Information Science (iSci) majors study concepts and examine issues at the nexus of people, data, information and computing. Majors gain the knowledge and skills to create data driven technologies, and to make them work for real communities. Information Science focuses on the ethical, cultural, and social factors in design and use of information technology-based and data-driven systems. Majors become adept in the creation, management, retrieval, and curation of data and information. The major emphasizes designing systems that foster well-being and support the public good.
