AGRICULTURAL BUSINESS MANAGEMENT, B.S.

WISCONSIN EXPERIENCE

Student organizations

There are numerous campus student organizations of interest to agricultural business management majors, including Alpha Gamma Rho, Association of Women in Agriculture, Collegiate Farm Bureau, and National Agri-Marketing Association. A full list of organizations is available on the Wisconsin Involvement Network website (https://win.wisc.edu/organizations/).

Competitive teams

Students can join the UW–Madison team that participates in the annual CME Group University Trading Challenge (https://www.cmegroup.com/events/university-trading-challenge.html). This simulated trading competition pits hundreds of college teams from around the world against one another as they make real-time commodity trading decisions.

Research experience

Students are able to gain social science research experience on both domestic and international topics by working with a faculty member on a specific project.

Internships

Agricultural business management majors are encouraged to complete an internship during their undergraduate years, and they typically do so during the summer after their sophomore or junior years. Internships allow students to explore career options, gain professional skills, and develop their networks.

Community engagement and volunteering

Students have numerous volunteer activities to choose from. The Morgridge Center for Public Service (https://morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

Global engagement

ABM majors can choose to study abroad. Students work with their advisor and the CALS study abroad office to identify appropriate programs. More information is available on the CALS study abroad advising page (https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/).
