

# GLOBAL HEALTH, CERTIFICATE

## OVERVIEW

The 15-credit certificate provides interdisciplinary perspectives on well-being, health inequities, and the root causes of global health challenges, and it is a great compliment to many majors. The certificate is open to all UW-Madison students and welcomes all who are passionate about improving the health of populations across the world.

Students build knowledge about the global burden of disease and threats to well-being, and are able to identify parallels between local, domestic, and international health issues. Through coursework and field experiences students learn about public and global health careers and build valuable cross-cultural communication skills.

### CUSTOMIZE A PATH OF STUDY

The certificate curriculum is flexible including core courses, a diverse range of electives, and a credit-bearing field experience requirement, allowing students to enhance the connection between the certificate and their major field of study as desired. Students have added the certificate to more than 50 majors in Agricultural and Life Sciences, Letters & Science, Human Ecology, Education, Nursing, Engineering, and Business.

### LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

A required field experience (<https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/>) allows students to apply their coursework with a real-life setting where they examine global health issues and explore the connections among human, animal, plant, and environmental health alongside community members and health practitioners in Wisconsin, the U.S., and abroad.

### GAIN GLOBAL PERSPECTIVE

Core courses provide students with a strong global and comparative framework for understanding complex health challenges, and faculty-led field experiences, whether international or within the US, allow students to learn about global health challenges from leading experts in the field.

### BUILD COMMUNITY AND NETWORKS

Field experience courses provide opportunities for community-building and high-impact educational experiences in courses with fewer than twenty students. Many students also build connections and develop leadership skills through participation in the many student organizations (<https://globalhealth.cals.wisc.edu/involvement/student-orgs/>) on campus related to global health.

## HOW TO GET IN

Undergraduate students from across campus are encouraged to consider completing the Certificate in Global Health. There are no prerequisites for declaring, and students pursuing the program are encouraged to declare as early as possible so that they can best align the coursework with their interests and plan their field experience.

Students can declare the program by scheduling an appointment with their assigned Global Health advisor, or by filling out the online declaration form

on the program's website (<https://education.ghi.wisc.edu/undergraduate-certificate-in-global-health/>).

Students declared in the certificate should plan to complete the program before or alongside their degree and major requirements, as they are not able to extend their time on campus to complete a certificate.

Students declared in the Global Health major are not eligible to declare the certificate. Students may not declare both the Certificate in Global Health and the Health and the Humanities Certificate.

## REQUIREMENTS

### MINIMUM REQUIREMENTS

- Minimum grade of C in all certificate coursework
- At least 50% of certificate coursework taken in residence

Code	Title	Credits
<b>Foundation Course Requirement</b>		<b>3</b>
NUTR SCI/ AGRONOMY/ ENTOM 203	Introduction to Global Health	
<b>Core Course Requirement (select one)</b>		<b>3-4</b>
Additional core courses can also be taken as elective courses, but a course cannot double count in both categories.		
A A E 352	Global Health: Economics, Natural Systems, and Policy	
AGRONOMY 377	Global Food Production and Health	
CSCS 500	Global Health and Communities: From Research to Praxis	
ENTOM/ ENVIR ST 205	Our Planet, Our Health	
MICROBIO 345	Introduction to Disease Biology	
HIST SCI/ ENVIR ST 213	Global Environmental Health: An Interdisciplinary Introduction	
NUTR SCI 379	Introduction to Epidemiology	
PL PATH 311	Global Food Security	
POP HLTH 370	Introduction to Public Health: Local to Global Perspectives	
<b>Field Experience</b>		<b>1-4</b>
Field experiences are a central component of the certificate program, and range in length from one week to an entire semester. Students are encouraged to complete the field experience prior to their senior year, and should consult the program website for complete information on different field experience programs and courses. <sup>1</sup>		
LAND ARC 360	Earth Partnership Restoration Education: Indigenous Arts & Sciences	
LAND ARC 363	Earth Partnership: Restoration Education for Equity and Resilience	
LEGAL ST 473	Health Impacts of Unmet Social Needs (Note: this course requires an application prior to enrollment.)	

NURSING 436	Health and Illness Concepts with Individuals, Families, and Communities: Experiential Learning (Note: only open to Nursing students.)	
NUTR SCI/INTER-AG 421	Global Health Field Experience (Note: this is a topics course used for study abroad field experience programs as well as some local courses. Many field experiences require applications prior to enrollment, and students should consult the program website for complete information. ) <sup>1</sup>	
<b>Electives</b>		<b>4-8</b>
Select from electives list (see below) to reach a minimum of 15 credits total for the certificate.		
<b>Total Credits</b>		<b>15</b>

1

Students are advised to consult the program website (<https://education.ghi.wisc.edu/undergraduate-certificate-in-global-health/curriculum/undergraduate-field-experiences/>) for additional information on field experience programs and courses.

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Identify and articulate the global burden of disease, opportunities and threats to well-being, and the root causes and possible solutions to these challenges.
2. Demonstrate a holistic and critical perspective on human health and well-being.
3. Utilize global frameworks for policy development and action for improved health, well-being, and equity.
4. Identify local, national and international health issues, and the connections between these challenges.
5. Engage and communicate respectfully with diverse colleagues and local partners.
6. Reflect and demonstrate self-awareness, humility, and empathy toward multiple cultural perspectives and knowledge.

## ADVISING AND CAREERS

### ADVISING

Each certificate student is assigned an advisor who works to understand student goals and helps each student shape their path through the certificate. Advisors also provide students with advising around options to fulfill the field experience requirement and post-graduation plans such as "gap year" opportunities, jobs, fellowships, and graduate school.

Connect with Global Health Advisors (<https://globalhealth.cals.wisc.edu/advising/>)

### CAREER OPPORTUNITIES

Many graduates connect their major and certificate studies to best match employers looking for a global health perspective. Areas for future careers are extremely varied, but include healthcare professions, public health and epidemiology, research, policy, education, health communications, environmental health, and international development.

## PEOPLE

### FACULTY AND INSTRUCTORS

Jeri Barak, Department of Plant Pathology

Kerri Coon, Department of Bacteriology

Lori DiPrete Brown, Department of Civil Society and Community Studies

Joshua Garoon, Department of Community and Environmental Sociology

Malia Jones, Department of Community and Environmental Sociology

Richard Keller, Department of Medical History and Bioethics

Susan Paskewitz, Department of Entomology (Director)

Jonathan Patz, Nelson Institute for Environmental Studies

Paul Peppard, Department of Population Health Sciences

Daniel Phaneuf, Department of Agricultural and Applied Economics

Valentin Picasso Riso, Department of Agronomy

Devika Suri, Department of Nutritional Sciences

Sherry Tanumihardjo, Department of Nutritional Sciences

Monica White, Department of Community and Environmental Sociology

### ADVISING HUB STAFF

Todd Courtenay, Advisor and Associate Director

Kelcey Daniels, Advisor

Megan Juneau, Advisor

## WISCONSIN EXPERIENCE

### WISCONSIN EXPERIENCE

#### INTERNSHIP

Local or international internships may be part of students' field experience requirement. Examples include: Community Health Internship Program with the Wisconsin Areas Health Education Centers (<https://ahec.wisc.edu/>); Resource Navigator Internship Program with the Center for Patient Partnerships (<https://patientpartnerships.wisc.edu/>); Wisconsin in Washington Internship Program (<https://studyabroad.wisc.edu/uwindc/>); and internships through the International Internship Program (<https://internships.international.wisc.edu/>).

#### GLOBAL ENGAGEMENT

Immersive field experiences (<https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/>) are a hallmark of the certificate program and include both local and international opportunities. Local field experiences are offered in Madison and throughout Wisconsin, International field experiences are offered across the globe: Mexico, Costa Rica, Ecuador, Tanzania, Ghana, Uganda, Sri Lanka, Nepal, Thailand, Japan, China, Spain, and Austria.

**RESEARCH EXPERIENCE**

Many students pursuing the certificate choose to be involved in research (<https://globalhealth.cals.wisc.edu/involvement/research/>) and are mentored by leading researchers in global health. Examples include: studying the effects of climate change on human and ecosystem health; researching ways to prevent Lyme disease spread by ticks; examining how women's empowerment leads to better health outcomes; or investigating methods to evaluate population vitamin A status which informs global health policy.

**COMMUNITY ENGAGEMENT AND VOLUNTEERING**

Several student organizations (<https://globalhealth.cals.wisc.edu/involvement/student-orgs/>) on campus are related to global health. These organizations can be a great way to connect with other students with similar interests, network, get involved in the local community (<https://globalhealth.cals.wisc.edu/involvement/community-engagement/>), and learn more about global health or other similar topics. Examples include Slow Food, Community Health Volunteers of Madison, and Partners in Health Engage.
