

GENETICS IN A MODERN WORLD, CERTIFICATE

ADVISING AND CAREERS

ADVISING AND CAREERS

Each certificate student is assigned an advisor who helps the student navigate a path to achieve their academic and career goals. Advisors and CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>) can help students connect their major and certificate studies to enhance future career opportunities in areas such as healthcare, biomedical research, education, technology, law, and journalism among others.

Students may email the certificate advisors listed in the contact information box with questions or to set up an advising appointment.
