

# SOIL SCIENCE, B.S.

## WISCONSIN EXPERIENCE

Students majoring in soil science are involved in an array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (<https://soils.wisc.edu/research-programs/>), volunteering (<https://morgridge.wisc.edu/>), internships (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/internships/>), and study abroad (<https://www.studyabroad.wisc.edu/>).

The department also has a UW–Madison Soils Club ([http://www.soils.wisc.edu/soils\\_club/](http://www.soils.wisc.edu/soils_club/)), a student organization designed primarily for students in the soil science major but open to students with a strong interest in the field.
