## ADVISING AND CAREERS

### ADVISING AND CAREERS

#### ADVISING

Each student receives one-on-one guidance from their professional advisor. Academic advisors will help students build an individualized, four-year plan. Many Agroecology majors complete certificates or double majors.

#### CAREER OPPORTUNITIES

The knowledge and skills developed through the agroecology major prepare students for a wide variety of careers. The program is designed to allow students to pursue their interests and career goals. Some of the areas students may work in include: conservation and environmental organizations, the agricultural industry, state and federal agencies, consulting, land/ farm management, or agricultural policy, research, and education. Students may also continue their education in graduate programs in areas focused on agriculture, conservation, ecology, and the environment.

#### CAREER ADVISING

Students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>). These resources can help students reflect on their values, identify career goals, and outline strategies to achieve them. CALS Career Services advisors can help students one-on-one with their career goals, resume and cover letter help, interview prep, and more.
