ANIMAL SCIENCES, B.S.

ADVISING AND CAREERS

All students receive individualized advising from their academic advisor. Students are assigned an academic advisor upon declaration of the major and are expected to meet with their advisor each semester before registering for courses in the upcoming semester. Academic advisors will assist students in developing an individualized, four-year curricular plan. Internships and research experience are encouraged. Numerous graduates have completed double majors with Life Sciences Communication, Genetics and Genomics, and departments outside of CALS such as Spanish, according to the interests and aspirations of the student. Interested students should contact J. Liv Sandberg (jsandberg@wisc.edu) (608-263-4303) with questions.

Career opportunities exist in the meat, reproductive technology, feed, agribusiness, agri-marketing, and biotechnology industries. Occasionally, students have found positions within zoos. Many students pursue graduate education in veterinary medicine, animal science, medicine, or other programs.
