CIVIL ENGINEERING: ENVIRONMENTAL ENGINEERING

The Department of Civil and Environmental Engineering offers an undergraduate option in environmental engineering. Students taking the environmental engineering option will earn an ABET-accredited B.S. degree in civil engineering. The transcript will indicate that the student has earned a Bachelor of Science–Civil Engineering with option: Environmental Engineering.

Students pursuing the environmental engineering option take the same core courses in mathematics, natural sciences, engineering, communications, and liberal studies as do the other civil engineering students. The applied engineering requirements within the environmental engineering curriculum differ from those of BSCE in that students are required to complete several courses with an emphasis in water resources, environmental fluid mechanics, environmental chemistry and biotechnology, water and wastewater treatment, geoenvironmental and hazardous wastes engineering, air pollution control engineering, or occupational health engineering.

REQUIREMENTS

CIVIL ENGINEERING DESIGN REQUIREMENT

<table>

<tbody>
<tr>
<td>CIV ENGR 578</td>
<td>Senior Capstone Design</td>
<td>4</td>
</tr>
</tbody>
</table>

Every student must take at least one course in the environmental or water resources discipline and another course in a different discipline, for a total of 6 credits. One of the two courses MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.

Water Resources

Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other courses will count toward the electives requirement (see section below).

Total Credits: 10

ENGINEERING ELECTIVES REQUIREMENT

1. Students must take at least 3 credits of coursework from an ABET-accredited degree-granting program outside of the bachelor of science in civil engineering program. InterEGR and EPD courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CEE) do not qualify for meeting this requirement.

2. Select at least one of the following: CIV ENGR 322 Environmental Engineering Processes or CIV ENGR 410 Hydraulic Engineering.

3. Students must take at least 6 credits of coursework that meets at least one of the following:

   a. Any course offered by an engineering department, including but not limited to CEE.

   b. Any intermediate- or advanced-level course with a breadth designation of Biological Sciences, Physical Sciences, and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities, or Literature.

Total Credits: 12

1. Up to 3 credits of CIV ENGR 1 Cooperative Education Program may be used toward Item 3.

2. Up to 6 credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research, and/or CIV ENGR 699 Independent Study) may be used toward Item 3.

3. Depending on their choice of courses, students may need to take some of these 6 credits to satisfy the breadth requirement below.

ENVIRONMENTAL ENGINEERING BREADTH REQUIREMENT

Courses selected to meet the design and electives requirement above must also be selected in a manner that meets this requirement. At least one CEE course must be selected from at least three of the specialty groups in the table below.
