THE WISCONSIN EXPERIENCE

UW–Madison’s vision for the total student experience, the Wisconsin Experience, (https://wisconsinexperience.wisc.edu/about/) combines learning in and out of the classroom. Tied to the Wisconsin Idea (https://www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values—the commitment to the truth, shared participation in decision-making, and service to local and global communities—the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus.

- Empathy & Humility (https://wisconsinexperience.wisc.edu/empathy-and-humility/) - Badgers bring heart—empathy and humility—to everything that we do. It’s the very lens of our worldview. We develop and demonstrate a cultural understanding of ourselves and others; we engage locally, nationally, and globally in a respectful and civil manner; and we appreciate and celebrate one another’s abilities, views, and accomplishments.
- Relentless Curiosity (https://wisconsinexperience.wisc.edu/relevantless-curiosity/) - Badgers show relentless curiosity at every step of life’s journey. We question things that no one has ever thought to question. We actively learn with expert instructors, scholars, and peers; we engage in creative inquiry, scholarship, and research; we develop resilience; and we foster courage in life and learning.
- Intellectual Confidence (https://wisconsinexperience.wisc.edu/intellectual-confidence/) - Badgers fearlessly sift and winnow until we achieve intellectual confidence. At our core, we’re learners and teachers. We develop competence, depth, and expertise in a field of study; we integrate ideas and synthesize knowledge across multiple contexts; and we exercise critical thinking and effective communication.
- Purposeful Action (https://wisconsinexperience.wisc.edu/purposeful-action/) - Badgers strive to find greater meaning every day through purposeful action. We work for the common good—for something that’s bigger than ourselves. We apply knowledge and skills to solve problems; we engage in public service, partner with others, and contribute to the community; and we lead for positive change.

THE WISCONSIN EXPERIENCE IN THE SCHOOL OF EDUCATION

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Some of the current activities are listed below.

SERVICE LEARNING AND COMMUNITY SERVICE

- Students pursuing health-related studies, including the Health Promotion and Health Equity major (https://guide.wisc.edu/undergraduate/education/kinesiology/health-promo-health-equity-bs/), have an opportunity to become involved in the Fit Families (https://education.wisc.edu/news/capital-times-spotlights-uw-madisons-luis-columna-and-fit-families-program/) program, developed by Dr. Luis Columna. Fit Families is a physical activity program that brings together children with disabilities, their parents, college students and in-service professionals in related fields such as adapted physical education, special education, orientation & mobility, psychology, physical education, and exercise science.
- The art department offers ART 338, a service learning course. Students work with a community partner in an art-related capacity and learn about community-based practices in the field.
- Last Thanksgiving students in the Physical Education Teacher Education (PETE) (https://guide.wisc.edu/undergraduate/education/kinesiology/physical-education-bs/) program partnered with the Boys and Girls Club of Dane County to help kids and their families stay active during the holiday break from school. Working together, they developed games that could be done at home using common household items. A flyer describing the games was included in over 500 Thanksgiving baskets distributed by the Boys and Girls Club, and associated videos were made available on their website. Who wouldn’t want to play “Reverse Pig Trash Ball?”

STUDY ABROAD

- Conflict, Human Rights, and Education in Colombia (https://studyabroad.wisc.edu/program/?programId=672) is the signature study abroad program of the educational policy studies department. This 3-week summer course takes place in Bogotá and its rural surroundings, inviting students to engage directly with local activists and communities at the frontlines of peace efforts underway. How do societies move from armed conflict to comprehensive peace? What strategies and actions advance human rights in situations of armed conflict? What role does education play in shaping conditions for peace and human rights? These issues are explored in the context of Colombia’s long-term conflict, recent peace accords, and ongoing struggles to promote equity through education.

STUDENT ORGANIZATIONS

- Aspiring Educators of Wisconsin (https://win.wisc.edu/organization/aspiringeducators/) is a pre-professional association for those pursuing careers as educators. It provides opportunities to meet other education majors and current teachers, to explore cutting edge issues in education, and interact with the community.
- The Kinesiology Club (https://kinesiology.education.wisc.edu/home/student-orgs/kines-club/) is a student organization committed to community service through engaging in opportunities to promote physical activity throughout the campus and community. Members are also committed to exploring career opportunities within the field of kinesiology.
- Diverse Leaders in Education (DLE) (https://win.wisc.edu/organization/dle/) aims to provide a loving and supportive space for BIPOC students interested in the field of education. The group provides a space that allows future educators of color to create networks with one another throughout subject areas and fields of study. Participants work within
the community and provide support for other educators while diversifying the field of education.

RESEARCH AND DEPTH OF STUDY

- The Center for Research on Early Childhood Education (https://crece.wcreuw.org/) recently announced the creation of a new undergraduate research fellowship program. The program’s goal is to diversify the research communities that address early childhood education.
- The dance department provides financial awards (https://dance.wisc.edu/admissions-and-aid/scholarships-and-awards/) to encourage students to continue their studies, both nationally and internationally, over the summer. For example, full-tuition scholarships are given to dance majors to study in the summer study program at the Dance Education Lab in New York. One award of full tuition and accommodation is given to a freshman dance major to study at the six-week Perry Mansfield pre-professional summer study program. Students have these, and other opportunities, to make professional connections in the field and in the global dance community.
- The theatre and drama department offers an Honors option (https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/#requirementstext) in the major and a named option in Acting (https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/theatre-drama-acting-bs/).
- Undergraduate awards (https://eps.education.wisc.edu/admissions-and-aid/financial-aid/) in writing, research and community-based scholarship are sponsored by the educational policy studies department. One such award is the Eric Flanagan Community-Engaged Scholarship Award.

VOLUNTEER OPPORTUNITIES

- One of the UW's most sought-after volunteer experiences, the kinesiology department’s Adapted Fitness (https://kinesiology.education.wisc.edu/adapted-fitness-personal-training/) program, located in the heart of campus, offers fitness training and physical activities to community-based clients with a wide variety of permanent and temporary disabilities from heritable disorders, chronic and neurological diseases, and accidental traumas. Students who pursue the Physical Activity for Diverse Abilities certificate (https://guide.wisc.edu/undergraduate/education/kinesiology/promoting-activity-diverse-abilities-certificate/) receive priority placement for volunteer positions.

INTERNSHIPS AND FIELD PLACEMENTS

- Students earning an undergraduate degree in Rehabilitation Psychology (https://guide.wisc.edu/undergraduate/education/rehabilitation-psychology-special-education/rehabilitation-psychology-bs/) complete at least six credits of internship, selected from a large and diverse number of sites in the community. The goals of the experience include exploring career interests and gaining experience in community agencies serving and advocating for individuals with disabilities.
- Undergraduates in teacher education programs have multiple field experiences in K-12 schools, culminating in a full-time student teaching experience following the semester of the cooperating school.
- Art internships provide real-world experience and can often be completed for university credit through enrollment in ART 393 Internships in Art. Students have interned and conducted research at many businesses, institutions, and on-campus locations, including the Madison Children's Museum, Bayview Center for Arts and Education, ArtWrite Collective, Chazen Museum of Art, Museum of Modern Art, Metropolitan Museum of Art, Monroe Street Arts Center, and the Madison Museum of Contemporary Art.
