## ENVIRONMENTAL SOIL SCIENCE, CERTIFICATE

## LEARNING OUTCOMES

## LEARNING OUTCOMES

- 1. Discuss, debate, and communicate those aspects of soil science pertinent to their primary major, specialization, and career goals.
- 2. Describe how soil integrates into larger environmental issues using its properties, processes, and distribution from local to global scales and natural to anthropogenic environments.
- 3. Identify potential solutions to issues related to soil that promote the ecosystem services soil provides.
- 4. Communicate, in written or oral form, potential environmental impacts of land-use practices involving soil.
