

# LIFE SCIENCES COMMUNICATION, B.S.

## WISCONSIN EXPERIENCE

### STUDYING ABROAD

LSC majors can find study abroad and internship abroad opportunities on the International Academic Programs (<https://www.studyabroad.wisc.edu/>) and International Internship Program (<http://internships.international.wisc.edu/>) websites. Travel opportunities range from one to two weeks to an entire academic year, and many students pursue volunteer, research or internship opportunities while abroad. Check out our Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/life-sciences-communication/>) for more information for LSC students considering study abroad opportunities.

### INTERSHIPS

LSC notifies majors of abundant opportunities to apply for summer and academic year internships related to science communication. Students intern with marketing agencies, environmental and sustainability organizations, and healthcare and agricultural agencies. The Wisconsin Technology Council and Farm Journal, Inc. actively offer internship opportunities to LSC students.

### SERVICE LEARNING

LSC seniors can select a service learning course for their final capstone. LSC 515 Social Marketing Campaigns in Science, Health and the Environment partners with a real-life client to create a strategic marketing campaign for issues of social significance, such as environmental conservation.
