## CHEMISTRY, BA

## LEARNING OUTCOMES

## LEARNING OUTCOMES

- 1. Identify, formulate and solve integrative problems using appropriate information and approaches.
- 2. Demonstrate an understanding of basic chemical transformations, including the ability to predict chemical reactivity and properties.
- 3. Recognize the relationship between structure, bonding and the properties of molecules and materials.
- 4. Model chemical systems and experimental data using relevant quantitative, mathematical and computational methods.
- 5. Design, conduct and analyze experiments safely and successfully.
- 6. Locate, evaluate and use information in the chemical literature.
- 7. Communicate chemical knowledge effectively through written reports, oral presentations and visual aids.
- 8. Work collaboratively with others, both chemists and those from other disciplines, to solve problems and create new knowledge.
- 9. Recognize how chemistry relates to contemporary issues in our society.
- 10. Understand professional and ethical responsibility.
