CHEMICAL ENGINEERING, B.S.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (http://guide.wisc.edu/undergraduate/#requirementsforundergraduatetestudytext) section of the Guide.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

Chemical Engineering electives may be chosen from any of the CBE courses that are not required, numbered 300 or above (excluding seminar courses). A maximum of two credits of co-op work (CBE 1 Cooperative Education Program) may be used to meet the CBE elective requirement. Qualified undergraduates may take graduate-level (600 or 700) courses to fulfill this requirement.

- Courses 300+ from the following College of Engineering departments and programs may be used:
  - Biomedical Engineering
  - Civil and Environmental Engineering
  - Electrical and Computer Engineering
  - Engineering Mechanics and Astronautics
  - Engineering Professional Development
  - Geological Engineering
  - Industrial Engineering
  - Interdisciplinary Courses (Engineering)
  - Materials Science and Engineering
  - Mechanical Engineering
  - Nuclear Engineering
  - Engineering Physics

Courses 300+ from the following departments in the College of Letters and Sciences may be used:

- Chemistry
- Computer Sciences
- Math
- Physics

The following courses may also be used:

- ACCT I S 300 Accounting Principles
- BIOCHEM 501 Introduction to Biochemistry
- BIOCHEM 507 General Biochemistry I
- BIOCORE 381 Evolution, Ecology, and Genetics
- BIOCORE 383 Cellular Biology
- BSE 364 Engineering Properties of Food and Biological Materials

- ECON/A A E/ ENVIR ST 343 Environmental Economics
- ENVIR ST/ GEOSCI 411 Energy Resources
- ENVIR ST/ PHILOS 441 Environmental Ethics
- FINANCE/ ECON 300 Introduction to Finance
- FOOD SCI 550 Fermented Foods and Beverages
- GEN BUS 310 Fundamentals of Accounting and Finance for Non-Business Majors
- GEN BUS 311 Fundamentals of Management and Marketing for Non-Business Majors
- GENETICS 466 Principles of Genetics
- MHR 300 Managing Organizations
- MICROBIO 303 Biology of Microorganisms
- STAT/M E 424 Statistical Experimental Design
- ZOOLOGY 570 Cell Biology

**Total Credits** 6

Students may petition the department to allow other courses related to engineering professional practice. To request that a course not listed
above be used, the student should fill out the Professional Breadth Requirement Course Request form available online and submit it to the advisor. The department will then determine if the course can be counted toward the Professional Breadth Requirement. Petitions must be submitted before the beginning of the semester in which the course is to be taken.

3

The objective of this requirement is to provide students with skills to interact with professionals from other disciplines. Suitable courses for this requirement include courses in engineering (excluding CBE) and science, as well as a variety of other disciplines.

4

Full degree credit is not allowed if a student takes both CBE 440 Chemical Engineering Materials and M S & E 350 Introduction to Materials Science. In this case M S & E 350 Introduction to Materials Science will be awarded only 1 degree credit.

For Part A of the General Education Communication Requirement (3 cr) students must select one course with an "a" designation in "g" of the "geBLC" information in the Course Guide. Some students will be exempt from this requirement based on their placement test scores or advanced placement in English.

LIBERAL STUDIES ELECTIVES

Students must complete 16 credits of liberal studies according to the College of Engineering requirements.

1. Liberal studies elective courses must be classified as either Humanities, Social Studies, or Literature courses (identified by the letters H, S, L, or Z in "B" of the "geBLC" information in the Guide). At least six credits must have a breadth designation of Humanities (H, L, or Z), and at least three credits must have a designation of Social Studies (S or Z). Foreign language courses count as H credits.

2. A three-credit ethnic studies course must be selected from the College of Letters & Science. Acceptable courses are identified by the letter "e" in Guide. If appropriate, the ethnic studies course may be among those used to satisfy the concentration requirement.

3. A minimum of two liberal studies courses must be taken from the same subject area (https://registrar.wisc.edu/subjectareas/) (the description before the course number). At least one of these two courses must be at an intermediate or advanced level (designated in Guide).

4. Retroactive credits may be awarded for foreign-language work done in high school. The following conditions apply:
   a. A university-level foreign language course must be taken before the student has earned 30 college credits in residence.
   b. Retroactive Language Credit Request Form must be completed and submitted to the language instructor during the first two weeks of class.
   c. The student must earn a B or better in this course.
   d. Such credits do not count toward the 16 liberal-studies credits required. They may, however, be used to satisfy the concentration and depth requirements as stated in number three above and count as degree credits.

5. English composition courses, English as a Second Language courses, and basic communications arts courses are not accepted as liberal studies electives.

FREE ELECTIVES

Students fulfilling their course requirements with fewer than 132 credits must take additional free-elective credits to comply with the 132-credit minimum graduation requirement.

COURSE SUBSTITUTION REGULATIONS

1. Any student may, with advisor approval, replace up to 12 credits of required courses in the curriculum, except CBE 424 Operations and Process Laboratory, by an equal number of credits of other courses within the limitations listed under (3) below.

2. Any student who wishes to amend the curriculum by more than 12 credits or wishes to appeal the advisor's decision in (1) or to request exception to (3) below must submit a written request to the chair of the department, who will bring it to the department faculty for consideration.

3. Restrictions on course substitutions are as follows:
   a. Physics courses may be replaced by science or engineering courses.
   b. Chemistry/life science courses must be replaced by courses with significant chemistry/life science content.
   c. Engineering courses must be replaced by engineering courses.
   d. Lab courses must be replaced by courses with an equal number of hours of lab courses.
   e. English as a Second Language courses, and MATH 112 Algebra, MATH 113 Trigonometry, and MATH 114 Algebra and Trigonometry may not be used for course substitutions.

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

The Honors in Research program in Chemical Engineering is designed for students who wish to have a more in-depth research experience and is particularly recommended for students considering enrollment in a PhD program. To be accepted into the Honors in Research program, students must have completed at least two semesters on the UW-Madison campus with a cumulative GPA of at least 3.5 and should find a faculty mentor. Students register for 1-3 credits of CBE 489 Honors in Research and are expected to complete at least 8 credits of CBE 489 over 2-3 semesters. Students must also write a senior thesis and present the work to a committee of faculty. Students meeting all requirements, and maintaining a cumulative GPA of at least 3.3, will receive the Honors in Research designation upon graduation.

<tr>
<td>Total Degree</td>
<td>To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.</td>
</tr>
<tr>
<td>Residency</td>
<td>Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. &quot;In residence&quot; means on the UW–Madison campus with an undergraduate degree classification. &quot;In residence&quot; credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.</td>
