, STAT (except STAT 301), ASTRON, MED PHYS, and CHEM departments		
Students may also propose any class that they feel will benefit their education path with pre-requisite of two physics or calculus classes. For these courses the advisor will review the request and if approved, recommend a DARS substitution.		
Total Credits		11

Medical Physics Electives Course List¹

Code	Title	Credits
MED PHYS/N E 506	Monte Carlo Radiation Transport	3
MED PHYS/ B M E 566	Physics of Radiotherapy	3
MED PHYS/N E 569	Health Physics and Biological Effects ²	3-4

MED PHYS/ B M E 573	Mathematical Methods in Medical Physics	3
MED PHYS/ B M E 578	Non-Ionizing Diagnostic Imaging	4
MED PHYS/ B M E 580	The Physics of Medical Imaging with Ionizing Radiation	4
MED PHYS 671	Selected Topics in Medical Physics ²	1-4
MED PHYS 674	Data Science in Medical Physics	3
MED PHYS/ PHYSICS 688	Radiation Production and Detection	4
MED PHYS 701	Ethics and the responsible conduct of research and practice of Medical Physics	1

Students are encouraged to access the online N E future course offering grid to plan their future course schedules and to confirm the offering of a course in the table.

¹ Courses meeting the Medical Physics Electives requirement are selected MED PHYS courses numbered 500 and above and selected PHYSICS courses numbered 400 or above. No more than 3 credits of N E 699 Advanced Independent Study may be used to meet this requirement. (Refer to the NE handbook under Degree Information on the NE department website (<https://docs.google.com/document/u/1/d/e/2PACX-1vRMi-zHWwv19rf6wMx2E5Nzdn1Awf0ZHG6pK-QXTSRfsD-13kYuBBCOMZbiWt9vcLejeTxBQQHEjZVs/pub/>)).

² N E/MED PHYS 569 Health Physics and Biological Effects and MED PHYS 671 Selected Topics in Medical Physics are especially recommended for students in this focus area.

LIBERAL STUDIES ELECTIVES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 254) ¹		16
Total Credits		16

¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectarea/>) (the description before the course

- number). At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case “e” in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. *Note:* Some courses may have “e” designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honor in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

Total Credits 129

- ¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.
- ² PHYSICS 321 Electric Circuits and Electronics is an acceptable substitute for E C E 376 Electrical and Electronic Circuits
- ³ Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
- ⁴ After completing E M A 201 Statics, students may complete E M A 202 Dynamics and E M A 303 Mechanics of Materials in either order or concurrently.
- ⁵ STAT 311 Introduction to Theory and Methods of Mathematical Statistics I or STAT/M E 424 Statistical Experimental Design are acceptable substitutes.
- ⁶ PHYSICS 623 Electronic Aids to Measurement is recommended for students in the Radiation Sciences focus area.

COLLEGE OF LETTERS & SCIENCE

In the College of Letters & Science (<https://ls.wisc.edu/>), you earn your bachelor's degree through a customized mix of classes where you explore your interests and discover new ones. You get the advantages that we have created over 175 years of being a great university. In Letters & Science, we take pride in blending the best practices from this long tradition with the newest ideas for instruction and research to offer an extraordinary undergraduate experience.

The Letters & Science difference is how you weave together studies in multiple areas, expanding this knowledge through ever-widening connections to related fields. You have at least one major for focused, in-depth study, and lots of flexibility in the ways you complete your degree.

You choose from an astonishing range of classes designed by Letters & Science faculty to give you a forward-looking education blending histories, communications, sciences, arts, languages, cultural studies, technologies,

numbers, and international studies: ways we interact with our world, with information, and with each other.

WAYS WE INTERACT WITH OUR WORLD

Essential building blocks of science knowledge, including physics, chemistry, and mathematics, are especially strong here. Letters & Science offers not just biology, zoology, and botany, but also specialized areas of neurobiology, molecular and cell biology, and conservation biology.

You can study skies far away through astronomy and close above us through atmospheric sciences. Geology and environmental sciences reveal the physical world, while geography, cartography, and landscape studies show how land is used by humans and other living things.

WAYS WE INTERACT WITH INFORMATION

In Letters & Science, we offer in-depth studies in computer, statistics, and other information sciences. And data is everywhere, in every field and discipline, from psychology and linguistics to geographic information systems and digital media analytics. You learn how to collect, analyze, and use information to give you stronger tools to accomplish your academic and career goals.

WAYS WE INTERACT WITH EACH OTHER

Understanding different perspectives is one of the most significant transformations of your college years. Letters & Science's academic programs include the study of uniquely American experiences of Asian American, African American, American Indian, and Chicana/x/e people. You can explore the cultures and histories around the globe with classes and majors dedicated to regions in Asia, Africa, the Middle East, Europe, and the Americas.

Learn how we sustain our communities and social systems, through political science, legal studies, philosophy, economics, sociology, religion, gender, and social welfare. You can study (and create) music, art and visual culture, television and film, folklore, and literature.

Communications are a huge part of the Letters & Science academic mission. Here you can learn to speak and read in 50 languages, including those most commonly spoken around the world, American Sign Language, and six indigenous American Indian languages. About 40 Letters & Science majors and certificates (<https://languages.wisc.edu/majors-and-certificates/>) have a required or recommended language component.

And communication is central to so many other areas of study in Letters & Science: journalism, rhetoric, English, communication disorders—and really, everything already named above.

PUTTING IT ALL TOGETHER

As a Letters & Science bachelor's student, you get to choose from all these wonderful, intriguing, eye-opening, mind-awakening fields—and so many more. This Guide presents the full list of degrees, majors, and certificates (<https://guide.wisc.edu/undergraduate/letters-science/#degreesmajorscertificatestext>), and all our courses (<https://guide.wisc.edu/courses/>). (See courses scheduled for a specific term in the public Course Search (<https://public.enroll.wisc.edu/search/>).)

As you earn your degree, what will be your special blend of knowledge, skills, and experiences, weaving together your understanding of the world, of information, and ourselves?

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

NOTE: Major requirements are the same whether a student pursues a Bachelor of Arts (BA) or a Bachelor of Science (BS) degree.

- African American Studies, BA (p. 379)
- African American Studies, BS (p. 383)
- African American Studies, Certificate (p. 387)
- African Cultural Studies, BA (p. 389)
- African Cultural Studies, BS (p. 394)
- African Studies, Certificate (p. 861)
- Aging Studies, Certificate (p. 1284)
- American Indian and Indigenous Studies, Certificate (p. 401)

- Zoology, BA (p. 1040)
- Zoology, BS (p. 1045)

ENTERING THE COLLEGE

ENTERING THE COLLEGE

Students can enter the College of Letters & Science (L&S) upon admission to UW–Madison (<http://admissions.wisc.edu>) or by transferring from another school or college at UW–Madison.

Most students are admitted to Letters & Science upon admission to the University if their primary academic interest on their application is an L&S degree program or “Undecided.” A student may also enter L&S as a first year student if they select Business as their primary academic interest, do not gain admission to the School of Business upon entry, and have a second degree plan choice in L&S. Students who select Pharmacy as their primary interest begin in L&S, and may subsequently transition to the Pharmacology/Toxicology program or remain in L&S.

Students originally admitted to a different School or College at UW–Madison may transfer to Letters & Science if they are in good academic standing, meet the eligibility requirements, and complete a Request to Transfer to L&S (<https://advising.ls.wisc.edu/transfer/>) application.

PROGRAM OF STUDY UPON ENTERING THE COLLEGE

All students, except those admitted to the College’s Mead Witter School of Music (<https://music.wisc.edu/undergraduate-admissions/>) through an audition, enter Letters & Science as either Bachelor of Arts or Bachelor of Science students. Students are required to declare a major (<https://kb.wisc.edu/lis/page.php?id=53616>) before reaching Senior standing.

REENTRY/READMISSION

Students who have not been enrolled in classes for more than one full Fall or Spring term must apply as a reentry student (<https://admissions.wisc.edu/apply-as-a-reentry-student/>) through the Office of Admissions. Students reenter their most recent academic program (degree, major, and certificates).

L&S students who have been academically suspended (<https://guide.wisc.edu/undergraduate/letters-science/#policiesandregulationstext>) must first apply for readmission to the College of Letters & Science. If approved, they must also apply for reentry to UW–Madison through the Office of Admissions. [see: L&S | Readmission after Academic Suspension (<https://deans.ls.wisc.edu/policies-forms/probation/readmission/>)].

POLICIES AND REGULATIONS

POLICIES AND REGULATIONS

Enrollment Status

Students are considered enrolled at UW–Madison when they are officially registered for classes. Students on a UW–Madison Study Abroad program are considered enrolled at UW–Madison.

Full-time enrollment is:

- Fall and Spring: 12 to 18 credits (18 is the normal maximum)
- Summer: 6 to 12 credits (12 is the normal maximum)

Students may enroll in fewer than 12 credits in Fall or Spring terms without special permission. [see: Office of the Registrar | Credit Load and Ranges (<https://registrar.wisc.edu/credit-load-and-ranges/>)]. However, full-time status is required for some campus programs, benefits, and services. Students should consult their academic advisor before enrolling in fewer than 12 credits. [Find your advisor in Academic Navigator (<https://my.wisc.edu/academic-navigator/>)].

Students may request a credit overload of 19 or 20 credits in Fall or Spring term, or 13 credits in Summer term, if they have a cumulative University GPA of 3.000 or higher. No student may be enrolled in more than these maximum credits. This credit overload must be approved by L&S Undergraduate Academic Deans' Services (<https://deans.ls.wisc.edu/>). [see: L&S | Credit Overload (<https://deans.ls.wisc.edu/policies-forms/credit-overload/>)]

University tuition is calculated based on enrolled credits, among other factors, so additional tuition and fees is assessed on credit overloads. [see: Bursar's Office | Tuition & Fees (<https://bursar.wisc.edu/tuition-and-fees/>) and L&S | Tuition Refund Policy (<https://deans.ls.wisc.edu/policies-forms/tuition-refund-policy/>)]

Concurrent enrollment at another institution

Students may be enrolled in classes at another institution when they are also enrolled in UW–Madison classes, as long as the combined credit totals do not exceed 20 credits in Fall or Spring terms and 13 credits in Summer terms. No special permission is needed. [see: L&S | Concurrent Enrollment (<https://deans.ls.wisc.edu/policies-forms/concurrent-enrollment/>)]

Credit earned at other institutions may be eligible to transfer to UW–Madison, up to the maximums described above. [see: Office of the Registrar | Transfer your credit to UW–Madison (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>)]

Withdrawing from a term

A withdrawal is a request to drop all classes and not continue enrollment in that term. Because of the potential consequences of a withdrawal, the student must submit a withdrawal application to L&S Undergraduate Academic Deans' Services (<https://deans.ls.wisc.edu/>). [see: L&S | Withdrawing from Semester/Term (<https://deans.ls.wisc.edu/policies-forms/withdrawal/>)]

Deadlines to add, drop, and change classes

For each session in a term, UW–Madison sets deadlines for making changes to class schedules. After those deadlines pass, students must seek permission to make changes. When a “academic dean approval” is required, contact L&S Undergraduate Academic Deans' Services (<https://deans.ls.wisc.edu/>). [see: Office of the Registrar | Dates & Deadlines (<https://registrar.wisc.edu/dates/>), L&S | Late Drop Request] (<https://deans.ls.wisc.edu/policies-forms/late-drop-application/>)]

Reentry

Students who have not been enrolled for at least one full term must apply for reentry (p. 369) to UW–Madison through the Office of Admissions. Students reenter their most recent academic program (degree, major, and certificates). [see: Office of Admissions | Apply as Reentry Student (<https://admissions.wisc.edu/apply-as-a-reentry-student/>)]

COURSES AND CREDITS

Find descriptions of UW–Madison courses, attributes, repeatability, and requisites in the Courses (<https://guide.wisc.edu/courses/>) section of the Guide.

Course requisites

Some courses have required conditions (“requisite” or “prerequisite”) that must be met before a student can enroll, such as another completed course (e.g., CHEM 103 before CHEM 104), placement test scores, or class standing (e.g., sophomore standing). Some courses have a co-requisite course where both are taken together in the same term.

Repeating a course

Some courses are designated as repeatable for credit, as shown in the details of the Courses (<https://guide.wisc.edu/courses/>) section in Guide. For “Special Topics” and Directed Study courses that are repeated, the content of the class must be different each time for credit to be awarded.

Students may enroll in a non-repeatable course for which they have already earned credit. This is referred to as enrolling on a “refresher” basis. Students earn credit for the first time they pass a non-repeatable course, whether that course was first passed at UW–Madison or another institution. A grade earned in a refresher course is calculated in the cumulative University GPA and the Term GPA, but not in the L&S degree's other GPA requirements. [see: L&S | Retaking a Course (<https://deans.ls.wisc.edu/policies-forms/retaking-courses/>)]

A refresher course counts toward the student's credit load for the term, including as a basis for tuition and fees.

Repeating a non-repeatable course does not remove or change the grade received for the earlier attempt or completion of the course.

Directed Study

Directed Study are courses where the learning experience is customized with the mentorship of a member of the faculty.

Directed Study courses in subject areas outside of Letters & Science, and numbered 398 or higher, are considered Liberal Arts and Science (LAS) courses. Directed Study courses may be repeated for credit if course content is not duplicated. Directed Study courses do not meet University General Education, Language, or L&S Breadth requirements. [see: L&S Degree Requirements (<https://guide.wisc.edu/undergraduate/letters-science/#requirementstext>)]

Directed Study courses may not be taken on a Pass/Fail or Audit basis. Courses with numbers ending in “99” (e.g., HISTORY 699) are graded on an A to F basis. Courses with numbers ending in “98” (e.g., HISTORY 698) are graded on a Credit/No Credit basis.

Graduate courses

Courses numbered 700 and above are reserved for students enrolled in a UW–Madison graduate degree program.

In rare instances, an instructor may permit an exceptional undergraduate student to enroll in their graduate course, if the graduate experience advances the student's education goals.

Undergraduate students taking graduate courses are expected to complete the same work as graduate students and are graded accordingly. Undergraduate students who complete a graduate course with a passing grade earn undergraduate degree credit. [see: L&S | Graduate Courses (<https://deans.ls.wisc.edu/policies-forms/graduate-courses/>)]

- Graduate-level courses in L&S subject areas count as Advanced-level credit and toward the required 108 credits in Liberal Arts and Science courses and the Mastery of Intermediate/Advanced work.
- Graduate-level courses in subject areas outside of Letters & Science are considered free electives in the degree.
- Graduate-level courses do not count towards L&S Breadth requirements.
- Grades earned by undergraduates in graduate-level courses are computed in all relevant grade-point averages for the degree.
- Undergraduate students cannot enroll in or earn degree credit for graduate-level Directed Study, Independent Reading, Independent

Study, Dissertation, or Individual Enrollment courses (e.g., 799, 899, 999).

Credit by Departmental Examination

Some L&S departments may award credit by exam for approved courses. Departments are responsible for maintaining procedures for awarding credit by departmental examination. For a list of courses approved for credit by examination see: Credit by Exam (<https://guide.wisc.edu/undergraduate/#placementandcreditbyexamtext>).

Retroactive language credit

UW–Madison awards degree credit (called retroactive credit or retro-credit) for language learning to students who meet certain criteria. [see: Retroactive Language Credit (<https://guide.wisc.edu/undergraduate/#placementandcreditbyexamtext>) and UW–Madison Language Institute | Policies (<https://languages.wisc.edu/policy/>)]

English as a Second Language (ESL)

Language placement tests for some students evaluate their English language proficiency and place those students into an English as a Second Language course. [see: Placement Tests (<https://guide.wisc.edu/undergraduate/#placementandcreditbyexamtext>)]

Up to six credits in ESL courses may count for degree credit in Letters & Science. Only ESL 118 counts as Liberal Arts and Science credit.

EXAMS

Letters & Science follows the University policy (<https://policy.wisc.edu/library/UW-862/>) and the campus schedule for midterm and final examinations. [see: L&S | Exams (<https://deans.ls.wisc.edu/policies-forms/exams/>)]

GRADES

Letters & Science follows the University policy for grades and grading. [see: Grading System (<https://guide.wisc.edu/undergraduate/#enrollmentandrecordtext>) and Office of the Registrar | Student Grading and GPA (<https://registrar.wisc.edu/student-grades/>)]

Grade changes

A grade may be changed only if there has been a reporting error. In such cases, the student should notify the instructor, who can then correct the grade. [see: L&S | Grade Changes (<https://deans.ls.wisc.edu/policies-forms/grade-changes/>)]

Grade appeals

Students have the right to appeal a final grade if they believe that grade to be either incorrect or inequitable when compared to the standard grading policy in the syllabus for all students taking the same course. A student wishing to appeal their grade must follow the process described here: [L&S | Grade Appeals (<https://kb.wisc.edu/lis/22258/>)]

Incomplete grade (I)

A grade of Incomplete may be assigned to a student who, because of illness or another unusual and substantiated cause beyond their control, is unable to complete the coursework.

To be eligible for an Incomplete grade, the student must:

- be earning a passing grade to-date in the course,
- and have a limited amount of work to complete by the end of the term.

For a short summary of the policy, see the Enrollment and Records – Incompletes section (<https://uwprod-my.sharepoint.com/undergraduate/#undergraduateincompletes>) of Guide.

Pass/Fail grade (S/U)

Students may take classes on a Pass/Fail basis according to University policy (<https://guide.wisc.edu/undergraduate/#undergraduatepassfailgradingprocess>). In Letters & Science, courses with a Pass/Fail grade of S are eligible to meet the requirements for total degree credits, Liberal Arts and Science credit, Mastery of Intermediate/Advanced work, and the Senior Residence requirement. Courses with a Pass/Fail grade of S do not meet other requirements of L&S degree, major, or certificate programs. Pass/Fail grades do not compute into any GPA requirements. [see: L&S | Pass/Fail (<https://deans.ls.wisc.edu/policies-forms/pass-fail/>)]

Students request the Pass/Fail grade option through their Student Center. This request must be approved by L&S Undergraduate Academic Deans' Services (<https://deans.ls.wisc.edu/>). Once the deadline for requesting Pass/Fail grading has passed, no adjustments to the grading approach may occur. [see: Process for requesting the Pass/Fail grading option (<https://guide.wisc.edu/undergraduate/#undergraduatepassfailgradingprocess>)]

MAJORS

Declaring a major

Declaring is the formal process of adding a major to a degree program.

Students are required to declare a major or be admitted into a specialized degree program before they reach Senior standing (i.e., they have 86 earned degree credits). Students who have not yet declared a major or specialized degree by the fifth week of the term in which they have 86 combined earned and in-progress credits will be prevented from enrolling in a future term until they either declare a major/specialized degree or are granted an extension by L&S Undergraduate Academic Deans' Services (<https://deans.ls.wisc.edu/>). Students who feel they need an extension must consult their academic advisor about their plan to declare a major. [Find your advisors in Academic Navigator (<https://my.wisc.edu/academic-navigator/>)]

Canceling a major

Students who no longer want to complete a major must contact the department of the major and request it be canceled. Seniors who wish to cancel their only declared major are subject to the major declaration policy above, and will need to choose an alternate major. [see: L&S Degrees/ Majors/Certificates (<https://guide.wisc.edu/undergraduate/letters-science/#degreesmajorscertificatestext>)]

Additional L&S major (for students in other schools/ colleges)

Undergraduate students pursuing degrees in other UW–Madison Schools/ Colleges may declare an additional major in the College of Letters & Science. Students must obtain permission from the academic deans (<https://registrar.wisc.edu/permissions/#academicdean>) in their home School/College and the L&S department that offers the L&S major.

Students who declare an additional L&S major only complete the requirements of that major; they do not complete the other L&S degree requirements.

Students earning their degree from another School/College at UW–Madison and who concurrently complete the requirements of an L&S major will have that major conferred by L&S after their primary degree is conferred. The L&S major will be added to the

official UW–Madison transcript. [see: L&S Degrees, Majors, and Certificates (<https://guide.wisc.edu/undergraduate/letters-science/#degreesmajorscertificatestext>) and Office of the Registrar | Posting of Degrees (<https://registrar.wisc.edu/posting-of-degrees/>)]

Additional majors in other colleges/schools (for L&S students)

After declaring at least one L&S major, students may request permission to declare one of these additional majors outside of Letters & Science [see: L&S | Declaring a Second Major Outside of L&S for L&S Undergraduates] (<https://kb.wisc.edu/lis/25408/>):

- Educational Policy Studies (School of Education)
- Global Health (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/entomology/global-health-bs/>) (College of Agriculture & Life Sciences)
- Health Promotion and Health Equity (<https://guide.wisc.edu/undergraduate/education/kinesiology/health-promo-health-equity-bs/>) (School of Education)
- Theatre and Drama (<https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/>) (School of Education)

The College of Letters & Science will not delay conferring a degree to a student who has completed their L&S degree requirements but has not completed the requirements of an additional non-L&S major.

ACADEMIC STANDING

Academic standing is based on the student's most recent academic standing status, cumulative University GPA, and Term GPA. [see: L&S | Probation (<https://kb.wisc.edu/lis/38198/>)]

Good academic standing

Students are in good academic standing when their cumulative University GPA and most recent Term GPA are both 2.000 or higher. New students who have not yet established a University GPA are in good academic standing.

Academic probation and suspension

Students with a cumulative University GPA or most recent Term GPA of 1.999 or lower have an academic standing of Probation, Strict Probation, or Suspension, according to the section below. Students who are academically suspended may not enroll at UW–Madison for three consecutive terms (a combination of Fall, Spring, and Summer). [see: L&S | Probation (<https://kb.wisc.edu/lis/38198/>)]

Probation

- Assigned when a student in good academic standing earns a Term GPA of 1.000 to 1.999.
- Continued when a student on probation earns a Term GPA of 2.000 to 4.000 that results in a cumulative University GPA of 0.000 to 1.999.

Strict Probation

- Assigned when a student in good academic standing earns a Term GPA of 0.000 to 0.999; or
- Assigned when a student on probation earns a Term GPA of 1.500 to 1.999; or
- Assigned when a student on academic suspension is readmitted.
- Continued when a student on strict probation earns a Term GPA of 2.000 to 4.000 that results in a cumulative University GPA of 0.000 to 1.999.

Suspension

- Occurs when a student on probation earns a Term GPA of 0.000 to 1.499; or
- Occurs when a student on strict probation earns a Term GPA of 0.000 to 1.999.

Readmission

L&S students who have been academically suspended must first apply for readmission to the College of Letters & Science. If approved, they must also apply for reentry to UW–Madison through the Office of Admissions. [see: L&S | Readmission after Academic Suspension (<https://deans.ls.wisc.edu/policies-forms/probation/readmission/>)].

UW–Madison requires that academically suspended students who have been approved for readmission return to their previous college (Letters & Science) and major (if declared), although the student may later follow standard processes to change colleges or majors.

DEAN'S LIST

The Dean's List is published at the end of Fall and Spring terms [registrar.wisc.edu/deanslist (<https://registrar.wisc.edu/deanslist/>)]. Students on the Dean's List for that term receive a transcript notation.

In the College of Letters & Science, students are eligible for the Dean's List for a term when they complete at least 12 graded credits, do not have any unresolved temporary grades, and have a Term GPA of:

- 3.600 or higher (freshmen and sophomores)
- 3.850 or higher (juniors and seniors)

Temporary grades like NR, I, and Q must be resolved before students are eligible for the L&S Dean's List. [see: Office of the Registrar | Valid Grades (<https://registrar.wisc.edu/valid-grades/>)]

Students who have verified that they meet the eligibility criteria for a term but do not have a Dean's List notation on their transcript may contact L&S Undergraduate Academic Deans' Services (<https://deans.ls.wisc.edu/>). [see: L&S | Dean's List (<https://deans.ls.wisc.edu/policies-forms/deans-list/>)]

DEGREES AND DIPLOMAS

Changing degrees within Letters & Science

Students in the Bachelor of Arts and Bachelor of Science degrees may switch between them by completing a Degree Program Change form. [see: L&S | Degree Program Change (<https://deans.ls.wisc.edu/policies-forms/degree-program-change/>)]

Graduation

Students are expected to graduate in the term when they have completed all degree and major requirements. Graduating students should review all of their degree audit ("DARS") reports, meet with their advisor, and "apply for graduation" by the tenth day of class in their final term. Students apply for graduation via their Student Center. [see: Office of the Registrar | Apply for Graduation (<https://registrar.wisc.edu/applyforgraduation/>)]

Degree conferral

L&S confers degrees to qualified students after final grades are reported for a term. L&S uses the degree audit ("DARS") to verify that all requirements in a student's degree and each declared major are complete, and that all grades are final. Students should review their "DARS" in consultation with their advisor(s) to verify eligibility to graduate at the conclusion of the term.

In the term a student graduates with their degree, all completed certificates will be audited and, if complete, awarded. Certificates that are not complete will not be awarded and will not delay graduation. Students are strongly advised not to delay their graduation for the sole purpose of pursuing a certificate program.

Term of Conferral

A student's degree is conferred in the term when all credit is awarded and all grades are final.

If a student has an Incomplete grade in their last enrolled term that is given a final grade after that term is over the degree will be conferred in the term when the work was reported to be completed by the instructor of the course. [see: L&S | Graduation and Degree Audit Deficiency (<https://deans.ls.wisc.edu/policies-forms/graduation-and-degree-audit-deficiency/>)]

The College of Letters & Science has the authority to confer a degree to a student who has completed their degree requirements but did not formally apply for graduation. [see: Office of the Registrar | Apply for Graduation (<https://registrar.wisc.edu/applyforgraduation/>)]

Diplomas

The University Registrar posts degrees and orders diplomas after a student's degree is conferred by the College of Letters & Science. UW-Madison undergraduate diplomas display the degree earned (e.g., Bachelor of Arts) but not major(s) or certificate(s). Major and certificate information is recorded on the student's official UW-Madison transcript. [see: Office of the Registrar | Posting of Degrees (<https://registrar.wisc.edu/posting-of-degrees/>), Office of the Registrar | Diplomas (<https://registrar.wisc.edu/diplomas/>) and Office of the Registrar | Transcripts (<https://registrar.wisc.edu/transcript/>)]

Second undergraduate degree

Students may be enrolled in, and earn, only one UW-Madison undergraduate degree. Students may not pursue a dual degree that combines a degree program in L&S with one in another UW-Madison School or College.

When there are exceptional circumstances, a student may be approved to enroll in the College of Letters & Science for a second undergraduate degree. Eligibility is determined as part of the admissions process, in consultation with the academic deans in Letters & Science. [see: L&S | Second Undergraduate Degree (<https://deans.ls.wisc.edu/second-undergraduate-degree/>)]

REQUIREMENTS

REQUIREMENTS

This page provides information about the requirements of these L&S degrees:

- Bachelor of Arts (BA)
- Bachelor of Science (BS)
- Journalism Bachelor of Arts (JBA)
- Journalism Bachelor of Science (JBS)

Consult the Guide Majors & Certificates (p. 22) section for degree requirements for the L&S degrees: Bachelor of Science in Applied Mathematics, Engineering, and Physics; Bachelor of Landscape

Architecture; Bachelor of Music: Performance; Bachelor of Music: Education and Bachelor of Social Work.

Requirements for the BA, BS, JBA, and JBS degrees:

- University General Education (p. 373)
 - Language (p. 373)
 - Mathematics (p. 374)
 - Breadth: Exploration in the Liberal Arts and Sciences (p. 374)
- Major: Understanding a Field of Study (p. 374)
- Liberal Arts and Science Credits (p. 374)
- Mastery of Intermediate/Advanced Liberal Arts and Science Credit (p. 375)
- Residency Requirement (p. 375)
- Quality of Work (p. 375)

CATALOG YEARS

A student's degree requirements are established according to student-specific academic milestones. These are often referred to as "catalog year" policies. Each school and college at UW-Madison may have different catalog year policies. In L&S, the catalog policies determine the requirements of the degree as follows:

- University General Education Requirements (UGER): Year and term of first matriculation to any accredited institution of higher learning, after graduating from secondary school.
- L&S degree requirements: Year and term of first matriculation to any accredited institution of higher learning, after graduating from secondary school.
- L&S major/certificate requirements: Year and term of program declaration.

The Degree Audit Reporting System (DARS (p. 375)) applies these catalog year policies automatically.

Students should consult the catalog-year edition of the Guide that applies to each requirement of their programs. For example, a student's Guide for L&S degree requirements may differ from their Guide for major requirements.

Students have the option to adopt new catalog-year rules if a new version of the curriculum benefits them. Students wishing to update their catalog year for major/certificate requirements should contact the advisor of that program. For L&S or UGER requirements, students should contact L&S Undergraduate Academic Deans' Services.

UNIVERSITY GENERAL EDUCATION

Students in L&S must satisfy the University General Education requirements (p. 33). Most General Education courses are taught in L&S and provide foundations in communication, quantitative reasoning, ethnic studies, humanities, social sciences, and natural sciences.

Language

The College of Letters & Science teaches over fifty languages (<https://languages.wisc.edu/>) other than English. The study of a language other than English contributes in an important way to a broad education in a multi-lingual world where many people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a language other than English is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own language. Degrees in L&S require language study to ensure that all

students have access to the knowledge, skills, and perspectives studying a language affords.

L&S Language requirements differ between the BA and the BS degrees:

- BA students complete either the fourth unit of a language other than English, or the third unit of one language other than English in combination with the second unit of a different language other than English.
- BS students complete the third unit of a language other than English.

A language unit is one semester of college language study, one year of language study in the same language in high school, or two years of language study in the same language in middle school. This requirement can only be met by units of study in languages other than English.

Students may complete the L&S Language requirements in various ways:

- Through units completed in high school
- Through units completed at UW-Madison or at another accredited college or university
- Through departmental placement and assessment methods (<https://languages.wisc.edu/new-students/#placement-and-policies>)

Students with a documented disability in second language acquisition who believe they cannot meet the Language requirement for their L&S degree may apply for an accommodation. If approved, students will be allowed to complete the Language requirement with alternate course work known as a "Language Substitution Package." Information about this process is available at L&S Undergraduate Academic Deans' Services (<https://deans.ls.wisc.edu/non-english-language-substitution-package/>).

Mathematics

Mathematics and mathematical reasoning are foundational to learning in nearly all areas of inquiry and are thus a key component of a liberal arts and science education.

- For BA students, the L&S mathematics requirement is satisfied by completing the University General Education Requirements for Quantitative Reasoning A and Quantitative Reasoning B.
- BS students must complete two Intermediate or Advanced courses, each at least three credits, in either Mathematics, Computer Sciences, or Statistics. Of the two additional courses, only one may be from Computer Sciences and only one may be from Statistics.

Breadth: Exploration in the Liberal Arts and Sciences

Students who are liberally educated understand the connections between many scholarly approaches to world knowledge. The L&S Breadth requirements expose students to three general areas of knowledge: arts and humanities, social sciences, and the natural sciences. Combined, these broad areas challenge students to understand different ways (methods) of knowing and to connect various subjects of inquiry.

The three areas of Breadth are:

- Humanities, which primarily focuses on understanding humans as thinkers, citizens, and creators of art, literature, and culture. Courses that meet the Humanities Breadth requirement are designated as Humanities or Literature.
- Social Sciences which primarily focuses on understanding humans and their interactions in societies, institutions, and systems. Courses that meet the Social Science Breadth requirement are designated as Social Science.

- Natural Sciences, which primarily focuses on systematic study of the natural and physical world, and with the use of abstraction and logical reasoning. Courses that meet the Natural Science Breadth requirement are designated as Biological Science, Physical Science, or Natural Science.

Many courses carry more than one Breadth designation (e.g., "Humanities or Social Science"). These courses always approach their topics from these complementary "ways of knowing," but may only count toward one of the Breadth requirements and cannot be split between two areas.

BA students must complete these Breadth requirements:

- 12 credits in Humanities, to include at least 6 credits in Literature.
- 12 credits in Social Sciences.
- 12 credits in Natural Sciences, to include at least one 3+ credit course in Biological Science and one 3+ credit course in Physical Science.

BS students must complete these Breadth requirements:

- 12 credits in Humanities, to include at least 6 credits in Literature.
- 12 credits in Social Sciences.
- 12 credits in Natural Sciences, to include at least 6 credits in Biological Science and 6 credits in Physical Science.

MAJOR: UNDERSTANDING A FIELD OF STUDY

L&S offers more than 60 majors and special degree programs (p. 367). Completing a major allows students to deeply investigate at least one subject or issue. Work in the major requires a progression of skills, knowledge, and values, where advanced learning opportunities in upper-level coursework grow from and expand upon earlier experiences. In advanced coursework, senior capstone, or independent research projects, students are asked to synthesize what they have learned and apply it in new situations. By the conclusion of their studies, students are educated to understand themselves and their society, to develop their intellectual powers outside of a university setting, and to make productive contributions to the world around them.

Students must complete at least one L&S major to earn their degree. Students are required to declare a major before reaching senior standing (86 earned credits). The process to declare a major is outlined in the How to Get In (p. 367) section of each major. All L&S majors require students to meet quality of work (p. 375) and residency (p. 375) requirements.

LIBERAL ARTS AND SCIENCE CREDITS

Of the 120 credits required for the bachelor's degree (p. 9), students must earn at least 108 credits in courses designated as Liberal Arts and Science courses. These courses promote the core educational values of the liberal arts and sciences:

- skilled written and verbal communication, excelling in formulating and expressing a point of view; reflecting and questioning current knowledge through reading; research and consideration of the views of others.
- the ability to draw flexibly upon and apply the modes of thought of the major areas of knowledge.
- knowledge of our basic cultural heritage as a multifaceted and often contested history.

MASTERY OF INTERMEDIATE/ADVANCED LIBERAL ARTS AND SCIENCE CREDIT

Students are expected to challenge themselves in rigorous courses and achieve deeper knowledge of subject matter as they progress in their degree. To meet this expectation, students must:

- complete at least 60 credits in Liberal Arts and Science courses with either the Intermediate or Advanced level designation.
- earn a minimum 2.000 GPA on all Intermediate and Advanced courses.

RESIDENCY

Students must have 30 overall credits in residence to meet the campus requirement. In addition, L&S students must complete at least 30 credits in residence as a Senior (after 86 earned degree credits) and 15 credits at the upper-level in each declared major. These requirements are intended to ensure that students have a substantive and meaningful academic experience in classes taught by UW-Madison faculty. These credits do not have to be contiguous for the requirement to be met.

A course is considered in residence if the student enrolls for credit through UW-Madison. This includes any courses completed:

- at UW-Madison, in any instructional mode (in-person, online, or hybrid).
- through a UW-Madison administered program, either domestically or internationally (i.e., Study Abroad through International Academic Programs).

Courses are considered on campus if they are both in residence and taught by a UW-Madison instructor in-person, online, or in a hybrid mode of instruction. Courses taken through a UW-Madison study abroad program are not on campus.

QUALITY OF WORK

A student's overall quality of work and their quality of work in their chosen major(s) are important measures of a student's mastery of knowledge. The L&S quality of work requirements are all computed on courses taken in residence, and set a minimum 2.000 GPA in four specific areas:

- University GPA, computed using all graded courses at UW-Madison.
- Intermediate/Advanced, computed using courses designated Liberal Arts and Science (LAS) with Intermediate or Advanced level. Courses taken on a refresher basis (p. 370) do not compute toward this requirement.
- Major, computed in each major using all courses that meet the requirements of that major and all courses in the subject listing of each major (if applicable). Courses taken on a refresher basis (p. 370) do not compute toward this requirement.
- Upper-Level in Major, computed in each major using courses designated as upper-level for that major. Courses taken on a refresher basis (p. 370) do not compute toward this requirement.

DEGREE AUDIT REPORTING SYSTEM (DARS)

The requirements for every L&S degree, major, and certificate program are audited using the Degree Audit Reporting System (DARS) (<https://enroll.wisc.edu/dars/>). DARS is the official report of student degree progress, requirement fulfillment, and eligibility to graduate with an L&S degree, additional major, or certificate program.

Students should use DARS regularly (<https://kb.wisc.edu/21634/>) in conjunction with academic advising to see how their completed and in-progress coursework satisfies the requirements of their L&S program(s).

When a student applies to graduate, L&S will use DARS for all their declared programs to determine whether they have completed all requirements of the degree and are eligible to graduate. Students can generate and review their DARS in the Student Center via My UW (<https://my.wisc.edu>).

Students may also use DARS to explore L&S programs in which they are interested but not declared by using the "What-If" DARS (<https://kb.wisc.edu/94068/>) available in their Student Center. They may also include courses they plan to take in a future term and audit the results using DARS. When exploring L&S programs, students are encouraged to consult Guide, their assigned academic advisor, and the academic advisor of the program they are considering.

RESOURCES

RESOURCES ACADEMIC ADVISING

You make the decisions that fit your academic plan. We'll help you know your options.

Academic advisors are experts who help you explore UW-Madison courses and understand the components of your degree. They help you find learning support, tutoring, activities, and services that enhance your college experience, such as First-Year Interest Groups (<https://figs.wisc.edu/>), Study Abroad (<https://studyabroad.wisc.edu/>), and honors classes (<https://honors.ls.wisc.edu/>).

Enrolled undergraduate students always have at least one assigned advisor; find yours in MyUW's Academic Navigator (<https://my.wisc.edu/academic-navigator/>).

Discuss your academic plan with your advisor frequently throughout your college years.

You connect with your advising team at SOAR (<https://soar.wisc.edu/>), the orientation for all incoming students. Your assigned advisor will have a broad knowledge of courses, majors, and certificates.

When you declare a major, your primary academic advising shifts to an advisor in that major's department who specializes in its requirements and opportunities.

Additional Advisors

UW-Madison has specialist advisors for students interested in future study in medicine and health professions, law, business, and more. Students developing research for a senior thesis and other kinds of advanced study may have a faculty advisor who is an instructor or professor.

advising.wisc.edu/advising-101 (<http://advising.wisc.edu/advising-101/>)
— This all-campus advising website is an excellent place to start understanding how advising fits into your college life.

advising.ls.wisc.edu (<http://advising.ls.wisc.edu>) — L&S Academic Advising Services is the College's central coordinating office for undergraduate academic advising.

POLICY ADVISING

If you are told to "talk to a dean" or you "need deans' permission," this means a special kind of college administrator called an academic dean.

Academic deans assist students on issues and processes related to college policy, such as grade changes, enrollment updates, credit overloads,

and degree clearance. They also support students who are experiencing academic challenges, helping them navigate academic suspension, withdrawing from the term, and seeking readmission to the College. In their work, academic deans make discretionary decisions regarding the interpretation and implementation of College policy for individual cases and manage appeals of related concerns.

deans.ls.wisc.edu (<https://deans.ls.wisc.edu/>) – Our academic deans are in L&S Undergraduate Academic Deans' Services. They interpret and apply academic policy to L&S students, faculty, and staff and provides accurate and comprehensive information about L&S academic rules and processes.

CAREER ADVISING

Many departments in Letters & Science have career advisors dedicated to students in the major: check the “Advising and Careers” sections of programs in this Guide. Career advisors have deep connections to alumni and other professionals in fields related to the major. They assist with internships, networking, and other services to help students build a plan toward chosen careers.

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience, and connect with supportive alumni and employers who open doors of opportunity.

- What you can do with your major (<https://successworks.wisc.edu/what-you-can-do-with-your-major/>) (Major Skills & Outcomes Sheets)
- Make a career advising appointment (<https://successworks.wisc.edu/make-an-appointment/>)
- Learn about internships and internship funding (<https://successworks.wisc.edu/finding-a-job-or-internship/>)
- Try “Jobs, Internships, & How to Get Them,” (<https://successworks.wisc.edu/canvas/>) an interactive guide in Canvas for enrolled UW–Madison students

HONORS

HONORS

The College of Letters & Science Honors Program provides a community for many of the university’s most talented and engaged undergraduates. Students of all backgrounds and academic interests challenge and learn from each other while working closely with faculty members and completing Honors coursework. The Honors Program is home to around 1,500 motivated, curious students, all pursuing one of three degree tracks: Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors—the highest undergraduate degree awarded by the college. In addition to an enhanced curriculum that offers small, faculty-led courses, the program also offers academic advising services; grants, scholarships, and awards; and many professional development and co-curricular opportunities. Events, term-specific deadlines, funding opportunities and much more can be found on the L&S Honors Program website (<http://honors.ls.wisc.edu/>). We welcome inquiries via email at honors@honors.ls.wisc.edu. The L&S

Honors Program is located in the historic Washburn Observatory at 1401 Observatory Drive in Madison, WI 53706.

HOW TO GET IN

Eligibility criteria and admissions procedures differ for the different Honors degrees. Any UW–Madison Honors credits earned before admission to the Honors Program may be applied toward Honors degree requirements.

Admission to Honors in the Liberal Arts (HLA)

To become a candidate for the Honors in the Liberal Arts degree, a student must apply directly to the L&S Honors Program. Students follow different application procedures based on whether they are an incoming (non-transfer) student newly admitted to the College of Letters & Science, on the one hand, or a transfer student or continuing L&S student, on the other.

All students admitted to the university and to the College of Letters & Science are invited to apply to the Honors Program to pursue Honors in the Liberal Arts. Interested incoming students can apply via an online application. L&S admitted students receive an invitation message by email that contains application instructions, and instructions are also on the Honors Program website. Admission to the program is competitive, and space is limited.

Continuing L&S undergraduates and incoming transfer students with a cumulative grade point average of 3.300 or above who are currently enrolled at UW–Madison or who are transferring to UW–Madison from another college or university may apply. Application instructions and decision timelines are available on the Honors Program website (<http://honors.ls.wisc.edu/>). While continuing or transfer students having 60 or more credits at the time of application to the Honors Program are eligible to pursue the Honors in the Liberal Arts (HLA) degree track, they are encouraged to consider whether Honors in the Major (HM) would be their preferred Honors track (see below), since they may find it difficult to prioritize and complete the HLA degree requirements. Meeting with an Honors advisor can help interested students understand Honors requirements and possible paths forward.

Admission to Honors in the Major (HM)

Most majors in the College of Letters & Science offer students the option of pursuing Honors in the Major. Students interested in pursuing an Honors in the Major degree should consult the requirements for their major in Guide, follow major-specific procedures to declare the major, and speak with their assigned major advisor, who will explain any major-specific admissions procedures and Honors requirements. After receiving authorization from the department to declare Honors in the Major, students must complete the Honors in the Major Declaration Form (<https://honors.ls.wisc.edu/honors-in-the-major-declaration-form/>) on the Honors Program website.

Honors in the Major can be pursued independently from or alongside Honors in the Liberal Arts.

REQUIREMENTS

Honors may be earned in any L&S undergraduate degree (Bachelor of Arts; Bachelor of Science; Bachelor of Science–Applied Mathematics, Engineering, and Physics; Bachelor of Arts–Journalism or Bachelor of Science–Journalism; Bachelor of Landscape Architecture; Bachelor of Music; and Bachelor of Social Work). For students who complete the requirements, Honors will appear on diplomas and transcripts (for

example, BA with Honors in the Liberal Arts or BS with Honors in the Major).

Honors in the Liberal Arts (HLA)

Honors in the Liberal Arts requires students earn Honors credits in a breadth of disciplines and is meant to enrich and enhance a student's academic experience outside of the major. Coursework toward Honors in the Liberal Arts should be started as soon as possible and spread throughout a student's undergraduate degree. Students who complete this curriculum build connections with faculty and peers and develop strong skills in communication, critical thinking and complex problem solving, which will serve them well regardless of career path. The specific requirements for the HLA degree are:

- completion of the L&S general degree requirements
- a University GPA of 3.300 or higher at the time of graduation
- completion of at least 24 credits in Honors courses with the Liberal Arts & Science (LAS) designation and with grades of B or better, of which:
 - at least 15 credits must be in courses with the Honors Only or Accelerated Honors designation
 - 6 credits must be courses designated as Humanities (may include Literature designation)
 - 6 credits must be courses designated as Social Science
 - 6 credits must be courses designated as Biological, Physical, or Natural Science

Honors in the Major (HM)

Honors in the Major is intended for students who are interested in original research and who want deeper undergraduate training in the discipline. Honors in the Major can prepare students with the research, writing, and critical thinking skills useful to a wide range of career choices and graduate programs.

Each academic department and program in the college, with approval of the Faculty Honors Committee, establishes its own requirements for the Honors in the Major degree.

Although many of the specific requirements for HM vary by department, all students pursuing Honors in the Major must:

- complete the L&S general degree requirements, if an L&S degree candidate¹;
- complete the regular major requirements, including any declared named option requirements;
- obtain a University grade point average of at least 3.300;
- earn a grade of B or better in all courses counting towards Honors in the Major requirements; and
- successfully complete a capstone experience during their senior year, typically a Senior Honors Thesis (see below for more information).

¹ Non-L&S degree candidates may pursue Honors in the Major, but will not receive an L&S degree.

In addition to these collegewide requirements, Honors in the Major students may be required to complete additional upper-level, Honors coursework; participate in department research colloquia; and meet a minimum grade point average in all classes in the major (typically between 3.300 and 3.500).

Senior Honors Thesis

Most departments require a Senior Honors Thesis as the culmination of their Honors in the Major curriculum. In departments for which a research thesis is not the most appropriate capstone, an alternative such as a performance, a professional practicum, or a major piece of creative writing may be required. The two-semester Senior Honors Thesis or capstone project is often the most challenging part of the Honors in the Major experience, and for most students it also proves to be the most rewarding.

The Senior Honors Thesis is a two-semester (or summer and semester) effort; students first enroll in Senior Honors Thesis 681, followed the next term by Senior Honors Thesis 682 (some departments may use different numeric designations for Senior Honors Thesis courses). These two courses may not be taken concurrently. The final grade for the entire thesis is assigned after 682 has been completed. The thesis advisor will assign the thesis writer a P grade at the end of 681, signifying "progress," if progress has been made on the Senior Honors Thesis. When a 682 grade is posted, the Registrar's Office will update the "P" grade from 681 to match the assigned grade from 682.

A Senior Honors Thesis may not count toward Honors in the Major requirements in more than one major unless the student has received Dual Thesis Authorization from the L&S Honors Program. Dual Thesis Authorization (<https://honors.ls.wisc.edu/dual-thesis-authorization/>) allows the student to write one interdisciplinary thesis under the guidance of two thesis mentors, one representing each major, and have the thesis count toward Honors in the Major for both majors. Students interested in Dual Thesis Authorization should consult the Honors Program's Dual Thesis Authorization information. The L&S Honors Program strongly recommends that students seeking Dual Thesis Authorization submit required application materials the semester before they will be in a first-semester thesis course (typically 681).

A student may not enroll in senior Honors thesis credits for an L&S major (typically 681 and 682) while studying abroad unless they have received prior authorization from the L&S Honors Program. Such authorization is rarely granted, and the student would still need their thesis mentorship to be through UW-Madison. L&S Honors students interested in completing any thesis credits while abroad should consult with the L&S Honors Associate Director of Advising and Curriculum and also make a plan for thesis completion while on campus in Madison.

Comprehensive Honors

Students who complete the requirements for both Honors in the Liberal Arts and Honors in the Major in at least one department or program earn Comprehensive Honors, the highest undergraduate degree awarded by the College.

HOW TO EARN HONORS CREDIT

There are three unique Honors course designations, each described below. Students should always verify the Honors designation available for the particular section in which they wish to enroll.

- "Honors Only" courses are reserved for Honors candidates. They are generally small classes, led by a faculty member and designed for substantive engagement, or discussion sections or labs reserved for Honors students in larger non-Honors lecture courses. The enrollment system will automatically assign Honors credit to all enrolled students.
- "Accelerated Honors" are open to all students. Honors credit is awarded in recognition of the rigor and pace of the course. These Honors courses are often conducted at a faster pace than the non-Honors course counterparts or are upper-level capstone courses in a major that require significant engagement with the course material.

As with "Honors Only" designated courses, the enrollment system will automatically assign Honors credit to all enrolled students.

- "Honors Optional" designates courses for which Honors is available through an optional component of the course curriculum. These courses are open to all students for enrollment. Opting into the Honors component of the course is done through the enrollment process. Students who have selected the "Honors Option" are advised to consult with the instructor during the first three weeks of the term to confirm the Honors requirements for the course. Instructors either have pre-established Honors Optional expectations or students may be encouraged to develop a project idea of their own.

When the Schedule of Classes is published for the upcoming term, students can use the Enroll App to identify which course sections are being offered for Honors and with which designation. A course or course section being offered for Honors in a past term in no way guarantees that it will be offered for Honors in a future term.

Honors candidates may also earn Honors credit through the following methods:

- Complete an approved "Green Sheet" project. The Green Sheet proposal process allows a student to design an additional project for a course that is not otherwise offered for Honors credit in the given term. Green Sheets require consent of the instructor and approval of the L&S Honors Program. Green Sheet proposals must be submitted to the Honors Program no later than sixth week of a fall or spring semester or the third week of an eight-week summer term. Additional information and the online proposal form are available on the Green Sheet Information page (<https://honors.ls.wisc.edu/green-sheet-information/>) of the Honors Program website.
- Participate in an Honors-affiliated Study Abroad Program. Honors credit for some or all of the courses taken through these programs is awarded automatically through the study abroad equivalency process. More information about current Honors-affiliated study abroad programs can be found on the Study Abroad page (<https://honors.ls.wisc.edu/study-abroad-3/>) of the Honors Program website.
- Complete a study abroad petition. Through this process, a student may petition to have one course from an eligible study abroad term count toward unmet Honors requirements for Honors in the Liberal Arts. More information can be found on the Study Abroad Petition Information (<https://honors.ls.wisc.edu/study-abroad-petition-information/>) page of the Honors Program website.

In all cases, to receive Honors credit in a course, students must earn a final grade of B or higher in that course. If a grade of BC or lower is earned in an Honors course, the Honors notation remains on the student's record, but the course does not count toward Honors degree requirements. If the course is retaken for Honors, regardless of the grade earned during this second attempt, the course cannot satisfy an Honors degree requirement.

Students may not receive Honors credit in courses carried on a pass/fail basis.

ADVISING AND CAREERS

The L&S Honors Program has a team of dedicated academic advisors who accompany and support Honors candidates from the time the students join the Honors Program through their graduation. Advisors help individual students as they navigate a large, complex university, explore diverse educational and co-curricular experiences, and develop and pursue long-term goals. Advising occurs through a variety of formats including small group workshops, individual appointments, drop-in hours, and email.

Additional information is available on the Honors Program website (<http://honors.ls.wisc.edu/>).

The L&S Honors Program encourages our students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L&S SuccessWorks office to help students leverage the academic skills learned in the major(s) and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

PEOPLE

Please visit the L&S Honors website (<https://honors.ls.wisc.edu/meet-the-honors-team-members/>) to view Honors Team Members, including the Director, Associate Directors, Program Administrator, and Academic Advisors.

We welcome inquiries via email at honors@honors.ls.wisc.edu. Current students can connect with Honors advising via Starfish or by emailing advisor@honors.ls.wisc.edu.

POLICIES

Honors Progression

Students must obtain a University grade point average of 3.300 or higher to be eligible to graduate with an Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors. As such, we encourage students to strive for at least this GPA each academic term. The Honors Program advising team will reach out to students and offer their support in developing an improvement plan should their GPA drop below 3.300.

Students who leave the College of Letters & Science or who have not made progress toward meeting Honors in the Liberal Arts coursework or GPA requirements may be administratively withdrawn to facilitate timely graduation with a non-Honors degree.

Because each department sets its own criteria for the HM degree program, students are encouraged to work closely with departmental advisors to stay on track towards successful completion of HM.

Students may withdraw from HLA and/or HM at any time by submitting an Honors Withdrawal Form (<https://honors.ls.wisc.edu/honors-withdrawal-form/>), available on the Honors Program website.

Honors Transfer Credit

Honors credit earned at other institutions is not accepted towards L&S Honors degree requirements.

AFRICAN AMERICAN STUDIES

The Department of African American Studies at the University of Wisconsin-Madison offers students an opportunity to study those aspects of black history, culture, and society in ideal interdisciplinary models that reconstruct African American life. It challenges students to critically examine facts and issues that are historically and contemporaneously relevant to the African American experience. The department offers an undergraduate major and certificate.

The Department of African American Studies formed in 1970 out of student concern for relevance in higher education that was so dramatically evidenced on many college campuses in the 1960s. Committed to bringing academic research to the broadest possible audience, the

Department of African American Studies at UW–Madison believes the deepest understanding of the complex reality of race in America requires a truly interdisciplinary approach. Within and beyond the walls of the university, our studies draw on history, literature, the social sciences, and the arts. Faculty members and students are active in a broad range of activities, including hip-hop programs for at-risk youth, college classes for low-income adults, and the Public History Project. The department prides itself on positive working relationships with our colleagues in other disciplines, including the other ethnic studies programs, the departments of Gender and Women's Studies, African Cultural Studies, English, History, and the School of Education.

A vibrant community of scholars and students who believe in the ideal of unity without uniformity, we welcome all those committed to a deeper understanding of race and ethnicity in America and the world.

AFRICAN AMERICAN STUDIES, BA

The Department of African American Studies offers you an opportunity to study Black history, culture, and society in interdisciplinary models that reconstruct African American life. It challenges you to critically examine facts and issues that are historically and contemporaneously relevant to the African American experience. Faculty members and students are active in a broad range of activities, including hip-hop programs for at-risk youth, college classes for low-income adults, the Prison Education Initiative, and the Public History Project. The department prides itself on positive working relationships with our colleagues in other disciplines, including the departments of Gender and Women's Studies (<https://gws.wisc.edu/>), African Cultural Studies (<https://african.wisc.edu/>), English (<https://english.wisc.edu/>), History (<https://history.wisc.edu/>), and the School of Education (<https://education.wisc.edu/>).

The department is committed to bringing academic research to the broadest possible audience, with the belief that the deepest understanding of the complex reality of race in America requires a truly interdisciplinary approach, one that draws on history and literature, the social sciences, and the arts. Course options for the African American Studies major include "Introduction to Black Women Writers," "Race and American Politics from the New Deal to the New Right," "Hip-Hop and Contemporary American Society," "Blacks, Film, and Society," "Afrofuturism and Popular Culture," "Introduction to African American Art," "Black Street Culture," "Traditions in African American Humor," "Slavery and Capitalism," and "Black Women's Political Behavior."

African American Studies students gain deeper insight into ongoing racial inequality and social justice, helping them be more informed and empathetic when addressing issues of equity in their future careers. Students will graduate prepared to interact effectively in a

multicultural world and workplaces and to share the results of academic research in the area of race with their communities.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (BA)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics	Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
Language	<ul style="list-style-type: none">• Complete the fourth unit of a language other than English; OR• Complete the third unit of a language and the second unit of an additional language other than English.
L&S Breadth	<ul style="list-style-type: none">• 12 credits of Humanities, which must include 6 credits of literature; and• 12 credits of Social Science; and• 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced work	Complete at least 60 credits at the intermediate or advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	<ul style="list-style-type: none">• 30 credits in residence, overall; and• 30 credits in residence after the 86th credit.
Quality of Work	<ul style="list-style-type: none">• 2.000 in all coursework at UW-Madison• 2.000 in Intermediate/Advanced level coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

The major in African American Studies requires **a minimum of 30 credits**. 15 of those credits must be numbered 300 and above. Students must take 2 courses from each of the five areas listed below:

1. Literature;
2. History and Society;
3. Arts and Culture;
4. Seminars and Advanced Courses; and
5. Electives.

LITERATURE

Code	Title	Credits
Two Courses From:		6
AFROAMER/ GEN&WS 222	Introduction to Black Women Writers	
AFROAMER 225	Introduction to African American Dramatic Literature	
AFROAMER 227	Masterpieces of African American Literature	
AFROAMER 265	African-American Autobiography	
AFROAMER 337	The Harlem Renaissance	
AFROAMER 338	The Black Arts Movement	
Total Credits		6

HISTORY AND SOCIETY

Code	Title	Credits
Two Courses From:		6
AFROAMER 151	Introduction to Contemporary Afro-American Society	
AFROAMER 231	Introduction to African American History	
AFROAMER 272	Race and American Politics from the New Deal to the New Right	
AFROAMER/ HISTORY 321	Afro-American History Since 1900	
AFROAMER/ HISTORY 322	African American History to 1900	
AFROAMER/ GEN&WS 324	Black Women in America: Reconstruction to the Present	
AFROAMER/ GEN&WS 326	Race and Gender in Post-World War II U.S. Society	
AFROAMER/ HISTORY 393	Slavery, Civil War, and Reconstruction, 1848-1877	
Total Credits		6

ARTS AND CULTURE

Code	Title	Credits
Two Courses From:		6
AFROAMER 154	Hip-Hop and Contemporary American Society	
AFROAMER 156	Black Music and American Cultural History	
AFROAMER/ ART HIST 241	Introduction to African Art and Architecture	
AFROAMER/ ART HIST 242	Introduction to Afro-American Art	
AFROAMER/ GEN&WS 267	Artistic/Cultural Images of Black Women	
AFROAMER 303	Blacks, Film, and Society	

AFROAMER/ GEN&WS 367	Art and Visual Culture: Women of the African Diaspora and Africa
Total Credits 6	

SEMINARS AND ADVANCED COURSES

Code	Title	Credits
Two Courses From		6
AFROAMER 525	Major Authors	
AFROAMER 621	Slavery and Capitalism in the United States	
AFROAMER/ GEN&WS 624	African American Women's Activism (19th & 20th Centuries)	
AFROAMER/ GEN&WS 625	Gender, Race and the Civil Rights Movement	
AFROAMER/ HISTORY 628	History of the Civil Rights Movement in the United States	
AFROAMER 631	Colloquium in Afro-American History	
AFROAMER 671	Selected Topics in Afro-American History	
AFROAMER/ ENGL 672	Selected Topics in Afro-American Literature	
AFROAMER 673	Selected Topics in Afro-American Society	
AFROAMER 675	Selected Topics in Afro-American Culture	
AFROAMER/ GEN&WS 677	Critical and Theoretical Perspectives in Black Women's Writings	
Total Credits		6

ELECTIVES

Code	Title	Credits
Two Courses From		6
AFROAMER/ AMER IND/ ASIAN AM/ CHICLA/ FOLKLORE 102	Introduction to Comparative US Ethnic and American Indian Studies	
AFROAMER 155	They: Race in American Literature	
AFROAMER/ GEN&WS 221	Introduction to Black Women's Studies	
AFROAMER 271	Selected Topics in African American Culture	
AFROAMER 302	Undergraduate Studies in Afro-American History	
AFROAMER/ GEN&WS 323	Gender, Race and Class: Women in U.S. History	
AFROAMER/ GEN&WS 333	Black Feminisms	
AFROAMER/ HISTORY 347	The Caribbean and its Diasporas	
AFROAMER/ POLI SCI 519	African American Political Theory	
AFROAMER/ HIST SCI/ MED HIST 523	Race, American Medicine and Public Health	

AFROAMER/ ED POL 567	History of African American Education
Total Credits 6	

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all AFROAMER and major courses
- 2.000 GPA on at least 15 credits of upper-level work in the major, in residence²
- 15 credits in AFROAMER, taken on the UW-Madison campus

² Upper-level in the major includes AFROAMER courses numbered 300 and above and courses that count for the major that are designated as Intermediate or Advanced level.

HONORS IN THE MAJOR

Students may declare Honors in the African American Studies Major in consultation with the African American Studies undergraduate advisor.

HONORS IN THE AFRICAN AMERICAN STUDIES MAJOR REQUIREMENTS

To earn Honors in the Major in African American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major
- Complete at least one course with a cross-cultural or comparative focus:

Code	Title	Credits
AFROAMER/ ART HIST 241	Introduction to African Art and Architecture	3
AFROAMER/ ANTHRO/C&E SOC/ GEOG/HISTORY/ LACIS/POLI SCI/ SOC/SPANISH 260	Latin America: An Introduction	3-4
AFROAMER/ AFRICAN/ANTHRO/ GEOG/HISTORY/ POLI SCI/SOC 277	Africa: An Introductory Survey	4
AFROAMER/ DANCE/MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
AFROAMER/ ASIAN AM/DANCE/ FOLKLORE 319	Afro Asian Improv: From Hip Hop to Martial Arts Fusion	3
AFROAMER/ HISTORY 347	The Caribbean and its Diasporas	3
AFROAMER/ AFRICAN 413	Contemporary African and Caribbean Drama	3-4

- Complete at least 15 credits in AFROAMER in courses numbered 500-599 or 600-699, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Familiar with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
- 2. Prepared to interact effectively in a multicultural world.
- 3. Prepared to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.
- 4. Prepared for careers working in institutions that address the needs of multicultural communities.
- 5. Develop an understanding of the connection between different disciplinary approaches to the study of race.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

First Year

Fall	Credits Spring	Credits
Communication-A (complete during your first year)	3 AFROAMER major course	3

Quantitative Reasoning-A (complete during your first year)	3 AFROAMER major course (Literature) ²	3
Foreign Language	4 AFROAMER elective (Ethnic Studies) ³	3

	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (BS)

Students pursuing a Bachelor of Science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Language	Complete the third unit of a language other than English.
L&S Breadth	Complete: <ul style="list-style-type: none">• 12 credits of Humanities, which must include at least 6 credits of Literature; and• 12 credits of Social Science; and• 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced Coursework	Complete at least 60 credits at the Intermediate or Advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	Complete both: <ul style="list-style-type: none">• 30 credits in residence, overall, and• 30 credits in residence after the 86th credit.
Quality of Work	<ul style="list-style-type: none">• 2.000 in all coursework at UW–Madison• 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

The major in African American Studies requires **a minimum of 30 credits**. 15 of those credits must be numbered 300 and above. Students must take 2 courses from each of the five areas listed below:

- 1. Literature;
- 2. History and Society;
- 3. Arts and Culture;
- 4. Seminars and Advanced Courses; and
- 5. Electives.

LITERATURE

Code	Title	Credits
Two Courses From:		6
AFROAMER/ GEN&WS 222	Introduction to Black Women Writers	
AFROAMER 225	Introduction to African American Dramatic Literature	
AFROAMER 227	Masterpieces of African American Literature	
AFROAMER 265	African-American Autobiography	
AFROAMER 337	The Harlem Renaissance	
AFROAMER 338	The Black Arts Movement	
Total Credits		6

HISTORY AND SOCIETY

Code	Title	Credits
Two Courses From:		6
AFROAMER 151	Introduction to Contemporary Afro-American Society	
AFROAMER 231	Introduction to African American History	
AFROAMER 272	Race and American Politics from the New Deal to the New Right	
AFROAMER/ HISTORY 321	Afro-American History Since 1900	
AFROAMER/ HISTORY 322	African American History to 1900	
AFROAMER/ GEN&WS 324	Black Women in America: Reconstruction to the Present	
AFROAMER/ GEN&WS 326	Race and Gender in Post-World War II U.S. Society	
AFROAMER/ HISTORY 393	Slavery, Civil War, and Reconstruction, 1848-1877	
Total Credits		6

ARTS AND CULTURE

Code	Title	Credits
Two Courses From		6
AFROAMER 154	Hip-Hop and Contemporary American Society	
AFROAMER 156	Black Music and American Cultural History

AFROAMER/HIST SCI/MED HIST 523	Race, American Medicine and Public Health	
AFROAMER/ED POL 567	History of African American Education	
Total Credits		6

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all AFROAMER and major courses
- 2.000 GPA on at least 15 credits of upper-level work in the major, in residence²
- 15 credits in AFROAMER, taken on the UW–Madison campus

² Upper-level in the major includes AFROAMER courses numbered 300 and above and courses that count for the major that are designated as Intermediate or Advanced level.

HONORS IN THE MAJOR

Students may declare Honors in the African American Studies Major in consultation with the African American Studies undergraduate advisor.

HONORS IN THE AFRICAN AMERICAN STUDIES MAJOR REQUIREMENTS

To earn Honors in the Major in African American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major
- Complete at least one course with a cross-cultural or comparative focus:

Code	Title	Credits
AFROAMER/ART HIST 241	Introduction to African Art and Architecture	3
AFROAMER/ANTHRO/C&E SOC/ GEOG/HISTORY/ LACIS/POLI SCI/ SOC/SPANISH 260	Latin America: An Introduction	3-4

AFROAMER/ AFRICAN/ANTHRO/ GEOG/HISTORY/ POLI SCI/SOC 277	Africa: An Introductory Survey	4
AFROAMER/ DANCE/MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
AFROAMER/ ASIAN AM/DANCE/ FOLKLORE 319	Afro Asian Improv: From Hip Hop to Martial Arts Fusion	3
AFROAMER/ HISTORY 347	The Caribbean and its Diasporas	3
AFROAMER/ AFRICAN 413	Contemporary African and Caribbean Drama	3-4

- Complete at least 15 credits in AFROAMER in courses numbered 500-599 or 600-699, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Familiar with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
2. Prepared to interact effectively in a multicultural world.
3. Prepared to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.
4. Prepared for careers working in institutions that address the needs of multicultural communities.
5. Develop an understanding of the connection between different disciplinary approaches to the study of race.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

AFRICAN AMERICAN STUDIES, CERTIFICATE

The certificate in African American Studies introduces you to the interdisciplinary study of African American, African diaspora and African history, society, and culture. You may choose courses in African American history, literature, Black women's studies, art history, visual culture, music history, politics, and sociology. The certificate offers you opportunities to engage in interdisciplinary study and practice that will complement your degree and enhance your intellectual and creative participation in their chosen professions and a citizen in our global society.

HOW TO GET IN**HOW TO GET IN**

To declare a certificate in African American Studies, students must be enrolled as an undergraduate at the University of Wisconsin-Madison. Interested students must contact the department's undergraduate adviser to declare the certificate and be assigned a faculty adviser in their area of interest. Students may not declare both the certificate and the major in African American studies.

REQUIREMENTS**REQUIREMENTS**

Certificate students must plan with a faculty adviser a cohesive program consisting of 15 credits chosen from undergraduate AFROAMER courses.

- At least one 3-credit course must focus on African American history (see list below).
- A minimum of 9 credits must be completed from AFROAMER courses numbered 300-699.
- At least one 3-credit course must be advanced (AFROAMER 500-697).
- A maximum of 3 credits of directed study (AFROAMER 699) may count toward the certificate.
- Students may not substitute courses from other academic programs or subject listings to fulfill the requirements for this program

Code	Title	Credits
All certificate students must take one 3-credit course in African American history:		3
AFROAMER 231	Introduction to African American History	
AFROAMER 272	Race and American Politics from the New Deal to the New Right	
AFROAMER 302	Undergraduate Studies in Afro-American History	
AFROAMER/HISTORY 321	Afro-American History Since 1900	
AFROAMER/HISTORY 322	African American History to 1900	
AFROAMER/GEN&WS 324	Black Women in America: Reconstruction to the Present	

AFROAMER/ GEN&WS 326	Race and Gender in Post-World War II U.S. Society	
AFROAMER/ HISTORY 393	Slavery, Civil War, and Reconstruction, 1848-1877	
AFROAMER 621	Slavery and Capitalism in the United States

AFROAMER/ HISTORY 628	History of the Civil Rights Movement in the United States	
AFROAMER 631	Colloquium in Afro-American History	
AFROAMER 671	Selected Topics in Afro-American History	
AFROAMER electives to meet the minimum credit requirement for the certificate		12
Total Credits		15

RESIDENCE & QUALITY OF WORK

- At least 8 credits must be completed in residence.
- Minimum 2.500 GPA on all certificate courses.
- Courses taken pass/fail or credit/no credit may not apply to the certificate.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. To familiarize students with the history, culture and social conditions of African Americans in the United States.
2. To introduce students to an interdisciplinary approach to the study of race, gender, and ethnicity in America.
3. To prepare students for careers in institutions that address the needs of multicultural communities.

AFRICAN CULTURAL STUDIES

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. Our faculty specialize in literature, history, music, film, critical applied linguistics, drama, diaspora studies, communications and new media. Our undergraduate program emphasizes the development and application of analytical, linguistic, and research methods that enable students to work effectively and imaginatively across regions, languages, cultural forms, fields, and disciplines. A student majoring in African Cultural Studies is prepared for careers across the globe!

Undergraduates study one of six languages offered by the department – Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu – and combine their language study with popular courses in the humanities, literature, and ethnic studies. Students can also enroll in academic self-driven study for less commonly taught African languages. The department offers a wide range of course topics, including African literature and theater, contemporary cinema and music, Afro-Futurism, gender and sexuality, and internet and media studies.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW-Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (<http://www.studyabroad.wisc.edu/>) and visit the Majors Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/african-cultural-studies/>).

For more information, students should feel free to contact the Department of African Cultural Studies (<http://african.wisc.edu/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (BA)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

- | | |
|-------------|--|
| Mathematics | Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework. |
| Language | <ul style="list-style-type: none"> • Complete the fourth unit of a language other than English; OR • Complete the third unit of a language and the second unit of an additional language other than English. |

- 2.000 GPA on 15 upper-level major credits, taken in residence ¹
- 15 credits in AFRICAN, taken on the UW–Madison campus

HONORS IN THE MAJOR

Students may declare Honors in the African Cultural Studies Major in consultation with the African Cultural Studies undergraduate advisor. To earn Honors in the Major in African Cultural Studies students must satisfy both the requirements for the major (above) and the following additional requirements:

1. Earn a 3.300 overall university GPA
2. Earn 3.300 GPA in all AFRICAN and major courses
3. Complete 15 Honors credits in the major, in residence, that includes:
 - a. 9 credits in courses numbered 200 and above
 - b. A two-semester Senior Honors Thesis in AFRICAN 681 and AFRICAN 682, for a total of 6 credits.

FOOTNOTES

¹ Courses with Intermediate or Advanced level are considered upper level in this major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Content) Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.
2. (Content) Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.

3. (Content) Develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language, literatures, and cultures.
4. (Research Skills) Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.
5. (Research Skills) Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.
6. (Communication Skills) Develop or improve speaking, listening, writing, reading skills in an African language, and integrate these skills to communicate effectively.
7. (Communication Skills) Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
8. (Communication Skills) Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
9. (Communication Skills) Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.
10. (Analytical Skills) Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
11. (Analytical Skills) Demonstrate command of the terminology and methodology of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

CAREERS

Humanities majors develop a wide variety of skills and talents, so they're prepared for just about any type of career or educational pursuit. Our coursework builds the critical thinking and communication skills needed to succeed in careers ranging from politics and education to business and law.

One of the more significant skills African Cultural Studies students develop is language acquisition. We offer a number of funding opportunities (<https://languages.wisc.edu/scholarships/>) to support language study, small class sizes with more opportunity for participation and cultural exchange, unique study abroad and international internship experiences, and instructors who are primarily native speakers with a keen interest in teaching. Plus, UW-Madison ranks #1 in the nation for students earning a bachelor's degree in language other than English!

In addition to the valuable language training and cultural competence an African Cultural Studies major gives you, consider what you learn in the classroom as well as what you do each day to be a successful student. The skills you develop are equally important in the workplace:

- critical reading, reflection, and analysis
- expanded world view and exposure to new ideas/ways of thinking
- effective teamwork to advance a common project/purpose
- effective time-management and self-motivation to complete projects independently
- demonstrated writing proficiency in short and long essay format
- discussion and debate strategies
- proper research design and methodology
- broader knowledge of career and graduate-study options

Count on being well-prepared for an exciting and rewarding career!

Visit our website (<https://african.wisc.edu/undergraduate-program/career-and-skill-development/>) for more information.

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience,

ADVISING AND CAREERS**ADVISING AND CAREERS
DECLARE OR CANCEL THIS MAJOR**

Please follow the process described on the African Cultural Studies website. (<https://african.wisc.edu/undergraduate-program/>)

ADVISING

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in *Contemporary Arabic Literature and Culture* and *South Africa's Truth and Reconciliation Commission* before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style. Any and all of these discussions can occur during your advising appointment.

and connect with supportive alumni and employers who open doors of opportunity.

- What you can do with your major (<https://successworks.wisc.edu/what-you-can-do-with-your-major/>) (Major Skills & Outcomes Sheets)
- Make a career advising appointment (<https://successworks.wisc.edu/make-an-appointment/>)
- Learn about internships and internship funding (<https://successworks.wisc.edu/finding-a-job-or-internship/>)
- Try “Jobs, Internships, & How to Get Them,” (<https://successworks.wisc.edu/canvas/>) an interactive guide in Canvas for enrolled UW–Madison students

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

One of the most valuable resources for students interested in language study is the Language Institute and its website, Languages at UW–Madison (<http://www.languages.wisc.edu/>).

Learn more about scholarships (<http://www.languages.wisc.edu/beyond/scholarships/>) and other opportunities for funded language study.

ACS partners with the campus’ African Studies Program, a federally-funded language and resource center for those doing research in Africa. See their offerings, grants and fellowships here (<https://africa.wisc.edu/academics/academics-fellowships-and-awards/>).

AFRICAN CULTURAL STUDIES, BS

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. Our faculty specialize in literature, history, music, film, critical applied linguistics, drama, diaspora studies, communications and new media. Our undergraduate program emphasizes the development and application of analytical, linguistic, and research methods that enable students to work effectively and imaginatively across regions, languages, cultural forms, fields, and disciplines. A student majoring in African Cultural Studies is prepared for careers across the globe!

Undergraduates study one of six languages offered by the department – Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu – and combine their language study with popular courses in the humanities, literature, and ethnic studies. Students can also enroll in academic self-driven study for less commonly taught African languages. The department offers a wide range of course topics, including African literature and theater, contemporary cinema and music, Afro-Futurism, gender and sexuality, and internet and media studies.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW–Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (<http://www.studyabroad.wisc.edu/>) and visit the Majors Advising Page (<https://www.studyabroad.wisc.edu/academics/major-advising-pages-maps/african-cultural-studies/>).

studyabroad.wisc.edu/academics/major-advising-pages-maps/african-cultural-studies/).

For more information, students should feel free to contact the Department of African Cultural Studies (<http://african.wisc.edu/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|---|
| General Education | <ul style="list-style-type: none">• Breadth–Humanities/Literature/Arts: 6 credits• Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits• Breadth–Social Studies: 3 credits• Communication Part A & Part B *• Ethnic Studies *• Quantitative Reasoning Part A & Part B * |
|-------------------|---|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (BS)

Students pursuing a Bachelor of Science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

Language Complete the third unit of a language other than English.

L&S Breadth Complete:
 • 12 credits of Humanities, which must include at least 6 credits of Literature; and
 • 12 credits of Social Science; and
 • 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.

Liberal Arts and Science Coursework Complete at least 108 credits.

Depth of Intermediate/Advanced Coursework Complete at least 60 credits at the Intermediate or Advanced level.

Major Declare and complete at least one major.

Total Credits Complete at least 120 credits.

UW-Madison Experience Complete both:
 • 30 credits in residence, overall, and
 • 30 credits in residence after the 86th credit.

Quality of Work
 • 2.000 in all coursework at UW-Madison
 • 2.000 in Intermediate/Advanced level coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

The African Cultural Studies major consists of a combination of literature and culture courses and two semesters of an African language for a minimum of 32 credits. The major requirements are divided into three areas: Language, Literature and Culture, and Capstone Course.

LANGUAGE

Code	Title	Credits
Complete one of the following language options:		8-10

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all AFRICAN and major courses
- 2.000 GPA on 15 upper-level major credits, taken in residence ¹
- 15 credits in AFRICAN, taken on the UW-Madison campus

HONORS IN THE MAJOR

Students may declare Honors in the African Cultural Studies Major in consultation with the African Cultural Studies undergraduate advisor. To earn Honors in the Major in African Cultural Studies students must satisfy both the requirements for the major (above) and the following additional requirements:

1. Earn a 3.300 overall university GPA
2. Earn 3.300 GPA in all AFRICAN and major courses
3. Complete 15 Honors credits in the major, in residence, that includes:
 - a. 9 credits in courses numbered 200 and above
 - b. A two-semester Senior Honors Thesis in AFRICAN 681 and AFRICAN 682, for a total of 6 credits.

FOOTNOTES

¹ Courses with Intermediate or Advanced level are considered upper level in this major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

ARABIC LANGUAGE AND CULTURE, CERTIFICATE

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. Our faculty specialize in literature, music, film, critical applied linguistics, drama, diaspora studies, and new media.

In support of this mission, the certificate in Arabic Language and Culture offers students the opportunity to develop proficiency in Arabic, thereby complementing their studies in other areas across the university. The certificate fosters a thorough understanding of one of the most widely spoken languages (official language of over 20 countries) throughout northern Africa and the Middle East with a focus on Arabic language skills, advanced language courses in Arabic, and courses on the literature and culture of the region. The certificate also strengthens the skills of students who intend to pursue careers or graduate study in areas of the world where Arabic proficiency is useful.

HOW TO GET IN

HOW TO GET IN DECLARING THE CERTIFICATE

Declaring the Arabic Language and Culture certificate is as easy as meeting with the advisor. Find the African Cultural Studies advisor on Starfish (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=service/64484>).

REQUIREMENTS

REQUIREMENTS

The Arabic Language and Culture certificate requires 14 credits. Students must complete through the fourth unit (semester) of Arabic language.

Students may earn the remaining credits with courses on culture, literature, and/or additional language study.

RESIDENCE AND QUALITY OF WORK

- At least 7 credits must be completed in residence.
- Minimum 2.000 GPA on all certificate courses.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate intermediate to advanced level proficiency in Modern Standard Arabic.
2. Compare and critique cultural, historical, and/or political realities in regions where Arabic language is influential to demonstrate intercultural competence and ethical reasoning.
3. Develop skills and abilities necessary to work in diverse career fields where Arabic language, cultural competence, and experience with international issues are sought after.

ADVISING AND CAREERS

ADVISING AND CAREERS DECLARE OR CANCEL THIS MAJOR

Please follow the process described on the African Cultural Studies (<https://african.wisc.edu/undergraduate-program/>) website (<https://www.anthropology.wisc.edu/undergraduate-study/>).

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience, and connect with supportive alumni and employers who open doors of opportunity.

AMERICAN INDIAN AND INDIGENOUS STUDIES PROGRAM

The American Indian & Indigenous Studies Program is dedicated to fostering excellence in education, scholarship, leadership, and support for students, staff, and faculty at the university. While serving the entire university community, the program prioritizes assisting and supporting American Indian and Indigenous students in their academic pursuits. Beyond campus, the American Indian & Indigenous Studies Program provides consultation and services to local, state, and national organizations, strengthening connections between academia and Indigenous communities.

As a leader in American Indian and Indigenous studies, the program supports course development, interdisciplinary scholarship, and research that centers Indigenous knowledge and perspectives. Additionally, the American Indian & Indigenous Studies Program serves as a resource hub for individuals interested in Indigenous cultures, histories, and contemporary issues, offering guidance, events, and academic opportunities that promote deeper engagement with Indigenous communities.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- American Indian and Indigenous Studies, Certificate (p. 401)

AMERICAN INDIAN AND INDIGENOUS STUDIES, CERTIFICATE

A certificate in American Indian & Indigenous Studies is a way of giving recognition to students who have made a significant effort to learn about Native culture and the role of American Indians and Indigenous peoples in society. The certificate is an interdisciplinary program that delves into the histories, cultures, languages, and contemporary issues of American Indian and Indigenous peoples. Students can tailor their studies by selecting from a diverse array of courses across disciplines such as literature, anthropology, social work, environmental studies, and more.

Additionally, the program offers opportunities to learn Indigenous languages spoken in Wisconsin, including Ojibwe (Anishinaabemowin), Ho-Chunk (Hoocąk), Menominee (Omāeqnomenēweqnaesen), and Oneida (Ukwehuwehnéha).

To enhance the academic experience, the program hosts events like the annual Evening of Storytelling (<https://am-indian-indigenous.wisc.edu/programs/storytelling/>), the Elder-in Residence Program (<https://am-indian-indigenous.wisc.edu/programs/eir/>), and the AIIIS Colloquium series (<https://am-indian-indigenous.wisc.edu/colloquiums/>), fostering community engagement and a deeper understanding of Indigenous narratives. Students pursuing the certificate may also be eligible for the American Indian & Indigenous Studies Scholarship (<https://am-indian-indigenous.wisc.edu/scholarships/>), a one-time, nonrenewable award supporting education-related expenses.

HOW TO GET IN

HOW TO GET IN

To begin the certificate declaration process, students must complete the Certificate Program Application which can be found on our Certificate Website (<https://amindian.wisc.edu/certificate-program/>). The certificate is open to all undergraduate students and those enrolled through the Special Student program, regardless of the college of enrollment.

REQUIREMENTS

REQUIREMENTS

15 total credits are required, as follows:

Total Credits**15**

RESIDENCE AND QUALITY OF WORK

- Minimum 2.000 GPA on all certificate courses.
- 6 credits may be taken as pass/fail. All other credits must be taken for a letter grade.
- At least 8 certificate credits must be completed in residence.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Apply knowledge and methods of inquiry characteristic of this interdisciplinary field.
2. Apply knowledge of historical precedents to contemporary issues.
3. Demonstrate knowledge of the creativity and ethos contained within the diverse ways of knowing (Indigenous Knowledge Systems) among American Indian nations and communities.
4. Apply knowledge of the effects (ongoing) of oppression and racism that American Indians experience.
5. Demonstrate knowledge of the contributions of American Indian value-belief systems and practical knowledge across all fields of human endeavor.

ADVISING AND CAREERS

ADVISING AND CAREERS

DECLARE OR CANCEL THIS CERTIFICATE

Please follow the process described on the American Indian & Indigenous Studies website (<https://am-indian-indigenous.wisc.edu/certificate-program/>). Talk with the academic advisor about courses and requirements: aiis@lets.wisc.edu.

Students of American Indian & Indigenous Studies go on to successful careers in administration, advising, academics, advocacy, the arts, business, community outreach, consulting, education, government, health or health education, journalism, library science, literacy programming, lobbying, management, politics, publishing, school counseling, social work, research, and many more.

ANTHROPOLOGY

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology – the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology – the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology – the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics – the analysis of language and its place in social life. Comparative and empirical work – and fieldwork in particular – are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth–Humanities/Literature/Arts: 6 credits
 - Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth–Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (BA)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

- Mathematics
- Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
- Language
- Complete the fourth unit of a language other than English; OR
 - Complete the third unit of a language and the second unit of an additional language other than English.

- L&S Breadth
- 12 credits of Humanities, which must include 6 credits of literature; and
 - 12 credits of Social Science; and
 - 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced work	Complete at least 60 credits at the intermediate or advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	<ul style="list-style-type: none">• 30 credits in residence, overall; and• 30 credits in residence after the 86th credit.
Quality of Work	<ul style="list-style-type: none">• 2.000 in all coursework at UW-Madison• 2.000 in Intermediate/Advanced level coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3
ANTHRO 300	Cultural Anthropology: Theory and Ethnography	3
Complete two:		6
ANTHRO 212	Principles of Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 490	Undergraduate Seminar	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Acquire specialized training in anthropological research.
2. Obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people's relationships with the physical, cultural, and natural world.
3. Gain an awareness of ethnographic, archaeological and biological anthropological ethics practice and research.
4. Distinguish between empirical and speculative narratives and claims about human diversity past and present.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

Quality of Work	<ul style="list-style-type: none">• 2.000 in all coursework at UW-Madison• 2.000 in Intermediate/Advanced level coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3
ANTHRO 300	Cultural Anthropology: Theory and Ethnography	3
Complete two:		6
ANTHRO 212	Principles of Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 490	Undergraduate Seminar	3
ANTHRO electives		15
Total Credits		30

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ANTHRO and major courses
- 2.000 GPA in 15 upper-level major credits in residence¹
- 15 credits in ANTHRO, taken on campus

¹ ANTHRO 300 and above are upper-level, with the exception of Quechua and Yucatec Maya language courses (ANTHRO/LACIS 361, ANTHRO/LACIS 362, ANTHRO/LACIS 363, ANTHRO/LACIS 364, ANTHRO/LACIS 376, ANTHRO/LACIS 377).

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Anthropology major advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the Anthropology major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all ANTHRO and major courses
- Complete the following coursework:

Code	Title	Credits
Biological Anthropology (complete one):		3
ANTHRO 105	Principles of Biological Anthropology	
ANTHRO 302	Hominoid Evolution	
ANTHRO 303	Human Skeletal Anatomy	
ANTHRO 304	Heredity, Environment and Human Populations	

ANTHRO/ BOTANY/ ZOOLOGY 410	Evolutionary Biology
ANTHRO 411	The Evolution of the Genus, Homo
ANTHRO 420	Introduction to Primatological Research
ANTHRO 454	Study Abroad: Topics in Biological Anthropology
ANTHRO 458	Primate Behavioral Ecology
ANTHRO 603	Seminar in Evolutionary Theory
ANTHRO 605	Seminar-Current Problems in Paleoanthropology
ANTHRO/ PSYCH/ ZOOLOGY 619	Biology of Mind
ANTHRO 668	Primate Conservation
<i>Cultural Anthropology (complete one):</i> 3	
ANTHRO 104	Cultural Anthropology and Human Diversity
ANTHRO/ FOLKLORE/ INTL ST/ LINGUIS 211	Global Language Issues
ANTHRO/ MED HIST 231	Introduction to Social Medicine
ANTHRO 237	Cut 'n' Mix: Music, Race, and Culture in the Caribbean
ANTHRO/ AFROAMER/ C&E SOC/GEOG/ HISTORY/LACIS/ POLI SCI/SOC/ SPANISH 260	Latin America: An Introduction
ANTHRO 265	Introduction to Culture and Health
ANTHRO/ AFRICAN/ AFROAMER/ GEOG/HISTORY/ POLI SCI/ SOC 277	Africa: An Introductory Survey
ANTHRO 300	Cultural Anthropology: Theory and Ethnography
ANTHRO/ AMER IND 314	Indians of North America
ANTHRO 340	Music, Race, And Culture in Brazil
ANTHRO/ RELIG ST 343	Anthropology of Religion
ANTHRO 345	Family, Kin and Community in Anthropological Perspective
ANTHRO 348	Economic Anthropology
ANTHRO 357	Introduction to the Anthropology of Japan
ANTHRO/ LACIS 361	Elementary Quechua
ANTHRO/ LACIS 362	Elementary Quechua

ANTHRO/ LACIS 363	Intermediate Quechua
ANTHRO/ LACIS 364	Advanced Quechua
ANTHRO 365	Medical Anthropology
ANTHRO/ LACIS 376	First Semester Yucatec Maya
ANTHRO/ LACIS 377	Second Semester Yucatec Maya
ANTHRO 424	Historical Anthropology
ANTHRO/ AMER IND/ FOLKLORE/ GEN&WS 437	American Indian Women

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Acquire specialized training in anthropological research.
2. Obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people’s relationships with the physical, cultural, and natural world.
3. Gain an awareness of ethnographic, archaeological and bio# anthropological ethics practice and research.
4. Distinguish between empirical and speculative narratives and claims about human diversity past and present.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

ADVISING AND CAREERS

ADVISING AND CAREERS DECLARE OR CANCEL THIS MAJOR

Please follow the process described on the Anthropology website (<https://www.anthropology.wisc.edu/undergraduate-study/>).

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience, and connect with supportive alumni and employers who open doors of opportunity.

- What you can do with your major (<https://successworks.wisc.edu/what-you-can-do-with-your-major/>) (Major Skills & Outcomes Sheets)
- Make a career advising appointment (<https://successworks.wisc.edu/make-an-appointment/>)
- Learn about internships and internship funding (<https://successworks.wisc.edu/finding-a-job-or-internship/>)
- Try “Jobs, Internships, & How to Get Them,” (<https://successworks.wisc.edu/canvas/>) an interactive guide in Canvas for enrolled UW–Madison students

ARCHAEOLOGY, CERTIFICATE

The Archaeology certificate is designed to help students develop the knowledge and practical skills needed to analyze archaeological materials and participate in archaeological field research. Students who complete the certificate, along with a BA or BS degree from UW–Madison, improve their competitiveness in graduate school applications and are qualified for entry-level employment opportunities in archaeology. In addition to providing a strong intellectual foundation in archaeology and hands-on experience in fieldwork, the certificate provides an interdisciplinary link to courses in three or more departments, exposing students to diverse approaches to the study of our global human heritage.

Ancient history is a puzzle made up of innumerable fragments—pieces of bone, pottery, stone, and metal; remnants of architecture and monuments; residues of food; and traces of other things. Archaeology is the field of study that provides the tools to discover these fragments and piece them together to reconstruct a picture of the ancient world and to illuminate the stories of past peoples. An accurate understanding of the past is critical for developing a better present and future.

Through their participation in the Archaeology certificate program, students gain an appreciation of the diversity of human societies and a fuller understanding of the cultural processes that have resulted in the way that we live today. Students explore the origins of subsistence strategies, trade, technology, belief systems, and conflict that are relevant to understanding the human condition in our modern world.

HOW TO GET IN

HOW TO GET IN

To declare an archaeology certificate, should contact or visit the Department of Anthropology.

REQUIREMENTS

REQUIREMENTS

7 courses and 21 credits ¹

Credits must be distributed in at least three SUBJECTs, and must meet these requirements:

Introductory course

Code	Title	Credits
Complete one:		3
ANTHRO 102	Archaeology and the Prehistoric World	
ANTHRO 105	Principles of Biological Anthropology	
ANTHRO 212	Principles of Archaeology	
Total Credits		3

Area courses

Code	Title	Credits
Complete 6 credits from:		6
ANTHRO 310	Topics in Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 333	Prehistory of Africa	
ANTHRO/ AMER IND 354	Archaeology of Wisconsin	
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	From Tomb to Temple: Ancient Chinese Art and Religion in Transition	
ART HIST 405	Cities and Sanctuaries of Ancient Greece	
CLASSICS/ JEWISH 241	Introduction to Biblical Archaeology	
CLASSICS 320	The Greeks

Field course

Code	Title	Credits
ANTHRO 370	Field Course in Archaeology	3-6
Total Credits		3-6

Capstone

Code	Title	Credits
Choose from:		3-4
ANTHRO 352	Ancient Technology and Invention ²	
ANTHRO 490	Undergraduate Seminar ³	
Total Credits		3-4

¹ Courses taken Pass/Fail do not count.² ANTHRO 352 can count either for a methods course **or** for the capstone course, but not both.³ ANTHRO 490 is a Topics course. In order to meet the capstone requirement, it must be on an archaeology topic.

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA on all certificate-approved courses
- At least 11 Certificate credits, taken in Residence

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATE

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. acquire specialized training in archaeological research, which may include: obtaining basic knowledge of and skills in observational methods and recording of information for a variety of lines of archaeological evidence, putting these abilities into practice in the classroom and outside of the classroom, developing research questions and the analytical skills necessary to address them, strengthening archaeological interpretations through critical thinking and reference to empirical evidence, gaining experience in considering a problem, synthesizing information from disparate sources, and evaluating contrasting arguments, being able to distinguish between empirical research and speculation, communicating archaeological findings through written and oral expression.
2. obtain comparative global knowledge of archaeology, material culture, and the evolution of people's relationships with the physical world.
3. become aware of the ethical practice of archaeology and heritage preservation.
4. synthesize information relevant to archaeological research across multiple disciplines.
5. gain an appreciation of cultural diversity through time and space.

ART HISTORY, BA

The Art History major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, we explore the ways in which art and visual and material culture are fully integrated into larger cultural histories.

Read more about the skills (<https://arthistory.wisc.edu/undergraduate-program/#about-the-major>) you develop through the Art History major.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (BA)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of

Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

Language • Complete the fourth unit of a language other than English; OR • Complete the third unit of a language and the second unit of an additional language other than English.

L&S Breadth • 12 credits of Humanities, which must include 6 credits of literature; and • 12 credits of Social Science; and • 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts and Science Coursework Complete at least 108 credits.

Depth of Intermediate/Advanced work Complete at least 60 credits at the intermediate or advanced level.

Major Declare and complete at least one major.

Total Credits Complete at least 120 credits.

UW-Madison Experience • 30 credits in residence, overall; and • 30 credits in residence after the 86th credit.

Quality of Work • 2.000 in all coursework at UW-Madison • 2.000 in Intermediate/Advanced level coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR LANGUAGE

- Complete the fourth unit of a language other than English; or
- Complete the third unit of a language other than English and the second unit of an additional language other than English.

LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

Intro-level ART HIST (two required)

Code	Title	Credits
ART HIST 102	Seeing Through Conspiracy Theories	

ART HIST 104	The Art of Diversity: Race and Representation in the Art and Visual Culture of the United States

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in ART HIST and major courses
- 2.000 GPA on 15 upper-level major credits in residence²
- 15 credits in ART HIST taken on the UW–Madison campus

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Art History undergraduate advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.500 GPA in all ART HIST courses
- Complete a two-semester Senior Honors Thesis in ART HIST 681 and ART HIST 682, for a total of 6 credits.
- Present an oral report on work in an undergraduate Honors colloquium during the senior year

FOOTNOTES

¹ Course is accepted in one or more Chronological or Geographical areas, but will only apply to one of those areas. Students with questions should consult the academic advisor for this program.

² ART HIST courses numbered 300–699 are considered upper-level in the major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Skills in visual analysis, including description, comparison and formal analysis.
2. Proficiency in understanding images, buildings and objects in ways that consider theoretical, historical, and /or cultural contexts.
3. Ability to articulate thoughts and ideas clearly and effectively in written, oral, and/or visual communication, and to cultivate active, critical listening.
4. Ability to understand and critically reflect upon scholarly arguments, based on the evidence presented.
5. Ability to locate, assess and enlist research resources in physical and digital forms.
6. Ability to formulate a persuasive and coherent argument based on visual and textual evidence.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

Total Credits 120**ADVISING AND CAREERS****ADVISING AND CAREERS
DECLARE OR CANCEL THIS MAJOR**

Please follow the process described on the Art History website (<https://arthistory.wisc.edu/undergraduate-program/#advising>).

Letters & Science students have unique perspectives, knowledge, and skills that make them highly desirable to today's employers. Art History students have career advising and mentoring from the department's academic advisor and the Director of Undergraduate Studies, plus networking and advice from our faculty and alumni. Talk with any of your Art History professors and with our advising team about your questions: career paths and internships; preparation for the job search; or applying to

graduate school: arthistory.wisc.edu/undergraduate-program/#advising (<https://arthistory.wisc.edu/undergraduate-program/#advising>)

We encourage students in the major to seek information from Art History faculty and advisors about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L&S also provide networking opportunities with professionals in the field (employers and alumni).

Honors in the Major is a strong choice for students who want more advanced study in art history, especially those interested in continuing in art history graduate studies or a career directly in the field of art history (e.g., curator, gallerist, etc.). Review the Honors in the Major requirements (<https://guide.wisc.edu/undergraduate/letters-science/art-history/art-history-ba/#requirementstext>), including the minimum grade-point average in all Art History courses, and talk with the academic advisor about how this fits your academic and career plan.

STUDY ABROAD

We strongly encourage a study-abroad program as part of your Art History learning. You gain firsthand experience of other cultures and languages and have the opportunity to study major works of art. Credit for appropriate coursework may be applied toward the major; see the Study Abroad website (<https://studyabroad.wisc.edu/academics/>).

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The Department of Art History promotes an understanding of art, architecture, objects, and ideas worthy of close visual analysis to be local, hemispheric, transnational, and international, and existing both within and outside of traditional institutions of display. In guiding our students to develop skills in visual analysis, close reading, historical contextualization, and communication and interpretation through writing about art, conducting research on objects in our museum collections, and organizing exhibitions, our department is committed to building an understanding of how humans perceive, create, and inhabit the world. Opportunities to work with and present collections to the public, both at the Chazen Museum and through internships at other Wisconsin institutions, afford our students the chance to connect with diverse audiences beyond the borders of campus.

ART HISTORY, BS

The Art History major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today’s workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, we explore the ways in which art and visual and material culture are fully integrated into larger cultural histories.

Read more about the skills (<https://arthistory.wisc.edu/undergraduate-program/#about-the-major>) you develop through the Art History major.

Credits required to get in	None
Other	None

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (BS)

Students pursuing a Bachelor of Science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Language	Complete the third unit of a language other than English.
L&S Breadth	Complete: <ul style="list-style-type: none">• 12 credits of Humanities, which must include at least 6 credits of Literature; and• 12 credits of Social Science; and• 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.

Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced Coursework	Complete at least 60 credits at the Intermediate or Advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	Complete both: <ul style="list-style-type: none"> • 30 credits in residence, overall, and • 30 credits in residence after the 86th credit.
Quality of Work	<ul style="list-style-type: none"> • 2.000 in all coursework at UW-Madison • 2.000 in Intermediate/Advanced level coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR LANGUAGE

- Complete the fourth unit of a language other than English; **or**
- Complete the third unit of a language other than English **and** the second unit of an additional language other than English.

LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

Intro-level ART HIST (two required)

Code	Title	Credits

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in ART HIST and major courses
- 2.000 GPA on 15 upper-level major credits in residence²
- 15 credits in ART HIST taken on the UW-Madison campus

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Art History undergraduate advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.500 GPA in all ART HIST courses
- Complete a two-semester Senior Honors Thesis in ART HIST 681 and ART HIST 682, for a total of 6 credits.
- Present an oral report on work in an undergraduate Honors colloquium during the senior year

FOOTNOTES

¹ Course is accepted in one or more Chronological or Geographical areas, but will only apply to one of those areas. Students with questions should consult the academic advisor for this program.

² ART HIST courses numbered 300-699 are considered upper-level in the major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Skills in visual analysis, including description, comparison and formal analysis.
2. Proficiency in understanding images, buildings and objects in ways that consider theoretical, historical, and/or cultural contexts.
3. Ability to articulate thoughts and ideas clearly and effectively in written, oral, and/or visual communication, and to cultivate active, critical listening.
4. Ability to understand and critically reflect upon scholarly arguments, based on the evidence presented.
5. Ability to locate, assess and enlist research resources in physical and digital forms.
6. Ability to formulate a persuasive and coherent argument based on visual and textual evidence.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

First Year

Total Credits 120**ADVISING AND CAREERS****ADVISING AND CAREERS
DECLARE OR CANCEL THIS MAJOR**

Please follow the process described on the Art History website (<https://arthistory.wisc.edu/undergraduate-program/#advising>).

Letters & Science students have unique perspectives, knowledge, and skills that make them highly desirable to today's employers. Art History students have career advising and mentoring from the department's academic advisor and the Director of Undergraduate Studies, plus networking and advice from our faculty and alumni. Talk with any of your Art History professors and with our advising team about your questions: career paths and internships; preparation for the job search; or applying to graduate school: arthistory.wisc.edu/undergraduate-program/#advising (<https://arthistory.wisc.edu/undergraduate-program/#advising>)

We encourage students in the major to seek information from Art History faculty and advisors about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L&S also provide networking opportunities with professionals in the field (employers and alumni).

Honors in the Major is a strong choice for students who want more advanced study in art history, especially those interested in continuing in art history graduate studies or a career directly in the field of art history (e.g., curator, gallerist, etc.). Review the Honors in the Major requirements (<https://guide.wisc.edu/undergraduate/letters-science/art-history/art-history-ba/#requirementstext>), including the minimum grade-point average in all Art History courses, and talk with the academic advisor about how this fits your academic and career plan.

STUDY ABROAD

We strongly encourage a study-abroad program as part of your Art History learning. You gain firsthand experience of other cultures and languages and have the opportunity to study major works of art. Credit for appropriate coursework may be applied toward the major; see the Study Abroad website (<https://studyabroad.wisc.edu/academics/>).

OTHER RESOURCES

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience, and connect with supportive alumni and employers who open doors of opportunity.

- What you can do with your major (<https://successworks.wisc.edu/what-you-can-do-with-your-major/>) (Major Skills & Outcomes Sheets)
- Make a career advising appointment (<https://successworks.wisc.edu/make-an-appointment/>)
- Learn about internships and internship funding (<https://successworks.wisc.edu/finding-a-job-or-internship/>)
- Try "Jobs, Internships, & How to Get Them," (<https://successworks.wisc.edu/canvas/>) an interactive guide in Canvas for enrolled UW-Madison students

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE**

The Department of Art History promotes an understanding of art, architecture, objects, and ideas worthy of close visual analysis to be local, hemispheric, transnational, and international, and existing both within and outside of traditional institutions of display. In guiding our students to develop skills in visual analysis, close reading, historical contextualization, and communication and interpretation through writing about art, conducting research on objects in our museum collections, and organizing exhibitions, our department is committed to building an understanding of how humans perceive, create, and inhabit the world. Opportunities to work with and present collections to the public, both at the Chazen Museum and through internships at other Wisconsin institutions, afford our students the chance to connect with diverse audiences beyond the borders of campus.

ART HISTORY, CERTIFICATE

The Art History Certificate is designed to meet twenty-first-century needs by promoting visual literacy in an increasingly visual world. Our classes teach critical and creative approaches to analysis, problem-solving, writing, and visual communication using a variety of artistic media, including painting, sculpture, architecture, photography, prints, ephemera, and the decorative arts.

Students earning the certificate will hone skills in visual analysis and interpretation that make them more competitive in a variety of fields, given the need for people who can think critically about visual cultural and visual storytelling.

HOW TO GET IN

HOW TO GET IN

Students are eligible to declare the certificate at any point in their studies. We encourage students to declare as early as possible in order to plan their required coursework. Students should contact the undergraduate advisor to declare the certificate.

Students thinking about declaring the Art History Certificate as well as the Material Culture Certificate: Undergraduate students may request permission to complete both the Art History Certificate and the Material Culture Certificate but **only one course** can overlap between the two certificates. Please consult with the undergraduate advisor with any questions.

Students declared in the Art History major may not declare the Certificate.

REQUIREMENTS

REQUIREMENTS

Four courses and 12 credits are required, as follows:

INTERMEDIATE SURVEY COURSE

Code	Title	Credits
Complete one:		
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	3-4

ART HIST 699	Directed Study	1-3

RESIDENCE AND QUALITY OF WORK

- At least 6 Certificate credits must be earned in residence
- A 2.000 GPA is required in all courses approved for the certificate

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student’s undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Describe objects and images accurately; identify different stylistic characteristics and media; recall artists and art movements; analyze images.
2. Interpret art in context of deeper historical knowledge of specific cultures, acquire critical reading skills, integrate research.
3. Apply critical reading and writing skills, produce original interpretations, make plausible arguments based on visual and historical evidence, acquire sophisticated research abilities; formal oral presentation skills.

ADVISING AND CAREERS

ADVISING AND CAREERS

Advising questions may be directed to the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), or the director of undergraduate studies in the department.

Each year, the department hosts an Art History Majors and Career Fair for students in the Art History major, certificate, and anyone interested in the field. We discuss Art History courses and internships on campus and in the community. We invite alumni to speak about their career paths. Our director of undergraduate studies hosts a "How to Apply to Graduate School" workshop. We work with SuccessWorks (<https://careers.ls.wisc.edu/>) to organize events for our students.

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience, and connect with supportive alumni and employers who open doors of opportunity.

ASIAN AMERICAN STUDIES PROGRAM

The Asian American Studies Program is an interdisciplinary program that focuses on the scholarship and experiences of Americans, Pacific Islanders, and immigrants to the United States from Asian heritage groups. The program sheds light on Asian American experiences and concerns, both historically and in contemporary society. The certificate in Asian American Studies provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, communities, and culture. The program also serves as a teaching and resource center not only for Asian Americans but for the University and Madison community as a whole.

Courses offered by the program and through other departments incorporate the perspective of a variety of disciplines: anthropology, communication arts, cultural studies, dance, education, English, ethnic studies, film, history, human development and family studies, journalism, literature, media, political science, popular culture, psychology, sociology, theatre, and visual arts. New course topics are introduced each year. Examples of past topics include: Asian American History, Asian American

Literature, Asian American Women Writers, Asian Americans in the Midwest, Hmong American Studies, Contemporary Legal Issues in Asian American Communities, Mixed Race Asian Americans, Asian American Cultural Politics, Southeast Asian Americans in US Schools, Asian American Dance, Asian Americans & Media, Afro-Asian Improvisational Dance, Psychology of Hmong Americans, and community-based research and service-learning courses.

ASIAN LANGUAGES AND CULTURES

The 21st century has been called the "Asian Century": indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades, Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures (ALC) offers a wide variety of courses on East, South, and Southeast Asia taught by faculty

who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC undergraduate advisor is especially important.

STARTING COURSEWORK TOWARD THE MAJOR

Students may declare the Asian Languages and Cultures major at any time. Before declaring the major, students may begin coursework to explore the language and fields of interest. Those students who have studied an Asian language prior to coming to UW-Madison will have to take a placement test (<https://alc.wisc.edu/languages/placement-tests/>) for a language offered during the academic year to determine the best class to enroll in on campus.

Code	Title	Credits
The courses noted below are open to freshman and have no prerequisites:		
ASIAN 100	Gateway to Asia: Special Topics	3-4
ASIAN/ HISTORY 103	Introduction to East Asian History: China	3-4
ASIAN/ HISTORY 104	Introduction to East Asian History: Japan	3-4
ASIAN/ HISTORY 108	Introduction to East Asian History - Korea	3-4

STUDY ABROAD & INTERNSHIPS

The University of Wisconsin-Madison is ranked #2 for semester-long study abroad participation among all U.S. institutions, and #16 among all U.S. universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (<https://www.iie.org/en/Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High/>).

Currently there are 60 study abroad programs across Asia. Students who participate in approved programs will receive residence credit for study abroad. More information about study abroad, application process, and costs is available through International Academic Programs (<https://www.studyabroad.wisc.edu/>). With pre-planning, students may fulfill major requirements during study abroad. It is important to meet with the undergraduate advisor to create a study plan.

Students can also gain professional experience through various internship opportunities abroad. More information about internship opportunities is available through International Internship Programs (<http://internships.international.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND
SCHOLARSHIPS

Foreign Language & Area Studies (FLAS) Fellowships (<https://flas.wisc.edu/>)

FLAS fellowships are funded by the U.S. Department of Education and administered by UW–Madison’s National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (<https://flas.wisc.edu/languages/>) and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (<https://flas.wisc.edu/languages/>) of your chosen language.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Wisconsin Scholarship Hub (<https://wisc.academicworks.com/>)

This is the primary campus-wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (<https://awards.advising.wisc.edu/>)

We help UW–Madison undergraduates and recent graduates pursue nationally competitive scholarships (<https://awards.advising.wisc.edu/scholarships/nationally-competitive/>) and campus-wide awards (<https://awards.advising.wisc.edu/scholarships/campus-wide/>) for research, service, and leadership – activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (<https://awards.advising.wisc.edu/schedule-an-appointment/>) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (<http://borenawards.org/>)

Campus Representative: Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director, International Academic Programs

These scholarships provide up to \$20,000 to US undergraduate students to study abroad in areas of the world that are critical to U.S. interests and underrepresented in study abroad, including Africa, Asia, Central & Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. Additionally, all programs must include formal study of an appropriate foreign language.

Critical Language Scholarship Program (<http://www.clscholarship.org/>)

Campus Representative: Mark Lilleleht (awards@iris.wisc.edu), Assistant Director, IRIS

The Critical Language Scholarship (CLS) Program is part of the U.S. Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and building relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds, and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities, are encouraged to apply.

Gilman Scholarship Program (<https://www.iie.org/Programs/Gilman-Scholarship-Program/>)

Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for U.S. citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

DEPARTMENT SCHOLARSHIPS

The Department of Asian Languages and Cultures has various scholarships to support meritorious students in our academic programs. Please visit the department website (<https://alc.wisc.edu/undergraduate-studies/department-scholarships/>) for more details.

ASIAN LANGUAGES AND
CULTURES, BA

The 21st century has been called the “Asian Century”: indeed, many of the world’s most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world’s population. China, Japan, and India are three of the world’s top economies. For decades Asian countries have been leaders in global

manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an Asian Languages and Cultures major will expand your ability to think and work across cultural and linguistic boundaries. Students may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in Asian Languages and Cultures with one of the certificates offered at the university, such as the Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the Asian Languages and Cultures undergraduate advisor is especially important.

EAST ASIA

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime, and counterculture.

SOUTH ASIA

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia.

SOUTHEAST ASIA

The Southeast Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai, and Vietnamese language; Human rights in Thailand; literature of the region; and history and politics in Southeast Asia.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	None
Other	None

The Asian Languages and Cultures major has three named options. Students who intend to declare a named option may not be declared in a certificate program focused on the same region. Students may not combine the following programs:

- East Asian Studies named option and the Certificate in East Asian Studies
- South Asian Studies named option and the Certificate in South Asian Studies
- Southeast Asian Studies named option and the Certificate in Southeast Asian Studies

PLACEMENT EXAM

The Asian Languages and Cultures department offers placement exams for students with prior language study or experience as a speaker of Chinese, Filipino, Hindi, Hmong, Indonesian, Japanese, Korean, Persian, Thai, Tibetan, Urdu, and Vietnamese. For more information, see the department's website (<https://alc.wisc.edu/languages/placement-tests/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (BA)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics	Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
Language	<ul style="list-style-type: none"> • Complete the fourth unit of a language other than English; OR • Complete the third unit of a language and the second unit of an additional language other than English.
L&S Breadth	<ul style="list-style-type: none"> • 12 credits of Humanities, which must include 6 credits of literature; and • 12 credits of Social Science; and • 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced work	Complete at least 60 credits at the intermediate or advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	<ul style="list-style-type: none"> • 30 credits in residence, overall; and • 30 credits in residence after the 86th credit.

Quality of Work	• 2.000 in all coursework at UW–Madison
	• 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

Students must take 32 credits as follows: ¹

GATEWAY COURSE

Code	Title	Credits
Required course:		
ASIAN 100	Gateway to Asia: Special Topics	3–4

REQUIRED LANGUAGE COURSES

Complete Third and Fourth Semester language courses:

Code	Title	Credits
East Asian languages		
ASIALANG 201 & ASIALANG 202	Third Semester Chinese and Fourth Semester Chinese	8

CAPSTONE COURSE

Code	Title	Credits
Complete one course (at least 3 credits):		
ASIAN/ RELIG ST 505	The Perfectible Body in Religions, Medicines, and Politics	3
ASIAN 600	Capstone Seminar in Asian Humanities	3
ASIAN/ ART HIST 621	Mapping, Making, and Representing Colonial Spaces	3
ASIAN 630	Proseminar: Studies in Cultures of Asia	3
ASIAN/ RELIG ST 650	Proseminar in Buddhist Thought	2-3
ASIAN 655	Ethnography in Asia	3
ASIAN 682	Senior Honors Thesis (must be enrolled in Honors in the Major)	3
ASIAN 692	Senior Thesis (must have permission from faculty)	3
ASIAN 699	Directed Study (must have permission from faculty)	3

NAMED OPTIONS

View as listView as grid

- **ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES (P. 440)**
- **ASIAN LANGUAGES AND CULTURES: SOUTH ASIAN STUDIES (P. 443)**
- **ASIAN LANGUAGES AND CULTURES: SOUTHEAST ASIAN STUDIES (P. 445)**

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ASIAN, ASIALANG, and approved courses for the major
- 2.000 GPA in 15 upper-level major credits, taken in residence²
- 15 credits in the major, taken in residence

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Asian Languages & Cultures undergraduate advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.300 for all courses accepted in the major
- Complete the following coursework, with a grade of B or better:
 - ASIAN 699 or any course from the list below when taken for at least 3 credits. This course must be taken before ASIAN 681.

Code	Title	Credits
ASIAN/ RELIG ST 505	The Perfectible Body in Religions, Medicines, and Politics	3
ASIAN 533	Readings in Early Modern Japanese Literature	3
ASIAN 563	Readings in Modern Japanese Literature	3
ASIAN 573	Readings in Classical Japanese Literature	3
ASIAN 600	Capstone Seminar in Asian Humanities	3
ASIAN/ ART HIST 621	Mapping, Making, and Representing Colonial Spaces	3
ASIAN 630	Proseminar: Studies in Cultures of Asia	3
ASIAN 631	History of the Chinese Language	3
ASIAN 632	Studies in Chinese Linguistics	3
ASIAN 633	Chinese Applied Linguistics	3
ASIAN 641	History of Chinese Literature I	3
ASIAN 642	History of Chinese Literature II	3
ASIAN/ RELIG ST 650	Proseminar in Buddhist Thought	2-3
ASIAN 655	Ethnography in Asia	3
ASIAN 672	Studies in Chinese Fiction	3

- A two-semester Senior Honors Thesis in ASIAN 681 and ASIAN 682, for a total of 6 credits.

FOOTNOTES

¹ Students who test above 4th semester language must still complete a minimum of 32 credits in the major. These students may complete another language sequence or other coursework as approved by the advisor.

² Intermediate and Advanced level major courses are upper-level.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Broad regional grounding: Understand the variation within and similarities across Asia with reference to historical and contemporary cultural connections (people, societies, languages, literatures, religions, and cultural genres).
2. Multidisciplinary: Become familiar and proficient with multiple perspectives scholars use to study Asia and use them as resources in their own self-reflective thinking.
3. Depth of knowledge: Employ relevant theoretical and methodological approaches to arrive at informed understandings of key issues involving the environment, human rights, cultural practices, structures of power, etc. based on an understanding of the social and cultural ties within Asia as well as between Asia and the rest of the globe.
4. Analytical skills: Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction. They will also be able to read, analyze and explain the significance of Asian texts and artifacts (literary, cultural, historical, and popular culture).
5. Language and cultural competence: Manage basic everyday communication needs in at least one Asian language; understand the relationship between language and culture; and understand how to study a new language and culture and how to advance their proficiency as life-long learners.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

Please follow the process described on the Asian Languages and Cultures website (<https://alc.wisc.edu/advising/>).

ADVISING

If you like to plan, seeing your advisor is very important; it can make the difference between fitting in general education and major requirements before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with

your learning style. Any and all of these discussions can occur during your advising appointment.

The advisor is happy to meet with students as they explore the degree options, prepare for study abroad, or advance through their four-year plans. Schedule an appointment in Starfish (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/10715/schedule>).

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience, and connect with supportive alumni and employers who open doors of opportunity.

- What you can do with your major (<https://successworks.wisc.edu/what-you-can-do-with-your-major/>) (Major Skills & Outcomes Sheets)
- Make a career advising appointment (<https://successworks.wisc.edu/make-an-appointment/>)
- Learn about internships and internship funding (<https://successworks.wisc.edu/finding-a-job-or-internship/>)
- Try "Jobs, Internships, & How to Get Them," (<https://successworks.wisc.edu/canvas/>) an interactive guide in Canvas for enrolled UW–Madison students

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE
UNDERGRADUATE RESEARCH**

Students in the Asian Languages and Cultures (ALC) department academic programs are encouraged to become engaged in undergraduate research. There are numerous programs (<https://teachlearn.provost.wisc.edu/initiatives-and-programs/undergraduate-research/>) that provide research opportunities for undergraduates at UW–Madison, including:

- Hilldale Undergraduate/Faculty Research Fellowships (<https://awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship/>)
- McNair Scholars (<http://grad.wisc.edu/mcnair/>)
- Summer Research Programs (<https://grad.wisc.edu/diversity/srop/>)
- Undergraduate Research Scholars (<https://urs.ls.wisc.edu/>)
- The Wisconsin Idea Undergraduate Fellowship Program (<https://morgridge.wisc.edu/students/wisconsin-idea-fellowships/>)

**WISCONSIN SUMMER LANGUAGE
INSTITUTES**

Each summer around 200 undergraduate students, graduate students, professionals, and others come to UW–Madison to study a language at the Wisconsin Intensive Summer Language Institutes (WISLI) (<https://wisli.wisc.edu/>). WISLI is host to five summer language institutes which offer high-quality courses in 30 less commonly taught languages:

Arabic, Persian, and Turkish Language Immersion Institute (APTLII)

Central Eurasian Studies Summer Institute (CESSI) (<https://cessi.wisc.edu/>)
 South Asia Summer Language Institute (SASLI) (<https://sasli.wisc.edu/>)
 Southeast Asian Studies Summer Institute (SEASSI) (<https://seassi.wisc.edu/>)

STUDY ABROAD AND INTERNSHIPS

The University of Wisconsin–Madison is ranked #2 for semester-long study abroad participation among all US institutions, and #16 among all US universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (<https://www.iie.org/en/Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High/>). There are nearly 60 study abroad opportunities across Asia. Approved UW–Madison programs will allow students to receive resident credit while abroad. With pre-planning, students may also fulfill major requirements on academic programs abroad, however, careful planning and discussion with your advisor are key. For more information about programs, application process, and fees, visit: International Academic Programs (<https://www.studyabroad.wisc.edu/>).

Students may also gain career and professional experience through various internship opportunities abroad. To review opportunities, application process, and fees, visit: International Internship Programs (<http://internships.international.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

CAMPUS RESOURCES

Foreign Language & Area Studies (FLAS) Fellowships (<https://flas.wisc.edu/>)

FLAS fellowships are funded by the US Department of Education and administered by UW–Madison's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (<https://flas.wisc.edu/languages/>) and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (<https://flas.wisc.edu/languages/>) of your chosen language.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Wisconsin Scholarship Hub (<https://wisc.academicworks.com/>)

This is the primary campus-wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (<https://awards.advising.wisc.edu/>)

We help UW–Madison undergraduates and recent graduates pursue nationally competitive scholarships (<https://awards.advising.wisc.edu/scholarships/nationally-competitive/>) and campus-wide awards (<https://awards.advising.wisc.edu/scholarships/campus-wide/>) for research, service, and leadership–activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (<https://awards.advising.wisc.edu/schedule-an-appointment/>) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (<http://borenawards.org/>)

Campus Representative: Undergraduates with questions should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs

These scholarships provide up to \$20,000 to U.S. undergraduate students to study abroad in areas of the world that are critical to U.S. interests and underrepresented in study abroad, including Africa, Asia, Central and Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (<https://borenawards.org/eligible-programs/#countries>)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (<https://borenawards.org/eligible-programs/#languages>)). Undergraduates with questions about the Boren Scholarship should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs.

Critical Language Scholarship Program (<http://www.clscholarship.org/>)

Campus Representative: Mark Lilleleht, Assistant Director for Awards, at awards@iris.wisc.edu

The Critical Language Scholarship (CLS) Program is part of the U.S. Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and building relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds, and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities, are encouraged to apply.

Gilman Scholarship Program (<https://www.iie.org/Programs/Gilman-Scholarship-Program/>)

Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for U.S. citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea, and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean, or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime, and counterculture.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in Asian Languages and Cultures with one of the certificates offered at the university, such as the certificate in Global Health (p. 147), the certificate in Health and the Humanities (p. 977), or those offered by the area studies centers: Center for East Asian Studies (<https://eastasia.wisc.edu/>); Center for South Asia (<https://southasia.wisc.edu/>); and Center for Southeast Asian Studies (<https://seasia.wisc.edu/>).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the Asian Languages and Cultures advisor is especially important.

REQUIREMENTS

REQUIREMENTS FOR THE EAST ASIAN OPTION

32 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the East Asian Option:

GATEWAY COURSE

Code	Title	Credits
Required Course:		
ASIAN 100	Gateway to Asia: Special Topics	3-4

REQUIRED LANGUAGE COURSES

Code	Title	Credits
Complete Second Year East Asian Language Courses:		
ASIALANG 201 & ASIALANG 202	Third Semester Chinese and Fourth Semester Chinese	8
ASIALANG 203 & ASIALANG 204	Third Semester Japanese and Fourth Semester Japanese	8
ASIALANG 205 & ASIALANG 206	Third Semester Korean and Fourth Semester Korean	8

EAST ASIAN STUDIES COURSE

Code	Title	Credits
Complete one course from the following options (at least 3 credits):		

ASIAN/HISTORY/ POLI SCI 255	Introduction to East Asian Civilizations	3-4
ASIAN/SOC 334	Gender, Work, and Family in East Asia	3

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

ASIAN LANGUAGES AND CULTURES: SOUTH ASIAN STUDIES

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; and probe the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in Asian Languages and Cultures with one of the certificates offered at the university, such as the certificate in Global Health (p. 147), the certificate in Health and the Humanities (p. 977), or those offered by the area studies centers: Center for East Asian Studies (<https://eastasia.wisc.edu/>); Center for South Asia (<https://southasia.wisc.edu/>); and Center for Southeast Asian Studies (<https://seasia.wisc.edu/>).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the Asian Languages and Cultures advisor is especially important.

ASIAN LANGUAGES AND CULTURES: SOUTHEAST ASIAN STUDIES

The Southeast Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai, and Vietnamese language; and probe Human rights in Thailand; explore literature of the region; and history and politics in Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in Asian Languages and Cultures with one of the certificates offered at the university, such as the certificate in Global Health (p. 147), the certificate in Health and the Humanities (p. 977), or those offered by the area studies centers: Center for East Asian Studies (<https://eastasia.wisc.edu/>); Center for South Asia (<https://southasia.wisc.edu/>); and Center for Southeast Asian Studies (<https://seasia.wisc.edu/>).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the Asian Languages and Cultures advisor is especially important.

REQUIREMENTS

REQUIREMENTS FOR THE SOUTHEAST ASIAN OPTION

32 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the Southeast Asian Option:

GATEWAY COURSE

Code	Title	Credits
Required Course:		
ASIAN 100	Gateway to Asia: Special Topics	3

REQUIRED LANGUAGE COURSES

Code	Title	Credits
Complete Second Year Southeast Asian language courses:		
ASIALANG 229 & ASIALANG 230	Third Semester Thai and Fourth Semester Thai	8
ASIALANG 223 & ASIALANG 224	Third Semester Filipino and Fourth Semester Filipino	8
ASIALANG 225 & ASIALANG 226	Third Semester Hmong and Fourth Semester Hmong	8
ASIALANG 227 & ASIALANG 228	Third Semester Indonesian and Fourth Semester Indonesian	8
ASIALANG 231 & ASIALANG 232	Third Semester Vietnamese and Fourth Semester Vietnamese	8

SOUTHEAST ASIAN STUDIES COURSES

Code	Title	Credits
Complete six classes from the following course options (at least 16 credits):		
ASIAN/ RELIG ST 206	The Qur'an: Religious Scripture & Literature	3

ASIAN LANGUAGES AND CULTURES, BS

The 21st century has been called the “Asian Century”: indeed, many of the world’s most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world’s population. China, Japan, and India are three of the world’s top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first

step toward learning about Asia or you bring some background experience, an Asian Languages and Cultures major will expand your ability to think and work across cultural and linguistic boundaries. Students may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in Asian Languages and Cultures with one of the certificates offered at the university, such as the Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the Asian Languages and Cultures undergraduate advisor is especially important.

EAST ASIA

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime, and counterculture.

SOUTH ASIA

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia.

SOUTHEAST ASIA

The Southeast Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai, and Vietnamese language; Human rights in Thailand; literature of the region; and history and politics in Southeast Asia.

Courses required to get in	None
----------------------------	------

GPA requirements to get in	None
----------------------------	------

Credits required to get in	None
----------------------------	------

Other	None
-------	------

The Asian Languages and Cultures major has three named options. Students who intend to declare a named option may not be declared in a certificate program focused on the same region. Students may not combine the following programs:

- East Asian Studies named option and the Certificate in East Asian Studies
- South Asian Studies named option and the Certificate in South Asian Studies
- Southeast Asian Studies named option and the Certificate in Southeast Asian Studies

PLACEMENT EXAM

The Asian Languages and Cultures department offers placement exams for students with prior language study or experience as a speaker of Chinese, Filipino, Hindi, Hmong, Indonesian, Japanese, Korean, Persian, Thai, Tibetan, Urdu, and Vietnamese. For more information, see the department's website (<https://alc.wisc.edu/languages/placement-tests/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

HOW TO GET IN

HOW TO GET IN

Requirements Details

How to get in

No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (BS)

Students pursuing a Bachelor of Science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Language	Complete the third unit of a language other than English.
L&S Breadth	Complete: <ul style="list-style-type: none">• 12 credits of Humanities, which must include at least 6 credits of Literature; and• 12 credits of Social Science; and• 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced Coursework	Complete at least 60 credits at the Intermediate or Advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	Complete both: <ul style="list-style-type: none">• 30 credits in residence, overall, and• 30 credits in residence after the 86th credit.
Quality of Work	<ul style="list-style-type: none">• 2.000 in all coursework at UW-Madison• 2.000 in Intermediate/Advanced level coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

Students must take 32 credits as follows:¹

GATEWAY COURSE

Code	Title	Credits
Required course:		
ASIAN 100	Gateway to Asia: Special Topics	3-4

REQUIRED LANGUAGE COURSES

Complete Third and Fourth Semester language courses:

Code	Title	Credits
East Asian languages

ASIAN 642	History of Chinese Literature II	3
ASIAN/RELIG ST 650	Proseminar in Buddhist Thought	2-3
ASIAN 655	Ethnography in Asia	3
ASIAN 672	Studies in Chinese Fiction	3

- A two-semester Senior Honors Thesis in ASIAN 681 and ASIAN 682, for a total of 6 credits.

cultural connections (people, societies, languages, literatures, religions, and cultural genres).

2. Multidisciplinarity: Become familiar and proficient with multiple perspectives scholars use to study Asia and use them as resources in their own self-reflective thinking.
3. Depth of knowledge: Employ relevant theoretical and methodological approaches to arrive at informed understandings of key issues involving the environment, human rights, cultural practices, structures of power, etc. based on an understanding of the social and cultural ties within Asia as well as between Asia and the rest of the globe.
4. Analytical skills: Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction. They will also be able to read, analyze and explain the significance of Asian texts and artifacts (literary, cultural, historical, and popular culture).
5. Language and cultural competence: Manage basic everyday communication needs in at least one Asian language; understand the relationship between language and culture; and understand how to study a new language and culture and how to advance their proficiency as life-long learners.

FOOTNOTES

¹ Students who test above 4th semester language must still complete a minimum of 32 credits in the major. These students may complete another language sequence or other coursework as approved by the advisor.

² Intermediate and Advanced level major courses are upper-level.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

ADVISING AND CAREERS

DECLARE OR CANCEL THIS PROGRAM

Please follow the process described on the Asian Languages and Cultures website (<https://alc.wisc.edu/advising/>).

ADVISING

If you like to plan, seeing your advisor is very important; it can make the difference between fitting in general education and major requirements before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style. Any and all of these discussions can occur during your advising appointment.

The advisor is happy to meet with students as they explore the degree options, prepare for study abroad, or advance through their four-year plans. Schedule an appointment in Starfish (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/10715/schedule>).

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience,

and connect with supportive alumni and employers who open doors of opportunity.

- What you can do with your major (<https://successworks.wisc.edu/what-you-can-do-with-your-major/>) (Major Skills & Outcomes Sheets)
- Make a career advising appointment (<https://successworks.wisc.edu/make-an-appointment/>)
- Learn about internships and internship funding (<https://successworks.wisc.edu/finding-a-job-or-internship/>)
- Try “Jobs, Internships, & How to Get Them,” (<https://successworks.wisc.edu/canvas/>) an interactive guide in Canvas for enrolled UW–Madison students

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UNDERGRADUATE RESEARCH

Students in the ALC department academic programs are encouraged to become engaged in undergraduate research. There are numerous programs (<https://teachlearn.provost.wisc.edu/initiatives-and-programs/undergraduate-research/>) that provide research opportunities for undergraduates at UW–Madison, including:

- Hilldale Undergraduate/Faculty Research Fellowships (<https://awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship/>)
- McNair Scholars (<http://grad.wisc.edu/mcnair/>)
- Summer Research Programs (<https://grad.wisc.edu/diversity/srop/>)
- Undergraduate Research Scholars (<https://urs.ls.wisc.edu/>)
- The Wisconsin Idea Undergraduate Fellowship Program (<https://morgridge.wisc.edu/students/wisconsin-idea-fellowships/>)

WISCONSIN SUMMER LANGUAGE

INSTITUTES

Each summer around 200 undergraduate students, graduate students, professionals, and others come to UW–Madison to study a language at the Wisconsin Intensive Summer Language Institutes (WISLI) (<https://wisli.wisc.edu/>). WISLI is host to five summer language institutes which offer high-quality courses in 30 less commonly taught languages:

Arabic, Persian, and Turkish Language Immersion Institute (APTLII)
 Central Eurasian Studies Summer Institute (CESSI) (<https://cessi.wisc.edu/>)
 South Asia Summer Language Institute (SASLI) (<https://sasli.wisc.edu/>)
 Southeast Asian Studies Summer Institute (SEASSI) (<https://seassi.wisc.edu/>)

STUDY ABROAD

The University of Wisconsin–Madison is ranked #2 for semester-long study abroad participation among all U.S. institutions and #16 among all U.S. universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (<https://www.iie.org/en/Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High/>). There are nearly 60 study abroad opportunities across Asia. Approved UW–Madison programs will allow students to receive resident credit while abroad. With pre-planning, students may also fulfill major requirements on academic programs abroad; however, careful planning and discussion with your advisor are key.

For more information about programs, application process, and fees, visit: International Academic Programs (<https://www.studyabroad.wisc.edu/>).

Students may also gain career and professional experience through various internship opportunities abroad. To review opportunities, application process, and fees, visit: International Internship Programs (<http://internships.international.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

CAMPUS RESOURCES

Foreign Language & Area Studies (FLAS) Fellowships (<https://flas.wisc.edu/>)

FLAS fellowships are funded by the US Department of Education and administered by UW–Madison's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (<https://flas.wisc.edu/languages/>) and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (<https://flas.wisc.edu/languages/>) of your chosen language.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Wisconsin Scholarship Hub (<https://wisc.academicworks.com/>)

This is the primary campus-wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (<https://awards.advising.wisc.edu/>)

We help UW–Madison undergraduates and recent graduates pursue nationally competitive scholarships (<https://awards.advising.wisc.edu/scholarships/nationally-competitive/>) and campus-wide awards (<https://awards.advising.wisc.edu/scholarships/campus-wide/>) for research, service, and leadership—activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (<https://awards.advising.wisc.edu/schedule-an-appointment/>) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (<http://borenawards.org/>)

Campus Representative: Undergraduates with questions should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs

These scholarships provide up to \$20,000 to U.S. undergraduate students to study abroad in areas of the world that are critical to U.S. interests and

underrepresented in study abroad, including Africa, Asia, Central and Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (<https://borenawards.org/eligible-programs/#countries>)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (<https://borenawards.org/eligible-programs/#languages>)). Undergraduates with questions about the Boren Scholarship should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs.

Critical Language Scholarship Program (<http://www.clscholarship.org/>)

Campus Representative: Mark Lilleleht, Assistant Director for Awards, at awards@iris.wisc.edu

The Critical Language Scholarship (CLS) Program is part of the U.S. Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and building relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds, and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities, are encouraged to apply.

Gilman Scholarship Program (<https://www.iie.org/Programs/Gilman-Scholarship-Program/>)

Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for U.S. citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea, and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean, or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime, and counterculture.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in Asian Languages and Cultures with one of the certificates offered at the university, such as the certificate in Global Health (p. 147), the certificate in Health and the Humanities (p. 977), or those offered by the area studies centers: Center for East Asian Studies (<https://eastasia.wisc.edu/>); Center for South Asia (<https://southasia.wisc.edu/>); and Center for Southeast Asian Studies (<https://seasia.wisc.edu/>).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the Asian Languages and Cultures advisor is especially important.

REQUIREMENTS

REQUIREMENTS FOR THE EAST ASIAN OPTION

32 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the East Asian Option:

GATEWAY COURSE

Code	Title	Credits
Required Course:		
ASIAN 100	Gateway to Asia: Special Topics	3-4

REQUIRED LANGUAGE COURSES

Code	Title	Credits
Complete Second Year East Asian Language Courses:		
ASIALANG 201 & ASIALANG 202	Third Semester Chinese and Fourth Semester Chinese	8
ASIALANG 203 & ASIALANG 204	Third Semester Japanese and Fourth Semester Japanese	8
ASIALANG 205 & ASIALANG 206	Third Semester Korean and Fourth Semester Korean	8

EAST ASIAN STUDIES COURSE

Code	Title	Credits
Complete one course from the following options (at least 3 credits):		
ASIAN/HISTORY/ POLI SCI 255	Introduction to East Asian Civilizations	3-4

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

First Year

ASIAN 655	Ethnography in Asia	3

ASIAN 682	Senior Honors Thesis (must be enrolled in Honors in the Major)	3
ASIAN 692	Senior Thesis (must have permission from faculty)	3
ASIAN 699	Directed Study (must have permission from faculty)	2-3

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This Four-Year Plan is only one way a student may complete an L&S degree with this major. Many factors can affect student degree planning, including placement scores, credit for transferred courses, credits earned by examination, and individual scholarly interests. In addition, many students have commitments (e.g., athletics, honors, research, student organizations, study abroad, work and volunteer experiences) that necessitate they adjust their plans accordingly. Informed students engage in their own unique Wisconsin Experience by consulting their academic advisors, Guide, DARS, and Course Search & Enroll for assistance making and adjusting their plan.

First Year

Fall	Credits Spring	Credits
Communication A	4 Intermediate/Advanced COMP SCI, MATH, or STAT (if BS) or Electives (Intermediate/Advanced level)	4

Total Credits 120

CHINESE PROFESSIONAL COMMUNICATION, CERTIFICATE

The Certificate in Chinese Professional Communication provides students with the opportunity to develop proficiency in Chinese while pursuing majors in other subjects across the university. It emphasizes the development of communication skills that are applicable to various professional contexts that students may encounter in their future careers.

STUDY ABROAD

Students may receive residence credit for study abroad through a variety of different programs in China, Taiwan, Singapore, and other countries through UW-Madison's Study Abroad Programs (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/chinese/>).

Students may also receive credit, or gain experience, through various internship opportunities abroad. Please contact International Internship Programs (<http://internships.international.wisc.edu/>) for details.

HOW TO GET IN

HOW TO GET IN PLACEMENT EXAM

The Asian Languages and Cultures department offers placement exams for students with prior language study or experience as a speaker of Chinese. For more information, see the department's website (<https://alc.wisc.edu/languages/placement-tests/>).

DECLARING THE CERTIFICATE

Declaring the certificate is as easy as meeting with the undergraduate advisor and making an appointment to review requirements and discuss course plans on Starfish (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/10715/schedule>). Students may declare the certificate at any point in their language study.

Students declared in the Chinese major are not eligible to declare the Chinese Professional Communication certificate.

Chinese Language Requisites

Code	Title	Credits
ASIALANG 101	First Semester Chinese	4
ASIALANG 102	Second Semester Chinese	4
ASIALANG 201	Third Semester Chinese	4
ASIALANG 202	Fourth Semester Chinese	4

REQUIREMENTS

REQUIREMENTS

15 credits distributed as follows:

Code	Title	Credits
Required Language Course		
ASIALANG 379	Business Chinese	3
Advanced Chinese Language Courses (complete 3 courses from options below):		9
ASIALANG 301	Fifth Semester Chinese	
ASIALANG 302	Sixth Semester Chinese	
ASIALANG 378	Chinese Conversation	
ASIALANG 454	Advanced Chinese through Media	
ASIALANG 457	Advanced Chinese: Reading and Writing	
Chinese Studies Course (complete one):		3
ASIAN/ HISTORY 103	Introduction to East Asian History: China

POLI SCI 324	Chinese Politics
POLI SCI 346	China in World Politics
THEATRE 526	The Theatres of China and Japan

Total Credits **15**

RESIDENCE AND QUALITY OF WORK

- Minimum 2.000 GPA on all certificate courses
- At least 8 certificate credits must be completed in residence

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Explain in the target language their academic and professional experiences, and articulate their career objectives, both in writing and speaking.
2. Manage basic everyday workplace (face-to-face, telephone, and email) communications in the target language (e.g., greeting, introducing oneself, making/changing appointments, making and receiving requests, obtaining permission, reporting, thanking, apologizing).
3. With preparation, deliver a clear, concise, and connected presentation in the target language, with the effective use of visual images, on a subject they researched through online resources and/or interviews.
4. Demonstrate an awareness of the significance of honorific and formulaic expressions and etiquette observed in the workplace within the target culture, which can be applied to their life-long learning.
5. Demonstrate an awareness of diverse cultural perspectives, which may influence business and other professional practices, and a disposition to approach unfamiliar contexts with an open mind.

ADVISING AND CAREERS

ADVISING AND CAREERS DECLARE OR CANCEL THIS PROGRAM

Please follow the process described on the Asian Languages and Cultures website (<https://alc.wisc.edu/advising/>).

ADVISING

If you like to plan, seeing your advisor is very important; it can make the difference between fitting in general education and major requirements before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style. Any and all of these discussions can occur during your advising appointment.

The advisor is happy to meet with students as they explore the degree options, prepare for study abroad, or advance through their four-year plans. Schedule an appointment in Starfish (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/10715/schedule>).

SUCCESSWORKS

SuccessWorks (<https://successworks.wisc.edu/>) at the College of Letters & Science helps you turn the academic skills learned in your classes into a fulfilling life, guiding you every step of the way to securing jobs, internships, or admission to graduate school.

Through one-on-one career advising, events, and resources, you can explore career options, build valuable internship and research experience, and connect with supportive alumni and employers who open doors of opportunity.

- What you can do with your major (<https://successworks.wisc.edu/what-you-can-do-with-your-major/>) (Major Skills & Outcomes Sheets)
- Make a career advising appointment (<https://successworks.wisc.edu/make-an-appointment/>)
- Learn about internships and internship funding (<https://successworks.wisc.edu/finding-a-job-or-internship/>)
- Try “Jobs, Internships, & How to Get Them,” (<https://successworks.wisc.edu/canvas/>) an interactive guide in Canvas for enrolled UW–Madison students

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE UNDERGRADUATE RESEARCH

Students in the Department of Asian Languages and Cultures’ academic programs are encouraged to become engaged in undergraduate research. There are numerous programs (<https://teachlearn.provost.wisc.edu/initiatives-and-programs/undergraduate-research/>) that provide research opportunities for undergraduates at UW–Madison, including:

- Hilldale Undergraduate/Faculty Research Fellowships (<https://awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship/>)
- McNair Scholars (<https://mcnair.wisc.edu/>)
- Summer Research Programs (<https://grad.wisc.edu/diversity/summer-research-opportunity-program/>)
- Undergraduate Research Scholars (<https://urs.ls.wisc.edu/>)
- The Wisconsin Idea Undergraduate Fellowship Program (<https://morgridge.wisc.edu/get-connected-students/wisconsin-undergraduate-idea-fellowships/>)

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS DEPARTMENT SCHOLARSHIPS

The Department of Asian Languages and Cultures has various scholarships to support meritorious students in our programs. Application information and deadlines (<https://alc.wisc.edu/undergraduate-studies/departmentscholarships/>).

Chinese Language Learners Bridge Fund

Chinese Major Alumni Jarrett Wiesolek (Class of 2011) and Ali Dibble (Class of 2012) launched the Bridge Fund in 2016. CLLBF is designed to award scholarships to students who are passionate about learning Chinese and building bridges between UW–Madison and China.

Chou Kuo-p'ing Book Award

Several awards will be given each year to undergraduate students who are studying and will continue to study Chinese during the following semester. This award is made possible through a donation by Professor Emerita Chou Kuo-p'ing, the founder of the Chinese program here at the University of Wisconsin–Madison. Professor Chou, a dedicated teacher, devoted her entire career to teaching, promoting, and developing Chinese studies in Wisconsin. Professor Chou was very active during her teaching career and often helped financially disadvantaged students, especially those who excelled in their academic careers despite economic difficulties. Although this award is based mainly on the applicant's academic performance, special consideration is given to those who are financially disadvantaged in order to carry on this tradition.

Ellen and William E. Fisher Scholarship

Ellen and William E. Fisher have provided funding for an annual scholarship to be awarded to an undergraduate student at UW–Madison who is studying the Chinese language. According to the terms of the gift agreement, the award is based on merit, therefore there is no application, but faculty will make a determination based on students progressing in the program. Mr. Fisher stipulated that the award must be made in the fall semester so that the recipient can use it in the Spring semester.

Gwang-Tsai Chen Award

Professor Sabina Knight established this scholarship in honor of Gwang-Tsai (Arthur) Chen, Emeritus Professor of East Asian Languages and Literature at UW–Madison. The scholarship recognizes a rising undergraduate Chinese major. Student eligibility: must be a non-heritage language learner, freshman or sophomore standing, a GPA above 3.5.

Lawrence Louey Merit Scholarship

The Lawrence Louey Merit Scholarship is an annual competition recognizing an undergraduate Chinese major in the Department of Asian

Languages and Cultures. Eligibility: You must be a graduating senior with a GPA above 3.75 and have taken at least three years of Chinese. An application is required for consideration, including a brief career plan, as well as a research paper from one of your major field courses.

CAMPUS RESOURCES

Foreign Language & Area Studies (FLAS) Fellowships (<https://flas.wisc.edu/>)

East Asian Studies FLAS Coordinator: Laurie Dennis, Assistant Director, ldennis@wisc.edu (ldennis@international.wisc.edu), 325 Ingraham Hall

FLAS fellowships are funded by the U.S. Department of Education and administered by UW–Madison's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (<https://flas.wisc.edu/languages/>), and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (<https://flas.wisc.edu/languages/>) of your chosen language.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are **two separate competitions** requiring **two separate and complete applications**.

Scholarships@UW–Madison (<https://scholarships.wisc.edu/Scholarships/>)

This is the primary campus-wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (<https://awards.advising.wisc.edu/>)

We help UW–Madison undergraduates and recent graduates pursue nationally competitive scholarships (<https://awards.advising.wisc.edu/scholarships/nationally-competitive/>) and campus-wide awards (<https://awards.advising.wisc.edu/scholarships/campus-wide/>) for research, service, and leadership – activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (<https://awards.advising.wisc.edu/schedule-an-appointment/>) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (<https://borenawards.org/>)

Campus Representative: Undergraduates with questions should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs

These scholarships provide up to \$20,000 to U.S. undergraduate students to study abroad in areas of the world that are critical to U.S. interests and underrepresented in study abroad, including Africa, Asia, Central & Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (<https://borenawards.org/eligible-programs/#countries>)) Additionally, all programs must include formal study of an

appropriate foreign language. (Full list of preferred languages (<https://borenawards.org/eligible-programs/#languages>)).

Critical Language Scholarship Program (<http://www.clscholarship.org/>)

Campus Representative: Mark Lilleleht, Assistant Director for Awards at awards@iris.wisc.edu

The CLS program is part of the U.S. Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and to build relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds, and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts, and humanities are encouraged to apply.

Gilman Scholarship Program (<https://www.iie.org/Programs/Gilman-Scholarship-Program/>)

Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for U.S. citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

CHINESE, BA

The Chinese major offers students a range of courses and activities which impart an understanding of the culture and civilization of China. With the completion of three years of the language, students will be prepared to communicate effectively in written and spoken Chinese. Most majors pursue advanced studies in Chinese linguistics or literature, while others combine an interest in China with a degree in business, education, engineering or journalism.

Visit our website (<https://alc.wisc.edu/undergraduate-studies/undergraduate-studies-in-chinese/>) for more information about the undergraduate studies in Chinese.

STUDY ABROAD

Students may receive residence credit for study abroad through a variety of different programs in China, Taiwan, Singapore, and other countries through UW–Madison's Study Abroad Programs (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/chinese/>).

Students may also receive credit, or gain experience, through various internship opportunities abroad. Please contact International Internship Programs (<http://internships.international.wisc.edu/>) for details.

STARTING COURSEWORK TOWARD THE MAJOR

Students may declare the Chinese major at any time. Before declaring the major, students may begin coursework to explore the language and fields of interest. Those students who have studied Chinese prior to coming to UW-Madison will have to take a placement test (<https://alc.wisc.edu/placement-tests/>) to determine the best class to enroll in on campus.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are eligible to declare. For information on how to declare, visit Advising & Careers.
Courses required to get in	None
GPA requirements to get in	None
Credits required to get in	None
Other	None

Students declared in the Chinese Professional Communication certificate may not be declared in the Chinese major at the same time. Students who do wish to declare the Chinese major must first cancel their declaration in the Chinese Professional Communication certificate.

PLACEMENT EXAM

The Asian Languages and Cultures department offers placement exams for students with prior language study or experience as a speaker of Chinese. For more information, see the department’s website. (<https://alc.wisc.edu/languages/placement-tests/>)

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (BA)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics	Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
Language	<ul style="list-style-type: none">• Complete the fourth unit of a language other than English; OR• Complete the third unit of a language and the second unit of an additional language other than English.
L&S Breadth	<ul style="list-style-type: none">• 12 credits of Humanities, which must include 6 credits of literature; and• 12 credits of Social Science; and• 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced work	Complete at least 60 credits at the intermediate or advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
