

BIOCHEMISTRY, B.S. (L&S)

HOW TO GET IN

Students may declare the major via an appointment with the undergraduate advisor at any time.

The Biochemistry major is offered through the College of Letters & Science (L&S) and the College of Agriculture and Life Sciences (CALs). Students interested in the differences or transferring between CALs and L&S should meet with the advisor to discuss this in more detail.

Students who intend to major in Biochemistry may not combine this major ("double major") with the Molecular and Cell Biology major.
