Careers

Health policy issues affect every resident and community in the United States. Because of its complexity, people working in the health sector benefit from understanding specific terminology, issues, and systems involved in policymaking. Through the Certificate in Health Policy, students will build the knowledge base for this work while also gaining skills in quantitative analysis, communication, writing, critical thinking, and problem solving. More and more, employers across the health sector value this combination of skills and insights.

Students interested in health care, advocacy, business, or research will earn a credential highlighting highly sought-after skills that, through the fieldwork component of the certificate, they have applied in the context of real-world practice. Focused on evidence-based health policy and practice, courses help students hone skills to gather data and information from a variety of sources, analyze and synthesize the findings, and communicate key insights using clear, concise communication strategies.

Career development is an integral part of the La Follette School experience, with staff members and alumni eager to support and mentor students with diverse interests. Students benefit from networking opportunities, employer visits, professional development seminars, and other services.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
