**FOOD SCIENCE, B.S.**

Food science is the application of science and engineering to the production, processing, distribution, preparation, and evaluation of food.

The Department of Food Science at the University of Wisconsin–Madison has been a part of the College of Agricultural and Life Sciences for more than 100 years, instructing generations of food science and industry leaders. Housed in the recently remodeled Babcock Hall, the Department of Food Science offers students a truly unique undergraduate experience. Known for our distinguished and dedicated faculty and staff, students find the Department of Food Science a stimulating and encouraging environment to study and conduct research.

The Department of Food Science's undergraduate program offers students valuable real-world experience and leadership skills by providing an innovative curriculum; varied club and extracurricular activities; research lab opportunities; access to a fully functional and award winning dairy plant; professional and industry contacts and experience; numerous internships and scholarships; and nearly 100% job placement.

Students find career opportunities in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

**HOW TO GET IN**

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (http://guide.wisc.edu/undergraduate/agricultural-life-sciences/enteringthecolgetext).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

**REQUIREMENTS**

**UNIVERSITY GENERAL EDUCATION REQUIREMENTS**

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (http://guide.wisc.edu/undergraduate/#requirementsforundergraduatetestudytext) section of the Guide.

**General Education**

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

**COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS**

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

**MAJOR REQUIREMENTS**

NUTR SCI/A A E/AGRonomy/INTER-AG 350 World Hunger and Malnutrition is recommended to fulfill the CALS International Studies requirement.
## Mathematics and Statistics
This major requires calculus. Prerequisites may need to be taken before enrollment in calculus.

Select one of the following:
- **MATH 217** Calculus with Algebra and Trigonometry II
- **MATH 221** Calculus and Analytic Geometry

Select one of the following:
- **STAT 301** Introduction to Statistical Methods
- **STAT 371** Introductory Applied Statistics for the Life Sciences

## Chemistry
Select one of the following:
- **CHEM 103** General Chemistry I
- **CHEM 104** Advanced General Chemistry
- **CHEM 109** Advanced General Chemistry
- **CHEM 343** Introductory Organic Chemistry
- **CHEM 344** Introductory Organic Chemistry Laboratory
- **CHEM 345** Intermediate Organic Chemistry

## Physics
Select one of the following:
- **PHYSICS 201** General Physics
- **PHYSICS 207** General Physics

## Biology
Select one of the following (see below):
- Biochem/Botany/Microbio/Zoology (Path 1)
- Biocore (Path 2)

## Foundation
**Econ or Ag & Applied Econ**
- **A A E 215** Introduction to Agricultural and Applied Economics
- **A A E 323** Cooperatives and Alternative Forms of Enterprise Ownership
- **ECON 101** Principles of Microeconomics
- **ECON 111** Principles of Economics-Accelerated Treatment

## Nutritional Science
- **NUTR SCI/ BIOCHEM 510** Nutritional Biochemistry and Metabolism
- **NUTR SCI 332** Human Nutritional Needs

## Core
- **FOOD SCI 301** Introduction to the Science and Technology of Food
- **AN SCI/FOOD SCI 321** Food Laws and Regulations
- **FOOD SCI/MICROBIO 324** Food Microbiology Laboratory
- **FOOD SCI/MICROBIO 325** Food Microbiology
- **FOOD SCI 410** Food Chemistry
- **FOOD SCI 412** Food Analysis
- **FOOD SCI 432** Principles of Food Preservation
- **FOOD SCI 440** Principles of Food Engineering
- **FOOD SCI 514** Integrated Food Functionality
- **FOOD SCI 532** Integrated Food Manufacturing

### Integrated Food Product Elective
Select one of the following (2 credits minimum):
- **FOOD SCI 511** Chemistry and Technology of Dairy Products
- **FOOD SCI/AN SCI 515** Commercial Meat Processing
- **FOOD SCI 535** Confectionery Science and Technology
- **FOOD SCI 550 & FOOD SCI 551** Fermented Foods and Beverages and Food Fermentation Laboratory
- **FOOD SCI 550 & FOOD SCI 552** Fermented Foods and Beverages and Food Fermentation Laboratory: The Science of Wine

## Science Elective
Any 400-level or above course with Physical Science designation

## Capstone
- **FOOD SCI 602** Senior Project
- **FOOD SCI 603** Senior Seminar

Total Credits: 85-92

---

1. MATH 217 Calculus with Algebra and Trigonometry II requires MATH 171 Calculus with Algebra and Trigonometry I as a prerequisite.

### BIOLOGY PATHS

#### BIOCHEM/BOTANY/MICROBIO/ZOOLOGY (PATH 1)

Select two of the following: 4
HONORS IN THE MAJOR
Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:
- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:
- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY
Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or request an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student’s first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION
Students who are no longer interested in pursuing Honors should contact the CALS Honors Program Manager (see the contact box for CALS Honors Program (http://guide.wisc.edu/undergraduate/agricultural-life-sciences/college-wide/college-agricultural-life-sciences-honors/)). Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS
To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take FOOD SCI 681 Senior Honors Thesis and FOOD SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/) for more information.

UNIVERSITY DEGREE REQUIREMENTS
Total Degree  To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency  Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work  Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES
1. Clearly and effectively communicate, both verbally and written, to a diverse range of audiences including technical experts and a lay audience.
2. Apply quantitative problem solving and critical thinking skills in all aspects of food science.
3. Rigorously apply scientific principles and quantitative reasoning to solve food science problems (technical competence).
4. Demonstrate the ability to work both independently and in groups across a wide range of situations.

FOUR-YEAR PLAN

FOUR-YEAR PLAN
SAMPLE FOOD SCIENCE FOUR-YEAR PLAN

Freshman  Credits  Spring  Credits
CHEM 103 or 109  4-5  CHEM 104  5
MATH 221  5  BIOLOGY/BOTANY/ZOOLOGY 151  5

WISCONSIN EXPERIENCE

Food science students are strongly encouraged to develop leadership skills through a variety of extracurricular experiences.

FOOD SCIENCE CLUB
The highly-acclaimed Food Science Club provides a wide array of activities to its members each year. These activities provide opportunities to develop leadership skills and network with industry professionals and other students.

- Product Development teams. Join teams of students who develop new products, from idea conception to manufacture, for submission to national competitions. Our student teams place highly every year, in part because of the extremely supportive culture within the program.
- Outreach. Each semester, club members participate in outreach activities (WI Science Festival, Science Expeditions, local school activities, etc.) that promote food science to grade school and high school students. Outreach activities, such as cheese making, Peeps Jousting, gummy bear production, chocolate rheology, flavor and sensory science, and many others, help demonstrate various science principles and generate interest in science among younger students.
- Fundraising activities. In order to sponsor club activities, fundraising activities (i.e., selling Babcock ice cream at Taste of Madison, silent auctions at professional meetings, and merchandise sales) are a great way to get involved and develop leadership skills.
- Food and Health Initiative. Are you interested in developing healthy food alternatives? This program is for you then. Hear from a variety of experts on various topics of interest, including gluten-free pasta, sugar and health, GMO foods, and many others.
- Food Systems Initiative. Food science focuses on converting raw materials into edible food products. But there is so much more to the broader food landscape. This initiative focuses on the wider scope of food systems, investigating how food scientists can interact with the broader food landscape.

ADVISORY AND CAREERS

Students are assigned a faculty or staff advisor once they declare the major. Advisors are prepared to help with curricular planning and course access; major and degree questions; discussion of independent study and lab research experience; and navigating internship and scholarship opportunities. Declared food science majors must meet with their assigned advisor prior to registration. Additional information
students. The team competes first in the regional competition, and if successful then moves on to the national competition. Yes, Wisconsin is the largest producer of ginseng in the United States.

- **Company info sessions.** Each club meeting is sponsored by a food company that also gives a brief presentation about itself. Additional info sessions are sponsored on an individual basis. These info sessions provide an opportunity to learn about the range of companies that hire our graduates and are a great opportunity for networking.

### SUMMER INTERNSHIPS

Spending a summer working and gaining experience at a food company is a great way to apply classroom learning to the real world. With over 40 companies visiting the program each year, numerous opportunities are available for any student interested in a summer internship. Students spend their summers at companies that include General Mills, Pepsico, Kraft Heinz, Organic Valley, Dannone, Agropur, Schreiber Cheese, Lindt Chocolate, and many more. These internships are generally paid and many have lodging subsidies.

### RESEARCH/WORK EXPERIENCE

Another way to gain practical experience is to work in the building or on campus.

- **Research labs.** Food science faculty welcome undergraduates to gain experience conducting meaningful research in their labs.
- **Babcock Dairy Plant.** Want practical experience in a fully operational dairy plant? Consider signing up for part-time work in the Babcock Dairy Plant gaining experience in a wide range of practical jobs, from quality control to production.
- **Center for Dairy Research (CDR).** Also within Babcock Hall is the internationally-renowned Center for Dairy Research. Students can conduct research, work in the analytical labs or participate on the CDR Sensory Panel to gain invaluable practical experience.
- **Food Research Institute (FRI).** Housed in the Microbial Sciences Building, FRI conducts industry oriented research on a wide range of food safety topics.
- **Meat Lab/Bucky’s Butchery.** Interested in meat science? The meat processing facilities within the Animal Sciences Department actually apply many food science principles and provide a unique opportunity for students to get hands-on experience with all aspects of meat production.
