

COLLEGE OF ENGINEERING HONORS IN THE LIBERAL ARTS

HOW TO GET IN

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters & Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (<https://www.engr.wisc.edu/academics/undergraduate-academics/honors/>) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu with questions.
